STUDENT GOVERNMENT AT QUEEN'S

By Herbert J. Hamilton, Arts '32

QUEEN'S University has pioneered in many fields. It was the first university in Ontario to engage in teaching, the first in Canada to admit women students to its classes, and the first in Canada to establish a summer school and an extramural study system. Queen's also led all Canadian institutions in granting the student body the right of

self-government.

In 1941 the University celebrates its one-hundredth anniversary; student government will then be in its eighty-third year. Analysis shows that Queen's students enjoy a most liberal and democratic form of autonomy. All students are members of the Alma Mater Society, the chief instrument of student government, and are expected to share in its duties and activities. The Society, legally incorporated in 1898, has control over all legitimate student enterprises of a nonacademic nature, although considerable responsibility is delegated to the faculty organizations; the relationship is roughly the same as that existing between the federal and provincial governments in Canada.

The Alma Mater Society was formed during the 1858-59 session, as a result of correspondence with ex-students on matters of common interest. A committee of graduates resident in Kingston drew up the draft of the original Constitution and by-laws, receiving material assistance from J. M. Machar, Arts '57. According to the Constitution the aims and objectives of the Society were as follows:

- 1. To preserve the attachment of the alumni to the University, and their interest in it after immediate connection has ceased.
- 2. To serve as a bond of union between the students and the ex-students of the various faculties.
- 3. To cultivate a literary and scientific taste among the students.

- 4. To promote the general interests of the University.
- 5. To serve as a medium of communication between the students and the governing bodies of the University.

The Society did not long serve as a bond between the alumni and the University. The guarantee for this, provided in the Constitution, that the president should not be a resident of Kingston, was removed as soon as the founders ceased to be active in the Society. Gradually it became a students' organization.

All students did not attend regularly or take an active part in its proceedings, but all recognized the Society as their official organ, and it was the medium of expression on all vital issues. At some periods the students took a more active part in the affairs of the Society than at others, but interest has always been at fever-pitch at election time, however lukewarm it might be during the rest of the year.

An exciting contest for the election of the first president, for a three-year term, occurred between Dr. W. D. Mattice, Arts '47, then M.P.P. for Stormont, and Rev. J. H. Mackerras, Arts '50, then of Bowmanville. Dr. Mattice's success was due to the overwhelming Medical support, it was charged by the Mackerras supporters. Thus was precipitated an argument that may still be heard today — that the Arts men vote intelligently, while the other faculties are slaves to party policy.

As the nature of the Society changed, considerable hard feeling developed between two schools of thought: one group would have the Society "preserve the attachment of the alumni to the University, and their interest in it after immediate connection has ceased." This group favoured a non-resident for president and would allow all non-resident ex-stu-

dents to vote through the medium of voting papers. The other group, which won out, favoured a resident of Kingston for president and restriction of the vote to local graduates and alumni and students. Thus the Society became predominately a students' organization contrary to the wishes of many alumni and graduates.

The elections in the early years took place at an open meeting on the first Friday in December. Only those who attended could vote, and membership fees of twenty-five cents had to be paid beforehand. Open voting was abolished in 1883 and the ballot system substituted. The state of the poll was announced hourly, and intense excitement gripped the students who turned out to record the progress of their favourites.

The candidates and their followers carried on an even more vigorous election campaign than is prevalent today. Signs were posted, cards were distributed, and party whips dashed recklessly about the town in hansom cabs rounding up prospective voters. Canvassing was done even at the polls and sometimes in the classrooms, the professors speaking on

behalf of one or another of the candidates, but this was considered unethical and was frowned upon. Impersonation at the polls was not unknown.

Theatre night was the closing episode in the election campaigns, a sort of open battle coming as a relief from the intrigue and guerilla warfare of the previous weeks. Yells would echo from every corner of the Grand Opera House, the orchestra in the pit would be silenced by a band in the gallery, there would be paper streamers and peas raining down on those seated on the ground floor. When the two groups of candidates arrived and occupied boxes on the opposite sides of the house, the excitement in some incredible way would grow even more intense; then the curtain would rise, the noise would gradually subside, and the play would begin. The stage presentation itself, usually of a light nature, was regarded by the students as merely incidental.

After the results were announced at the end of election day it was customary for the students to parade through the city streets, usually concluding with a concerted attack or "rush" on the local

theatre. Quite often considerable property damage was done and consequently feeling between town and gown was not always so cordial as it might have been. On one occasion the students were grieved because they had given assurance to the Mayor and the Chief of Police that they would not damage property in the downtown section and had been told they would be trusted, only to discover the theatre entrances guarded by policemen. In 1908 the students attempted to rush the Grand Opera House to see "Uncle Tom's Cabin," and were repulsed by the local constabulary. Eggs were thrown about freely and the net result was that six students spent the week-end in the city gaol.

FEW ELIGIBLE CANDIDATES

The Constitution provided that the president must be a graduate in Arts. It was estimated that only 54 out of 633 registered students, or 8.5 per cent, had been eligible to contest the presidency in 1898. The following year this honour was extended to the graduates of all It was not until 1920 that faculties. the presidency was filled by other than a graduate. In 1908 the Constitution was amended to limit the franchise to bona-fide students. Some alumni resented this action as they felt it was a privilege to vote and to attend meetings at which they could express their opinions.

When women students were admitted to Queen's, their brethren did not quite know how to cope with the situation. There was a momentous struggle between gallantry and a desire to keep the Alma Mater Society purely masculine. problem was finally solved by permitting the ladies to pay their membership fees and vote, but otherwise take no part in student affairs. The Levana Society first contested office in 1916 and was successful in having both its candidates elected. Since that time the co-eds have played an important part in the administration of the Alma Mater Society, although the first woman president has yet to be elected.

The party system has been in vogue either officially or unofficially for the greater part of the Society's history. Attempts have been made periodically to

eliminate the traditional alignment of Medicine and Science on the one side, and Arts, Levana, and Theology on the other, but it has never been long before the system reverted to its original status. "Better a spirit of antagonism than no spirit at all," said one *Journal* writer. Currently the party system is out of favour, and candidates from Arts, Levana, Science, and Medicine contest the presidency.

A. M. S. MEETINGS

Meetings of the Society were held every Saturday night up until comparatively recent times. Conducted along strictly parliamentary lines, the gatherings served as a great stamping-ground for budding orators. In fact, during the early years of its history, the Society was little more than a debating club. In time this was changed; the freshmen year would take care of the programme at one meeting, musical and literary entertainment would be furnished at others. and occasionally there would be a mock trial or a mock parliament. Janitor John Cormack often moved adjournments by turning off the gas, and consequently discussions were sometimes finished in the moonlight, with the members ranged upon the campus and the speaker perched upon a chair.

The meetings were not always well attended, of course. Sometimes a quorum was lacking, and loyal members were sent out into the highways and byways to corral the required numbers. After the War, interest in the meetings fell off because of too much competition from other attractions. In 1922 the meeting night was changed from Saturday to Monday in an effort to increase attendance. In latter years various evenings have been tried, but with indifferent success. Once the executive has been appointed it is apparently expected to proceed on its own initiative.

One of the most powerful weapons possessed by the Alma Mater Society is the Court through which justice is meted out to erring students. The ancient and honourable Concursus Iniquitatis et Virtutis is said to have had its birthplace in a vacant lot behind a brewery, where the students were accustomed to as-

semble on fine afternoons and hold high carnival. A judge was selected; some unfortunate was seized, tried on a convenient charge, and fined, the proceeds being used to purchase refreshments for the Court. When this supply gave out, another culprit was found and the procedure was repeated. W. H. Fuller, Arts '67, is said to have been a moving spirit in this humble beginning of the Court.

ENFORCING THE LAW

In the early days, an arrest, not to mention an execution, often involved fractured bones and broken furniture. There were many disturbances and at least two mighty battles, one in the seventies and one in the eighties, when gowns, hats, vests, and shirts were torn to ribbons, benches smashed, and interfering

professors rudely handled.

Frivolities were the life of the Court and were all right when kept within reasonable bounds. Swearing in witnesses on the dictionary in the name of the janitor was a brilliant conception. Pranks almost ruined the institution, however, and several times it was nearly abolished. It was saved for two reasons: the older students saw in it some features of permanent value, and Principal Grant, at first opposed, later realized its possibilities and encouraged its growth. The students became increasingly proud of their Court, realizing that the right to be tried by their peers was a valuable possession.

When a man was "courted" his whole behaviour as a student came up for frank discussion, and in this way many a brash young chap was induced to lead a more modest and retiring existence. The trial combined entertainment for the audience and a moral lesson for the culprit. Dr. W. L. Grant, Arts '94, LL.D. '23, in later years confessed that nothing had done him so much good as being courted.

Court Still Functions

The Court is no longer an intimate affair; that is precluded by the size of the enrolment. But it still performs a highly valuable service. In 1935 the Court won nation-wide acclaim for its stand against fraternities. Although members of the sacrosanct football team were involved,

the Court stood by its principles and time-honoured tradition, and the athletes received no more consideration than any one else.

The Alma Mater Society Court as it exists today is a supreme court with jurisdiction over the faculty units. It is a serious-minded organization, although the merry andrews still have their fun at the lesser courts. Punishment has ranged from nominal fines to expulsion from the University. While Court officials seldom have had previous experience, it is noteworthy that students take their duties seriously.

RELATIONS WITH SENATE

With reference to relations between the Alma Mater Society and the Senate, it must be confessed that these two bodies have not always agreed. It is significant, however, that when they met together in committee, differences were usually satisfactorily adjusted. Principal Grant once refused a petition because it had not come through the proper channels, to wit, the Alma Mater Society.

On the recommendation of the Senate, approved by the Board of Trustees, the Act of 1912 gave the Alma Mater Society the privilege of appointing a University officer, the Rector. The duties of the Rector are rather vague beyond the fact that he is a member of the Board of Trustees and is expected to address the students some time during his three-year term of office. The Society has always taken pride in its selection, and the list of those who have served in this capacity contains many famous and illustrious names.

Queen's College Journal

The medium of expression for student-government is and has been for sixty-seven years the *Journal*, edited and published by and for the students. The first number of the *Queen's College Journal* came off the presses on October 25, 1873. The prospectus stated that its objects were to foster a literary taste among the students and to serve as a bond of union between the University and her alumni. With the passage of time both objects have dropped from

sight, and the *Journal* now serves as a newspaper, attempting to present the campus news of the day in professional style and to guide and advise student opinion.

In its infancy the *Journal* was a magazine rather than a newspaper. Volume One, Number One, was a pamphlet of eight pages, each eight by eleven inches, and containing three columns of fine, closely set type. No pictures alleviated the severity of its columns and flamboyant headlines were entirely missing. The paper appeared fortnightly during the College sessions. Subscription was 50 cents a year, five cents a copy, and the duties of the business manager seemed to consist mainly of dunning subscribers for their dues.

The Journal remained a fortnightly publication until 1909 when it became a weekly. Since 1911 it has been issued twice a week, reaching students with commendable regularity on Tuesdays and Fridays. The subscription rate was gradually raised until it reached its present level of \$1.75 a year. The financial position of the Journal is no longer precarious as the fee is collected by the University from the students at time of registration.

There have been occasions, surprisingly few, when the University authorities have not seen eye to eye with the *Journal* staff. At such times, however, sincerity

of motive has never been questioned; it has been found that where criticism was deserved, insufficient investigation, lack of proper consideration, immaturity of viewpoint, or excess zeal has almost always been responsible.

The Journal ranks with the Court as one of the proudest possessions of student government at Queen's.

Until the spring of 1888 athletics were in no way connected with the A. M. S. Prior to that year the methods of organization were somewhat as follows: At the start of the fall term someone interested in football would put a notice on the bulletin board calling a meeting. Perhaps a dozen would attend and elect officers of the football club. The officers would then make a levy upon the students to purchase a football and other necessities. If the team had to make a trip another levy was made, and so on. This procedure was followed by all the athletic clubs.

In 1888, through the efforts of Dr. W. H. Rankin, Med. '89, LL.D. '26, Dr. H. H. Pirie, Arts '87, Med. '90, and others, all the athletic organizations of the University were taken under the control of the Alma Mater Society, and it was decided to manage them through a committee appointed annually. Athletic affairs soon furnished most of the business for the A.M.S. meetings.

THE FOOTBALL TEAM, 1892

This arrangement did not automatically smooth out all difficulties, however. In 1898 the players and the Athletic Committee went on strike over some differences, and the team did not turn out for practices for eleven days. Out of this dispute grew more favourable relationships between the athletes and the scholars. It was in this year that the A.M.S. surrendered to the Senate the right to rule regarding a player's eligibility.

ATHLETIC AWARDS

The matter of awarding letters to athletes was first decided in 1900-01. Provision was made to award a gold "Q" to any man who played in two senior matches of rugby football or hockey in a series in which a championship was won; to any man who broke a record in the annual games; to the all-round champion in the annual games, provided he won three first places; and to a man who won a first place in the Intercollegiate games. Regulations were also formed for the award of a "Q II." These same awards are given today, although the requirements have been made more stringent.

The gymnasium also came under the control of a special committee. The gymnasium has had a checkered career, consisting merely of a room in what is now the Principal's Residence, then in the basement of the Old Arts Building, then at the rear of the Old Medical Building, then in the attic of Carruthers Hall. In all cases the meagre equipment was furnished by the students themselves.

Principal Grant conceived the idea of combining in one building a workshop for the School of Science and a gymnasium. This arrangement was not a happy one as the professors complained of the noise. Before long, University expansion had crowded out the athletes. By dint of a prolonged financial campaign the students finally raised enough money for an adequate gymnasium in 1906.

Under the direct control of the Alma Mater Society athletics prospered, but there were still many faults in the system. In 1920 the whole set-up was investigated by a committee headed by Professor Lindsay Malcolm, Arts '05, Sc. '07. Out of this was evolved the Athletic Board of Control with a directorate of graduates, staff, and students. Sports now enjoyed a continuity of administration, and Queen's entered into a new era of athletic prosperity.

The Athletic Board of Control still is a sub-committee of the Alma Mater Society. It is true that the Society's control of the A.B. of C. is largely nominal, and from time to time the students complain of vanishing power. The undergraduates have considerable voice in the direction of athletics, however, and it is generally agreed that the arrangement has worked out to the advantage of all concerned.

HAZING THE FRESHMEN

Freshmen have always received a great deal of attention at Queen's. Since the earliest days of the institution first-year men have been harassed in some way or another, the theory being that they would be thereby tempered into responsible citizens. For many years the Concursus Iniquitatis et Virtutis existed for no other purpose apparently than to haze freshmen.

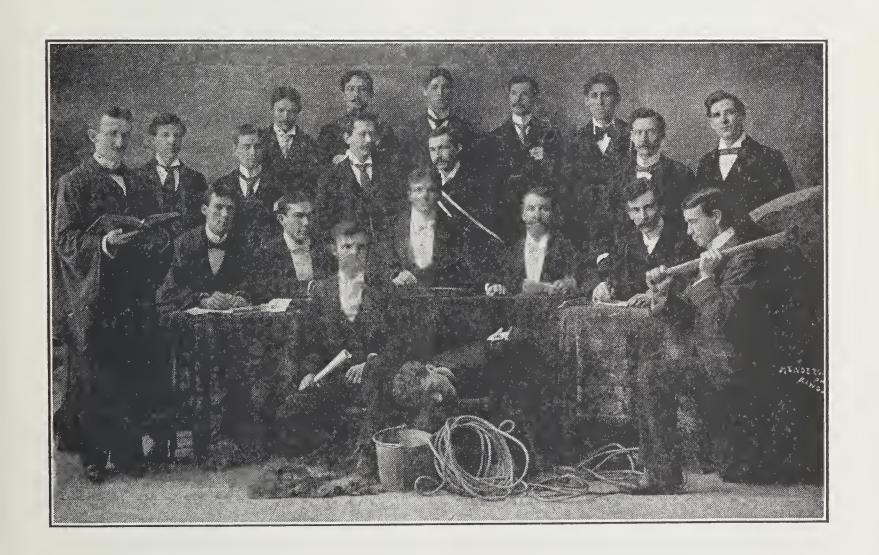

There was no formal initiation until 1905, however, for up to that time the students took pride in the fact that they were more civilized than their contemporaries at Varsity and McGill. The Queen's contribution to civilized progress was the "rush," for which one day was set aside each fall. The custom was for freshmen to line up on one side of the lower campus, and the sophomores, augmented by sadistic seniors, to line up on the other. At a given signal the older students rushed the freshmen. The latter were free to make whatever resistance they could, but usually were overpowered by superior numbers. They were liberally bedaubed with paint, oil, molasses, shoe polish, and other original cosmetics, and were forced to drink most unappetizing and unwholesome drinks brewed by their ingenious and inventive tormentors. final stage in the programme was to parade the freshmen around the city, apparently the idea being to impress the townspeople with the advantages of a college education.

Rushes came to be a problem as the sophomores went to extremes in their attempts to outdo their predecessors in thinking up refined tortures. Occasionally a student was hurt, and much unfavourable publicity ensued. During the War all forms of initiation were abandoned and in 1918 the Alma Mater Society outlawed rushes. The student body, in general, was loth to give up the timehonoured custom, and broke the regulations for several years. Finally the initiation was brought under control. The only regulations now governing freshmen is that they must wear a tam and display their faculty ribbon. The freshmen's reception, previously held under the auspices of various student organizations, was taken over by the A.M.S. in 1926.

Student life at Queen's has never been a matter of all work and no play. The social side of life has never been stinted in the pursuit of knowledge. For many years the major social event on the campus was the Conversazione. Popularly known as the "Conversat" it was the Alma Mater Society party of the term. Originally the programme consisted of promenades and musical selections, and eventually dancing was introduced.

One of the most turbulent meetings of the Alma Mater Society was held on April 9, 1887, when dancing at the Conversat was discussed. For several years dancing had taken place on the top floor of the Arts Building, surreptitiously, and those who indulged were considered of rather questionable character. The Puritans affected to believe that as long as dancing was not announced it did not exist. At this meeting the Puritans succeeded in having their way, but it was their last victory.

It must not be supposed Queen's was alone in this attitude. The following letter dated December 9, 1892, was received from the Students Society of McMaster University: "It was decided at a meeting of our Literary and Theological Society not to send a delegate to

CONCURSUS INIQUITATIS ET VIRTUTIS, QUEEN'S MEDICAL COLLEGE, 1896-97

Third row: Rev. Dr. Hill, W. A. Jaquith, G. W. Mylks, A. Letellier, W. A. McCarthy, W. B. Scott.

Bottom row: W. Young, N. A. Davis, H. M. Waldren.

your Conversazione of the 16th inst., as invited, because we fear a repetition of certain features of last year's programme, which we feel as a Christian college we cannot participate in."

DEATH OF THE CONVERSAT

In later years the Conversat was overshadowed by the more exclusive dances of the faculty societies and of the senior and junior years. Shortly after the war, the older social function disappeared altogether. Today dances are the main events on the social calendar. All functions are policed by student constables who are instructed to see that no untoward incidents take place.

One of the most valuable contributions to student life has been along cultural lines. In the early years a series of concerts and public lectures was provided annually. Sometimes the performers were students and citizens of Kingston; occasionally professional artists were secured. As adequate facilities were lacking on the campus, these concerts were often held in downtown halls.

A popular programme took the form of an elocution contest, and the participants would hold forth on such topics as "Spartacus' Speech to the Gladiators" and "National Morality," while those who recited might enthrall the audience with "Mary, Queen of Scots," "Shamus O'Brien," and the like.

MISCELLANEOUS CONTRIBUTIONS

Religious services have always been sponsored by the Society and have proved popular with the student body right up to the present day. For many years the A.M.S. had control of the reading-room, a popular gathering-place that has since been succeeded by adequate library facilities. A new venture is being inaugurated this year in the Alma Mater Society Lecture, under which it is planned to bring annually an outstanding speaker to the University to address the students.

The Alma Mater Society has always been generous in its efforts to raise money for worthy projects. It has participated in every endowment campaign that the University has carried on. Indeed, to the current effort to build up the financial resources of Queen's, the students donated their entire reserve fund of \$1,711. The members contributed towards the building of Grant Hall in the 1900's and to its renovation a few years ago, and to the establishment of the Students' Memorial Union. During the Great War, the Society raised a substantial sum for relief purposes; during the present conflict several hundred dollars have already been obtained for war aid purposes.

In an article of this length it is impossible, of course, to tell all that student government has accomplished at Queen's. Most of the privileges and institutions enjoyed by the students today are a heritage from preceding student administrations. Only for the Alma Mater Society the Queen's yell might still be

Queen's! Hip! Hip! Hurrah!
1-2-3! Sis! Boo! Yah!
or the slightly more acceptable
Rah! Rah! Rah!
Regina! Queen's!

for those were prevalent at one time.

One thing is certain: student government at Queen's has long since passed the experimental stage. Having successfully stood the test of time, it now rests on a firm foundation of tradition and achievement. The students have justified the confidence that was placed in them eighty-two years ago, and the University has been richly benefitted by the experience.

Staff Members Raise Fund To Aid Refugee European Scientist

PERMISSION of Ottawa authorities to allow a refugee scientist to be brought to Queen's from Europe is being awaited by the University's Refugee Committee. Members of the staff have contributed to a fund to assist the professor in establishing himself. This effort is part of a nation-wide movement in academic circles to aid refugee scholars. Principal Wallace is head of the Canadian committee as well as of the University group.

DR. W. A. MACKINTOSH TO AID GOVERNMENT AS ECONOMIC ADVISER

R. W. A. Mackintosh, Arts '16, Sir John A. Macdonald professor of political and economic science, and director of the School of Commerce and Administration, left the University on leave of absence in December to become an adviser in an economic capacity to the Dominion Government. His leave extends to the end of the academic year, but it may be renewed for the duration of the war if necessary.

Prof. F. A. Knox will assume charge of the economics department during Dr. Mackintosh's absence, and Professors C. E. Walker and R. G. H. Smails will act as co-directors of the School of Commerce and Administration. To carry on the lecture courses given by Dr. Mackintosh, J. J. Deutsch, Com. '35, of the Bank of Canada staff, has been appointed

by the Board of Trustees.

Dr. Mackintosh's record has been brilliant throughout his career and his loss will be keenly felt by the University. He became assistant professor in 1919, associate professor in 1922, and was appointed head of the department of economics and political science in 1927. He has been a member of numerous commissions of the Dominion Government and has acted in an advisory capacity in economic matters on various occasions. He is a writer of distinction and is editor of the Journal of the Canadian Bankers' Association. He has been a director of the General Alumni Association since 1937.

Death of Princess Louise Recalls Visit to Queen's in 1879

'HE death of Princess Louise, Duchess of Argyll and great-aunt of King George VI, recalls the occasion when she visited Queen's in 1879 as Marchioness of Lorne.

Her husband, who was then Marquess of Lorne and Governor-General of Canada, received an honorary LL.D. from Queen's in June of 1879, and the occasion was marked by the laying of the corner stone of the Old Arts Building. Princess Louise laid the one to the west of the

main door, and the Marquess the one to the east. At the same time two trees were planted on the campus. An iron bar bearing the words "Princess Louise" may still be seen beside one of the trees, now a large maple. The other is a Scottish birch.

ROBERT ENGLAND TO DIRECT OVERSEAS EDUCATION

ROBERT England, Arts '21, well-known economist of Winnipeg, has been appointed director of overseas education for the Canadian troops. With

the rank of colonel, he will direct all educational facilities to be provided for the Canadian Active Service Force by the Canadian Legion War Services in collaboration with the Canadian Association for Adult Education.

from Queen's with his M.A. degree in 1921,

After graduating ROBERT ENGLAND

Mr. England spent three years teaching in a Ukrainian school in Saskatchewan. A scholarship gave him a year of postgraduate work at the Sorbonne and the College of Social Science in Paris, after which he returned to the Canadian West. He was western manager of the departments of colonization and immigration for the Canadian National Railways for some time, and also was connected with the University of British Columbia's extension department.

A fellow of the Royal Economic and American Geographical societies, he has served on the Institute of Pacific Relations and the Canadian Institute of International Affairs. He is also the author of two volumes on immigration and colonization which are regarded as authoritative in their fields, as well as

numerous articles.

Mr. England will have his headquarters in London, England. The purpose of his service will be to maintain the morale of the troops by stimulating the development of personal resources; to retain and cultivate aptitudes and skills: to offer means for the constructive use

of leisure, especially during leave or convalescence; and to facilitate the civil rehabilitation of the soldier.

It is expected that Mr. England will take up his post some time this month.

FOR COUNCIL ELECTION

FOURTEEN candidates have been nominated by graduates or by the executive committee of the University Council for this spring's Council election. Nine of these are to be elected, to hold office until 1946.

Ballots are being mailed to the graduates, and these must be returned to the secretary of the Council on or before March 31. For the guidance of voters, brief information regarding each candidate is given on the reverse side of the ballot.

The nominees are as follows: Dr. J. A. Bannister, Arts '98, Peterborough; James Bartlett, Sc. '07, Kirkland Lake; H. G. Bertram, Sc. '10, Dundas; Dr. J. C. Gillie, Med. '09, Fort William; C. W. Greenland, Sc. '13, Toronto; Dr. G. B. Kendrick, Arts '09, Med. '11, Chatham; Dr. Campbell Laidlaw, Arts '02, Med. '07, Ottawa; E. L. Longmore, Sc. '12, Timmins; Dr. B. T. McGhie, Med. '16, Toronto; B. E. Norrish, Sc. '08, Montreal; Dr. L. A. Pierce, Arts '13, LL.D. '28, Toronto; G. S. Otto, Arts '10, Hamilton; Mrs. R. O. Sweezey (Harriet Watson), Arts '09, Kingston; Dr. James Wallace, Arts '98, Theol. '01, Med. '20, New York City.

Dr. J. E. McAskill, Med. '14, Watertown, N.Y., was recently appointed by the executive committee of the Council to fill the vacancy that had been created by the death of W. C. Dowsley, Arts '98, Brockville. Dr. McAskill will serve in Mr. Dowsley's place until 1943.

Students Pass Examinations For Home-Nursing Course

EVERY one of the 154 girls who tried the examination in the St. John Ambulance Association's home-nursing course passed with distinction. The examination was held in December after a six weeks' course.

Miss Gertrude Goodall, Arts '42, Ottawa, passed first with ninety-eight per cent. The lowest mark made was seventy-two.

The examinations were practical as well as theoretical. Dr. P. M. Macdonnell, Arts '12, Med. '16, assisted by several nurses of Kingston General Hospital and the local military hospital, conducted the tests.

APPOINTED SENIOR CHAPLAIN FOR CANADIAN TROOPS

REV. Dr. H. A. Kent spent New Year's Eve amid familiar surroundings, not as Principal of Queen's Theological College, however, but as Lieut.-Col. Kent, E.D., senior chaplain of the first Division, C.A.S.F., in camp at Aldershot, England, where he conducted divine service.

Dr. Kent was appointed to his high post early in December and left shortly afterwards to take up active service. During his absence, Rev. Dr. J. R. Watts, Arts '01, Theol. '04, D.D. '26, professor of practical theology and Christian ethics and registrar of the College, will act as principal.

A native of Nova Scotia, Lieut.-Col. Kent was educated at Truro, Dalhousie University, and Presbyterian College, Halifax. After graduation he carried on postgraduate work at Marburg and Berlin, in Germany. In 1908 he joined the staff of Presbyterian College as a lecturer, later becoming professor. In 1926 he was appointed Principal of Queen's Theological College.

During the Great War, Lieut.-Col. Kent commanded a company of the Nova Scotia Highlanders which went overseas in October, 1916. He went to France with his unit in 1917 and later returned to England as officer in charge of training with the 17th Reserve Battalion at Bramshott. In the autumn of 1917, at the request of the director, he was transferred to the chaplain service. In January of the following year he was sent to London as adjutant to Col. Almond, director of Canadian Chaplain Services, a post he retained until his return to Canada after the Armistice.

Since the War, Lieut.-Col. Kent has served as chaplain of the 14th Field Bri-

gade, R.C.A., and the Prince of Wales' Own Regiment (M.G.). In 1936 he won the efficiency decoration for twenty years of military service.

Before he left Queen's, students in Theology tendered their Principal a farewell party and wished him godspeed.

TO HONOUR MEMORY OF CHARLES L. FORTESCUE

AS a memorial to Charles LeGeyt Fortescue, Sc. '98, LL.D. '29, the American Institute of Electrical Engineers has announced that the Westinghouse Electric and Manufacturing Company has

CHARLES L. FORTESCUE

set up a \$25,000 trust fund to provide graduate fellowships in electrical engineering. The fellowships are open to Queen's students as well as to those of other Canadian and American universities.

Known as the Charles LeGeyt Fortescue Fellowship, the educational trust was established in honour of Dr. Fortescue "in recognition of his valuable contributions to the electric power industry." His outstanding achievements were his development of symmetrical co-ordinates, his work on transformer design, and his theories of lightning behaviour.

Dr. Fortescue was the first Queen's graduate in electrical engineering and a member of the second graduating class in Science. Prior to his death on De-

cember 4, 1936, he was the recipient of 185 patents for electrical inventions during his thirty-eight year association with the Westinghouse Company.

Beginning in 1940, the Fellowship Committee of the American Institute of Electrical Engineers will annually select the most promising candidates to receive the Fortescue awards, which will provide a minimum allowance of \$500 each. The 1940 awards will be made before April 1.

Any student of electrical engineering who has received a bachelor's degree from an accredited college is eligible for the fellowship, provided he does not hold other fellowships which carry a stipend greater than the tuition required by the institution at which he proposes to undertake his graduate work.

THREE CANDIDATES CONTEST TRUSTEE BOARD ELECTIONS

FOR election to the Board of Trustees as representatives of the graduates, three candidates have been nominated: W. C. Clark, Arts '10, LL.D., '35, deputy minister of finance at Ottawa, Dr. Charlotte Whitton, Arts '17, executive secretary of the Canadian Welfare Council, Ottawa, and Dr. Alexander Macphail, retired professor of civil engineering at Queen's. As only two candidates are to be appointed, an election is necessary. Ballots will go out from the Registrar's office this month and voting is to close March 31.

Dr. Clark has been deputy minister of finance since 1932. Prior to then he had a distinguished career as a professor in the economics department at Queen's, as an eminent economist in the United States, and as a director of courses in commerce and administration at Queen's. He has been a member of the Board of Trustees since 1934.

Dr. Whitton has been executive secretary of the Canadian Welfare Council since 1925. Previously she had been private secretary to the Minister of Trade and Commerce at Ottawa, and assistant secretary of the Social Service Council of Canada. She was created a C.B.E. in 1934. Dr. Whitton has been active in the affairs of the University for many years and has been a member of the Board of Trustees since 1928.

For thirty-five years Dr. Macphail was professor of civil engineering at Queen's. He was given an LL.D. last year on his retirement. An honour graduate of McGill University, he did postgraduate work in Germany. In the Great War he served as commanding officer of the First Canadian Division Engineers, C.E.F. Twice he was mentioned in despatches and was decorated with the D.S.O. in 1915 and the C.M.G. in 1919.

DR. J. E. McASKILL PRESENTS VALUABLE GIFT

COMPLETE equipment for the projection of sound films and slides was received by the University recently as a gift from Dr. J. E. McAskill, Med. '14, Watertown, N.Y. The apparatus is now in use in the Medical faculty as an aid to instruction in various courses.

The valuable outfit is complete to the last detail, and consists of a Bell and Howell sound projector with turntable and microphone for amplifying a lecturer's voice, an editing splicer, a Bausch and Lomb still projector with cooling system, a beaded screen for showing colour films, and a portfolio of notes, instructions, and filing system for films.

Many medical films and slides are available, and the faculty anticipates that great use will be made of the new equipment. Dr. McAskill visited the University for a week-end to demonstrate the operation of the machines to students and staff, and the projectors are now set up in the New Medical Building.

Conducted Church Service

Rev. E. J. McCorkell, Superior of St. Michael's College, Toronto, was the speaker at the regular monthly University Church Service in Grant Hall on December 10. Held under the auspices of the Newman Club, the service was directed by Rev. T. E. Mooney. St. Mary's Cathedral male choir contributed several selections.

Attended S. C. M. Conference

SIX Queen's undergraduates attended the Student Christian Movement conference held at the University of Toronto for five days beginning December 27. Twenty well-known figures in youth movements addressed the young people who represented universities from all over the world.

ROSS M. WINTER HEADS WAR SERVICES COMMITTEE

ROSS M. Winter, Arts '26, director of the Department of University Extension, is playing an important part in the work of the Canadian Legion War

ROSS M. WINTER

Services as chairman of its education committee for Military District No. 3, which has headquarters at Kingston.

Early in October Mr. Winter was appointed to head the committee, the other members of which are Mr. Walter S. Woods, Lieut.-Col. F. J. G. Garneau, Ottawa, and Dr. Seraphin Marion, of the University of Ottawa.

The committee has met three times since its organization. In M.D. No. 3 at present there are concentrations of troops in Lindsay, Cobourg, Trenton, Kingston, and Ottawa. In each area the units have been visited and a careful survey made of the educational needs of the troops and of the available personnel and facilities.

The programme is sponsored by the Canadian Legion War Services in co-

operation with the Canadian Association for Adult Education. It is intended to provide facilities whereby members of the fighting units may be able to continue their studies, even though on active service. The method of instruction is fully modern, consisting of talks, discussion, and allotted reading. Lectures alone are not regarded as sufficient; motion pictures are used extensively.

With his close connection and intimate knowledge of university extension and adult education in Eastern Ontario, the appointment of Mr. Winter to act as chairman of the committee is most fit-

ting.

RECEIVE ACCLAMATION IN RE-ELECTION TO BOARD

WO retiring members of the Board of Trustees, C. Jackson Booth, Arts '86, and A. E. MacRae, Sc. '14, both of Ottawa, have been re-elected by acclamation as representatives of the benefactors. Mr. MacRae will serve until 1943 and Mr. Booth until 1944.

Mr. Booth has been president of J. R. Booth, Limited, since 1925, when he succeeded his father, a pioneer lumberman of the Ottawa Valley. He is a director in a number of corporations and is a member of the Federal District Commission in Ottawa. During his student days at Queen's he played on the first rugby football team. He has been a member of the Board of Trustees since 1927.

Mr. MacRae is a prominent consulting engineer and patent attorney. He is a past president of the General Alumni Association and has been a member of the directorate since 1931. A member of many professional societies, he is a fellow of the Canadian Institute of Chemistry and of the Patent Institute of Canada. He has been a member of the Board of Trustees for four years.

Distinguished Economist Spoke

R. Moritz J. Bonn, formerly professor of economics at Munich and at Berlin, and economic adviser to the Weimar Government, addressed a large gathering in Grant Hall on December 1. His subject was "Germany and Mittel

Europa." Dr. Bonn also spoke the day previous in Convocation Hall under the auspices of the Commerce Club on "The Breakdown of International Finance."

LECTURE SERIES TO BE GIVEN BY FRENCH-CANADIANS

FIVE prominent French-Canadians will be the speakers in the University's Monday afternoon series of lectures to be given during the current term. The series will deal with several aspects of French Canada and the French-Canadians, with the purpose of interpreting their problems. The lectures will be broadcast over Queen's radio station CFRC. The programme is as follows:

January 15—"Some French-Canadian Backgrounds," by Dr. Olivier Maurault,

rector, University of Montreal.

January 22—"French Canada in Literature and in Song," by M. Jean Bruchesi, under-secretary of the province of Que-

January 29—"Art in French Canada," by Dr. Marius Barbeau, National Museum of Canada.

February 5—"French-Canadian Edu-

cational Ideals," by Rev. Dr. Henri Saint-

Denis, University of Ottawa. February 12—"French Canada in the National Setting," by Leon-Mercier Gouin, K.C., LL.D., Montreal.

Dr. E. L. Bruce Made Vice-President Of Geological Society of America

DR. E. L. Bruce, professor of geology, was elected vice-president of the Geological Society of America at the annual convention held at Minneapolis, Minn., during the last week of December. For several years Dr. Bruce has served on the council of the Society.

Dr. N. W. Buerger, lecturer in geology and mineralogy, attended a convention of the Mineralogical Society of

America held at the same time.

Delegates Were Appointed

At an open meeting of the Alma Mater Society on December 12, a grant of \$35 was made to the Queen's Student Assembly to send delegates to the national conference in Montreal during the Christmas holidays. Representatives were also

named to attend the National Federation of Canadian University Students' conference at McGill about the same time.

QUEEN'S GRADUATES ENROL WITH UNIVERSITY C.O.T.C.

↑ MONG more than 700 candidates of the Queen's University Contingent, Canadian Officers' Training Corps, who wrote the first qualifying examination for lieutenants' commissions in the Canadian militia in December, were some twenty-six graduates. Results of the first examination will be announced about the end of January.

Following is a list of graduates enrolled in the Q.U.C., C.O.T.C.: W. H. Agnew, Arts '38, Dr. R. E. Anderson, Med. '35, Samuel Adelkind, Com. '39, Dr. R. S. Brown, Arts '33, A. D. Carmichael, Sc. '39, H. A. Cohen, Arts '28, Sc. '30, S. J. Cohen, Arts '27, W. L. Dack, Arts '34, M. J. Fitzpatrick, Arts '39, A. L. Furanna, Sc. '39, T. F. Gelley, Arts '22, E. C. S. Gould, Sc. '37, Dr. E. T. Green, Med. '36, Douglas Hawken, Arts '39, J. M. Hitsman, Arts '39, E. R. James, Arts '38, C. C. F. Kirkpatrick, Arts '35', D. A. Lapp, Arts '36, Dr. Percy Lowe, Ph.D. '35, H. H. Lockwood, Sc. '39, J. M. S. Patton, Sc. '39, W. F. Rannie, Arts '38, G. A. Revell, Sc. '30, E. A. Stephenson, Arts '39, J. W. Ward, Arts '32, W. L. Way, Arts '35, and R. J. Wilson, Arts '39.

Alumni who are taking the course for the "O" certificate with the University of Toronto Contingent are H. L. Allen, Com. '36, M. A. Baker, Com. '34, R. B. Corneil, Sc. '29, E. M. Dolan, Arts '23, J. H. Donnelly, Arts '31, C. R. Gates, Arts '39, Thomas Grindlay, Com. '36, W. L. Hudson, Arts '30, A. H. Laidlaw, Arts '39, A. M. Laidlaw, Sc. '35, H. A. McLearn, Arts '34, R. C. McNeil, Com. '31, A. B. Miller, Arts '33, J. N. Milne, Sc. '35, J. K. B. Robertson, Arts '38, H. G. Sprott, Com. '32, and I. D. Vessie,

Supplementary to those whose names have been published in previous issues of the Review are the following who are members of the defence forces:

Royal Canadian Naval Volunteer Reserve—Sub-Lieut. F. H. Peters, Arts '38.

Royal Canadian Air Force — Flight Lieut. George Ault, Arts '35; K. C. Wilson, Sc. '39.

Royal Air Force—Flying Officer J. H. G. Preston, Med. '35, Abu Sueir, Egypt. Royal Canadian Army Medical Corps —No. 1 Field Ambulance (Kingston): Lieut.-Col. B. H. Hopkins, E.D., Queen's staff; Capt. P. A. McLeod, Arts '21, Med. '26, Capt. C. R. Salsbury, D.C.M., Med. '24, Lieut. P. M. Macdonnell, Arts '12, Med. '16, Lieut. R. C. Burr, Med. '32, Lieut. W. F. Connell, Med. '29.

No. 5 Field Ambulance: Major C. H. Playfair, Med. '24; Lieut. H. T. Ewart. Arts '26, Med. '35.

ALUMNI BRANCHES APPOINT ATHLETIC COMMITTEES

N accordance with the provision made at a special meeting held under the auspices of the Athletic Board of Control last July, athletic committees have been appointed by several branches of the General Alumni Association. Liaison officers will receive the agenda and minutes of meetings, together with any other pertinent information concerning athletics at Queen's, and will pass along reports to their committees and branch members. In this manner it is hoped that all interested alumni will be given an opportunity

to keep more closely informed.

Liaison officers appointed to date are as follows: Dr. W. G. Blair, Med. '16, Lanark County; J. W. Wing, Sc. '36, Quebec City; A. E. Pugsley, Sc. '33, Porcupine; W. H. Losee, Sc. '12, Ottawa; John M. Munro, Arts '38, London; W. E. Cook, Sc. '12, Victoria; W. M. Warnick, Sc. '35, Hamilton; E. A. Thomas, Com. '26, Montreal; R. C. McNeil, Com. '31, Toronto; J. W. Henley, Arts '35, R. D. Barker, Arts '38, and R. D. Guy, Arts '05, Winnipeg; Dr. J. E. Mc-Askill, Med. '14, Dr. William Hale, Med. '10, and Dr. T. H. Farrell, Arts '89, Med. '95, Central New York; D. M. Wilson, Sc. '14, Saskatoon.

Art Salon Held

The sixth annual Canadian Salon of Photographic Art was opened at the University on December 1. Assembled by the National Gallery, the collection had an international flavour with several exhibits from Czechoslovakia and the Balkan countries.

Prof. A. S. Orton Appointed to Staff Of Queen's Theological College

PROF. A. S. Orton of Emmanuel College, Toronto, has been granted leave of absence to become professor of Old Testament criticism at Queen's Theological College while Principal H. A. Kent is on active service. Rev. Dr. J. R. Watts will serve as acting principal.

Work of the Theological students has been re-arranged this term so that a full course in Old Testament criticism will be given by Professor Orton. Rev. Dr. S. M. Gilmour will teach the language part of the Old Testament course.

A graduate of Emmanuel College, Professor Orton taught for some years at St. Andrew's College, Saskatoon, before returning to Toronto three years ago to become professor of practical theology.

Broadcast Over CFRC

THE following took part in the week-by-week programmes presented over Queen's station CFRC during December: Rev. Dr. S. M. Gilmour, Mr. Glen Shortliffe, Mr. Freeman Waugh, Prof. L. E. Law, Mr. J. E. Tunstall, Mr. E. C. Kyte, Mr. Claude Saunders, Mr. H. S. Pollock, Dr. C. A. Curtis, and the choirs of St. George's Cathedral and Cooke's United Church. The series ended December 15 and was resumed January 8.

Dr. Rotherstein Spoke

Dr. John Rotherstein, director of the Tate Gallery in London, gave an illustrated lecture in Convocation Hall on December 5, on "One Thousand Years of British Painting."

Held Christmas Service

The University Church Service Commission sponsored a Christmas service in the Morgan Memorial Chapel on December 17.

THE BOOKSHELF

European-Canadians

Canada, Europe and Hitler, By T. Watson Kirkconnell, Arts '16. Published by the Oxford University Press.

MOST people are well aware of Europe's embittered minorities, but it will come as a surprise to the average Canadian to learn of the extent of the Dominion's foreign population. Actually, nearly one-quarter of the people are of European origin other than Anglo-Saxon and French.

The largest of these national groups is German, for whom the total is 549,376, or more than there are British in South Africa. Next, in point of numbers, come the Ukrainians with about 250,000; Scandinavians, 230,000; Jews, 157,000; Dutch, 150,000; Poles, 137,000; Italians, 100,000; Russians, 60,000; Finns, 44,000; Hungarians, 40,000; Jugoslavs,

10,000; and other smaller groups. If these figures do not convey much meaning, it would be well to remember that the population of Vancouver, Canada's third largest city, was 246,593 at the last census, while Ottawa, which ranks seventh, had 126,872.

In the present war, what is the attitude of these people? Do they feel they owe allegiance to Canada or to their native land? Can they ever completely break their home ties? Dr. Kirkconnell, Canada's chief a uthority on the vernacular literatures of the European-Canadians, answers these and other questions by sifting the editorial opinion of the newspapers printed for these groups.

For the most part these new Canadians are shown to be loyal to their adopted country. The author pleads for tolerance, not only on humanitarian grounds but also on behalf of the Allied cause.

Any Canadian who gives way to animosity against the entire German people, for example, is gratifying his spleen at the expense of his brains, and is helping to ensure Canada's defeat in war, he says.

Canada, Europe and Hitler presents as clear and concise a history of events leading up to the present conflict as has yet made its appearance. In the first part, Dr. Kirkconnell tells why Britain is at war, outlines Hitler's philosophy and aims, and, in general, sums up the stake each European nation has in this affair. To many people the Balkans and the Baltic states are just vague and mysterious names without much substance. This book should clarify any confusion concerning European geography.

Dr. Kirkconnell sees only two possible solutions for the small European nations in the dust and blood and turmoil of this war. The grimmer and starker of these

is to incorporate all the smaller nationalities by force into a conquering empire which would be enlightened enough to permit them the fullest possible cultural autonomy. Hitler and his aides have the first part of the idea letter perfect but none of the consideration of national cultures and economic well-being. alternative is some form of United States of Europe.

Part Two is called "Canada Faces Hitler." Here the author shows in vivid fashion what this war means to the Dominion, and outlines the attitude of those whose patriotism might be questioned at a time like this. The book should go a long way towards dispelling the senseless hatred against new European-Canadians that was all too common during the last war; at the same time, it should throw into sharp relief those elements that do constitute a real danger to the country's welfare.

ATHLETICS

Skiers Make Creditable Showing In Lake Placid Tournament

UEEN'S skiers competed in the nineteenth annual College Week men's invitation ski tournament which opened at Lake Placid, N.Y., December 29. Ten American and two Canadian colleges were represented. McGill, winner of last year's meet, and Dartmouth, runnerup, did not send teams.

The Tricolour team obtained a total of 89.8 points, a creditable showing in view of the fact that a full-sized team was not entered, that the skiers competed in only two out of four events, that none of the skiers had any opportunity for practice, and that all lacked racing experience. The boys made their best performance in the down-hill event. In the slalom good times would have been made

On the team were Don Overholt, Arts '43, Hamilton; Ray McKeown, Sc. '41, Westmount, Que.; Newland Coburn, Arts '43, Prescott; Bill Gray, Arts '40,

but for a little hard luck.

Winnipeg. Wallace Berry, Arts '41, Brantford, acted as manager. The boys paid their own expenses.

The skiers could not speak too highly of the treatment accorded them at Lake Placid. Plans are already being made for next year and it is hoped to be able to send a much stronger team.

Senior Hockey Team Participates In Six Games in Seven Days

REPARED for a strenuous campaign the Queen's senior hockey team left Kingston January 2 to play six matches in seven days against American teams, including two International Intercollegiate Hockey League games against Yale and Princeton.

The team's itinerary included Rye, N.Y., to meet McGill Grads; West Point, for two games against the United States Military Academy; New York, for a match with Brooklyn's St. Nicholas Club; and the league games at New

Haven and Princeton.

Twelve players were taken on the trip. The first team consisted of the high-scoring forward line of Mel. and Norv. Williamson and Bob Neilson, with Captain Ding McGill and Jim Neilson on defence and Jim Burrows in goal. Roy Musgrove, formerly with Wembley Lions of the English League, will relieve in goal, and Bill Osborne, experienced defenceman who has seen service with University of Manitoba and Portage juniors, as well as on Queen's teams, will support the regular rearguard.

George Hood, former Gananoque Junior, and Len Lane, who played for Sudbury Juniors and Creighton Eagles, will give relief to Bob Neilson at left wing; Wilf Mable, in his fifth year on Queen's

hockey teams, will play right wing when Norv Williamson is resting, and Hal Carter, six-feet-two centre from Wilkie, Sask., will alternate with Mel Williamson at mid ice.

During the Van Horne series in Kingston and district, the Tricolour Seniors set the pace and received excellent practice in a number of hard-fought games.

Entered E.O.A.B.A.

Queen's intermediate and junior teams are entered in the Eastern Ontario Amateur Basketball Association schedules. The intermediates opened against R.C.A.F. on January 10, while the juniors played first on January 12.

AT THE BRANCHES

Lanark County

A LUMNI and their friends in the Lanark County area turned out in large numbers for the annual dinner which was held at Vanity Fair tea room, Perth, on the evening of December 6. E. A. Fleming, Arts '25, president of the branch, acted as chairman and toastmaster. Dr. G. S. Graham, Arts '24, of the history department at Queen's, was the guest speaker of the evening.

guest speaker of the evening.

The toast to the King was proposed by Mr. Fleming, after which the National Anthem was sung. Dr. W. G. Blair, Med. '16, proposed the toast to Queen's University, with particular reference to athletics. The toast to sister universities was proposed by Miss Hilda Cram, Arts '34, Carleton Place, who stressed the fact that co-operation and good fellowship had never been of such importance as they were today. Response was made by Mr. Hyde of the University of Western Ontario.

In his address, Dr. Graham dealt with the present war as it affected Poland and the Balkan states. He gave a vivid picture of the events leading up to the destruction of Poland and said that if history had any lesson to teach, then this country might be expected to rise again. The danger of a German drive through the Balkans has given an impetus to the ideal of Balkan co-operation despite the many obstacles of diversity of manners, religion, culture, and traditions, said the speaker. A gradual revival of Pan-Slavism is being effected and a Common Front against foreign interference may yet be produced.

There are many indications of an extension of Soviet power in the Balkans, said Dr. Graham. Russian intervention in Poland has certainly upset Hitler's plan to drive to the East for the time being if not permanently. In any case the Balkans may be expected to play an important role in the months that lie ahead, said the speaker in conclusion.

Rev. R. A. Cameron, Arts '31, Theol. '34, Watson's Corners, introduced Dr. Graham. The vote of thanks was moved by W. F. Thom, Arts '36, Carleton Place, and Rev. D. N. Morden, Theol. '07, D.D. '34.

H. J. Hamilton, Arts '32, secretary-treasurer of the General Alumni Association, brought greetings from the University and the Association.

During the business part of the meeting, Dr. Blair was appointed liaison officer to serve between the branch and the

Athletic Board of Control. A veteran of the Great War, Dr. Blair is now a colonel in the army medical services. He has always been interested in amateur sport.

Two pleasing solos were rendered by Mr. H. Hosie, accompanied by Mr. Bryant Robinson. The remainder of the evening was spent in dancing and playing cards.

Ottawa

OTTAWA alumni were joined by a large number of undergraduates in a most successful holiday dance held at the Royal Ottawa Golf Club on December 27. More than 300 enjoyed dancing to the strains of an excellent orchestra, and a buffet supper was a popular feature. It is expected that the dance will become an annual affair.

Guests were received by Dr. W. P. E. Paterson, Med. '26, chairman of the dance committee, and Mrs. Paterson, Mr. Keith Light, Sc. '18, branch president, and Mrs. O. E. Ault (Roma Trowbridge), Arts '30. Decorations were in the Christmas motif, with reminders throughout that the dance was a Queen's function.

The committee in charge of arrangements included Dr. Paterson, Mr. Light, Dr. O. E. Ault, Arts '24, branch secretary, Stuart Ireton, Com. '31, and Ward Mc-Gill, Com. '31, Arts '33.

Porcupine

QUEEN'S alumni dances are always popular in Northern Ontario and the one held in the McIntyre Community Hall on November 4 was limited in size only by the capacity of the hall.

About 135 couples attended the most successful function, made more enjoyable through the use of the new hall, appropriately decorated with Queen's colours. The windows were hung with Tricolour streamers and small knots of red, yellow, and blue were fastened to the wall lamps. A large "Q" lighted with coloured lamps stood in front of the orchestra. Punch was served in an adjoining room, which was also tastefully decorated with Tricolour streamers.

In charge of arrangements was the executive, of which E. P. Thompson, Sc.

'31, is president, and J. M. Hamilton, Arts '27, Sc. '27, is secretary, assisted by Douglas Carriere, Arts '35, and Marion Ostrosser, Arts '39.

Montreal

SERGEANT Howard Baker, traffic engineer of the Montreal Police Department, addressed a branch meeting at the Mount Royal Hotel on December 13. President J. B. Stirling, Arts '09, Sc. '11, was in the chair.

Traffic problems in Montreal and the difficulties encountered in attempting to protect both driver and pedestrian were outlined by the speaker. A sparkling impromptu debate arose after John Corbett, Sc. '33, took umbrage at some fancied slights on pedestrians. The president acted as mediator and arbiter.

The meeting closed with an exhortation by the treasurer, A. F. White, Sc. '27, for payment of fees.

Kingston

A BOUT seventy-five alumnae attended the annual dinner meeting of the branch at the Kingston Badminton Club on December 9. Prof. James Roy of the English department was the guest speaker; Mrs. Norman Miller (Grace Jeffrey), Arts '14, president of the Kingston branch, was in the chair.

"From Kaiser to Feuhrer" was the subject of Professor Roy's interesting address. Drawing upon his experiences and acquaintance with Germany and its people over a period of many years, he stated his conviction that the beginnings of Hitlerism were formed almost as far back as the dawn of German history. He did not agree with those who say "we are not at war with the German people," but maintained that if the Allies were not at war with them, they were definitely at war with the Allies. In Professor Roy's opinion, the war will not be brought to a speedy conclusion.

Miss Jean I. Royce, Arts '30, moved the vote of thanks. At the head table were Mrs. Miller, Professor Roy, Principal and Mrs. R. C. Wallace, Dr. A. V. Douglas, dean of women, Miss J. Royce, Miss Caroline Mitchell, Arts '25, Mrs. A. F. Meiklejohn (Jean Ramsay), Arts '30, Miss Dorothy Druce, Arts '25, Miss

Ruth Hood, Arts '40, president of the Levana Society, and Miss L. Kilborn.

Conveners for the meeting were Mrs. Ian MacLachlan (Sybil Spencer), Arts

'26, Mrs. Charles Workman (Lucy Cumming), Arts '02, and Miss Doris Williams, Arts '26.

ALUMNI NEWS

Births

Cathcart — At St. Michael's Hospital, Toronto, on December 19, to G. B. Cathcart,

Sc. '31, and Mrs. Cathcart, a son.

Fraser—At the Mount Hamilton Hospital, Hamilton, Ont., on October 8, to Dr. W. G. Fraser and Mrs. Fraser (Margaret Perry), Arts '29, a daughter (Mary Roberta).

Ingles—At Halifax, N.S., on December 28, to Captain C. L. Ingles, Sc. '34, and Mrs.

Ingles, a daughter (Joan Adelaide).

McNeil—At the Private Patients' Pavilion, Toronto Western Hospital, on December 27, to R. C. McNeil, Com. '31, and Mrs. McNeil, a daughter (Heather Frances Evelyn).

Merritt—On December 18, at the Private Patients' Pavilion, Toronto General Hospital, to H. H. Merritt, Sc. '31, and Mrs. Merritt, a daughter (Margaret Elizabeth).

Pettit—On January 7, at Chestnut Hill Hospital, Philadelphia, Pa., to J. H. Pettit, Sc. '27, and Mrs. Pettit, a daughter (Anne Margaret).

Robinson—In July, 1939, to S. G. B. Robinson, Arts '25, and Mrs. Robinson (Sunny Thornburn), Arts '27, of Toronto, a daugh-

ter (Linda Thora).

Thoman—At the General Hospital, Hamilton, Ont., on December 19, to Dr. H. L. Thoman, Med. '39, and Mrs. Thoman (Florence Bibby), Arts '33, a son.

Marriages

Anderson-Ross—On December 22, in Knox College Chapel, Toronto, Phyllis Bryson Ross, Arts '38, daughter of Mr. George H. Ross and Mrs. Ross (Isabel Bryson), Arts '05, to Bruce Falconer Anderson, Med. '40, Kingston.

Berry—In Chalmers United Church, Ottawa, on December 9. Elizabeth Ann Sutherland to Dr. James Victor Berry, Med.

'31.

J Bigelow-Austin—On December 23, in the United Church, Wakefield, Que., Margaret Alice Elizabeth Austin, Arts '32, to Major Philip John Bigelow, Arts '32. They will live in Port Hope, Ont.

Campbell—In Erskine United Church, Toronto, on December 2, Hazel Allen to

Kenneth William Campbell, Sc. '38.

Stubbs—On December 25, in Parker Street United Church, Sarnia, Ont., Ivy Churchward to Thomas Leonard Stubbs, Sc. '38, Toronto.

Wright—In Robertson Church, Edmonton, Alta., on Nov. 30, Marjorie Jones to Lieut. Errol Harcourt Wright, Sc. '34.

Deaths

Donovan—Sixth on the seniority list of Queen's alumni, Dr. P. C. Donovan, Med. '79, died at San Jose, Calif., on December 15, and was buried there on his ninetieth birthday. Dr. Donovan was born near Campbellford, Ont. His early education was received at the local school and at the collegiate institute at Peterborough, after which he attended Toronto Normal School and received a teacher's certificate. For four years he taught school in Peterborough before entering the Royal College of Physicians and Surgeons at Queen's in 1876. Three years later he graduated, opening up a practice at Melrose, Hastings county. A few years later he moved west, settling in Niche, N.D., just south of the Canadian boundary. There he organized a school district and was president of the school board for many years, as well as being president of the village council. Dr. Donovan was appointed coroner for the county, and in 1886 he was elected Senator for North Dakota. In 1887 Dr. Donovan

was appointed a regent of the University of North Dakota. In 1890 he attended the International Medical Congress at Berlin and spent the year in several European hospitals. At this time he had, as assistant, Dr. James McKenty, Med. '90, who later went to Winnipeg where he became a noted surgeon. After an outbreak of smallpox among the Chinese in Gretna, Man., in 1893, Dr. Donovan returned to Canada and was appointed by the Manitoba government to take full charge, the United States government making him deputy consul. In 1909 he moved to Winnipeg where he practised for thirteen years, after which he went to Oregon and subsequently to Cali-Dr. Donovan was interested in anking during his stay in the United States, eing president of a national bank and director of three state banks, and he also had mining interests in the American West. He is survived by his wife.

Hurdman—Dr. Allen Graham Hurdman, Med. '00, prominent Ottawa medical practitioner for many years, died December 11 after an illness of nine months. Dr. Hurdman was born in Ottawa in 1877, and received his early education in private schools. As a youth he was actively interested in sports. He entered Queen's in 1896 to study medicine and received his M.D. and C.M. degrees four years later. He took extensive postgraduate studies at Edinburgh, Glasgow, Vienna, and leading German universities, and on his return from Europe he began to practise in Denver, Colorado, remaining there several years before returning to Ottawa in 1921. He is

survived by two sisters.

Kirk—Dr. Frederick James Kirk, Arts '88, Med. '92, died during December in Florida where he went to spend the winter. Born in 1866, he was a native of Kingston. He received his early education in the schools of that city, and matriculated from the collegiate institute in 1884. Enrolling at Queen's, Dr. Kirk spent four years in Arts, receiving his B.A. in 1888, and four years in the Medical school from which he received the M.D. and C.M. degrees in 1892. For many years he practised in Brooklyn, N.Y., retiring in 1932 because of ill health. During the summers he made his home at Gananoque, Ont., spending the winters in Florida. Two years ago Dr. Kirk attended the annual Reunion for the fiftieth anniversary of his graduation. He is survived by his wife and two children.

Knapp—For nearly forty years a dentist in Kingston, Dr. A. E. Knapp, Arts '95, died on November 27 at the age of seventy-one. Dr. Knapp was born at Elginburg, Ont., and received his early education at Sydenham. He matriculated in 1889 and received his B.A. from Queen's in 1895. Afterwards he attended the Ontario College of Dentis-For a short time he practised at Gravenhurst, later moving to Kingston. Dr. Knapp was active in the United Church as treasurer of Sydenham Church Sunday

School for many years. He was a member of Minden Lodge, A.F. and A.M., and of Granite Lodge, I.O.O.F. He was also a bowler of note. Rev. Dr. W. T. G. Brown, Arts '01, Kingston, and Rev. H. D. Mc-Cuaig, Arts '06, Gananoque, assisted at his funeral on November 29. Surviving, besides one brother and three sisters, is his wife, the former Sarah Harriet Anglin, Arts '99.

Macfarland — Agnes Adelia Macfarland, Arts '28, died at Ottawa on December 10 at the age of thirty-five. She was born at Warkworth, Ont., and received her education at Ottawa schools before entering Queen's in 1924. For several years she was connected with the executive offices of the Robert Simpson Company in Toronto. Miss

Macfarland was active in church affairs and was a well-known member of Sherbourne United Church. She was also a regent of Sherbourne Club Chapter, I.O.D.E. Surviving are her father, Rev. J. F. Macfarland, Arts '90, Ottawa, her mother, a brother, Dr. M. T. Macfarland, Arts '28, Med. '30, and a sister.

Milne — Former principal of Ottawa Ladies' College, Rev. Dr. J. W. H. Milne, Arts '85, D.D. '14, died at Ottawa on January 4 at the age of seventy-eight. Dr. Milne was a native of York County, Ontario. Before he came to Queen's in 1881 he attended the collegiate at Hamilton. In 1887 he received his B.A. degree and in 1888 was ordained to the Presbyterian ministry at Boston Church in Halton County. When

Glebe Presbyterian Church was founded. Dr. Milne went to Ottawa to become its first minister, a position he held with increasing success for fifteen years. When he left, his place was filled by Rev. Dr. T. J. Thompson, Arts '95, D.D. '29, who retired last spring. After leaving Glebe Church, Dr. Milne spent a year and a half in Weston, Ont., and then returned to Ottawa in 1914 to become principal of the Ottawa Ladies' College. He retired from that position in 1921. For the past eight years Dr. Milne devoted his whole time to conducting the Women's Interdenominational Bible Class in Chalmers United Church, at which more than 200 women enrol annually. On August 23, 1938, he celebrated the golden anniversary of his ordination. He was president of the Ottawa Ministerial Association in 1905-06, was president of the University Club for one year, and was vice-president of the Queen's Theological Alumni Association for a term. Dr. Milne was a member of the General Assembly Co-operative Committee on Legislation which helped in the arrangement of details of the Act of 1912 by which the Faculty of Theology became Queen's Theological College. He also served as Moderator of the Toronto and Ottawa Presbyteries. In 1914 he was awarded the degree of D.D. by his alma mater. Milne is survived by his wife, three children, a sister, and two grandsons. W. Courtenay Milne, Sc. '20, of Ottawa, is a son.

Somerville—Founder and onetime minster of St. Mark's Presbyterian Church, Toronto, Rev. James Forest Somerville, Arts '81, died in Toronto on December 12 at the age of eighty-three. Mr. Somerville was born at Lanark, Scotland, and came to Canada as a young man. He received his early education privately, and entered Queen's in 1877 to take Arts and In 1881 he received his B.A. and completed the Theological course in 1883. For a time he was engaged in mission work in the Huntsville, Ont., district, later becoming assistant minister at St. Andrew's Church, Toronto. He founded St. Mark's Church and served as pastor there for several years. In accepting a call to Detroit, Mich., Mr. Somerville helped to organize what is now known as Emmanuel Presbyterian Church. He remained in Detroit seven years and then returned to Ontario, as minister of St. Andrew's Church, Norwood. For the past several years he has lived in Toronto. Mr. Somerville is survived by one son.

THE FOUNDING OF THE NEW YORK SOCIETY OF QUEEN'S UNIVERSITY

By W. R. Givens, Arts '88

COME time ago I was asked by the Deditor of the Queen's Review, if, as one of the founders and charter members of the New York Society of Queen's University, I would give him a brief article telling of the organization of the Society. This I agreed to do. Unfortunately, owing to disturbed world conditions and the subsequent declaration of war, the promise slipped my memory until, first, I learned of the very successful dinner the Society held in New York toward the close of the year and, second, when I read the announcement some days ago that Dr. George Hayunga of New York City, a Queen's graduate of high distinction and many years standing, had established a scholarship valued at \$100 for the best student in the Queen's Contingent of the Canadian Officers' Training Corps.

Now, as it happens, it was at the home of Dr. Hayunga in Manhattan that the New York Society was formed, and it was perhaps only natural, therefore, that, reading of his gift of a scholarship to the University of which he has always been a loyal son, I had it impressed upon me how negligent I had been in fulfilling my promise to the editor of the *Review*. And so, with a somewhat uneasy conscience because of my neglect, I hasten now to make amends.

* * *

It was away back in 1898 that a mere handful of Queen's men — seven in all — met in Dr. Hayunga's office, prepared, if not to die for "dear old Siwash," at least to do our bit for the University on the "old Ontario Strand" for which all of us had retained so affectionate a memory. What we lacked in numbers we made up in enthusiasm and earnestness, for we had with us at that meeting none other than our beloved Principal, George Monro Grant, who had come down to

New York especially for the meeting and whose presence, needless to say, was as welcome as it was inspiring. In addition to the Principal those present were Dr. Hayunga and Dr. John R. Shannon of Manhattan; Dr. W. H. Rankin, Dr. James Kirk, and Dr. Fred McCammon of Brooklyn, all eminent in their profession and an honour and credit to the University; Mr. D. C. Porteous, later a prominent director of finance of all the railroads of the United States when they were taken over by the Government during the World War; and myself, at that time on the editorial staff of the New York *Times*. Of these only five are now alive, Dr. Rankin having passed on in the summer of 1939 and Dr. Kirk only a few months ago.

* * *

I have no distinct recollection of what prompted the organization meeting but my impression is that it was suggested by Principal Grant himself. As may be recalled, he decided in 1898 or thereabouts that it was time for Queen's to shake off its swaddling clothes of denominationalism and stand out not only as a national but as an international university, attracting students to it from all quarters and drawing its professorial staff from the best universities of the world — not from Canada alone, not from the Empire alone, but from Europe and our great neighbour to the south of us, the United States, as well. Outstanding imperialist as he was, Principal Grant was one of the first of Canada's leaders to see that our destiny lay not alone with and in the Empire but, preserving our national unity and integrity, walking hand in hand in good neighbourliness with our American cousins.

* * *

What wonderful vision the Principal had, and how clearly he foresaw coming

events and the changed conditions on this continent when he dwelt upon the international character of his new university came forcibly home to me when I listened to the memorable and world-moving address of President Roosevelt in the Richardson Stadium of Queen's University in 1938 and heard him declare:

The Dominion of Canada is part of the sisterhood of the British Empire. I give to you assurance that the people of the United States will not stand idly by if domination of Canadian soil is threatened by any other Empire.

And this at Queen's University, now in fact international in spirit, in outlook and in achievement, exactly forty years, almost to the very day, from the time of our meeting in New York City with Principal Grant when he unfolded to his handful of faithful there his intention to re-create the University and make it more than national, more than imperial — make it truly international. The genius of the man! The courage! The vision!

*

And so in our humble way we created the New York Society of Queen's University, and if it had not been for the Principal's untimely death several years later there would today be in the possession of the University two huge flags one the Union Jack, one the Stars and Stripes — which we had planned to give to the University as symbolic of its international spirit and character. But with the Principal's death the project was allowed to rest for the time being, and as far as I know has never been revived. Perhaps I should take my measure of responsibility for this for I was one of a committee of two appointed to carry the matter through.

* * *

We must have been an inordinately vain seven — we organizers of the Society — because the list of the first officers of the newly formed society shows as follows: honorary president, Principal Grant; president, Dr. J. R. Shannon; vice-president, W. R. Givens; treasurer, D. C. Porteous; secretary, Dr. George Hayunga; executive committee, Dr. W. H. Rankin, Dr. Fred McCammon, Dr. James Kirk.

As will be seen, and putting it baldly, there was not a single private in the ranks. We were all officers — and proud of the fact — and all, I am glad to say, in step.

That memorable night the Principal had dinner with me and Mr. Porteous at the family hotel where I stayed, in the Murray Hill district just a few blocks from the Grand Central Station; and when we saw him off on the train that evening, bound for Kingston, he was a happy, happy man—as pleased with the pitiful little efforts of the faithful seven as though we had bestowed upon him untold riches and blessings.

A great, great man, George Monro Grant! Is it to be wondered that we of the old school worship at his shrine, knowing as we do—none better—that his spirit still carries on, and ever will, in good old Queen's!

WAR LOAN BONDS PURCHASED BY UNIVERSITY

QUEEN'S University, having on hand \$200,000 from maturing investments, subscribed the whole sum towards Canada's first war loan and was allotted \$80,000 worth of the bonds. This proportion was similar to that allowed all other large subscribers.

Dr. W. E. McNeill, vice-principal and treasurer, stated that the large subscription was undertaken as a patriotic gesture and that the University was satisfied in the University was satisfied to the University was satisfie

fied with the amount allotted.

Prominent Queen's alumni who assisted in the promotion of the loan in Ontario included C. Jackson Booth, Arts '86, Ottawa; Rt. Hon. George P. Graham, LL.D. '08, Brockville; P. D. Ross, LL.D. '19, Ottawa; Hon. G. Howard Ferguson, LL.D. '30, Toronto.

Dr. George Hayunga of New York Establishes C.O.T.C. Scholarship

BRUCE F. Anderson, Med. '40, has been awarded a new scholarship established by Dr. George Hayunga, Med. '90. New York City.

Known as the American Legion Scholarship, it has a value of \$100. Each year it will be awarded to the member of the

Queen's University Contingent, C.O.T. C., who makes the highest marks in the corps examinations, on condition that he has attained satisfactory standing in his other academic work.

DISHES AND CUTLERY PURCHASED FOR GRANT HALL

DISHES and cutlery to serve 360 people have been purchased for Grant Hall by the General Alumni Association.

The equipment was used for the first time for the annual C.O.T.C. dinner, which was split into two sections this year because of the large number enrolled. These affairs were held on January 30 and February 1, with approximately 300 in attendance at each.

At the meeting of the Board of Directors last fall, it was pointed out that the dining-room in the basement of Grant Hall would fill a long-felt need if dishes and cutlery were available. The idea was expressed that the Association would be adding to the usefulness of the Hall, always a favoured project, if this purchase were made. The matter was referred to the advisory committee for further exploration.

After an investigation the committee recommended that the equipment be purchased, at an estimated cost of \$875, with the understanding that the money would be paid out of the profits realized on the football dances conducted each fall. In view of the fact that the need was urgent and that prices were expected to rise in the near future, it was thought advisable to make the purchase as soon as possible rather than wait until the next meeting of the Board. The secretary-treasurer was instructed to write the Directors, including the presidents of the various branches, asking for an expression of opinion. Without exception, all replies were in favour of the project.

Under the terms of the Constitution, it is not possible to obtain the sanction by letter vote for an expenditure in excess of \$500, but the University authorities came to the rescue by offering to

furnish the difference.

The equipment consists of the following items: dishes—cups and saucers, dinner plates, bread and butter plates, soup plates, and sugar bowls; glasswaretumblers, ice jugs, salt and pepper shakers, sugar bowls, and cream bowls; cutlery—tea, dessert, table, and soup spoons, dinner and dessert knives, dinner and dessert forks.

Accommodation for the various items is provided in lockers in the basement of Grant Hall. The University has placed a man in charge, whose duty it is to check the equipment before and after it is used and to make a report to the secretary-treasurer of the Association. It is planned that the latter will take an annual inventory.

All who have seen the well-stocked lockers have expressed admiration for the worthwhile contribution made by the General Alumni Association.

MATRICULATION REGULATIONS CHANGED FOR ENLISTED MEN

THE Senate of Queen's University has decided that, for enlisted men in any branch of the service, pass, or junior, matriculation will consist of five subjects on a basis of fifty per cent in each subject, as follows: English, mathematics. and any three of Latin, French, German, Greek, Italian, Spanish, science (physics or agriculture, part I, and chemistry or agriculture, part II), history (Canadian and ancient), or Canadian history and

While for junior matriculation the new requirements for men on active service are five subjects instead of the six demanded in regular procedure, no modification has been made in the requirements tor honour matriculation.

In Military District No. 3, Queen's has accepted responsibility of arranging for the instruction and of forwarding the recommendation of standing to the Ontario department of education. R. M. Winter, Arts '26, director of the Department of University Extension, is organizing the work throughout the district.

With the generous assistance of teachers in the Kingston area who are giving their time freely to the work, it is hoped that men who have almost completed matriculation requirements may be given the opportunity to finish their courses and thus become eligible for promotion in the services.

MENTAL HEALTH AND THE BRAIN

By Dr. Donald O. Hebb

THE world's prize mystery is balanced on the top of the spinal column, shut up in a tight, bony box—a mystery science would like to know a lot more about. The box, or skull, is interesting enough itself, consisting of a number of separate bones, fitted into each other more snugly than a cedar chest, as close as a Chinese puzzle, but the interesting mystery is not the box but the brain it contains.

The brain is a double handful of white jelly, like a bowlful of porridge, and to the naked eye does not seem much more; but looked at carefully under the microscope it becomes a far more complex and delicate piece of machinery than man ever made. The anatomist may spend his whole life studying the structure of one small area. Many men have done so, and are still doing so, every year adding new facts to existing knowledge of the brain; and almost every new fact makes it seem more complicated, more delicate, and harder to understand.

Science is slowly conquering the mystery, and it must be conquered. It is not only to cure mental illness; almost every human interest is concerned. Teaching arithmetic, learning to drive a car, being patient or learning to control a bad temper, trying to overcome sleeplessness, getting along with the boss, being a good salesman or a good lawyer, all these things have to do with the way the brain functions, and this is what we must understand to guide human development or to act more like adults ourselves. Improvement in these things is essential if society and social conditions are to be improved, and in the long run they are perhaps more important than the immediate cure of mental illness. But to some extent the two problems are the same.

What goes wrong with the brain when behaviour becomes abnormal? Tommy, for example, has always been a bad boy. His mother has no trouble with the other children, but she can do nothing with Tommy. Why? Mr. X suddenly begins to believe that people are spying on him, plotting evil things; and his business begins to go to pieces. Why? Mrs. X becomes hard to get along with; she is breaking up her home, but she can-

not stop nagging, worrying, quarrelling. Why has she changed? All such things depend on the way the brain works, on something that has gone wrong with it.

Now, though we cannot always do much at present, there are signs that we shall soon understand the problem better, and medicine is beginning to work cures that are little short of miracles. cures are based on the slow, painstaking work of scientists and physicians. Their work sometimes seems to have no practical value, but in the long run it may be the means of preventing illness. The psychologist studies a rat in a maze; no one cares about a rat's difficulty in finding his way around, but understanding it is one more piece in the jigsaw puzzle of human behaviour. A physiologist measures the electrical currents in the dog's brain, or in the eel's eye, and finds another piece to fit into the puzzle. The anatomist cuts a lizard's brain into thin pieces less than a two-thousandth of an inch thick, and stains them, and photographs them; this and thousands of other studies lead slowly to a real understanding of the human brain and therefore of mental illness and mental health.

There seem to be two ways in which the brain may begin to work badly. In one there is actual damage, to be seen with the naked eye: perhaps a fracture of the skull, breaking the bony wall and injuring the brain beneath, perhaps a stroke, with a blood-vessel breaking, or perhaps a growth inside the skull, pressing on the brain. These are things for the brain surgeon, and in the last few years brain surgeons have indeed been working miracles, opening the skull, removing the damaged part or the growth that is causing pressure, and in a week or a month the patient may be a new man.

The second kind of illness is not always understood so well. The patient behaves peculiarly, but his brain does not seem to have been injured. No actual destruction can be found—everything seems just as in a normal brain. Yet in some way the brain is working badly. Why? There are two possibilities, and over these there has been fierce disagreement and much scholarly, scien-

tific argument that might sound like a dog-fight if it were not known that it was the science read about in magazines and newspapers. If such quarrels sound undignified and unscientific, remember that these men feel strongly because the problem is important, of the utmost importance, and it may be better to feel too strongly than not to feel strongly enough.

Two Main Theories

Well, the two possibilities worth fighting over are these: one, that it is the mind that is damaged, or the activity of the brain and not the brain cells themselves; two, that the brain cells really are injured, and the injuries are so fine that they cannot be seen with our crude microscopes, but will be seen when we have better instruments. The first explanation is like saying that all the parts of the automobile engine are good, none of them damaged, but put together badly — spark plugs wrongly connected, or timer not adjusted. Now, says the one group, if you take that car to pieces, you will find nothing wrong with the parts, and yet the car would not run. Wrong connections have been made in the brain, perhaps by a wrong kind of training such as bringing a child up with bad habits, or perhaps a grown-up allowing himself to worry too much about business, or being sorry for himself instead of keeping busy. The other side denies this, saying that the trouble is in the parts of the automobile, and that if you know how to look properly you find little flaws. For this group the spark plug has been badly made, or has been broken, even if the break cannot be seen; and in studying the brain it has concentrated on better and better ways to cut it up and find changes in the cells.

Which of these explanations is right? Are the parts, the brain cells, all right, but not working together? Or is there something wrong with the parts, if you could only find it? The more we learn the more it seems, as with so many scientific problems, that both are right, and both are wrong. Science does not always learn the answer to the question it asks, but learns sometimes how to ask a better question. Another way of phrasing the question about the cause of men-

tal illness is to ask, Is it due to bad experiences, poor education, wrong ideas in childhood, bad habits in the adult — these are one possibility — or is it due instead to something happening in the nerve cells of the brain, to bad blood supply, lack of vitamins, nervous disease? And the answer is, Both.

We do know pretty definitely that mental illness can be produced without causing any injury; and just as definitely that mental illness can be caused, for example, by a lack of vitamins, and completely cured by supplying the missing substances in the blood stream.

AN INTERESTING EXPERIMENT

The demonstration that abnormal behaviour can take place without injuring the brain cells is a very interesting experiment. A dog is put in an experimental room, and given food at irregular intervals. Fifteen seconds before each feeding, a bell is rung. Before long, when the bell is rung the dog's mouth waters, he licks his chops, and makes a swallowing motion. This is the first part of the experiment, and now when the dog is turned out of his cage at the usual time for the experiment he will run to the experimental room, jump up on the table, and wait eagerly to have the apparatus adjusted. This is important, because it shows that the procedure does not injure the animal. No one who knows dogs can mistake the animal's pleasure. Now, before feeding the dog, he is shown a square of white paper, until this too becomes a sign of food; then he is shown a rectangle, and not fed. After several times, when he sees the rectangle he yawns, looks away, not interested in food; but when he is shown the square, his mouth waters and he looks eagerly for food as before. The next step is to make the rectangle more like a square; still the dog can tell them apart. The rectangle is made more and more like a square, to see how small a difference the dog can notice. What happens? When the square and rectangle are so much alike that the dog can just tell them apart sometimes, or cannot quite do so, then comes the exciting thing that tells us a little more about the causes of mental illnesses. Suddenly the dog becomes a different animal. No one has done anything to his brain, he has not been injured, he has not even been forced to solve the problem, and yet his behaviour becomes unrecognizable. He bites at the apparatus, at the experimenter, and struggles in his harness; when turned loose from his cage he runs away from the experimental room, fights the experimenter who tries to lead him toward it, snaps at other animals, and becomes, in short, unrecognizable, either in the experimental situation or outside it. And this behaviour continues for months, perhaps permanently, even if the experiment is stopped at once.

Human Neurosis

This is neurotic behaviour, and it has been produced solely by giving the dog a problem too hard for him to solve. No injury has been done to his brain, and none can be found by the closest examination. Yet in some way his brain is acting peculiarly. Is human neurosis like this? May the problems of living have a similar effect? More important, perhaps, may school children not be affected in the same way by the old-fashioned methods of teaching that are still the usual thing in our schools, and by the problems of the old-fashioned curriculum? The psychologist has no trouble showing that children in school are regularly, almost invariably, given arithmetic problems and grammar lessons that are too hard for them to understand; the trouble is to make parents believe it. The blame here is not the teacher's; it rests squarely on the shoulders of all parents who demand that their children be taught what they were taught, and in the way they were taught. It is not proved that these things produce neurosis, or even that they have a bad effect on the minds of children; it is not finally proved, but it is only too probable, and it raises a big question mark over the school building and over the parent who says that such and such a teacher is no good because she has a noisy class-room, or because she is not teaching Johnny what his father was taught in a curriculum that was out of date fifty years ago.

Now we come to a quite different situation, this time the case of a young man

who grew up rather normally until he was thirteen or fourteen, and then began to seem a little different to his family. Gradually he became more and more introverted — shy, not interested in others, more and more apathetic. His teachers found him going down hill as a student. He had been very keen; now he became slow at his learning and without interest in his studies, or for that matter in anything else. Three years later he had a convulsion, followed by others, and for ten years his memory disappeared even when he was not having convulsions. He was childish, and unable to look after himself. It was at last discovered, however, that his blood was lacking in sugar. The brain was not being fed, and the convulsions were in fact the same as a diabetic may have if he takes too much insulin. This was remedied, and the convulsions stopped completely; moreover, the young man's actions became those of a normal person. Within a week his memory becase as good as ever; his mind recovered its normal keenness. Now, it is clear in this case that no injury to the brain cells was causing the illness — otherwise he could not have made the rapid recovery — there was something wrong with the nutrition of the brain cells, not with the cells themselves.

Experiments at Queen's

Again, at Queen's University experiments are going on under the direction of Professor Humphrey, studying this question of abnormal behaviour. You cannot very well experiment with human beings in such a matter, but you can with rats. With a problem that is hard for them to solve, and with certain kinds of stimulation but without injury to the animal, it has been found possible to produce convulsions. From this work two things will be possible: first, a study of the conditions that lead to the abnormal behaviour; second, a study of possible cures. In such work lies a hope that human behaviour can be guided so as to avoid mental illness, or that cures may be found for mental illness if it does happen.

It was once thought that the brain was an organ so delicate or so fragile that the least injury to it would mean feeble-

mindedness or death. We now know that this is far from true, and again it was animal experiments that have led the way in this knowledge, and have led to cures, dramatic and startling, and opening new hope for many apparently hopeless invalids. It is true that there are certain regions essential to life or normal behaviour, and if one of these is completely destroyed nothing can be done about it; but again and again it is being tound that brain surgery can make a new man of a hopeless invalid. The study of these cases is fascinating. To see a man with memory gone, unable to answer to his own name, and the same man a year later, as well and apparently as normal as any of us, is a thrilling experience.

BRAIN SURGERY

A young man of sixteen was injured in a sawmill; a flying piece of timber had fractured his skull. For years his health became worse and worse, and his mind seemed gradually to become that of a child of eight or nine years. He became quarrelsome, forgetful, unresponsive; at times he might be unable to undress himself. But a brain surgeon reopened his skull, removed a part of the brain that was damaged and working so badly that it not only failed to do its own work but threw off the working of the rest of the brain. Three months later his family wrote to say that he was well, with a good memory and as good behaviour as anyone else. Psychological tests showed that his intelligence was that of an adult; far from "affecting his mind," the brain operation restored it.

Such cures are based on the original work of many men. In this combined attack the psychologist has his own part to play. His business is to study the mind and man's behaviour, so that abnormality may be discovered soon enough tor the physician to cure it. The most unlikely research — study of the sex life of the rat, the intelligence of apes, the little peculiarities of various individuals - may be of great importance. Such studies may seem to have no practical value, but it is just such research that will in the long run lead to an understanding of the mind and how to educate, to guide social behaviour, and to avoid mental illness.

C.O.T.C. FACILITIES HAVE BEEN ENLARGED

T O provide facilities for the large increase in personnel, due to war developments, Queen's University Contingent, Canadian Officers' Training Corps, has added enough companies and platoons to handle the 700-odd cadets now enrolled.

Last year the establishment was increased to a headquarters and two companies of three platoons each and one company of two platoons. Now there are six companies of four platoons each and one company of three platoons. The increases were announced recently in General Orders.

Organized in 1915 under Lieut.-Col. A. B. Cunningham, and reorganized after the War by Colonel Alexander Macphail, C.M.G., D.S.O., LL.D., the Queen's Contingent is now commanded by Lieut.-Col. R. O. Earl. He succeeded Lieut.-Col. D. M. Jemmett, who retired last year.

Officers attached to the contingent for instructional purposes are Lieut.-Col. D. S. Ellis, D.S.O., V.D., Arts '07, Sc. '10, professor of civil engineering, attached to the reserve of officers; Major C. A. Chabot and Captain C. C. Cook, 32nd (Kingston) Field Battery, 9th Field Brigade, R.C.A.; Major J. G. Cumming, P.W.O.R. (M.G.); Captain L. A. Brown, 5th Field Company, 3rd District Engineers, R.C.E.; and Lieut. R. A. Low, Sc. '28, Corps Reserve of Officers, Q.U.C., C.O.T.C.

Following is an additional list of alumni who are members of the Canadian Militia or the Canadian Active Service Force:

Royal Canadian Engineers—E. D. B. Magee, Sc. '39; Lieut. W. F. Sharon, Sc. '39.

Royal Canadian Ordnance Corps—No. 1 Ordnance Workshop Coy., Major H. J. Styles, Sc. '29; Captain H. G. Conn, Sc. '31; Lieutenants M. A. Dolan, Sc. '37, A. O. Monk, Sc. '35, K. L. Murray, Sc. '37, W. D. Gilbert, Sc. '32; Sergeant James Latimer, Arts '40; Staff Sergeant Tom Warner, formerly of the staff of Queen's radio station. Lieutenant J. M. Cockburn, Sc. '24, assistant ordnance mechanical engineer; Lieutenant P. C.

King, Sc. '30; Lieutenant E. C. Mayhew, Sc. '36; Captain A. C. Malloch, Sc. '21, No. 2 Army Field Workshop.

Royal Canadian Army Medical Corps—Colonel W. G. Blair, Med. '16; Captain W. W. Wade, Med. '30, attached to the 14th (Cobourg) Field Battery, R.C.A.

SIXTEEN STAFF MEMBERS TEACH IN SOLDIERS' CLASSES

SIXTEEN members of Queen's staff are acting as instructors in the educational courses being offered in Kingston to soldiers of the Canadian Active Service Force stationed here. Attended by more than 600, the classes are under the auspices of the Canadian Legion War Services.

Staff members who are assisting are Professors Marcel Tirol, W. M. Conacher, P. G. C. Campbell, A. A. Day, Glen Shortliffe, Heinrich Henel, and Norman Miller, of the Faculty of Arts; Captain H. G. Conn, Professors D. M. Jemmett, L. M. Arkley, L. T. Rutledge, H. H. Stewart, and Messrs. R. D. Bradfield, W. E. Connolly, H. S. Pollock, and A. C. Baiden, of the Faculty of Applied Science.

Ross M. Winter, Arts '26, director of the Department of University Extension, heads the educational committee for Military District No. 3.

Methods of War Aid Discussed At Faculty Women's Club

MRS. W. E. McNeill was the guest of honour at a luncheon meeting of the Faculty Women's Club held at the LaSalle hotel on January 31. Mrs. R. C. Wallace, president, was in the chair. Mrs. McNeill had as her guests the new members of the club.

Requests from the Red Cross for new or old material for clothing to be made over for European refugees, from a sergeants' mess for a piano, and from the I.O.D.E. for library work, were received. The sum of ten dollars was voted to assist the I.O.D.E. Mrs. G. S. Melvin was appointed to form a programme for

workers at the soldiers' recreation room every fifteen days. At the conclusion of the business meeting the guests adjourned to the mezzanine floor for bridge.

"PATHS OF LEARNING" LISTED IN CATALOGUE

THE Queen's film, "Paths of Learning," has been included in the latest catalogue issued by the Associated Screen News, Limited. Films listed are available free of charge to educational groups, schools, and religious institutions in Canada. "Paths of Learning" may be obtained by writing to the General Alumni Association or to Associated Screen News, 1330 Sherbrooke St., W., Montreal, Que. This is the 16-mm. size and may be shown only on a sound projector.

The 35-mm size, for exhibition in theatres, may be obtained without charge by writing to Associated Screen News. Alumni will be doing the University a favour if they will ask their local theatre managers to secure this worthwhile film. To date it has been shown in the following centres: Kingston, Ottawa, Hamilton, Brockville, Fort William, St. Catharines, Chatham, Trenton, Oshawa, Cornwall, Cobourg, and Fraserdale.

Old Pictures and Documents Are Valuable to University

GRADUATES are reminded that the General Alumni Association will be pleased to accept, on behalf of the University, pictures of student groups of past years, or letters, minutes, constitutions, and other documents that may now be gathering dust in attics.

These items are often valuable as sources of information, and at the University they are available to a larger number of interested people than is otherwise possible. From time to time, some of the pictures are published in the *Review* for the enjoyment of its 5,000 readers.

An interesting gift received recently consisted of a collection of lantern slides used to enliven the Alma Mater Society election meetings fifteen and twenty years ago.

EMPLOYMENT SERVICE APPEALS FOR ALUMNI AID

PERMANENT positions for a large number of prospective graduates and summer jobs for several hundred students are now being sought by the University Employment Service in its annual

intensive campaign.

Present indications point to increased activity in many fields of employment, particularly certain branches of engineering. As usual, however, the greatest problem will be in finding vacation work for the young men and women in the junior years, many of whom depend on their summer's earnings for the necessary funds to continue at the University.

Alumni have given valuable assistance to the Employment Service in the past. Any information that may lead to permanent or temporary employment for men and women with university training

will be welcomed.

On several occasions, lately, when attempting to make placements for graduates, the management has been handicapped because of insufficient data on file. Alumni who have registered with the Service at any time are urged to bring their record forms up to date; this applies even if they are no longer in need of its facilities. This co-operation will enable the Service to function with the maximum of efficiency.

ANNUAL C.O.T.C. BANQUET HELD AS TWO EVENTS

WING to the greatly increased enrolment, the Queen's University Contingent, C.O.T.C., was forced to hold its annual banquet in two sections this year. The functions took place in Grant Hall January 30 and February 1.

At the first banquet, 300 cadets listened to an address by Lieut.-Col. E. G. Weeks, M.C., M.M., commanding officer of Barriefield Signal Concentration Camp, on military communications, past, present, and future. Lieut.-Col. C. W. Devey, assistant adjutant and quartermaster general of M.D. No. 3, was the speaker on the second evening, when there were about the same number present.

Officers and guests at the head table included Lieut.-Col. R. O. Earl, commanding officer of the contingent, Principal Wallace, Dr. McNeill, Major G. S.

Melvin, Lieut.-Col. P. G. C. Campbell, Major Rev. H. B. Clarke, Lieut.-Col. D. M. Jemmett, Captain H. L. Tracy, and the guest speakers. Principal Wallace represented the University staff on the first night and Dr. McNeill on the second.

Advanced Course in First Aid Is Available to Women Students

THIRTY-FIVE young women, some students and others from various University offices, have registered for an advanced course in first aid under the auspices of the St. John Ambulance Association.

Lectures commenced January 23 and will last six weeks. Instruction will be given for the most part at Kingston General Hospital. The advanced course follows the home-nursing instruction taken by a large number of students last fall. Dr. L. J. Austin, professor of surgery, is in charge.

Principal Invited To Give Address And Receive Honorary Degree

N recognition of his services in the field of education, Principal Wallace was invited to deliver the annual "Founder's Day" address at Temple University, Philadelphia, on February 15.

Dr. Wallace and three prominent Americans were selected to receive honorary degrees on the occasion of the University's midyear commencement and Founder's Day celebration.

Broadcast Over CFRC

THE following took part in the University's regular series of quarter-hour radio programmes during January: Dean John Matheson, Prof. S. N. Graham, Miss Idele Wilson, Rev. Dr. J. R. Watts, St. James' Church Choir, Prof. J. K. Robertson, Mr. J. C. Cameron, Dr. R. W. Paton, Dr. D. O. Hebb, Dr. H. M. Cave, Dr. William Angus, the Gummer Trio, Mr. E. C. Kyte, Dr. H. M. Estall, Prof. T. V. Lord, and Prof. F. A. Knox. The programmes were broadcast over Queen's station CFRC.

Constitution Copies Available

Additional copies of the new Constitution of the General Alumni Association which was printed in the December, 1939, issue of the *Review*, are now available.

PUBLIC LECTURE SERIES FEATURES FRENCH-CANADIANS

HREE prominent French-Canadians delivered lectures at Queen's during January in the Monday-afternoon series sponsored by the University. The addresses were given in Convocation Hall and were broadcast over the Queen's station CFRC.

Introducing the series, which is devoted this year to French Canada and its problems, was Dr. Olivier Maurault, rector of the University of Montreal, who spoke on January 15 on "Some French - Canadian Backgrounds." Dr. Maurault voiced a strong plea for recognition and understanding of the French-Canadian attitude towards Britain which, though it expresses loyalty to the Crown and to Canada, is nevertheless mindful of its own rights in this country.

Mr. Jean Bruchesi, undersecretary of state for the Province of Quebec, addressed a large gathering on January 22 on the subject "French-Canada in Literature and in Song." He stated his belief that closer co-operation between the English and French in Canada needed a more sympathetic understanding on the part of the English element. He referred to Dr. Duncan McArthur, former professor of history at Queen's, who once said that if a French-Canadian problem exists, the solution rests with English Canada.

One week later an enthusiastic audience listened to Dr. Marius Barbeau, noted ethnologist of the National Museum of Canada, speak on "Art in French Canada." Dr. Barbeau traced the development and characteristics of French-Canadian handicrafts, wood-carving, silversmithing, and embroidery, and left the thought that French-Canadians were too practical to become really fine artists. They were not addicted to the fine arts, but they have excelled in the manual arts, he said.

Lithographic Prints of Cartoons Made An Interesting Display

RIGINAL lithographic prints of cartoons which appeared in Paris newspapers of the 1850's were exhibited in the Senate Room of the Old Arts Building for two weeks beginning January 22. The collection of famous cartoons by the Frenchman, Daumier, was lent by the National Gallery of Canada. Daumier is ranked with the Spaniard, Goya, as one of the best cartoonists of all times. He made cartoons of social and political customs of the Crimean War era.

OUT OF THE PAST

A Story of Yesteryear

A N illustrious graduate of Queen's was Brigadier-General Lewis W. Shannon, C.M.G, Arts '77, whose death occurred in 1936. General Shannon led an extremely useful life, serving as a teacher, publisher, and soldier. In view of his record the following contribution

is highly interesting:

When young Shannon was a freshman at Queen's, it was a rule that each student should bring with him, among other documents, a "certificate of good moral character," usually supplied by the minister of his church. At the appointed time the lad proceeded to the Registrar's Office, then situated in what is now the Old Medical Building.

Entering at the Arch Street gate, he was fumbling in his pockets for his papers when he was suddenly confronted by none other than the Principal, Dr. Snodgrass. The latter laughingly in-

quired.

"Well, Shannon, you seem to be in trouble. What's the matter?"

"I've lost my character," the young

man replied.

"Isn't it a little early in the session for that?" asked the Principal, with a twinkle in his eye. Nevertheless, the youthful student was assured that the incident would not be allowed to prevent his registration.—J. R. S.

Navigation School Opens

QUEEN'S Navigation School opened its twenty-seventh session on January 2 with ten students in attendance. Owing to changed regulations which demand more time affoat before the courses are taken, the class this year is smaller than usual. Captain A. Barrett is again in charge of the School.

STUDENT ACTIVITIES

Social functions crowded the student schedule during January and dent schedule during January and were followed closely in interest by C. O. T. C. examination results, the latter something new and unpredictable in the lives of seven hundred of the male stu-

Biggest social events were, of course, the Formals — three of them. On January 19 the Arts Society gave a War Party in the Gymnasium. Traditional formality blended with ugly reality as the guests, many in uniform, ate boxlunches from gas-mask-style boxes, ducked into Air Raid shelters, and groped about in the Blackout Room. Mr. G. C. Howitt was the convener of the committee in charge.

The ladies invited their men to the Levana At Home on January 25 and 26. Ban Righ Hall was appropriately and painstakingly decorated with the committee's version of the habits of Miss Levana during the four years of her college life, with cosmetic containers and other feminine frills forming the predominant *motif* in the decorative scheme. The convener for both dances was Miss

Jean Merriam.

Two days before the first Levana dance this advertisement appeared in the Queen's Journal: "The following members of Meds. '42 are still 'available' for the Levana Formals: Bill Law, Ed Lidington, John Parry, and Lou Mulvihill. Applications cheerfully received." editor commended their initiative.

A full report on C.O.T.C. examination results cannot be made this month as complete returns have not yet been received. Marks in three divisions have been posted, however, and it was with satisfaction that the cadets noted that military authorities at Ottawa and Barriefield had not been unduly severe. With about forty per cent of the total marks given for map-reading questions, it is expected that the engineering branches will come out on top. The next, and final, test comes in March. Satis-

faction with the corps as a whole was expressed by the C.O. at the annual banquet, held in two sections in Grant Hall

January 30 and February 1.

An upswing in the popularity of skiing is noted on the campus. Good snow conditions in the Kingston district plus the organization of a ski club at Gananoque are partly responsible. The Queen's Ski Club has made several excursions on week-ends into the surrounding countryside and a number of fair skiing spots have been discovered. Queen's skiers have also paid visits to the domain of the Gananoque club.

The Alma Mater Society has appointed a committee to investigate the possibility of Queen's taking the lead in the formation of a national student organization to replace the existing National Federation of Canadian University Students and the Canadian Student Assembly. Both bodies have their supporters on the campus, but the general attitude is one

of indifference.

Queen's representatives at the Student Christian Movement conference in Toronto during the Christmas holidays were Miss Mary Naughton, Messrs. Gerald Latham, Philip Lowe, Harold Miller, Arthur Rose, and George Tuttle . . . The Queen's Drama Guild is co-operating with the Queen's Student Assembly in an attempt to revive the famous "Campus Frolics" of a few years ago . . . The Guild is also planning to be represented in the Intervarsity Drama Festival at Hamilton on February 23 and 24 . . . Rev. T. Christie Innes of Knox Church, Toronto, was the guest preacher at the University Church Service held in Grant Hall on January 21, his subject being "Wisdom in an Imbecile World." . . . The Queen's War Aid Commission of the Alma Mater Society is attempting to raise \$1600 to purchase a field ambulance for the Finnish Red Cross . . . The Engineering Society enjoyed a film, "Construction of the Golden Gate Bridge," at its meeting on January 24 . . .

Under the auspices of Le Cercle Francais, a talking picture entitled "Double Crime sur la Ligne Maginot" was shown at one of the local theatres on January 31 . . . Principal Wallace delivered his second lecture to first-year students on January 30, his subject covering the

fields of history, sociology, economics, and governmental relationships . . . The Queen's Intercollegiate debating team of Messrs. Al Brady and Charles Case was defeated by one from Osgoode Hall on the motion "Resolved that the Canadian Senate should be abolished."

ATHLETICS

Loss to Varsity Gives Rude Jolt To Hockey Title Aspirations

THE Tricolour's hopes for a hockey championship were realized when the team won the Van Horne trophy in the Kingston City League competition, but aspirations for an International Intercollegiate title received a rude jolt when Varsity took a 4-0 victory in the Jock Harty Arena on January 26.

For the first time the Seniors won the local pre-season honours, defeating Trenton Fliers in a hotly contested series which went to three games. Paced by the front-line combination of Norv Williamson, Mel Williamson, and Bob Neilson, the boys came from behind to win the trophy.

Queen's met Princeton in the first Intercollegiate fixture on January 6, and won without much difficulty. Bob Neilson ran in three goals and Hood, Lane, and Norv Williamson netted two each. The final score was 10-3, with the Tricolour superior in every department of play.

Two nights later, Yale Bulldogs suffered an 11-3 defeat in much the same manner, with the first forward line running wild around the goal mouth. Hood, Lane, and Carter were also prominent.

When Dartmouth came to Kingston January 18 it was expected that Queen's would register another easy victory. The Indians had ideas of their own on this subject, however, and proved so stubborn that only a strong third-period rally saved the day for the Tricolour. The score was 4-4 going into the final frame, but the American's defence weakened and Queen's ran in four goals.

Just when everything in the garden seemed beautiful, Varsity came into town and proceeded to give the Tricolour its worst set-back of the season. The locals

CAPTAIN "DING" McGILL

were not at top strength, but it is doubtful whether they could have stopped the visitors that night in any case. The Tricolour was outplayed everywhere except in goal-tending, where "Specs" Musgrove was kicking them out from all angles. The Queen's offense was effectively smothered at all times and even

the vaunted first-string forward line was not able to make any dangerous sorties. The final score was 4-0 for Varsity, which was ample revenge for the two

losses to Queen's last year.

Whether they win the championship or not, the Tricolour players may be counted upon to finish high up in the standings. Their title hopes depend largely on the outcome of their second match with Varsity

Basketball Team Starts Season With 47-39 Win Over McGill

N its first Intercollegiate start, the Tricolour basketball team got off on the right foot and trounced McGill Redmen 47-39 in the Queen's gymnasium on Jan-

uary 27.

McGill, whose team is almost the same as last year's, held the new Queen's squad during the first half, but faded rapidly thereafter under the beautiful shooting of Captain Bob Davis and Al McLellan. McLellan, a junior last year, was the high scorer of the game with eleven points to his credit, followed by Davis who netted ten for Queen's. Davis is the only member of the 1939 team playing this season, and it augurs well for his team's chances in the Intercollegiate race that it was able to defeat the powerful and experienced McGill squad.

Individual scoring was as follows: centre, McLellan, 11; forwards, Davis, 10, Whyte, 4; guards, Walker, 9, Eastaugh, 8; alternates, Harrington, Lewis,

Mitchell, 5.

Coaches McMahon and Jarvis Prepare Team for Annual Assault

PREDICTING at least four wins for his wrestlers, Coach Gordie McMahon thinks that the team he will send into the ring at the Intercollegiate assault in McGill's new Sir Arthur Currie Gymnasium on February 23 and 24 is the best that has represented Queen's in four years.

Boxing Coach Jack Jarvis also feels enthusiastic over his boxers, although every one of this year's crop is new to

Intercollegiate competition.

Both sections of the team will go into the fray with plenty of practice. By February 23 they will have had four exhibition tournaments, three with the strong R.C.A.F. team from Trenton and one with Gananoque. In their first appearance during December the boys defeated R.C.A.F. seven bouts to six and many of them showed plenty of promise for Intercollegists, competition

for Intercollegiate competition.

In the boxing division, Coach Jarvis will likely start Johnny Evans in the 118-pound division. Macey Milner, Vegreville, Alta., medical student, will contest the 126-pound class. Ray Dubrule and Ron Haflidson are battling for the right to represent the Tricolour in the 135-pound group.

pound group.

The coach is finding it difficult to choose between Asa Mather and John Wilson in the 145-pound class. Doug Chant will ably represent Queen's at 155 and Pete Cain is the choice at 165 pounds. In the heavier weights, Bill Baker will receive the call at 175 pounds and Joe Bardswick will take on all comers in the unlimited division.

Coach McMahon is concentrating on a select sextet of wrestlers to represent the Tricolour and is counting on weight of experience and condition to offset the fact that a complete team will not be entered. Of the six, four competed in last year's assault and are showing the benefits of that experience.

The 118- and 125-pound classes will not be contested owing to lack of suitable material. Ed Holmes at 135 and George Neumann at 145 are both expected to win. Each is ten pounds heavier than last year and in the pink of condition. Pete Malachowski, 155-pound Intercollegiate champion, is expected to retain his title as he has been in winning form for weeks. Ira Brown, at 165, is a veteran campaigner, who has been showing up well. Ernie Miron in the 175-pound class is an experienced grappler, while in the heavyweight division Joe Loucks is expected to win his bout.

Fritz Placed Third

QUEEN'S crack runner, Bill Fritz, placed third in the feature 600-yard event at the invitation Prout track meet in Boston on January 27. Although he had had the benefit of only casual training, Fritz was able to set the pace, and he held the lead until near the finish when he was nosed out by Bertham of Columbus, Ohio, and Cagle of Indiana.

AT THE BRANCHES

Montreal

A T ten o'clock on Friday evening, March 8, the Montreal branches of the General Alumni Association of Queen's University and the Alumni Federation of the University of Toronto will combine forces at the Windsor Hotel for their eighth annual supper dance. Dancing will take place in the Rose Room to the music of Blake Sewell's orchestra.

Each year this function becomes more popular as alumni of the two universities rival each other in having a good time. More than five hundred guests attended last year's dance, and this year an even greater crowd is looked for by the conveners.

Mr. F. R. McDonald, of the University of Toronto alumni, is chairman of the committee in charge of arrangements. Queen's members include Mrs. A. G. Racey (Phyllis Leggett), Arts '31, J. A. H. Henderson, Sc. '22, G. V. Roney, Sc. '26, and S. L. Whitton, Com. '36.

At the meeting held January 18 in the Mount Royal Hotel, first vice-president Claude Root, Arts '19, acted as chairman. An innovation that found favour was a roll call, each member in turn arising and giving his name and year. E. A. Thomas, Com. '26, Athletic Board liaison representative, spoke briefly on the athletic situation at the University, and urged all present to attend the Queen's-McGill Hockey Match to be held at the Forum, February 17, at 8 p.m. The basketball team will play also on that date, and the boxing and wrestling tournament is scheduled for February

as large a turnout as possible.

The pièce de résistance of the meeting was an informal address by "Red" Lymburner, ace pilot of Trans-Canada Airways. Mr. Lymburner spoke of his last flight in Antarctica with the Ellsberg expedition. The talk was illustrated with moving pictures taken mostly by Mr. Lymburner himself. G. O. Vogan, Sc.

23 and 24. Plans are under way to have

'17, renewed an old acquaintanceship after the meeting. The question time was enlivened by some shrewd questions by Gordon Henderson, Sc. '25, on the equipment and fittings on the planes now in use in the north country.

Kootenay

FORTY guests attended the seventh annual dinner of the Kootenay branch at the Kootenay Hotel recently. B. J. Walsh, Sc. '22, president, was chairman

for the evening, which began with an excellent Italian dinner and concluded with dancing.

The toast to the University was proposed by K. B. Woodward, Arts '29, with F. C. Ransom, Sc. '30, responding. S. S. McDiarmid, Sc. '03, proposed the toast to the

B. T. COON

ladies, and Mrs. Ransom replied.

During the brief business meeting immediately following the banquet, the following officers were elected for 1940-41: Honorary president, B. J. Walsh; president, A. M. Chesser, Sc. '24; vice-president, C. H. Simpkinson Sc. '29; secretary-treasurer, B. T. Coon, Sc. '31; executive committee, Dr. N. E. Morrison, Med. '34, K. B. Woodward, James Atwell, Sc. '24, and A. E. Allison, Arts '20.

Kingston

A T a regular meeting of the Kingston alumnae, held in Ban Righ Hall, on January 9, it was decided to send a donation to Miss Margaret H. Brown, Arts '12, to assist in her work with the Christian Literature Society in Shanghai, China. A letter from Miss Brown was read at the meeting. Mrs. Norman Miller (Grace Jeffrey), Arts '14, president of the Kingston branch, was in the chair.

Mrs. F. A. Knox entertained the guests with a number of lantern slides

taken on a trip to the Pacific Coast last summer. Tea was served during the social hour.

Niagara Peninsula

MORE than one hundred members, some coming long distances, attended the dinner-dance meeting held at the Fox Head Hotel, Niagara Falls,

J. C. PATTINSON

Ont., on the evening of January 26. The guest speaker was Mr. F. W. Griffiths, prominent lawyer of Niagara Falls, who delivered a stirring address on Canada's war effort. Dr. S. A. McNeight, Sc. '31, president, acted as chairman and toastmaster.

The large banquet room of the Hotel was tastefully decorated for the occasion, with the Tricolour being prominently displayed A large golden "Q" occupied a place of honour at one end of the hall. The Queen's colours were also in evidence on the cleverly fashioned programmes.

In his address, Mr. Griffiths said that Canada's immediate duty in the present conflict was to protect all her transportation and communication lines in the Dominion and on the seas. Men are urgently needed to prevent profiteering, to check subversive elements, to put government regulations into effect. Women are needed to become nurses and perform other valuable duties. There is a responsibility for every Canadian citizen in this situation. "Nothing can stop us Hitlerism," said the from stopping speaker.

"Democracy is a dynamic faith," said Mr. Griffiths. "Now it has its back to the wall, but with God's help it will win through against Hitler's mad philosophy. We must keep alive the holy fires of

democracy and justice; we must be willing to sacrifice everything in order to preserve our homes and ideals," he said.

The speaker was introduced by Mr. D. L. Willson, and a vote of thanks was moved by C. D. Hanniwell, Arts '28.

H. J. Hamilton, Arts '32, secretary-treasurer of the General Alumni Association, was a guest at the meeting, and spoke in response to the toast to Queen's. He gave an outline of the service alumni might render their alma mater and the Association. Graduates were urged to join the Association, to send in news to the Review, to advise the Employment Service of available openings, and, above all, to keep up their interest in Queen's and to stimulate this interest in others.

A lively sing-song and a spirited rendition of the various college yells were led by Mr. Hanniwell. The remainder of the evening was spent in dancing. A pleasing feature was the serving of fruit punch.

Credit for the success of the function belongs to T. R. Gauld, Com. '31, and Jack Pattinson, Arts '37.

Lakehead

QUEEN'S yells, reminiscences of college days, and all the atmosphere of a Tricolour alumni party pervaded the pre-Christmas meeting of the Fort William Rotary Club. Only the coolheaded action of the president, a non-Queen's man, in turning the attention of those present to the club's welfare work, saved part of the day for Rotary; most of the programme went to Queen's.

Dr. Hugh R. Grant, Arts '93, minister emeritus of St. Andrew's Presbyterian church, left a hospital sick-bed to deliver a stirring Christmas message to the club. At the conclusion of his address, Dr. Grant read a Christmas poem that he had written. He was presented with a gift from the club, and other manifestations of esteem included complimentary remarks made by Dr. C. C. McCullough, Med. '04, Alex McNaughton, Med. '05, and P. E. Doncaster, Sc. '11. Dr. Mc-Cullough and Mr. McNaughton, who were at Queen's with Dr. Grant, recalled his prowess on the football field, his service as moderator of the Presbyterian church, and his activities as a member of the Fort William club. The alumni

were joined in a rousing Queen's yell by Dr. Grant, just about breaking up the meeting.

Ottawa

most successful bridge and fashion show was held by the Ottawa alumnae in the main ballroom of the Chateau Laurier on January 20. guests were welcomed by the president, Mrs. T. K. Waddell (Jean Govan), Arts '20.

Miss Georgina Hallett, Arts '26, convened the committee responsible for the show and was assisted by Mrs. Ben Hamilton (Marion Lewis), Arts '25, and Miss Margaret Davis, Arts '37. Mrs. Watson Sellar (Gwen Gauley), Arts '20, drew for the prizes.

Mrs. E. I. Holmes (Wilhelmina Nobes), Arts '24, secretary-treasurer of

the branch, was the commentator for the fashion show. Miss Margaret Davis and Miss Kay Wayling, Arts '36, were among the models who took part. Mrs. J. A. Hume accompanied on the piano.

Toronto

TWO well-attended luncheon-group I meetings were held during January with G. C. Bateman, Sc. '05, speaking on "The Position of the Mining Industries in Wartime," on January 8, and Rev. Salem Bland, D.D. '03, speaking on "What Queen's Did For Me," on January 22. These meetings are proving popular with the branch members, and any graduates living in Toronto who would like to receive notices should get in touch with the secretary, J. A. Bell, Sc. '24, 19 Jackson Ave.

ALUMNI NEWS

Births

Aylesworth — On January 25, to J. B. Aylesworth, Arts '20, and Mrs. Aylesworth, Windsor, Ont., a daughter.

Baker—At St. Joseph's Hospital, London, Ont., on January 27, to W. W. Baker, Sc. '28, and Mrs. Baker, a son (William Hall).

Bonfield—At the Ottawa General Hospital, on January 26, to Dr. J. P. Bonfield,

Med. '29, and Mrs. Bonfield, a son.

Byrne—On January 3, at St. Michael's Hospital, Toronto, to N. W. Byrne, Sc. '36, and Mrs. Byrne, a son (Norman John).

Carr—At the Private Patients' Pavilion, Toronto General Hospital, on January 24, to W. P. Carr, Com. 34, and Mrs. Carr, a

Curtis—At the Kingston General Hospital, on January 30, to Prof. C. A. Curtis, of the department of economics at Queen's, and Mrs. Curtis, a son.

Cushnie — At Sensen Brenner Hospital, Kapuskasing, Ont., on January 16, to G. W. Cushnie, Arts '33, and Mrs. Cushnie, a

daughter (Elizabeth Anne). Hinchley—At the Owen Sound Hospital, Owen Sound, Ont., on January 9, to J. M. Hinchley, Arts '25, and Mrs. Hinchley, a

Ingles—On December 28, to Capt. C. L. Ingles, Sc. '34, and Mrs. Ingles, of Halifax, N.S., a daughter (Joan Adelaide).

King—At St. Mary's Hospital, Timmins, Ont., on January 6, to R. B. King, Sc. '35, and Mrs. King, a son (Robert Alex).

Pelletier—At Sudbury, Ont., on January 4, to R. C. Pelletier, Sc. '36, and Mrs. Pelletier, a son.

Stevens—At the Women's College Hospital, Toronto, on January 19, to E. C. Stevens, Arts '37, and Mrs. Stevens, a son.

Stirtan—At Grace Hospital, Ottawa, on September 29, 1939, to E. W. Stirtan, Arts '37, and Mrs. Stirtan (Kay McCreary), Arts '30, a son (George Everett).

Thompkins — At South Porcupine, Ont., on January 11, to R. W. Thompkins, Sc. '33, and Mrs. Thompkins, Timmins, Ont., a son (Russell Brian Edison).

Marriages

Ault—On January 27, in St. Andrew's Presbyterian Church, Ottawa, Christine Elliot Murray to Flying Officer George Ault, Arts '35. Miss Helen Ault, Arts '41, was a bridesmaid.

Bateman—Recently, at the home of the groom's father, Mr. G. C. Bateman, Sc. '05, Toronto, Avis Walker, of Providence, R.I., to Dr. John Danvers Bateman, Arts '36 (Ph.D. Yale), Sudbury, Ont.

Freeman-At the parsonage of the First Baptist Church, Kingston, on January 8, Flora MacLeod, Winnipeg, to Dr. Horace David Freeman, Med. '37. They are living at Harrowsmith where Dr. Freeman has started in private practice.

Gates—At Princess Street United Church parsonage, Kingston, on December 30, Helen Irene Beck to Charles Rexford Gates, Arts

Keith—At St. Luke's Church, Winnipeg, in January, Gwendoline Joan Watson to Lieut. Robert McDougall Keith, Com. '35.

They will reside in Vancouver.

MacTavish—On January 6, at the home of the bride's parents, "Casa Loma," Ottawa, Ont., Janet Southam to Duncan K. MacTavish, K.C., Arts '20. R. W. Southam, Arts '36, was an usher.

Sager—In the Morgan Memorial Chapel, Queen's University, on January 20, Hilda Margaret Scott to Cecil Harrison Sager, Sc. '36.

Telfer—On January 1, at St. Thomas's Church, Belleville, Ont., Alice Elizabeth Davison to Dr. Gordon William Telfer, Med. '31. They will live in Kingston.

Worral-Nelson—On June 17, 1939, Jean Nelson, Arts '34, to Dr. Joseph Dorman Worral, Med. '38. Dr. Worral is at present associated in practice with Dr. Pellow of Kingsclere, England. He expects to do postgraduate work in England later.

Unsworth — On December 22, in St. James's Anglican Church, Paris, Ont., Freda Rowlett to Willard Thatcher Unsworth, Sc. '35. They are living in Paris where Mr. Unsworth is chemist with the Gypsum Lime and Alabastine Company.

Deaths

Acres—Prominent in educational circles in the Ottawa Valley, Mrs. T. G. Acres (Mima Alexandra Ellis), Arts '08, died in Ottawa on January 15 at the age of sixtynine. Mrs. Acres was born in Pakenham township. She attended Pakenham and Almonte high schools, and took her first courses at Queen's extramurally in 1904. After two years of extramural work, she came to Kingston to complete the courses for her degree and also took several courses in the Faculty of Education. In 1908 she received her B.A. degree, and then attended the University of Toronto where she received a B.Paed. degree. Later she took

postgraduate work at Columbia University, after which she returned to become principal of Pakenham high school. For twelve years she held that position before becoming head of the science department of Arnprior high school. By special request, she undertook the organization work for a new high school in Nepean township, just outside the city of Ottawa, and her success is attested to by all the teachers and pupils of that school. She is survived by one sister. Her husband, Rev. T. G. Acres, predeceased her some time ago.

Cantelo—An honour graduate of Queen's who had high qualifications for his work as a teacher of chemistry and chemical engin-eering, Dr. Robert C. Cantelo, Sc. '13, died at his home in Morgantown, West Virginia, January 29, at the age of forty-eight. He had been ill during the past year. Cantelo was a native of St. Thomas, Ont. He attended the collegiate institute there and then came to Queen's, entering the Faculty of Applied Science. In 1913 he received the degree of B.Sc. in chemical engineering and became research chemist at the works of the Deloro Mining and Reduction Company. In 1914-15 he was an assistant in chemistry at Queen's and in that year was awarded the Science Research Scholarship to study at the Royal School of Mines at London, England. On his return he joined the staff of the Mines Branch, department of mines, Ottawa, as a chemist. In 1920, as a result of research on the extraction of gasoline from wet gases, he received the degree of M.Sc. from Queen's, and became a fellow in chemical engineering at the University of Toronto, a position he held for two years. He received his M.A. degree from University of Toronto. From Toronto he went to Bethlehem, Pa., as instructor and assistant professor at Lehigh University. In 1924 Dr. Cantelo joined the faculty of the University of Cincinnati, receiving his Ph.D. degree two years later. He returned to Lehigh University, and two years afterwards he went back to Cincinnati where he remained as professor of chemistry until 1933. In 1934 he joined the development department of the Sinclair Refining Company, East Chicago, Indiana. About two years ago he went to West Virginia. During his teaching career, Dr. Cantelo was the author of many scientific articles which won him recognition in the field of chemical engineering and thermo-dynamics. He was a member of the American Chemical Society. Surviving are his wife, one daughter, a brother, and two sisters.

Condell—Prominent specialist, Dr. William Newton Condell, Med. '98, died in Edmonton on November 9 at the age of seventy-three after a notable career. His death marks the passing of three members of the class of Med. '98 within recent months, Dr. C. E. O'Connor of Kingston, Ont., and Dr. C. J. McCambridge being the other two. Dr. Condell was born at Ventnor, Ont., the second of a family of three. Left fatherless at the age of two, he attended public school,

leaving when fourteen to learn a trade as carriage maker. When his apprenticeship was finished, he started westward and worked in Toronto, Detroit, and at several other places across the continent, finally arriving in California. In 1893 he returned home to visit his mother. Without any previously announced intention, he decided to return to school, entering Athens high school. A year later he enrolled as a student of medicine at Queen's. In 1898 he was awarded the M.D. and C.M. degrees, and started to practise at Spencerville, Ont. He married in 1899. After five years at Spencerville, he went to Edinburgh and London to take special courses in eye, ear, nose, and throat diseases, returning to Canada in 1906. Settling in Edmonton, Dr. Condell conducted a very successful practice until his death. He was predeceased in 1910 by his only child. Surviving are his wife and one brother.

Donoghue—Fatally injured in an airplane accident at McMurray, Alta., William B. Donoghue, Sc. '12, died in hospital on January 25. He was mill superintendent at Eldorado Mines, Great Bear Lake. Mr. Donoghue was born at Newmanville, Ont., in 1885. He enrolled in mining at Queen's in 1908 and graduated four years later with the degree of B.Sc. After five years' service with the 6th Field Company, Royal Canadian Engineers, and the Tunnellers during the Great War, he went to Peru where he joined the staff of the Cerro de Pasco Mining Corporation. He remained there until about 1933, with the exception of two years, 1926-27, which were spent at the Hollinger Mine. In 1933 he was employed at the Dominion government's fueltesting laboratory at Ottawa. He accepted a position at the Central Manitoba Mine, later going to God's Lake Mine, in Manitoba. In 1936 he went to the Bayonne Consolidated Mine, at Bayonne, B.C., and during the next two years worked at the Ymir and Dividend mines in British Columbia. Last year he became mill superintendent at the Eldorado Mine at Great Bear Lake. He is survived by his wife, three children, one brother, and three sisters.

Dowd—Well-known lawyer of Hull, Que., and prominent in the work of Ottawa service clubs, Clinton Hamilton Dowd, Arts '22, died in Montreal on January 19 at the age of forty-two. Mr. Dowd was born at Quyon, Que. He was educated at local schools and at Ottawa collegiate institute before entering Queen's in 1918. In 1922 he received the B.A. degree and then undertook the study of law at McGill University, obtaining his LL.B. in 1925 and his B.C.L. in 1926. In 1927, Mr. Dowd was admitted to the Bar of the Province of Quebec and took up practice in the city of Hull. He enjoyed the confidence of his colleagues, as shown by his election as secretary and later treasurer of the Hull Bar. He was a trustee of St. James' United Church, a member of the Board of Stewards, and president of the Men's Association in 1938. He served as pianist for the Kinsmen's Club for nine years and was president of that organization in 1937. He is survived by his mother and six brothers, including Dr. Robert A. Dowd, Med. '16, Osgoode, Ont.

Johnston — One of the most brilliant Medical students to graduate from Queen's in recent years, Dr. Robert Johnston, Med.

'33, died at Tamworth, Ont., on January 27, at the age of thirty-seven. He was a native of Scotland, having been born in Stirling. He attended the high school there and then came to Canada and entered the Medical faculty at Queen's. Throughout his course he achieved the highest honours, as the list of his awards testifies: the Robert Bruce Scholarship, 1928 and 1930: Faculty scholarship.

DR. R. JOHNSTON

Scholarship, 1928 and 1930; Faculty scholarship, scholarship, 1932; D. E. Mundell scholarship, prize in medicine and clinical medicine, Canadian National Committee for Mental Hygiene scholarship in psychiatry, professor's prize in pathology, professor's prize in surgery and clinical surgery, medal in medicine, and medal in surgery, 1933. After graduation, Dr. Johnston interned at Kingston General Hospital and later took up a practice at Tamworth, north of Kingston. The funeral was held at the Masonic Temple, Kingston, under the direction of Lorne Masonic Lodge, Tamworth. Dr. Johnston is survived by his wife, three sisters, and two brothers.

McCambridge—Prominent physician and surgeon of Poughkeepsie, N.Y., Dr. Charles J. McCambridge, Med. '98, died at his home on January 8 at the age of sixty-four. Dr. McCambridge was born in Kingston, Ont., and attended the collegiate institute there before entering Queen's in 1894. After four years he graduated with the degrees of M.D. and C.M. and went to Gouverneur Hospital, New York City, for his internship, specializing in obstetrics and gynae-cology. In 1899 he set up a practice at Poughkeepsie where he has been ever since. During his forty years there he created an enviable reputation as an obstetrician and it is recorded that he attended 4,000 cases. In 1912 he went to Ireland for postgraduate work at the Dublin Rotunda, and he was a frequent visitor at the Crille clinic at Cleveland, the Mayo clinic at Rochester, Minn., and the Leahy clinic at Boston. In 1914 Dr. McCambridge was influential in the founding of St. Francis Hospital, Poughkeepsie, a project that engaged his attention for many years. For the last seven years he was surgeon for both the New York Central and New Haven railroad companies, a member of the staffs of St. Francis', Vassar, and Browne Memorial hospitals, and a consultant of the Hudson River State hospital. Surviving are his wife, three children, one sister, and three

brothers of whom two are Queen's alumni, Dr. J. E. McCambridge, Med. '03, Pough-keepsie, and Dr. L. A. McCambridge, Med.

'07, Kingston, N.Y.

Quinn — John Francis Quinn, Arts '15, teacher at Regiopolis College, Kingston, for twenty-nine years, and beloved as a friend and counsellor, died suddenly on January 28. He was born on Garden Island in 1864, the son of a ship-builder. After attending local schools and St. Catharine's collegiate institute, he began a teaching career which lasted until his retirement five years ago. In 1909, at the age of forty-five, he took his first courses at Queen's. For three years he attended summer school and then completed the requirements for his B.A. degree in 1915 through extramural study. For several years Mr. Quinn taught at Arnprior, later returning to Kingston to become a master at Regiopolis College. Through three decades his fame grew as a teacher and friend, and at the centennial of the College, celebrated last year, tribute was paid by former students now scattered across the country. Not only through his ceaseless efforts on behalf of his boys in the classroom was Mr. Quinn known; his activities for the promotion of clean sport were appreciated by all who knew him. With a vast store of hockey knowledge at his command, he developed many star players and brought recognition not only to Regiopolis College but to Kingston. Among the famous players who received their start from him were Bill and Bun Cook, formerly of the New York Rangers, and "Flat" Walsh, now coach of Queen's senior hockey team and former National Hockey League goal He is survived by his wife, one daughter, Mrs. E. K. Sauer (Eleanor Quinn), Arts '20, Regina, and four sons, Dr. Karl V. Quinn, Med. '24, Wrentham, Mass., A. F. Quinn, Sc. '31, Schumacher, Ont., James Quinn, Arts '20, and John Quinn, Sc. '33.

Smith—Alexander Lillie Smith, K.C., Arts '83, a director of the Trusts and Guarantee Company and well-known barrister, died January 26 at his home in Toronto in his seventy-sixth year. Mr. Smith was active in the interests of the Conservative party during his residence in eastern Ontario and was once president of the Conservative Association of Glengarry and Stormont. Born at Pakenham, Ont., he received his early education from his father and at Cornwall Collegiate, matriculating at the age of thirteen. Two years later he entered Queen's, and graduated in 1883 with the B.A. degree. He attended Osgoode Hall, and was admitted to the Ontario Bar in 1886. Mr. Smith opened a law office in Alexandria, Ont. where he became active in municipal and political affairs. He served for several years as town clerk and was elected mayor in 1909. Moving to Cornwall in the same year, Mr. Smith became associated with members of the syndicate responsible for the development of the Hollinger Consolidated Gold Mines. He served as president of the Canadian Mining and Finance Company, Limited. During his residence in Alexandria, he organized the Independent Order of Foresters and at one time was High Chief Ranger for Ontario. He moved to Toronto in 1922. He is survived by his wife, five children, and two sisters.

Van Dusen-Eldon Manley Van Dusen, Arts '06, died at his home in Far Rockaway, N.Y., on January 25 at the age of seventy-Mr. Van Dusen was a native of Ontario, but had been a resident of the Long Island town for thirty-five years. He was born at Point Traverse, Prince Edward county, and commenced his teaching career at the age of seventeen. After spending two years in rural schools, he entered Queen's as an extramural student. In 1903-04 he attended the University intramurally, but finished the remainder of his Arts course by correspondence, receiving the B.A. degree in 1906. He then went to New York where he studied business and administration, and was employed by a Manhattan engineering firm for a time, later teaching in a business college. Mr. Van Dusen was then appointed to the teaching staff of the Far Rockaway high school, where he remained until his retirement three years ago. In 1920 he became head of the commercial department at the school. In a farewell dinner at the time of his retirement, high praise for Mr. Van Dusen was bestowed by all his associate teachers and his pupils. Surviving are his wife and one daughter.

Notes

1890-1899

Rev. W. H. Cram, Arts '96, Theol. '00, has resigned as minister of Ottawa West United Church.

F. P. Gavin, Arts '96, has been for a number of years principal of the Ontario Training School for Teachers, Hamilton, Ont.

Rev. Dr. H. R. Grant, Arts '93, is minister emeritus of St. Andrew's Presbyterian Church, Fort William, Ont. He lives at 214 South Norah St.

Dr. A. A. Metcalfe, Med. '96, has been elected chairman of the Almonte, Ont., public utilities commission.

Dr. J. H. Putman, Arts '99, D.Paed. '10 (LL.D. Toronto), Ottawa, was bereaved on January 8 by the death of his wife.

J. W. Rawlins, Arts '99, Sc. '01, Toronto, was elected president of the Association of Professional Engineers of Ontario at a general meeting held recently in Toronto.

eral meeting held recently in Toronto.

Dr. A. L. Tinkess, Med. '98, has practised for many years in Watertown, N.Y., where his address is 114-120 Stone St.

1900-1909

Dr. E. L. Bruce, Sc. '09, Arts '11, Miller memorial research professor of geology at Queen's, addressed a meeting of the Life Underwriters Association of the Kingston district on January 12, dealing with the subject of Finland's nickel mines. Dr. Bruce made an extensive tour of the Scandinavian countries three years ago.

Rev. A. D. Cornett, Arts '07, Theol. '11, has resigned his pastorate of the United

Church in Smiths Falls, Ont., which he held

for the past seven years. Dr. T. S. Duncan, Arts '03, is on the staff of Washington University, St. Louis, Mo. J. J. Edwards, Arts '06, has been Ontario

public school inspector for Lambton East since 1922.

Dr. T. J. Goodfellow, Arts '07, Med. '09, eye, ear, nose and throat specialist at Saratoga Springs, N.Y., was admitted to membership in the Academy of Opthalmology and Otolaryngology at the annual meeting of that body held at Chicago in October.

W. M. Goodwin, Arts '09, Sc. '11, is consulting engineer for Seal Harbour Gold Mines, Goldboro, N.S., and for Mineral In-

dustries Limited, Saint John, N.B.

J. M. Macdonnell, Arts '04, president and general manager of the National Trust Company, Toronto, was recently elected to the board of directors of the Canada Life Assurance Company.

Alex McNaughton, Med. '05, is city clerk

at Fort William, Ont. W. J. Saunders, Arts '00, has retired from the principalship of the high school in Almonte, Ont., and is now living in Kingston.

Dr. B. L. Wickware, Med. '09, practises

in Perth, Ont.

N. B. Wormith, Arts '05, and Mrs. M. J. Rodden (Mildred Wormith), Arts '15, were bereaved on January 10 by the death of their father at Kingston.

1910-1919

Dr. Alan Bateman, Sc. '10 (Ph.D. Yale), professor of economic geology at Yale, has been elected president of the Society of Economic Geologists for 1940-1941.

Roger Clarke, Sc. '13, has resigned as assistant editor of the "Canada Year Book" and is now devoting all his time to fruit farming at "Bonnybank," Jordan, Ont. Mrs. Clarke was Muriel Shortt, Arts '09.

H. J. Coutu, K.C., Arts '14, is practising law in Prince Albert, Sask. His offices are

in the Imperial Bank Building.

Dr. D. R. G. Cowan, Arts '17 (Ph.D. Minnesota), chief statistician, commercial research department, Swift and Company, Chicago, has been elected president of the American Marketing Association. Dr. Cowan has made many contributions to marketing procedure, his best known work being "Sales Analysis from the Management Standpoint," a volume published in 1938. Dr. R. A. Dowd, Med. '16, is practising

in Osgoode, Ont.

W. O. Erb, Arts '15, teaches in the high

school at Niagara-on-the-Lake, Ont.

Dr. J. G. Ettinger, Arts '13, LL.D. '35, has been elected chairman of the Board of Education at Kingston.

F. A. Herman, Sc. '17, is chemist in charge of the Department of Agriculture's experimental station at Kentville, N.S. B. W. W. McDougall, Arts '12, Sc. '13, is

a consulting mining engineer in Vancouver, with offices in the Bank of Nova Scotia Building.

D. H. McGill, Arts '14, has been teaching in Orillia since graduation, with the exception of five years spent in Ingersoll, Ont.,

"Is it true what they say about Ted and Mary?" "Well, he is sending her a lot of Sweet Caps."

SWEET CAPORAL CIGARETTES

where he was principal of the high school. When Mr. and Mrs. McGill recently celebrated their silver wedding anniversary his staff at the Orillia Collegiate Institute made a presentation to them in honour of the occasion. Hugh McGill, Sc. '40, is a son.

N. B. MacRostie, Sc. '11, Arts '14, of Ottawa, has been appointed assessment com-

missioner for Gloucester township.

A. A. Paoli, Arts '15, Sc. '17, has been appointed general sales manager of the Vulcan Iron Works, Winnipeg, Man. For the past six years he was manager of mining machinery sales for the company. Mr. Paoli was also recently elected vice-president of the Manitoba branch of the Canadian Institute of Mining and Metallurgy.

Rev. G. R. Tench, Arts '10, who left his missionary work in Japan a few years ago because of ill-health, is now minister of the

Unitd Church at Ashcroft, B.C.

1920-1929

M. H. Baker, Arts '29, has been teaching at North Toronto Collegiate Institute since 1932.

W. W. Baker, Sc. '28, is district engineer for the Hydro Electric Power Commission of Ontario, with headquarters in London, Ont.

Miss Gertrude Best, Arts '23, Miss Evelyn Best, Arts '33, and Miss Ruth Best, Arts '38, were bereaved on January 20 by the

death of their mother at Ottawa. Dr. J. K. Bigelow, Med. '24, who has practised for some time in Lethbridge, Alta., recently formed a clinic there with Dr. D.

B. Fowler and Dr. A. R. Gordon.

Dr. Ford Connell, Med. '29, associate professor of medicine at Queen's, addressed the Toronto East Medical Association at their January meeting held in the Toronto East General Hospital on January 17. His subject was "Praecordial Pain." Dr. Connell also addressed a reorganization meeting of the Renfrew County Medical Association held in Renfrew recently.

D. L. Coulter, Sc. '23, is assistant manager of Silbank Premier Mine, Premier,

B.C.

C. F. Davison, Sc. '26, is superintendent of chemicals at the Windsor works of Canadian Industries Limited.

Dr. D. D. Hall, Med. '21, who has practised for many years in Napanee, Ont., was recently elected mayor of the town.

John Hunter, Arts '21, is farming near

Barrie, Ont.

A. H. Lemmon, Arts '29, of the Canada Life Assurance Company, has been promoted to assistant treasurer of the company. He was formerly supervisor of the bond department.

Dr. S. W. McIlmoyl, Arts '26, Med. '28,

is practising in Troy, N.Y.

Dr. P. A. McLeod, Arts '21, Med. '26, assistant professor of obstetrics and gynaecology at Queen's, had a paper published in the January issue of the Canadian Medical Journal on "Maternal Mortality from the Viewpoint of the Obstetrician."

Dr. W. M. McNeely, Med. '22, has been medical superintendent of Essex County Sanatorium, Windsor, Ont., for the past nine

G. M. Mather, Arts '26, is inspector of public schools in Woodstock, Ont.

Ralph Matthews, Arts '26, is with the Canadian Pacific Railway Company at Victoria, B.C.

Miss Elizabeth Shantz, Com. '27, is teaching in the collegiate and vocational institute

in Oshawa, Ont.

E. B. Taylor, Com. '29, is assistant manager of the brokerage firm, R. Moat and

Company, Kingston. G. C. Toner, Arts '28, spoke on "Fishery Problems" at the annual convention of the Ontario Federation of Anglers held in Toronto on February 13.

1930-1939

M. C. Aikens, Sc. '33, formerly with the London Life Insurance Company, Kitchener, Ont., has been transferred to Sudbury where he is district superintendent.

J. L. Alexander, Sc. '39, is in the maintenance department of the Ontario Hydro Electric Power Commission. His headquar-

ters at present are in Fraserdale.

W. W. Bake, Sc. '33, formerly at Lamaque Gold Mine, is now shift-boss at the Chesterville Gold Mines, Cheminis, Ont.

R. W. Ball, Arts '37, is with the advertising department of the E. B. Eddy Company, Hull, Que.

R. D. Barker, Arts '37, is with the Goodyear Tire and Rubber Company in Winnipeg.

A. K. Bayles, Sc. '38, has been transferred from the Algoma Steel Corporation to the Algoma Ore Properties Limited. His address at present is Helen Mine, Ont.

J. W. Beckham, Sc. '38, is with the Jer-

ome Gold Mines, Biscotasing, Ont.

E. G. Berry, Arts '36, is doing private research work with Prof. Werner Jaeger at Harvard University.

Dr. D. M. F. Biehn, Med. '37, has started

a practice in Fairfield, Conn.

W. D. Birch, Sc. '39, is in the erection department of the Lake Erie Engineering Company, Buffalo, N.Y.

Dr. S. E. Bishop, Med. '38, is interning

at the Civic Hospital, Ottawa.

Misses Barbara Bolton, Stuart Chubb and Eileen Graham, all of Arts '39, are working in the Foreign Exchange Control Board, Ottawa.

Dr. J. E. Boucher, Med. '35, is in general

practice at North Chelmsford, Mass.

Miss Evelyn Boyd, Arts '32, is teaching in the high school at Sturgeon Falls, Ont. Miss Kathleen Brockel, Arts '38, is teach-

ing at Kirkland Lake, Ont.

Miss Verna Burgess, Arts '36, is teaching in the Queen Alexandra public school, Peterborough, Ont.

R. H. Burton, Sc. '38, is assistant engineer and part-time shift-boss for the Cournor Mining Company at Perron, Que.

J. B. Chalmers, Sc. '32, was recently appointed general manager of Canadian Safety Fuse Company, Brownsburg, Que. He was formerly chief chemist.

R. E. Clarke, Sc. '35, of the Ontario Department of Highways staff at Kingston, is at present doing airport survey work at Deseronto. K. B. Andre, Sc. '37, is also engaged in the same work.

Miss F. Marion Clarke, Arts '38, is teaching mathematics and dancing at the Baldwin School, Bryn Mawr, Penn. She is also continuing her postgraduate studies at Bryn

Mawr College.

Miss Marie Cole, Arts '38, is teaching in the continuation school at Brooklin, Ont.

A. E. Cooper, Sc. '35, formerly of Frost and Wood Company, Smiths Falls, Ont., has joined the firm of C. Richardson and Son, Limited, St. Mary's, Ont., where he is doing design and development work.

B. M. Cooper, Arts '39, is studying medicine at McGill University.

J. M. Cormie, Sc. '33, is geologist at Preston East Dome Mines, South Porcupine,

Miss Lois Craig, Arts '39, is principal of the continuation school at Kars, Ont.

H. M. Cunningham, Com. '39, has joined the credit department of Canada Packers

Limited, Toronto. H. W. Davidson, Com. '34, is now assistant comptroller of the National Drug and

Chemical Company, Montreal.

A. B. Dove, Sc. '32, of the Steel Company of Canada, had an article in the December issue of the "Journal" of the Engineering Institute of Canada entitled "The Manufacture of Wire for Use in Wire Ropes."

Miss Clara Feller, Arts '37, is a nursein-training at the Women's General Hospital, Montreal.

R. N. Ferguson, Sc. '38, is mill laboratory assistant at the International Nickel Com-

pany, Copper Cliff, Ont.

F. J. Fortier, Com. '37, of the Northern Electric Company, has been transferred from Montreal to Ottawa.

Dr. Harold Frank, Med. '35, is assistant physician at the Ontario Hospital, Hamil-

ton, Ont.

A. L. Furanna, Sc. '39, is back at the University this session as a demonstrator in the electrical engineering department.

W. D. (Red) Gilmore, Arts '32, has been teaching in Oakwood Collegiate Institute, Toronto, for the past four years.
G. M. Godfrey, Sc. '38, has been for the

past year on the engineering staff of Preston East Dome Mines, South Porcupine, Ont.

R. J. Goodwillie, Arts '33, is with Atlas

Steels Limited, Welland, Ont.

Lorne Greene, Arts '37, is with the Cana-

dian Broadcasting Corporation, Ottawa.

J. W. Grimmon, Arts '32 (B.Paed. University of Toronto), has been principal of the high school at Elora, Ont., for the past two

J. W. Hay, Sc. '39, is with the Britannia Mining and Smelting Company, Britannia Beach, B.C.

A. R. D. Hazelgrove, Sc. '39, is with Canadian Industries Limited, Toronto.

SPUN (Reg'd.)

A resilient, long-fibred insulation made from molten rock. Proof against Fire, Vermin, Vibration and Corrosion. Recommended for cold-storage; sound-proofing and acoustical treatments; all industrial purposes up to 1000 F. Made in standard forms for home insulation; exported in bulk form.

Spun Rock Wools Ltd.

HIS EXCELLENCY, BARON TWEEDSMUIR OF ELSFIELD 1875—1940

TRIBUTE TO LORD TWEEDSMUIR

Delivered by Vice-Principal W. E. McNeill at the Memorial Service Held in Grant Hall on February 14

THIS hour, though shadowed with sadness, is lighted with gladness. A knightly spirit has gone by to the sound of triumphal acclamations:

Servant of God, well done. well hast thou fought
The better fight.

That the dust of the ground can take so valiant a shape is the urge of our striving. That the dust of the ground can flower so whitely into virtue is the end of our hoping.

Once more the idealism of a Scottish manse has enobled a life and enriched the world. Once more the English Bible has been a lamp to a wayfarer's feet and a light to his path.

"They that wait upon the Lord shall renew their strength; they shall mount up with wings as eagles; they shall run and not be weary; and they shall walk and not faint."

In this hall Lord Tweedsmuir gave his own interpretation:

"It sounds like an anti-climax, like a descent from the greater to the less. But I think the meaning is exactly the opposite. It is an ascent from the easy to the difficult. It is the last feat which is the hardest. It is not so difficult in a great crisis to rise like eagles; it is not so difficult in moods of excitement to run and not be weary. But most of the world's work has to be done at a foot's pace, and the hardest task of all is to walk the prosaic roads of life and not faint."

There he spoke from his heart. His soaring spirit, though disciplined to lowly tasks, longed for adventurous flights. He was born beside the River Tweed in the romantic border land, whose tales and songs entering the blood of a lame boy called Walter Scott had turned him into

a knightly figure. To John Buchan the same voices spoke. His imagination grew large, an unquenchable zest for life burned in his veins, a passionate love of country shaped his mind. Scott was his first hero, then Stevenson, then Scott again unto the end. A Scottish manse gave him idealism; the English Bible taught him to serve his fellow men; but Sir Walter Scott made him one in mind with the heroes of old. Though, like Scott, most of his work was in the writing of books, he would rather have been a soldier. He inherited Scott's bold and adventurous spirit, his courage, his kindliness, his wholesomeness, his complete sanity, his love for dogs and horses, his liking for the plain man. Fragile in appearance and never strong physically, he desired hard adventurous tasks, but with a frolic welcome he took what came. He found life good in all its diverse forms. In fiction he roamed in greatest happiness with Ulysses, the very symbol of the adventurous warrior, but he joyed next in the company of Falstaff, the chief of Shakespeare's wits and sinners, and of poor old Sairey Gamp, Dickens' bibulous fat nurse with the moisty eye. These he would have most liked to meet if characters could walk out of books in flesh and blood. But the author whom, if he could, he would bring out of heaven to be his shoulder companion on earth was Sir Walter Scott, lover of life.

As a youth of twenty-three, with the Universities of Glasgow and Oxford behind him but with no visible future before him, he prayed that his dreams might come true:

O Thou to whom man's heart is known, Grant me my morning orison. Grant me the rover's path to see The dawn arise, the daylight flee. In the far wastes of sand and sun Grant me with venturous heart to run On the old highway, where in pain And ecstasy man strives amain . . . Grant me the joy of wind and brine, The zest of food, the taste of wine, The fighter's strength, the echoing strife,

The high tumultuous lists of life

The high tumultuous lists of life . . . May I ne'er lag nor hapless fall, Nor weary at the battle call.

The prayer was answered. The brimming cup was presented to his lips. Timeless Wisdom worked her will.

Law was tried but found too dusty. So to South Africa where the Boers were fighting. Thrilling days: Secretary to Milner; trooper in the Rand Mounted Rifles; helper at the peace council table, watching the masterful Kitchener. Back to England to the congenial adventures of a publishing house and the romance of journalism. Then war again; once more a soldier; headquarters staff in France, Director of Information for the Government; later historian of the war. Then in succession the House of Commons, Lord High Commissioner to the Church of Scotland, the peerage with the title of Lord Tweedsmuir to record his love of the pebbled River of his boyhood; the post of Governor-General of Canada; official functions which he faithfully discharged but without heart. What he did love was the romance and adventure of a new land. He saw its mines and its wheat fields, its lumbering and its fishing. He travelled by canoe and airplane. He went deep into the Arctic circle—everywhere with the desire of knowing at first hand the men who with brawn and brain are building a new nation. His mind was stirred by the vast mysterious north, with its invitation to adventure, with its challenge to courage and resource. Undeveloped Canada called to all the deep places of his soul.

And then by way of contrast—Chancellor of the University of Edinburgh; constant writing—sixty books in all of biography, history, and romance: constant speaking, living a gracious life, winning all hearts.

This was a man indeed. He was presented for an honorary degree at Yale

with the words, "He is the kind of man every young man would like to be."

And now let him speak in his own words. As one who had stood before kings and was himself vicariously a king, what was his notion of sovereignty?

"The essence of the British monarchy," he has written, "is that the King, while lifted far above the Nation, should also be the nation itself in its most characteristic form. There is no place on our throne for the superman, whether he be conqueror or dreamer; its occupant must be recognized by his subjects as of like nature with themselves, exalted indeed, but with the same outlook on life, the same traditions and tastes, the staunch and familiar virtues—In the Platonic Utopia the King was the philosopher; it is more important that he should be the plain man. With the Queen to help him, he has made Britain not only a nation, but a household."

As Lord Tweedsmuir once said, his official position did not permit him to express political opinions. He had to confine himself to Governor Generalities. Yet he was able to say the things closest to his heart.

SAYINGS FROM THE HEART

Of the British and French relationship: "Canada is a North American nation with a jealously maintained European connection. She has therefore many problems in common with the United States, and certain others due to her membership in the British Empire. That is to say, she has affiliations with the world at large which differentiate her from other North American peoples . . . I like to think of her with her English and French peoples, as in a special degree the guardian of the great Mediterranean tradition which descends from Greece and Rome, and which she has to mould to the uses of a new world."

Of relations with the United States:

"I believe . . . that on a close understanding between the British Commonwealth and the Republic of the United States depend the peace and freedom of the world. . . . There is no other pair

of nations so closely linked together." And then with a flash of his ready wit, so revealing, so endearing, he dismissed Henry James's desire that the United States might have the "close and complete consciousness of the Scots." "What would happen," he asked, "if you had 120,000,000 Scotsmen living in the same country?"

RIGHTS OF MAN

He was a constant champion of the rights of man:

"The essence of the Reformation was the restoration of the importance of the individual soul and of the value of the individual judgment."

"The State must not be a machine to crush and blur that most precious thing,

the individuality of the citizen."

Like Tennyson, he feared the falsehood of extremes. "Extreme courses," he has said, "are easy to follow. They only require blind eyes and a hot temper."

He had a sense of history and a respect for the past. "Every problem is long descended." "The councils to which Time is not called, Time will not ratify," he quoted from Sir Walter Raleigh. True progress, he asserted, is an organic thing like the growth of a tree. Nothing good comes from "the rootless progressive who is crazy about anything, however foolish, provided it is new."

He exalted the mind:

We "must reverence human reason, not because it is infallible, but because it is the best thing we have got."

In education, we must have humane studies, which broaden human interests. "A university cannot be too practical in the right sense. . . . But first and foremost it must make . . . citizens in the full sense, citizens of Canada, citizens of the British Commonwealth, citizens of the immortal kingdom of mind and spirit."

Above all, he was ever urging the good life.

Our task, our urgent task, he constantly said, is to adapt our creations to the higher purposes of humanity, to harness them to the uses of a better life. With Socrates he prayed, "Grant to me to be-

come beautiful inwardly, that all my outward gifts may prosper my inner soul."

So for five years he taught and wrought, giving freely the fruits of a rich life and of an abundant mind, leading this young nation to the heights.

All fires burn out at last.

"The sweetest canticle," wrote Francis Bacon, "is *Nunc dimittis*, when a man hath obtained worthy ends."

God accept him, Christ receive him.

STAFF AND STUDENTS ATTEND MEMORIAL SERVICE

In a solemn memorial service held in Grant Hall on February 14, Queen's University staff and students paid last tribute to Lord Tweedsmuir, Governor-General of Canada.

Rev. Dr. J. R. Watts, acting principal of Queen's Theological College, conducted the brief ceremonies. Dr. W. E. McNeill, vice-principal and treasurer of Queen's University, delivered the address, printed in full elsewhere in this issue. Members of the University staff were seated on the platform.

Dr. Frank L. Harrison, resident musi-

cian, was at the organ.

LORD TWEEDSMUIR VISITED QUEEN'S TWICE

TWO visits of Lord Tweedsmuir to Queen's during his term of office as Governor-General of Canada were recalled by the news of his passing.

At a special Convocation on November 7, 1936, Queen's bestowed on Lord Tweedsmuir an honorary Doctor of Laws degree. His Excellency gave a splendid address entitled "The Moderate Man," which subsequently was printed in the Review. As he was speaking principally to those starting out on their careers, Lord Tweedsmuir said it seemed an appropriate occasion to mention "a type of character [the moderate man] which I believe to be estimable and worthy of all imitation, but which for the moment is unfashionable."

Prior to the Convocation ceremony, the C. O. T. C. mounted a guard of honour for the distinguished guest. In the after-

noon His Excellency attended a Queen's-Varsity football match at which the students presented him with a tam. Lord Tweedsmuir thus became both a graduate and freshman on the same day. The Queen's team celebrated the happy occasion, which was also Reunion week-end, by defeating Varsity 6-1.

The second visit of Lord Tweedsmuir to Queen's was in June, 1937, when he addressed the second Conference on Canadian-American Affairs. His Excellency spoke to the members at a luncheon in his honour, at which Owen D. Young, LL.D. '33, industrialist and world figure, acted as toastmaster.

THE MINING INDUSTRY IN WAR TIME

600311119Jeststatetofittittstletattittetethethethitational

By G. C. Bateman, Sc. '05

Secretary-Treasurer, Onlario Mining Association

In 1914 the mining industry in Canada was relatively small and relatively unimportant, and it did not stand very high in the public estimation. Since that time a tremendous change has taken place. Mining is now one of our greatest basic industries and is recognized for its important contributions to our national economy.

It seems to me that it may be worth while to review the great changes that have taken place in order to obtain a proper perspective for our estimate of the contribution that the industry can make to the struggle in which we are engaged. It seems particularly opportune to do so at this time because I believe that we are facing new conditions and profound changes, as a result of the war.

Of all the countries of the British Empire, Canada, for a number of reasons, is probably in the best position to make the greatest contribution. We are practically free from the danger of air raids, we have large supplies of raw materials, and our manufacturing facilities in proportion to our population are probably greater than any other country. We are in close proximity to and on the most friendly basis with the United States, which can supply not only many of the essential materials for war production, but, what is also very important, the research and technique necessary for the production of certain types of equipment. We are also relatively close to England. Because of all these factors Canada will be essentially a base for supplies. contributions in this respect will reach a

magnitude never before dreamed of. It will probably result in a great dislocation of industry before we reach our maximum effort. Manufacturing facilities will have to be turned to types of production that will be unremunerative when the war ends. Consumption in many lines will be curtailed, because undoubtedly as our facilities and labour are required for war production a larger measure of government control will be exercised.

We are already subjected to a rigid financial control. It is only a step further, and not a long step, to have this control extended to industry. Where the government is the principal buyer it is perhaps only natural to expect that the government will have a good deal to say in the conduct and operation of war industries, but in my opinion it will not stop there. I believe that as the available labour is absorbed in war production and the need for men becomes more pressing, government control may be exercised to curtail certain non-essential industries.

With greater employment and more money in circulation, we might, unless restrictions are imposed, find luxury goods competing for labour and capital with war industries. I do not believe this will be allowed. I think we will find the Government saying to some industries, "You cannot expand your operations"; saying to others, "You can operate at only a certain percentage of your capacity"; and perhaps saying to others, "You must close down because your men are needed in other places for more important work." We have already seen

some evidence of this in industries that certainly cannot be classed as luxury trades.

Now all of this will mean a great dislocation in industry generally, but fortunately mining is one industry that is best able to stand the shock of such changes. This is partly due to the fact that it is non-competitive, to a large extent, and that it is already in a high state of efficiency. Because the industry is largely non-competitive, there are practically no secrets. Research and experimental work are going on continually. Those who have found out something new, those who have discovered a better and more efficient way of doing things are glad to pass this knowledge on so that others may have the benefit. Because the industry is relatively young and prosperous it can afford to install the best and latest types of equipment. As a result, I believe that the mining industry as a whole is in a higher state of efficiency, both mechanically and technically, than any other industry in Canada. Mining does not have to be geared up for war effort as it is already operating at full capacity and does not have to discard obsolete methods and machinery. This is a remarkable position for an industry that has so many relatively small units. It would be impossible without the interchange of information through such media as the Mining Institute and the technical press, where details of the latest and best practices are made available to the largest as well as the smallest operator.

THE MINING CONTRIBUTION

So much for the probable effects of the war, or at least what I believe will be the probable effects, and about the readiness of the mining industry to meet the demands that may be made upon it. Now, I would like to mention the contribution that the industry can make, a very real contribution, both material and financial. When I say financial contribution, I do not mean taxes, although in 1938 Ontario mines alone paid between twelve and thirteen per cent of the total corporation taxes collected by the Dominion, but I believe

that the mines are entering the war with less expectation of war profits than most other industries.

At the present time we are all concerned with how Canada's resources may be most efficiently and economically used. Although the war has been in progress only a short time, one thing that stands out most clearly is the importance of mechanical combative equipment, as compared with the last war. Mechanized equipment, airplanes, guns, and shells will be required on a scale never dreamed of in the last war. If real fighting gets under way on the western front we will have to go to the moving picture studios for a phrase to describe the number of shells that will be needed and say that the demand will be "super-colossal." A short time ago I saw a statement by an American authority who said that the Allies would win the war through sheer weight of metal, and for the metals we must turn to the mines.

PRINCIPAL DIVISIONS

The principal divisions of the industry are base metals, precious metals, nonmetallics, and structural materials. Aside from asbestos and coal, non-metallic minerals are not produced in quantities that are desirable for a well-balanced industry. Structural materials are important, but if our experience in the last war is a guide, and it probably will be, we may expect to see a decline in the output of structural materials and a substantial increase in the production of metals.

Two of the most important non-metallic mineral products are coal and oil. While we have very large reserves of coal it is found only in the extreme East and West, so that central Canada is to a large extent dependent on supplies from the United States. However, war demands, increased manufacturing requirements, and the premium on the United States dollar will undoubtedly stimulate Canadian coal production.

The Empire, including the mandated territories, is deficient in oil supplies, producing only about one third of its requirements. Canada's only important

source is in Alberta. Production in this field has been expanding rapidly, having doubled from 1937 to 1938, with a further substantial increase for 1939, but the total will fall far short of Canadian requirements alone.

STRATEGIC MINERALS

Canada is also deficient in what are called the strategic minerals—molybdenum, manganese, tungsten, mercury, potash, and the like. Deposits of some of these are known and of these some will probably be worked. An active search will be carried on for additional deposits in the hope of at least partially meeting our requirements.

Of the base metals that are available, copper, nickel, lead, and zinc are the most important. We are in a more fortunate position with regard to these metals, having a large surplus over our own requirements, and our increasing production has enabled Canada to become the largest metal-exporting country in the world. Our greatest weakness in base metals to date has been in the lack of iron ore, and iron is the most important of all the metals in either peace or war. For many years and up until the outbreak of the present war, Canada did not produce a ton of iron ore. We were entirely dependent upon foreign ores, which had to be imported. However, the indications now point to this deficiency being at least partly remedied. Within the past few months, the new Helen Mine, owned by the Algoma Steel Corporation, has come into production, at the rate of between 300,000 and 400,000 tons a year, and this is capable of further expansion. In addition the Steep Rock Mine near Antikoken, a potentially large and important property, is under development and may come into production in the near future. With these sources available, Canada will be much better able to meet the demands for iron and steel products. From an importing nation we may eventually become an exporter of iron ore, thus providing foreign balances which will help to relieve our national economy.

During the last war the United States controlled copper, one of the most essential war metals. In 1913 the production of the British Empire amounted to only a little more than seven per cent of the world total; Canada produced less than four per cent, and none of this was refined in Canada. As a result of our dependence on other countries and as a result of war demands, the price of copper sky-rocketed to thirty-seven cents a pound. It was finally pegged by the United States Government at twentythree and a half cents, and later was raised to twenty-six cents, which price the Allies had to pay during the final period of the war.

PRODUCTION OF COPPER

During the past twenty years an amazing shift has taken place. To-day the British Empire produces more copper than the United States, and of the Empire production Canada accounts for about half. Empire countries will therefore be able to supply the Allies' war needs entirely from their own resources.

As a result Canadian and African producers have entered into an arrangement with the British Government under which they will supply copper at a little more than ten cents a pound. This price is about twenty-five per cent less than the Canadian equivalent of current prices in the United States, and is sixty per cent less than the price paid during the latter period of the last war.

Practically the same procedure has been followed in the case of lead, zinc. and nickel. Empire requirements are guaranteed from Empire sources at prices that are substantially below the prices now prevailing in the United States. However, the lead and zinc producers have gone the copper producers one better. Under agreements entered into with the British Government, lead will be sold at about three cents, and zinc three and a quarter cents a pound. These prices are only about one-half of the Canadian equivalent of current prices in the United States. During the last war zinc sold for twenty-seven cents a pound. Compare

that with the price of three and a quarter cents, under the recent agreement, and you will have a better appreciation of what the mining industry is doing.

These agreements call for the delivery of approximately one billion pounds of metal a year. The prices will average about three cents a pound less than current prices in the States. If you will convert this into dollars you will see why I said that the mines were entering the war with less expectation of war profits than most other industries.

Now this is really a remarkable achievement which would have been impossible without the development that has taken place in Canadian mining. The importance of this achievement is still further enhanced when you consider that in 1914 we did not refine a single pound of copper, nickel, or zinc, while our production of lead was small. Today we have refining capacity for about 150,000,000 pounds of nickel, 500,000,000 pounds of copper, and 700,000,000 pounds of lead and zinc, a year. This has enabled to guarantee the Empire's requirements of these metals at prices that mean a tremendous saving to Great Britain and also, incidentally, that mean a great sacrifice of possible profits by the producers. It sets an example that if followed by other Canadian industries and by Canadian labour will be of the greatest national importance.

ONTARIO NICKEL SUPPLY

Copper will be obtained from Canada and Africa, lead and zinc from Canada and Australia, but the nickel supply will come from Ontario. Ontario produces more than eighty per cent of the world's nickel, which is one of the important war metals. This virtual monopoly is not because Ontario is the only place where nickel is known, but because we have the tortunate combination of large deposits of high-grade ore amenable to treatment, from which nickel can be produced at a cost lower than anywhere else in the world. It is this which gives us our ad-There is as much or more nickel in other parts of the world as in Ontario, but some of it is very difficult to treat. There is sufficient refining capacity in Europe to supply Europe's peace-time demands for armaments, but this supply is entirely inadequate in time of war. With no difficulty, however, Ontario can meet any demands of the Allies for nickel.

CANADA'S GOLD PRODUCTION

Our gold production will play an entirely different, but nonetheless important part. It is not a war metal, but it provides the sinews of war.

In the last war Canada's gold production was relatively unimportant. branch of the industry was neither known nor appreciated by the government or the public. I am told that during the last war there was a discussion in Ottawa as to whether gold mining was not a nonessential industry that might better close down so that more men would be available for other industries. However, during the past ten years or so the situation has entirely changed. From a production of only \$16,000,000 in 1913, gold output has increased to an estimate of \$180,000,-000 for 1939, and is still increasing. During the depression years Canada's gold mines were the greatest stabilizing factor in our national economy. They helped to fill the gap in our exports caused by the falling off in manufactured goods and of the products of our farms, fisheries, and forests. More than any other single factor, the gold mines helped to maintain our national credit and enabled Canada to meet its foreign obligations in the terms in which they were contracted. Today they will play an even more important role.

Canada will undoubtedly have to do a great deal of financing for Great Britain. On the latter's account as well as our own we will have to make very large purchases in the United States, because it will be cheaper in the long run to buy many things there than to use our capital and labour for building and operating specialized plants that will be of little value after the war is over. With United States security markets closed to the

Allies the dollar exchange necessary to finance these purchases will become increasingly important. Of all the items that create dollar exchange, gold is not only the most important and the most easily marketed, but it is probably produced with a smaller expenditure of labour and capital than any other. It is the one form of export that is universally accepted, the one form of currency that never sells at a discount. Under present conditions, therefore, gold will be more essential than ever and increased production is a matter of vital concern.

ESSENTIAL INDUSTRIES

Both base- and precious-metal mining are considered as essential industries in which recruiting should not be carried on. Men engaged in the mines are already serving their country and making an important contribution to our war efforts.

Due to the high physical standards required by the industry and the low average age, Canadian miners probably represent the largest body of physically fit men in any industry in the Dominion. If the time comes when the demand for man power is greater than the demand for materials, the miners will be among the first to answer the call.

It is essential that we should distinguish clearly between what is true and what is false, between right and wrong, between duty and desire, and it is doubly important that we should do so under present conditions. There may be dislocation of industry, but we must be sure that our minds continue to think along straight lines. Individual desires must be sacrificed to national necessities. This war should be a co-operative effort in which each will give the best he has. Labour should not mar its fine contribution by taking advantage of the pressure of war conditions to make unreasonable demands. Similarly industry must not mar its efforts with any attempt to take advantage of its employees, the public, or the government. We must approach our task in a spirit of determination and sacrifice. We must do our present job well, but at the same time we should also plan for the future, plan to lay a foundation that will successfully withstand the shock of peace, because peace may bring problems almost as great as those of war.

FIREMEN'S TRAINING SCHOOL TO BE HELD AT QUEEN'S

DEMONSTRATIONS by the Ottawa and Kingston fire departments and addresses by members of the Queen's staff and others who are well qualified to discuss fire-fighters' problems will feature the two-day session of the firemen's training school to be held at the University April 11 and 12.

Prof. D. S. Ellis of the civil engineering department will give an address on "Hydraulics," and Dr. A. C. Neish, head of the chemistry department, will speak on "The Chemistry of Fire." Other lectures cover various phases of fire fighting, including salvage, electrical hazards, value of inspections, arson and sabotage, fire extinguishers, ventilation, and equipment for small municipalities.

First of its kind to be held in eastern Ontario, the school is under the auspices of the fire marshal of Ontario, the Dominion Association of Fire Chiefs, and the Department of University Extension of Queen's.

Gave Dedication Address

PRINCIPAL WALLACE was the guest speaker at a large meeting held under the auspices of the Rotary Club of Alexandria Bay, N.Y., on February 28. On this occasion welcome signs were placed on either end of the ninety-foot international span of the Thousand Islands Bridge. The Principal delivered the dedication address.

Broadcast Over CFRC

THE following took part during February in the regular week-by-week series of radio programmes sponsored by the University and broadcast over station CFRC: Miss Lenore Black, Prof. J. C. Cameron, Dr. E. M. Robertson, Mr. M. H. M. MacKinnon, Mr. M. W. Huggins,

Miss Florence Carson and Mr. James Allan, Mr. E. C. Kyte, Prof. L. F. Goodwin, Dr. H. B. Clarke, Mr. W. J. Coyle, the Faculty Players, Mr. Harold Williamson, Prof. R. L. Dorrance, Dr. Harrison

F. Lewis, Mr. George McEachern, Dr. Gregory Vlastos, Mr. I. Halperin, Prof. K. P. Johnson, Dr. F. L. Harrison, Rev. Elwood Lawson, Queen's Male Quartet, and Mr. H. J. Hamilton.

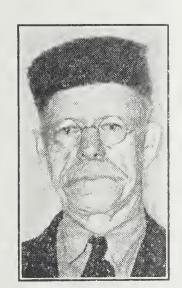

JOHN BAKER, Honoris Causa

By W. F. Rannie, Arts '38

IN a delightful little ceremony enacted in the New Medical Building on February 21. John Baker, beloved janitor for thirty-two years, was admitted to all the rights and privileges of a loved Queen's

man. Before a large gathering of members of the staff, Vice-Principal McNeill presented Mr. Baker to Vice-Chancellor Wallace for laureation, as a mark of the esteem in which he is held by all who know him.

Now in his eightieth year, Mr. Baker will be remembered by hundreds of Queen's

JOHN BAKER

alumni of the last three decades as the kindly, cheerful gentleman in the little black cap, who seemed so integral a part of the campus scene.

Dr. McNeill spoke as follows: "On behalf of us all, Queen's workers of every degree. I have the honour to present to you

JOHN BAKER

For thirty-two years a member of our maintenance staff
Ministering to our comfort;
Faithful, cheerful, kindly, obliging,
Quietly retiring, keeping his counsel,
Liked and respected by students and staff,
Honourable in thought and word and deed.

In hours of fun and relaxation Sometimes nimbly whirling in handsprings Pleasing children and wide-eyed students; Sometimes fisherman, bowler, curler, Sitting or moving in clouds of smoke; With mind at peace and goodwill to all, Finding content in simple things, Master of eighty well-spent years.

"Mr. Principal, we ask you to admit him, honoris causa, to one pound of tobacco, to one hundred dollars, and to all the rights and privileges of a loved Queen's man."

The presentation was raised by a subscription taken up among the University staff.

Mr. Baker expressed his thanks, with just the trace of a tear in his eye, and shook hands with all present as they filed past.

John J. Baker was born in Southampton, England, and came to Canada in 1871 at the age of eleven with a party of men and boys. For seven years he worked on a farm in Quebec, where he learned the pottery trade, later coming to Cataraqui, Ontario, where for fifteen years he tended flowers in a florist's greenhouses. After a further period during which he was employed at Deseronto, Ontario, he came to Queen's and was appointed janitor of the New Arts Building.

Ten years after he arrived in Canada, Mr. Baker married. He has brought up a family of three boys and two girls. In 1931 he and Mrs. Baker, who is now seventy-eight, celebrated their golden wedding anniversary.

Rev. Dr. D. M. Gordon was principal when Mr. Baker came to Queen's, and the janitor well remembers the first Convocation he attended. As he recalls, Convocations were famously noisy but happy occasions. At a later gathering Principal Taylor commented on the lack of noise. At the next Convocation the undergraduates enthusiastically responded, and Mr. Baker has reason to remember the occasion as he had to sweep up half a peck of white beans off the floor afterwards, as well as remove a cat or two which had been thrown from the gallery.

Mr. Baker recalls the students of the pre-war era as being infinitely more lively

than undergraduates at present. Baseball games in the upstairs corridors of the Old Arts Building between classes were the rule when he came, and no one thought the worse of the students for it. Freshmen eating out of hog troughs during initiation, some of the memorable "rushes" of the Arts building by Science students, and the boisterous conduct of Alma Mater Society court sessions are memories that remain vividly in his mind. When comparing students of former days with those of the present it is not difficult to see where Mr. Baker's sympathy lies. He looks fondly back to the old days as among the best of his life.

When he first came to Queen's, Mr. Baker was janitor of Kingston Hall, but after four years he moved to the "Old Arts," remaining there until the Douglas Library was built. At that time he asked to be transferred to the new building in order that he might be with the members of the staff who were changing quarters. Thus he became janitor of the Douglas Library, a position he held until retirement a few months ago. While employed at the Library he became known to a great many students and made many acquaintances through his ability to turn a neat cartwheel, a feat that he often performed on command.

An ardent fisherman, Mr. Baker was in the news a few years ago when he had the good fortune to hook and land two large bass, weighing a total of seven pounds, on one plug. The achievement was duly noted in the local press and the *Review*. The sequel came when a group of his fellow janitors awarded him a "diploma" and a handsome trophy, in recognition of his prowess. The diploma cited John Baker's accomplishments with rod and reel and conferred on him the degree of B.A.—Bachelor of Angling.

In the days before the first Great War the Kingston Bowling Club had its eight greens on the lower campus, in front of the New Arts Building, and John Baker was an important member of the club. Although he has not bowled for twenty years, he recalls happily many games with such enviable partners and opponents as the late Dr. John Watson, Dr. Daniel Bu-

chanan, Dean John Matheson, and many other members of the staff.

Though he has retired now from strenuous work and play, he is still very active. Often he is seen around the Douglas Library, perhaps just keeping an eye on the building he knows so well. John Baker is enjoying a well-earned retirement, and all his hundreds of friends and acquaintances will wish both him and Mrs. Baker many more years together.

FRENCH-CANADIAN PROBLEMS OUTLINED IN LECTURES

A DDRESSES by two prominent French-Canadians, Rev. Dr. Henri Saint-Denis of the University of Ottawa, and Mr. Leon-Mercier Gouin, K.C., Montreal, on February 5 and 12, respectively, concluded the 1940 series of Monday-afternoon lectures. This year the general topic was French-Canada and its problems.

Dr. Saint-Denis spoke on "French-Canadian Educational Ideals," pointing out that French Canada still placed importance on the classical tradition of education. He maintained that religious instruction in the schools was necessary, as otherwise religious indifference would result. When religion was banished from the schools it could hardly be kept alive by the home and the church, he said.

Mr. Gouin stressed the unity of language, religion, and race of the French-Canadians in his address, "French Canadians in the National Setting." National unity has never meant national uniformity to the French-Canadians, however, he said. In claiming equal rights, French-Canadians were fully prepared to make equal sacrifices and perform equal duties, he maintained.

The lectures were held in Convocation Hall and were broadcast over the Queen's radio station.

Arranged Three Lectures

FOR the sessions of the United Church's Eastern Ontario Winter School held at Kingston recently, the Department of University Extension arranged three lectures on democracy. Prof.

J. A. Corry spoke on "The Growth and Nature of Democracy," Prof. L. E. Law, "Democracy and Fascism," and Dr. A. A. Day, "Democracy and Education."

PRINCIPAL WALLACE GIVEN HONORARY DEGREE

PRINCIPAL WALLACE delivered the annual "Founders' Day" address at Temple University, Philadelphia, and received an honorary degree on the occasion of the University's midyear commencement and celebration on February 15. When he was presented for his degree, Dr. Wallace was cited by Rev. Dr. J. A. MacCallum, Arts '99, as follows:

"I have the honour to present for the degree of Doctor of Laws, Robert Charles Wallace, Principal and Vice-Chancellor of Queen's University, Kingston, Ontario, one of the outstanding institutions of learning and culture in the Dominion of Canada. Principal Wallace is matched with this hour after a long pilgrimage. He was born under austere northern skies on the Island of Orkney, educated at Edinburgh University, from which he received the degree of Doctor of Science, and at Gottingen University. from which he received the degree of Doctor of Philosophy. Coming to Canada, from 1910 to 1928 he was head of the department of geology in the University of Manitoba. From 1928 to 1936 he was President of the University of Alberta, and was elected to his present post as Principal of Queen's University in 1936.

"Though Dr. Wallace was born on an island, there is nothing insular in the range or texture of his mind. With William Blake he has the gift of seeing infinity in a grain of sand and eternity in an hour. Notwithstanding his academic achievements as a scientist, he has never lost interest in the human scene. He has never been tempted to dwell in an ivory tower or to find satisfaction in doctrinaire expositions of the scientific principles that are incorporate in his mind. Steadfastly he has kept the human touch, transposing to a higher key his readings from the rocks and applying them to the relations between man and man in all the problems of life, individual and social alike.

"As we should expect, in the light of his origin in a Celtic and puritan matrix, Principal Wallace, with increasing intellectual power, has not lost interest in religion but recognizes it as an essential factor in the culture of a higher civilization. Because of these considerations, it is fitting that Temple University should signalize the great contribution that he is making to education in Canada, a contribution which is not confined by national boundaries but in the nature of things is carried in a multitude of ways into the collective consciousness of this continent.

"Nor is this recognition restricted to Principal Wallace. He is the vehicle by which Temple University, representing, broadly, the education and educators of the United States, conveys to the people of Canada our profound appreciation of those ideas and ideals which characterize that nation, at its best, and our conviction that on this North American continent we are in the process of achieving a democratic civilization in which co-operation, rather than conquest or exploitation, will afford the mutual basis of a harmonious and creative society.

"On these grounds, and in the light of these considerations, I have, Mr. President, the honour to present Robert Charles Wallace, Principal of Queen's University, for the degree of Doctor of Laws."

University Resident Musician Participates in Piano Recitals

NDER the auspices of the department of music, a series of recitals for two pianos was given during February by Dr. Frank L. Harrison, resident musician, and Mr. Kenneth Meek, Mus. Bac. (Toronto), organist at Sydenham Street United Church, Kingston.

The recitals were given at 4.45 p.m. on Thursdays in the Ban Righ common room and proved very popular with students and alumni. Four performances were held during February and the final one was scheduled for March 7. Pro-

grammes included piano concertos by Bach, Beethoven, and Mozart, in arrangements for two pianos, as well as original two-piano compositions.

CONFERENCE PROCEEDINGS HAVE DEEP SIGNIFICANCE

THE proceedings of the Conference on Canadian-American Affairs held at The St. Lawrence University, Canton, N.Y., last summer were recently published in attractive book form. The volume was edited by Dr. A. B. Corey of St. Lawrence, who has taught at Queen's Summer School, Dr. R. G. Trotter, head of the history department at Queen's, and Dr. W. W. McLaren, Arts '99, Theol. '02, professor of economics, Williams College, Williamstown, Mass.

The Conference was held under the joint auspices of the Carnegie Endowment for International Peace, The St. Lawrence University, and Queen's. The discussions were devoted to the external economic and political interests of North America as well as the defence and external obligations of this continent.

In his preface to the volume, James T. Shotwell, LL.D. '37, director of the division of economics and history for the Carnegie Endowment for International Peace, writes as follows: "Now that war has broken out in Europe, involving Canada as a belligerent and forcing the United States to reconsider the terms of its neutrality, the study of Canadian-American relations acquires new significance. The determination of the people of the United States to stay out of the present war has been so clearly expressed as to leave no possibility of misunderstanding upon that point. But while the two countries go their different ways in the present crisis, both are more than ever aware of the need of maintaining in the world their heritage of freedom. This gives an added interest to the interplay of economic life between the two countries, which has been repeatedly the subject of discussion in these meetings. At the time the Conference was held the economic stress and strain of war-time conditions could not be fully anticipated, but

the unsolved issues of peace-time relations were dealt with somewhat more fully than at previous meetings."

Department of University Extension Arranges Community Lecture Series

A BOUT twenty-five lectures have been given already this year in the Kingston district by members of the University staff, under the auspices of the Department of University Extension.

Six speakers have visited Trenton and Cobourg, five have gone to Napanee and Smiths Falls, and two have lectured at Belleville and Sydenham. Lectures are usually held by study groups, men's clubs, or branches of the General Alumni Association.

Following is a list of those members of the staff who are taking part in the programme: Vice-Principal McNeill, Dean John Matheson, Drs. G. H. Clarke, Gregory Vlastos, G. S. Graham, W. F. Connell, L. J. Austin, J. A. Corry, George Humphrey and W. A. Mackintosh; Profs. J. A. Roy, C. A. Curtis, A. E. Prince, Henry Alexander, H. W. Curran, and J. O. Watts; and Messrs. Norman Chalmers, André Biéler, and R. M. Winter.

To Exhibit Paintings

THREE important exhibitions of recent paintings in water colour by Mr. André Biéler, resident artist at Queen's, are scheduled for the spring months. From March 15 to 31 there will be a display at the Art Association of Montreal; from April 5 to 20, at the Écôle des Beaux Arts in Quebec City; and during May, at "Le Caveau," Rideau Street, Ottawa.

C. A. Cameron Appointed as Judge of Ontario County Court Circuit

A PPOINTMENT of Charles Alexander Cameron, K.C., Arts '13, as judge of the Ontario County Court for Hastings was announced at the Prime Minister's office during February.

One year after he graduated from Queen's Mr. Cameron went overseas with the Princess Patricia's Canadian Light Infantry, in the ranks. He was commis-

sioned in the Northamptonshire Regiment and later in the Royal Air Force. Returning to Canada after the armistice, Mr. Cameron attended Osgoode Hall and later began to practise in Belleville, Ont., in partnership with his brother, A. R. Cameron, Arts '03. A member of parliament for Hastings South since 1935, he is a son of the Rev. Dr. Hugh Cameron, Arts '76, Ottawa.

MISS ANNE SEDGEWICK WINS MARTY SCHOLARSHIP

MISS ANNE SEDGEWICK, Arts '37, Ottawa, has been awarded the Marty Memorial Scholarship for 1940, it was announced in February. Valued at not less than \$750, the scholarship was intended to provide a year's study abroad, but owing to war conditions Miss Sedgewick will probably continue her work at Radcliffe College, Cambridge, Mass.

The Marty Scholarship was founded four years ago by Queen's alumnae in honour of Dr. Aletta Marty, Arts '94,

MISS SEDGEWICK

LL.D. '19, and her sister, Miss Sophia Marty, Arts '97. Dr. Marty was the only woman public school inspector in Toronto. Both she and her sister were distinguished graduates of Queen's and the scholar-ship commemorates their high standard

and unfailing response to the rigorous demands of the teaching profession.

Miss Sedgewick was educated at Bishop Strachan's School, Toronto, and St. Leonard's School, St. Andrew's, Scotland, before entering Queen's. Throughout her course she achieved first-class honours and graduated with the B.A. degree in 1937, with honours in history and economics. In that year she was awarded a scholarship which enabled her to attend the Zimmern School of International Studies at Geneva. This year she is completing the requirements for her M.A., studying Canadian-American relations.

Present holder of the Marty Memorial Scholarship is Miss Elise Berry, Arts '38. Former recipients of the honour were Miss Winifred Rutledge, Arts '36, and Miss Jeanne LeCaine, Arts '37.

C. O. T. C. MEMBERS TO RECEIVE CASH BONUSES

ASH bonuses will be paid to members of the Queen's University Contingent, C.O.T.C., it was announced during February. Cadets who have completed twenty days' training will receive five dollars; sixteen to nineteen days, four dollars; and twelve to fifteen days, three dollars. Four hours of drill or lectures are counted as one day.

When the students enrolled last October, it was understood that all military pay and allowances were to be turned over to the contingent. Only officers were exempt. It was agreed, however, that no cadet would be put to any expense in connection with his training, and with this in mind the military committee decided to award bonuses to cover any damage that might have been caused to clothing because of rain, grease off rifles, or other accidents.

It has been announced that Brig.-Gen. H. E. Boak, officer commanding M.D. 3, is to inspect the contingent. Because of the size of the unit, the inspection will be made on three days.

Following is a further list of alumni who have enlisted for service in the defence forces:

Royal Canadian Naval Volunteer Reserve—E. Ralph James, Arts '38.

Royal Canadian Air Force—Douglas Chown, Sc. '39; Pilot Officer Frank E. Grant, Arts '39; Pilot Officer C. M. Krug. Arts '37; Pilot Officer Eugene Neale, Sc. '38.

Royal Canadian Engineers—Captain C. B. Bate, Sc. '15; Lieut. Clifford Colliver, Com. '27; Captain C. L. Ingles, Sc. '34, works officer, M.D. 6; Lieut. J. D. Mitchell, Sc. '41; Lieut. J. M. S. Patton, Sc. '39 (transferred from Q.U.C., C.O. T.C.); Corp. Bert T. Trenouth, Sc. '39, 12th Field Company; Lieut. J. T. Williams, Sc. '37, 11th Field Company.

Royal Canadian Army Medical Corps—Captain W. W. Wade, Med. '30, medical officer, 14th Field Battery, R.C.A.

Presented Three Plays

THE Faculty players and the Queen's Dramatic Guild presented three oneact plays in Convocation Hall on February 22 before a large audience.

Medical Student Dies

A THIRD-YEAR medical student, Mr. Arthur Vernon Craig, died on March 2 after a lengthy illness. Mr. Craig was a son of Dr. W. H. Craig, Med. '09, and Mrs. Craig, Hardisty, Alberta, and a nephew of Dr. V. H. Craig, Med. '12, Ottawa. The young man was very popular with his fellow students.

STUDENT ACTIVITIES

A STORM of argument and debate was precipitated on the campus during February as the result of efforts made by the Queen's branch of the Canadian Student Assembly to circulate a questionnaire on conscription, profiteering, civil liberties, and youth problems as they are affected by government wartime regulations.

The matter first came up when the Queen's Student Assembly sought permission from the Alma Mater Society to circulate the questionnaire. After a lengthy discussion at the meeting on February 4, the petition was turned down, the feeling being that the ballot might stir up unfavourable publicity and hence was not in the best interests of the undergraduates, the University, or the Canadian war effort.

The Q. S. A. revised the questionnaire, deleting the section dealing with profiteering and making one or two other minor changes. Again the A. M. S. turned down the proposition, the decision being reached at a meeting that lasted well into the early hours of February 21. Still unsatisfied and convinced that student opinion would bear them out, Q. S. A. members collected together the required hundred signatures and demanded a referendum on the issue.

On voting day, February 26, the students were deluged with masses of propaganda by both sides, and an active interest was taken in the controversy. The result was a smashing victory for the

anti-questionnaire group. Out of 982 votes cast, 77 per cent were against the circulation of the questionnaire.

The incident proved the ability of the student government to control an issue of which it disapproved and undoubtedly strengthened its hand in student affairs.

Interest in the Science At Home was as keen as ever this year, despite the lack of an American "name" band. As usual, the engineers made a thorough job of decorating the Gymnasium, and the lighting effects were particularly effective. Favours were lovely compacts for the girls, embossed with the Science '40 crest. Patronesses for the evening were Mrs. R. C. Wallace, Mrs. A. L. Clark, Mrs. A. Jackson, Mrs. T. V. Lord, Mrs. D. S. Ellis, Mrs. L. M. Arkley, Mrs. S. N. Graham, Mrs. R. L. Dorrance, Mrs. D. M. Jemmett, and Mrs. J. E. Hawley. Bruce McIver, Sc. '40, Hamilton, Ont., was the convener of the capable committee in charge.

The Queen's Dramatic Guild entered a play entitled *The Devil Comes to Alcares* in the intervarsity drama festival at Mc-Master University on February 24. Varsity won the competition with a production of Eugene O'Neill's *The Rope*.

Several prominent men visited the campus during the month to address various clubs and societies. Included among these were Mr. W. W. Cushing of the Hamilton Bridge Company and Mr. L. A.

Wright, general secretary of the Engineering Institute of Canada, both of whom addressed the Engineering Society; Rabbi Charles Bender of Montreal, who delivered a stirring message to the students at the monthly church service on February 18; Mr. Tom Moore, president of the Trades and Labour Congress, who spoke to the Commerce Club, and Dr. E. W. Steacy of the National Research Council, who addressed the Chemical Society. Miss Doreen Day of T. Eaton Co. Ltd., Montreal, told the Levana Society how to operate a clothing budget.

Mr. H. L. Garner, managing director of the Peterborough *Examiner*, was the guest speaker at the Press Club's first annual dinner, held on February 23. He advised the members to continue with their organization because of the valuable experience that is to be gained in newspaper work.

Smarting under a 3-0 shutout at the hands of the Faculty on February 15, the *Journal* hockey team played Levana in a hectic battle one week later, the proceeds

going to the Queen's War Aid Commission. The scribes had their legs tied together with two feet of rope. The game ended in a 7-7 score.

* * *

With the noted Hambourg Trio as guest artists, the Glee Club put on a successful evening's musical entertainment in Grant Hall on February 7. Piano and vocal solos and a fine mixed quartet supplemented numbers by the whole chorus, under the direction of Dr. F. L. Harrison, resident musician. The calibre of the presentation gave evidence of the fine work being done in a musical way at Queen's.

After an absence of several years, the Campus Frolics were revived by the Dramatic Guild and presented in Convocation Hall on February 28 and 29. The various faculty societies contributed skits, while music was provided by the Glee Club and the Queen's orchestra. Large audiences greeted both performances most enthusiastically.

ATHLETICS

Fritz Second In Field of Twelve At National A. A. U. Title Meet

C ARRYING Queen's colours at Madison Square Garden, New York, Bill Fritz forced Charley Belcher, of Atlanta, Ga., to a new record in the 600-yard dash at the United States Amateur Athletic Union's track and field title meet on February 24. Pitted against twelve of the world's best, Fritz placed second, running well ahead of men who had defeated him in earlier meets this year.

Belcher finished a few feet in front of the Queen's star, who spurted past Johnny Quigley of Manhattan College in the stretch. Bill was a bit disappointed over his showings in previous races, but his effort in New York at the national A. A. U. championships was thoroughly satisfactory, as the winner was forced to

clip two-fifths of a second off Phil Edwards' old mark to beat him. Charley Beetham, indoor champion from New York University, and Jim Herbert, New York, were co-favorites for the race, but neither placed.

At the Prout games in Boston on January 27 Fritz finished third. He set the pace and led the field until well past half-way mark when Beetham of Columbus, Ohio, and Cagle of Indiana, nosed him out in a close finish.

In the Millrose games on February 3, Fritz finished in the 600 behind Herbert but forced the coloured athlete, who holds the world record of 1:11.1, to a time just 3-10 of a second off the world's mark. Bill's worst showing in any of the major competitions was in the Hollis 600 at Boston when he finished fifth.

Before 15,000 people in Madison Square Garden on February 17 Fritz competed in the 500-yard event at the New York Athletic Club's annual indoor meet against some of the best runners in America. In the race for the Buermeyer Cup, which he won last year, Bill ran fourth behind Herbert, who was timed at 58 seconds flat. Quigley was second and Belcher third. Fritz set the pace most of the way, but was passed in the sprint for the tape.

When Fritz attended the Prout games at Boston in January he stepped on to the board tracks for the first time since last winter. Indoor track work calls for intensive practice with special spikes, but Bill was unable to get much in Kingston. About all the conditioning he was able to obtain consisted of running a few laps around the gym. When his "training" schedule is compared with the elaborate routines followed by the men against whom he competed, the magnitude of his feats is realized.

Basketball Team Hits Slump After Starting Season With Win

THOUGH they had started off the season with a sparkling win over a powerful McGill squad, the Tricolour ran into a slump during February that saw them lose three games, two to Western

and one to Varsity.

On February 2 at London, Queen's led the Mustangs all the way until, with five minutes of play remaining. Western tied up the score and then went on to win 36-30. It was a tough game to lose. Mitchell and Eastaugh played well for Queen's at guard and held in check Western's famed Joe Krol. All but one player on the squad scored, and the passing and team-play were excellent. Whyte, Lewis, and Walker led the scoring with six points each.

The following night Art Walker played a standout game against Varsity at Toronto, but the Blue and White were too much for the Tricolour, who went down under a 47-37 score. Varsity had a 28-14 lead at half time, but a strong Queen's offensive in the second half cut that down considerably. Several times the Tricol-

our almost tied up the score but even the straight shooting of Walker, who netted fourteen points, could not wipe out the Blues' margin.

On February 10 Western visited Kingston and emerged from the fray on top by a 42-36 score. Art Walker again collected fourteen points and though his efforts were well backed up by his teammates, the combination of Krol and Blasingame proved to be the spark that meant victory for the visitors.

Queen's was scheduled to play McGill in Montreal on February 17, but owing to the death of His Excellency, the Governor-General, the match was postponed

to March.

Tricolour Boxers and Wrestlers Win Four Titles at Assault-at-Arms

ITH only one and one half points separating them from the championship, Queen's boxers and wrestlers emerged from the 1940 assault-at-arms a close second to the University of Toronto. The relatively small team that represented the Tricolour battled its way to four titles in the meet which was held at McGill's new gymnasium February 23-24.

Queen's two boxing and two wrestling titles went to Johnny Evans, Pete Cain, George Neumann, and Ira Brown. One more win over Varsity would have given the Tricolour top honours. Toronto finished with 5.86 points while Queen's had 4.28. Ontario Agricultural College and McGill placed third and fourth respectively, with 3.28 and 2.58 points. Queen's was not represented in the fencing, won by McGill in an upset victory over Toronto.

On the first night of the meet six of the Queen's team of thirteen were eliminated. Boxing at 125 pounds, Macey Milner lost a decision to the unorthodox punching of Lyle Smith of O. A. C., who went on to win the championship. Milner was unable to cope with Smith's style, but put up one of the gamest fights of the meet. Bill Lesy, at 135 pounds, dropped a close one to J. Smith of O. A. C., having his own way until the third round, when Smith was able to pile up enough

points for a win. In the welter class, Patterson of Toronto outpointed Guy Mathers. His height and longer reach prevented Mathers from moving in close and showing his punching power. Doug Chant, one of Queen's brightest hopes, dropped a decision to Ramore of Toronto in the 155-pound class. Ramore retained his championship.

The wrestling team on Friday night won three out of five bouts, with Ira Brown, Ernie Miron, and Joe Loucks turning in victories. George Neumann reached the finals by default. One of the biggest surprises of the night was the defeat of Pete Malachowski, 145-pound wrestling champion, who was entered in the next heaviest division. Pete lost a close decision to Scott, clever coloured McGill grappler. Ed Holmes of Queen's lost by one fall to Dobson of Toronto, 135-pound champion.

In the first boxing bout on Saturday, the Tricolour got off to a good start when Johnny Evans, clever bantamweight, won a technical knockout over Beach of O. A. C. The referee stopped the fight when Evans opened a cut on Beach's eye

in the second round.

Peter Cain completed the boxing victories by taking a well-deserved decision from Olynick of Toronto. The Toronto boxer won his semi-final bout on a technical knock-out, but was no match for the superior punching power of Cain. Joe Bardswick put up a game display against Hughes, defending heavyweight champion, but lost a close decision.

George Neumann started the Tricolour's wrestling victories when he earned a win over Graham of O. A. C. George's strength told and the bout was awarded on two straight falls. Ira Brown accounted for the second title when he took a decision from Southee of Toronto in the 165-pound class. Although there was not much grappling done on the mat, Ira was well ahead with his aggressive tactics and received a popular decision.

Ernie Miron met a strong and experienced grappler when he climbed into the ring with Bill Schwenger of Toronto. This did not deter Ernie from putting on a clever display of wrestling, but Schwen-

ger was too much for him and took the 175-pound title. In the heavyweight wrestling bout Joe Loucks tired after being ahead of Miles of O. A. C., and Miles worked hard to earn a close decision. Lack of condition spelled the difference between victory and defeat for Loucks.

In taking four titles Queen's made a good showing, especially as the team was not represented in three events.

Intercollegiate boxing and wrestling champions are as follows:

Boxing—

118 pounds, Evans (Queen's)

125 pounds, Smith (O.A.C.)

135 pounds, Mason (McGill)

145 pounds, Patterson (Toronto)

155 pounds, Ramore (Toronto)

165 pounds, Cain (Queen's)

175 pounds, McLean (Toronto)

Heavyweight, Hughes (McGill)

Wrestling-

118 pounds, Carrere (O.A.C.)

125 pounds, Mustard (Toronto)

135 pounds, Dobson (Toronto)

145 pounds, Neumann (Queen's)

155 pounds, Scott (McGill)

165 pounds, Brown (Queen's)

175 pounds, Schwenger (Toronto)

Heavyweight, Miles (O.A.C.)

Gymnasts Win Three First Places In Initial Intercollegiate Competition

NOTABLE was the success attained by the six-man gymnastic team representing Queen's, entered for the first time in Intercollegiate competition, at the annual meet in Montreal on February 24. Led by Hec Chaput, the boys collected 172.5 points to place second; Toronto had 203.5, and McGill, 104.

The Tricolour team won three first places and two seconds, and threatened throughout to displace the experienced Varsity squad, which got only one first but collected more points for second and third places. When the final contest had been finished, Johnny Miller had won on the parallel bars, Charlie Matthews was champion on the horse, and Hec Chaput had defeated other contestants on the mats. Doug Tetu, Don Montgomery,

and Robson Smith made up the remainder of the team.

Perhaps the most notable feat in the competition was the showing of Charlie Matthews of Queen's. Although crippled by infantile paralysis, Charlie nevertheless was on the top of every pyramid, and his win on the horse was highly popular.

Hockey Team Is Eliminated In International Competition

WITH no hope of coming out on top of the International Intercollegiate hockey league because of costly losses to Toronto and McGill, Queen's nevertheless put on enough pressure to wallop the Harvard squad 10-2 in the last scheduled home game on February 23.

Queen's had a chance to stay in the running until they went to Toronto on February 2 and were defeated in the last three minutes of a furious game with the Blues. The score was tied at 2-2 when Quigley of Toronto took a neat pass and coasted in on Burrows, who had no chance to save. Penalties played a large part in the game, each team scoring when the other was short handed.

Varsity scored twice in the opening period, but Queen's came back strongly in the second with Bobby Neilson getting a goal on a pass from Norv Williamson. In the final frame the efforts of the second line of Lane, Mable, and Carter resulted in a goal by Len Lane, tying up the score. Quigley's shot which beat Burrows late in the final period won the game

for the Blues, for although Coach "Flat" Walsh set loose six forwards in the last few minutes, the Tricolour could not crack the Varsity defence.

A week later McGill handed Queen's their worst defeat in three years when the Tricolour were snowed under 10-4. Three goals in the first, five in the second, and two in the third period were scored by the Redmen while Queen's scored one in the second period and three in the final frame. Bob Neilson and Mel Williamson each got one and Norv Williamson counted twice. Queen's were not able to cope with the McGill attack and fell down badly on defence, leaving Musgrove in the nets with an impossible task.

The following week Queen's were scheduled to play the return match with Mc-Gill, but all sport was postponed during the period of official mourning for Lord Tweedsmuir. On February 23 Harvard visited Kingston and the Tricolour gave the weaker American team a 10-2 trounc-The Harvard players were welldrilled and adopted a heavy checking game which proved effective, but they lacked speed and polish to finish their Bobby Neilson led the scoring with four goals and two assists. Norv Williamson scored three goals and one assist, while Mel Williamson collected one goal and five assists. Lane and Hood each got a goal and an assist.

A complete tabulation of the final league standing will be published in next month's *Review*.

AT THE BRANCHES

New York City

A REORGANIZATION meeting of the New York Society of Queen's University alumni was held at the Canadian Club, New York City, on February 23. Officers were elected to act until the election by ballot some time before September 30, 1940. The group has formal-

ly requested that it be accepted as a branch of the General Alumni Association.

Officers elected were as follows: president, N. A. Morrison, Sc. '23, Floral Park, Long Island; first vice-president, Dr. Waring Willis, Arts '26, Med. '28, Bronxville; second vice-president, Miss Nora Cordingly, Arts '10, New York

City; treasurer, Dr. Bryce Stewart, Arts '11, New York City: recording secretary, Mrs. A. J. Douglas (Elsie Gardiner), Arts '22, Flushing, N.Y.; corresponding secretary, Dr. James A. Polson, Arts '07, Med. '10, Bronxville, N.Y.

Toronto

THE annual At Home of the Toronto branches of the General Alumni Association and the Queen's Summer School Association was held in the Eaton Auditorium on February 2 with more

than 400 guests in attendance.

Patrons and patronesses for the big event were Dr. C. C. Goldring, Arts '18, and Mrs. Goldring, Dr. J. A. Hannah, Arts '26, Med. '28, and Mrs. Hannah, H. E. Armstrong, Arts '22, Com. '24, president of the Toronto branch of the General Alumni Association, and Mrs. Armstrong, R. M. Winter, Arts '26, director of the Department of University Extension at Queen's, and Mrs. Winter, Norman McLeod, Arts '26, and Mrs. McLeod (Mary Johnston), Arts '26, and Keith Barnard, Arts '35, president of the Toronto branch of the Queen's Summer School Association.

From 9 p.m. to 1.30 a.m. the alumni and their friends danced to the music of Don Romanelli and his orchestra. During intermission Mr. Armstrong and Mr. Barnard welcomed the guests. S. M. Ketcheson, Arts '33, presided at the piano for a sing song, ably led by Mr. Fred Devolin, and as a climax to a happy evening N. G. (Pat) Stewart, Arts '11, Sc. '15, led a Queen's yell that would flatter a football crowd. During the evening, guests made contributions to further the Red Cross work of the Toronto alumnae.

R. E. Story, Arts '30, was the convener and his committee was composed of A. E. Harkness, Sc. '21, W. K. Bailey, Arts '31, R. J. Aitchison, Arts '29, C. G. Currie, Arts '34, and Mr. Ketcheson.

THE Toronto branch has issued an attractive folder giving complete data on its social events for 1940, including names and telephone numbers of all members of the executive and committees for each function.

Listed in the folder are the following events:

Dinner and smoker, Military Institute, Friday, March 8.

Golf tournament, Mississauga Golf and Country Club, Monday, June 3.

Rugby Dance, Royal York Hotel, Saturday, October 19.

Annual Meeting, Eaton's Round Room, Friday, November 15.

* * *
P VEAD party

LEAP YEAR party was held by members of the Toronto alumnae on February 23 at the home of Mrs. Douglas Geiger (Goldie Bartels), Arts'22. To further the Association's war work, home-made cooking was sold. Games were played and Dr. D. M. Campbell, Med. '19, showed moving pictures of the Royal visit, after which refreshments were served. Mrs. Arthur Scace (Jean Simmons), Com. '26, and Mrs. Norman Davies (Ada Richardson), Arts '10, poured tea, and the assistants were members of the branch under the convenership of Mrs. J. G. MacGregor (Eunice Simpson), Arts '23.

TWO well-attended luncheon-group meetings were held at the Piccadilly Hotel during February. On the fifth, A. J. Elliott, Arts '25, manager of the Toronto Men's Hostel, gave a talk on "Unemployment." On the nineteenth, Dr. A. E. Lavell, Arts '91, former Ontario Parole Commissioner, spoke on "A Twenty-Minute Sentence to Prison."

Victoria

ABOUT twenty alumni and friends gathered in Victoria at an informal dinner held in honour of Dr. Charlotte Whitton, C.B.E., Arts '17, when she visited the city on February 7. Afterwards, Dr. Whitton gave a brief outline of present-day conditions at Queen's. Ralph Matthews, Arts '26, presided, and J. W. Gibson, Arts '08, moved a vote of thanks to the guest of honour.

Following is a list of those who attended: J. E. Sanders, Arts '26, A. M. Ferguson, Arts '83, and Mrs. Ferguson, Dr. J. S. Plaskett, LL.D. '34, and Mrs. Plaskett, H. S. Pringle, Arts '99, and Mrs.

Pringle, Mrs. J. W. Gibson, Mrs. H. A. Macleod (Doreene Taggart), Arts '18, Mrs. V. J. Pritchard, Dr. Helen Ryan (Helen Reynolds), Med. '85, Dr. W. A. Thorn, Sc. '24, and Mrs. Thorn, Miss Hazel Sargent, Arts '28, Miss Esther Tervo, Arts '28, Miss Ruby Nash, Mrs. A. W. Y. DesBrisay (Vera Skinner), Arts '26, Rev. and Mrs. D. M. Perley, Mrs. P. B. Scurrah, Fred Robertson, and Dr. E. W. Boak, Arts '13, Med. '13.

Border Cities

H. D. WILSON, Sc. '23, was elected • president of the Windsor branch at its annual meeting in the Prince Edward Hotel on February 22. The meeting took the form of a banquet and dance and was attended by a large number of alumni and friends. Feature of the evening was the showing of the film, "Paths of Learning."

The gathering was held on the mezzanine floor of the hotel and the smaller quarters made for a more congenial atmosphere than in the ballroom where previous meetings had been held. Another innovation was a reception preceding the banquet, centering around a large punch-

bowl.

early morning.

Queen's colours were used extensively in the decorations in the form of streamers and crests. Union Jacks were prominently displayed to add an appropriate patriotic touch. After the banquet and business meeting, guests danced until

Officers were elected as follows: past president, W. M. Wright, Arts '12; president, J. H. D. Wilson; vice-president, A. F. S. Gilbert, Sc. '20, Arts '21; secretary-treasurer, Mrs. Lula Kitts, Arts '31. The following members of committees were appointed: Medicine, Drs. W. M. McNeely, Med. '22, and J. F. Gorman. Med. '34; Arts, Mrs. James Walker (Gladys Thomas), Arts '34, and Mrs. Arthur Cotton (Mary Kirkland), Arts '26; Science, William Walker, Sc. '31, and A. Innis; Law, Lorne R. Cumming, Arts '16, and Paul Kidd, Arts '33; Paedagogy, Leonard Wheelton, Arts '19, and Robert McLeod, Arts '38; Commerce. Richard Green; Theology, Rev. D. L. Gordon, Arts '97; Directory, Norman

J Goebel, Sc. '18; Undergraduates, Miss Marjorie Miers.

A resolution was passed authorizing the executive to appoint a committee to meet with representatives of other alumni associations to arrange a "University night" in Windsor.

Kent County

HE Kent County branch held its annual banquet on February 28 at the William Pitt Hotel, Chatham. A large number of alumni and friends attended the function, at which the guest speaker was Mr. Cyril H. Cane, His Brittanic Majesty's Consul at Detroit. Mr. Cane's remarks were enthusiastically received as most appropriate during a time of war.

After a full-course dinner, made more attractive by well-printed menus featuring Queen's colours, C. A. Shaver, Arts '08, president of the branch, proposed the toast to The King. Mr. Templeton Moore sang two songs, accompanied by Mrs. Bryce Kendrick. Miss Norma Stevens, Arts '34, proposed the toast to Queen's University, and G. A. Pearson, Arts '24, responded. The toast to Sister Universities was proposed by Dr. H. A. Tanser, Arts '29, and responded to by Dr. S. M. Holmes for the University of Toronto and by Dr. A. L. Storey for the University of Western Ontario.

The committee in charge of arrangements included Mr. Shaver, Dr Bryce Kendrick, Arts '09, Med. '11, Mrs. R. Reynolds, Mrs. K. C. Annable, Miss Alice McCoig, Arts '38, and Miss Norma Ste-

growth and compared the members of the present-day staff with former teachers, known to the older alumni. Among financial matters and explanations of current policies of the University, the speaker interspersed several clever and amusing stories and anecdotes which kept his audience's close attention.

Dr. G. W. Parmelee, Arts '89, spoke briefly in moving the vote of thanks, and J. O. Martineau, Sc. '15, vice-president of the branch, also spoke. Dr. McNeill was introduced by Prof. Wilhelmina Gordon, of the English department, at present on sabbatical leave.

During the evening, Mrs. Douglas Muir gave a number of vocal solos, accompanied on the piano by Mr. G. H. Perry. After the dinner, dancing was enjoyed in the Jacques Cartier room of the hotel.

At the head table were Dr. McNeill. Dr. Matheson, Mrs. Matheson, J. A. Tremblay, Sc. '11, and Mrs. Tremblay. The committee in charge of arrangements included the president and Miss Margery Morton, Arts '37, George Warner, Sc. '23, Mr. Martineau, Philippe Godbout, Arts '34, C. Thomson, Sc. '25, Charles O'Neill, Com. '33, and W. D. Muir, Com. '33.

Montreal

IN the form of a musicale, the February meeting of the Montreal alumnae was held at the home of Mrs. C. W. Davison (Gladys S. Sexton), Arts '20, on February 7. Guest soloists were Alice Goodwin Anders, Arts '19, pianist, Larche Paul, violinist, and Miss Deniset, vocal-

ALUMNI NEWS

Births

Buell—At the Kingston General Hospital, on February 22, to M. A. Buell, Sc. '34, and

Mrs. Buell, Toronto, a son.

Gilmore—At the Private Patients' Pavilion, Toronto General Hospital, on February 22, to W. Dillon (Red) Gilmore, Arts '32, and Mrs. Gilmore, a son (David Hunt).

Hern—On February 25, at the Private Patients' Pavilion, Toronto Western Hospital, to G. G. Hern, Arts '30, and Mrs. Hern,

a daughter (Helen Margaret).

Kelley-At Smooth Rock Falls, Ont., on March 1, to Bruce W. Kelley, Arts '33, and Mrs. Kelley (Evelyn Poynter), Com. '33, a daughter (Sheila Joan).

Kennedy — At the General Hospital, Guelph, Ont., on February 25, to R. M. Kennedy and Mrs. Kennedy (Marion Rankin), Arts '27, a son (Robert Rankin).

'28, Galt, Ont., and the late Mrs. Fraser. The groom's father assisted at the ceremony and his sister, Miss Margaret Fraser, Arts '23, was bridesmaid. Hon. Eric W. Cross, Arts '24, minister of public welfare and municipal affairs in the Ontario government, was best man.

Lieff—In Shaarey-Zedek Synagogue, Winnipeg, on February 8, Dorothy Brodie, Ottawa, to Flight Lieut. A. H. Lieff, Com. '36. They will live in Winnipeg.

Deaths

Begg-Dr. John W. Begg, Med. '87, retired physician and veteran of the Great War, died at Guilford, Conn., on March 4 after a long illness. Dr. Begg was born in Kingston in 1862 and entered Queen's in 1883 to take the Medical course. Four years later he graduated with the degrees of M.D. and C.M. and took postgraduate work at Edinburgh University. He was medical director of the General Hospital at Port Limon, Costa Rica, from 1890 to 1902, and conducted a private practice at San Jose, the capital, until his retirement in 1913. In that year he went to Europe, and during the war he served with the Canadian Army Medical Corps. From 1920 to 1927 Dr. Begg divided his time between Europe and the United States, making his home at Stockbridge, Mass., until 1933, when he moved to Guilford. He is survived by his wife and two children. The late Captain John Donnelly, Sc. '98, Kingston, was a brother-in-law.

Glassford—Second on the seniority list of Queen's alumni and sole remaining member the class of '75, Rev. Thomas Stuart Glassford died on February 14 at his home in Alberni, B.C., in his ninety-third year. Mr. Glassford was born at Beaverton, Ontario. Attending public school, he won a scholarship which gave him his secondary education in a grammar school fifteen miles from home, and later he taught school long enough to enable him to enter Queen's. In 1871 he began his Arts course, which he completed in 1874. Then for two years he studied theology, winning the Colonial Committee Bursary in 1875. After two years

of missionary work, Mr. Glassford was inducted into the ministry of the Presbyterian Church at Richmond, Ontario, in 1880, where he remained ten years. In 1881 he married Catherine Shannon, sister of Dr. J. R. Shannon, Arts '84, Med. '90, and of the late Brig.-Gen. L. W. Shannon, Arts '77, and the late A. W. Shannon, Arts '75. Moving to British Columbia in 1890, he held charges at Ladner, Golden, and Donald, and was for some time the only ordained Presbyterian minister in a district of the Fraser Valley, one hundred miles in extent. After a short return to Ontario, he went to Vancouver Island, to Cumberland and Alberni, spending the remainder of his long career of forty-four years serving the Presbyterian In 1920 he was superannuated Church. from the active ministry, but remained in close touch with church affairs until his death. Many times during his retirement, Mr. Glassford was called upon to officiate at services and emergency calls, perform marriage ceremonies for many couples determined to have no one else, and conduct funeral rites for many old friends. Throughout his life Mr. Glassford took a keen interest in the affairs of Queen's and in its alumni. Active until his death, he was proud to recount to friends his youthful prowess as the champion long-distance runner of the school when he was at Queen's. Evidence of the esteem in which he was held was seen in his funeral service, at which all denominations joined with

Presbyterian presbytery of Victoria.

Murray—A general practitioner in Schenectady, N.Y., for forty-six years, and one of the few remaining women graduates of Queen's Medical School, Dr. Janet Murray, Med. '91, died in Schenectady on February 20 at the age of eighty-three. Dr. Murray was one of the oldest members of the Schenectady County Medical Association and retired only two years ago. She was born at Peebles, Scotland, the daughter of a mining engineer. At the age of ten she moved with her family to Canada and such was her success in ministering to her ailing mother amid primitive surroundings that she was encouraged to study medicine. In 1887, at the age of twenty-five, she entered Queen's and graduated with the degree of M.D. Four years later Dr. Murray went to New York State, where she passed the examination set by the Board of Regents. For fortysix years thereafter she conducted a successful practice in Schenectady, gaining the respect and affection of many citizens of that city. For more than forty years she was attending physician at the Old Ladies' Home, where she gave voluntary service. She was made an honorary member of the Schenectady Business and Professional Women's Club in 1936, an organization in which she took keen interest. In 1935 she was elected to the board of councillors of the Women's Medical Society of New York State and she was also a member of the New York State and American Medical So-

cieties. After her graduation from Queen's, Dr. Murray took two postgraduate courses

at the University of Pennsylvania.

Thomas—Rev. Dr. Ernest Thomas, Arts '97, D.D. '23, widely known in evangelistic and social service fields, died at his home in Toronto on February 19, at the age of seventy-four. For eighteen years he served as secretary for the department of evangelism and social service, first with the Methodist and then with the United Church, retiring in 1937. He was also active in temperance and youth movements and was a prolific writer. Born in England, Dr. Thomas came to Canada in his early twenties as a missionary to Gaspé. He attended Wesleyan Theological College, Montreal, and came to Queen's to study theology in 1893. Dr. Thomas spent two sessions at Queen's and then was ordained into the Methodist ministry. During his long career he held pastorates in Quebec, Ontar.o, Saskatchewan, and British Columbia. In 1923 Queen's conferred upon him an honorary D.D. degree. Keenly interested in the Student Christian Movement, he was a frequent lecturer before university groups. Numerous articles were contributed regularly by Dr. Thomas to Methodist and United Church publications and for some years he was a correspondent for the Chicago "Christian Century." Dr. Thomas was a member of the League for Social Reconstruction, the fellowship of the Christian Social Order, and the Masonic Order. Dr. Thomas is survived by his second wife, one daughter, and one son, Major Hartley Thomas, Arts '15, of the staff of the University of Western Ontario.

Notes 1890-1899

Mrs. J. S. Gillies, (Margaret Russell), Arts '97, Braeside, Ont., has been re-elected president of the Renfrew Presbyterial of the Women's Missionary Society of the

United Church of Canada.

Miss Elizabeth McLennan, Arts '99, retired recently from her missionary work in China and is now living at 10244--113th St., Edmonton. After leaving Queen's Miss McLennan taught for a short time in Williamstown and Maxville, Ont. In 1905 she left for Northern Honan, where she has been engaged in teaching and evangelical work ever since, with the exception of her regular furloughs and one year spent in Korea.

Dr. W. B. Munro, Arts '96, professor of history and government at the California Institute of Technology, is the author of an excellent article, "Banking Enters the Forties," which appeared in a recent issue of the journal of the American Bankers Association. The article has been reprinted

in pamphlet form.

1900-1909

Rev. G. A. Brunet, Arts '09, formerly rector of St. James's Church, Perth, Ont., was inducted minister of St. Matthew's Church in Ottawa at an impressive ceremony conducted by Bishop Jefferson on February 11.

It was the first time that the newly ordained Anglican Bishop of Ottawa had presided on an occasion of this nature.

C. J. Burns, Arts '08, has taught in London South Collegiate Institute, London, Ont., for the past eighteen years. He is now head of the classics department.

Dr. E. P. Byrne, Med. '09, Ottawa, was reappointed a member of the board of directors of the Ottawa General Hospital at its

annual meeting held in February.

Dr. Charles Camsell, Sc. '01, LL.D. '22, deputy minister of mines and resources, Ottawa, was unanimously re-elected president of the Canadian Geographical Society at the annual meeting of that body held on February 22.

W. E. Hanna, Arts '07, has been principal of Oakwood Collegiate Institute, Toronto,

for the past year.

W. A. Skirrow, Arts '09, teaches mathematics in Humberside Collegiate Institute, Toronto.

1910-1919

Rev. W. R. Alp, Arts '16, assistant minister of Chalmers United Church, Ottawa, has accepted a call to become minister of St. Paul's United Church, Perth. He will assume his new duties on July 1.

R. D. P. Davidson, Arts '14, K. S. Hill and Nellie Merry, Arts '13, and Hilda McLaren, Arts '19, are all on the staff of the colle-

giate institute in Belleville, Ont.

Rev. John T. Fleming, Arts '15, is on leave from his missionary work in Northern Honan, China, and is at present taking courses at Emmanuel College, Toronto.

Miss Sadie Fraser, Arts '19, is teaching home economics, agriculture, and art at the high school in Petrolia, Ont. Miss Fraser obtained a specialist's degree at the Ontario Agricultural College, Guelph, in 1938 after attending four summer sessions. She studied home economics at Toronto in 1939.

Dr. J. E. Kane, Med. '14, Kingston, was bereaved on February 21 by the death of his brother, Major Carl Kane, superintendent of the New York State Reformatory for Wo-

men at Bedford Hills, N.Y.

Angus McCallum, Sc. '19, member for Frontenac-Addington in the last Dominion parliament, was again chosen Liberal candidate for the riding at a nomination meeting held in Verona, Ont., on February 9.

N. B. MacRostie, Sc. '11, Arts '14, was elected chairman of the Ottawa Carnegie Library Board at its annual meeting held

recently.

Miss Eva McGill, Arts '16, is teaching in Harbord Collegiate Institute, Toronto.

A. R. Simpson, Sc. '14, is with the Bell Telephone Company in Toronto.

1920-1929

Miss Bessie Billings, Arts '25, Miss Alice Saunders, Arts '20, and Miss Agnes Sweeney, Arts '26, are teaching in the collegiate institute at Belleville, Ont.

H. E. Bushlen, Sc. '29, recently joined the staff of Defence Industries Limited, Montreal, where he is doing structural design

and draughting. He was formerly with the

Sarnia Bridge Company.

Cecil Climo, Sc. '23, Niagara Falls, Ont., and Percy Climo, Sc. '31, Timmins, Ont., were bereaved on January 10 by the death of their father, Mr. H. P. Climo, at Cobourg, Ont.

F. C. Doak, Sc. '29, formerly with Canadian National Telegraphs, Toronto, is now with the Southern Power Company, Ri-

mouski, Que. R. M. Gaviller, Com. '23, teaches in the

high school in Midland, Ont.

J. A. Gemmell, Sc. '28, is doing mechanical draughting and design work for Defence Industries Limited, Montreal.

Dr. S. E. Grimes, Med. '28, is practising in Ottawa, specializing in dermatology. His office is in the Medical Arts Building.

Miss Hazel Grimmon, Arts '29, is now teaching in the collegiate institute at Co-

bourg, Ont.

D. O. Hepburn, Sc. '24, is assistant design engineer for the Board of Water Supply, New York City.

E. F. Legon, Arts '27, is teaching in Lis-

gar Collegiate Institute, Ottawa.

J. C. Macgillivray, Arts '24, formerly Canadian Government Trade Commissioner at Berlin, has been transferred to Capetown, S.A., and not to Johannesburg, as was recently announced in the "Review."

Dr. Leo Palmer, Med. '20, formerly superintendent of the Medium Security Prison, Wallkill, N.Y., is now superintendent of Elmira State Reformatory, Elmira, N.Y.

Mrs. Watson Sellar (Gwen Gauley), Arts '20, of Ottawa, was recently elected regent of the Elizabeth Tudor Chapter, I.O.D.E.

G. C. Toner, Arts '28, Kingston, Ont., has been elected secretary of the Kingston and District Rod and Gun Club.

1930-1939

Clifton Barnett, Sc. '39, is mill assistant

at Pamour Mines, Pamour, Ont.

Dr. E. L. Bruce, Miller Research Professor of Geology at Queen's, presented a report to the American Institute of Mining and Metallurgical Engineers at its symposium on strategic metals, held in New York on February 14. He showed the various ways in which the chrome-steel industry of both Canada and the United States may be affected by the war.

Dr. George Herbert Clarke, head of the English department, spoke before the Kingston Rotary Club on February 15. The address was in the form of a tribute to Lord Tweedsmuir and included the reading of a poem wr.tten by Dr. Clarke on the occasion of the death of the Governor-General.

Rev. Dr. T. E. Holling, D.D. '28, New Liskeard, Ont., is retiring from active pastorate duties after fifty years in the ministry.

The following Queen's graduates were successful in the intermediate examinations of the Institute of Chartered Accountants of Ontario held in December: C. F. Butler, Arts '37; G. A. Church, Com. '38; A. P. McDiarmid, Com. '38; T. R. Roden, Com. '37; W. 'A. Simonton, Com. '37; MacPherson Hubbell, Com. '36; G. C. Tilley, Com. '36.

STUDENTS' MEMORIAL UNION

SWEPT CHANNELS

By Herbert Dawson

FEW days ago, I returned to Lon-guarded the harbour entrance were swingdon from my first visit to the Fleet at war. I am writing this at a solid desk, in a room that does not rock with every movement of the sea or vibrate with the steady pulsing of a single screw. For the Fleet I saw was not the Fleet of giant battleships or stately cruisers; nor was it the Fleet of destroyers and patrol ships whose engrossing task of submarine hunting prevents one's thought from considering the weather. No, it was composed of minesweepers; those little ships who work around the British coasts in gale and calm, who can be met with by day and by night, who search the seas for hidden death so that others may sail in safety, and whose amusement lies in the mathematical odds of their own survival.

Minesweeping! It sounds enough. Just dragging a wire through the water at nine knots and hoping for the best. Yet when I tell you that between 1914 and 1919 more than 23,000 mines were swept up and 214 minesweepers sunk or seriously damaged you will realize that this "dull" service is not quite so safe as it appears to be.

It was early in the morning when a smart naval barge brought me to the open roadstead where the minesweepers lay moored—they are rarely in port long enough to justify entering the main harbour. Running out from the land it was hard to pick them up against the allembracing mists; five little grey ships with a wisp of smoke above their funnel tops, as though impatient to get on with their work. They looked unsubstantial, almost unreal, as though roughly sketched in charcoal on some huge canvas. However, they were real enough when I climbed on board. By the time I reached the tiny charthouse the little flotilla was under way and the gate-vessels that ing aside to give us passage. I was with a squadron of "trawlers"; some had been in naval service for almost three years and others had been taken over by the Admiralty only a few weeks before the outbreak of war. They are stout little ships of some 600 tons, capable of twelve knots under favourable conditions and able to keep at sea in any weather. For defence they carry one 4-inch gun and one Lewis gun, while on the little poop are lashed four depth charges for direct action against lurking submarines.

The men who sail in minesweepers are drawn from the finest natural seamen in Great Britain—from the fishing ports of Hull and Grimsby, from the rugged coasts of Scotland and from the quiet coastal villages of East Anglia, where the sea has washed against the fishing wharves since the dawn of British history. Most of them are naval reservists called up on the outbreak of war, with a stiffening of regular naval ratings for the key positions such as signalmen, gunlayers, and helmsmen. There is nothing that the Navy can teach a North Sea fisherman about seamanship and very little about minesweeping-which, as will be seen, is very similar to the peace-time trawling that they have known since boyhood. What they do want to learn is how to fight. One young seaman, whose father had lost his life in a German raid on the British fishing fleets in the last war, summed up this feeling perfectly. We were on our way home and he had spent long hours struggling with wet cables as the sweeping wires were coiled down. "Me, I could do this blindfold as could any lad from Grimsby—what I wants to do is learn to work that bloody gun."

The famous English magazine *Punch* published some lines in 1915 that might well have been written to-day. They describe the work of an older generation of fishermen who answered an earlier call and whose bones lie on the sea bed from Dunkerque to the Shetlands—

Soles in the Silver Pit—an' there we'll let 'em lie;

Cod on the Dogger—oh, we'll fetch 'em by an' by;

War on the water—an' it's time to serve and die,

For there's wild work doin' on the North Sea Ground.

An' it's Wake up Johnnie! They want you at the trawlin'

(With your long sea boots and your tarry old tarpaulin),

All across the bitter seas duty comes a-callin',

In the Winter's weather off the North Sea Ground.

It's well we've learned to laugh at fear—the sea has taught us how;

It's well we've shaken hands with death—we'll not be strangers now;

With death in every climbin' wave before the trawler's bow,

An' the black spawn swimmin' on the North Sea Ground.

For minesweeping is like trawling. You have the same principle of a cable between ships that steam ahead and "catch" whatever lies between them. In fishing there is a net for fish and in minesweeping there is a tough wire that cuts the mine from its mooring and brings it bobbing to the surface. Once afloat, it is destroyed by rifle fire and woe betide the unfortunate "sweeper" who touches off one of the "contact horns" with a rifle bullet at short range. To keep the sweeping wire at a constant level large "kites" are used—an idea adopted by the Navy from the fishing fleets-and in naval work the flotillas usually sail five or six boats abreast. It all sounds easy enough but the usual way of discovering a minefield is for the leading ship to run into it and no minesweeping trawler has been known to float for more than forty-five seconds after striking a mine at sea.

Under these conditions the chances of heroism, the sort of heroism that ever becomes known, are few. Once a sweeper, working at night, pulled in her gear only to find a German mine entangled in the cable. There it lay, rocking in the swell and knocking against the ship's hull with every roll. The captain, a regular Navy man, ordered his little crew into the life boats and with a spanner tucked into his belt slid down the wire into the icy water. There he set to work, unscrewing the deadly "horns" until the "egg" was harmless. Then he climbed back inboard, signalled his crew to return and went below for breakfast.

This was only one of the stories I heard while sitting in the tiny wardroom of a converted fishing trawler "somewhere at sea." It dates back to the first German war, as does the historic story of

MINESWEEPERS AT SEA

a fisherman who rowed alongside a British cruiser with a German mine towing behind his dinghy. When he was within a few feet of the cruiser's side he hailed the quarter-deck: "Ahoy there, what do I do with this?" The officer of the watch took one look at the mine and told the fisherman in no uncertain terms just what he could do with it, ending with the plaintive request: "Do you want to get us all blown up?" "It's all right, sonny," answered the old fisherman, "I knocked the horns off with an oar on the way in."

Minesweepers are not lovely, but they do leave a picture in your mind. I can close my eyes now and feel the uneasy pitching of their little hulls, hear the cheery voices of their crews and recall the comfort of the wardroom stove. I can see again the grey windswept seas—so innocent and so deadly—with the five grey painted ships plodding back and forth on their endless beat. That is what they were doing yesterday, that is what

DESTROYING A MINE

they will be doing tomorrow—unless, of course, that one little vessel has "found" a mine-field for her mates to clear.

The promiscuous sowing of mines in open shipping lanes—as opposed to military objectives—is probably the most cowardly form of naval warfare. I have tried to tell you how the British Navy meets this menace, and should you ever meet a British sailor carrying the badge H.M.S. "Minesweeper" on his cap you will be talking to a man who hazards his life every time he goes to sea that his countrymen may live in greater comfort and that the ships of neutral nations may pass in safety to all the harbours of the outside world.

Queen's Financial Problems Outlined In Comprehensive Statement

THE financial problems of the University have been clearly and cogently set forth in a statement issued recently by Mr. G. J. Smith, director of endowment. This memorandum has been circulated among the members of staff, officers and directors of alumni organizations, and members of the University

Council. It is hoped to publish the material shortly in booklet form for distribution among the alumni and students.

ONE NEW MEMBER ELECTED TO BOARD OF TRUSTEES

DR. W. C. CLARK, Arts '10, LL.D. '35, was re-elected to the Board of Trustees and Dr. Alexander Macphail, LL.D. '39, C.M.G., D.S.O., was elected as a new member, representing the graduates, in the voting by ballot which closed March 31.

Dr. Clark has been deputy minister of finance in the Dominion government at Ottawa since 1932, and before that was director of courses in Commerce and Administration at Queen's. He has been a member of the Board of Trustees since 1934.

Connected with the University since 1904, Dr. Macphail is retired professor of general engineering. He served throughout the Great War overseas, rising to the command of the First Canadian Division Engineers. He retired from the headship of the department of civil engineering in the spring of 1939.

In addition, Alexander Longwell, Arts '00, Sc. '03, and J. C. Macfarlane, Arts '11, both of Toronto, were re-elected by acclamation as representatives of the University Council on the Board of Trustees. They were the only alumni receiving the requisite number of nominations, and they will hold office for another three-year period as two of the Council's six members on the Board.

Mechanical Engineering Courses To Include Aircraft Study

R ECOGNITION of the growing importance of the aircraft industry in Canada has resulted in some changes in the engineering courses offered at Queen's, to come into effect next term.

Courses in machine design and internal combustion engines will include work on aircraft design, aeronautics, aerodynamics, and on different types of aircraft engines and their auxiliaries.

Prof. L. M. Arkley is head of the mechanical engineering department.

ASTROLOGY AND SUPERSTITION

By Dean John Matheson

MAN has always been superstitious, and no doubt he always will be. Some of his superstitions are local in character, but others spread over much of the world and last for great periods of time. That Friday is an unlucky day has persisted since before the Christian era, and the bad reputation of the number thirteen is centuries old. It is quite true, as some one has said, that superstition is "tenacious and hard to kill."

There has been much speculation, involving a good deal of interesting human study, as to the origin of this or that superstition. But whatever the immediate origins may have been, it is fair to say that in general the roots of superstitions of all kinds are ultimately found in the soil of man's incurable fascination for the unknown. Both good and bad spring from this soil, for it not only nourishes superstition and its long train of evils, but it is also the source of that wonder which is the beginning of all philosophy

In this article I shall deal with only a single superstition, namely, the so-called science of astrology, which has been the great superstition of the ages. By astrology is meant a system of rules by which it is claimed that the fortunes of persons and things on the earth can be learned from a study of things in the sky. It maintains that all happenings on the earth, human or otherwise, are directed and controlled by bodies in the sky, and that if an astrologer knows his art he can foretell what the happenings will be.

This huge superstition has existed as far back as the earliest human records. Its first known appearance as a formal system of belief was among the Babylonians. Its rise among them may be pictured somewhat as follows: They believed that the forces that they saw constantly at work in nature came directly from their gods. They saw the actions of their gods in the formations of the clouds, in thunder and lightning, in the rain, in the growth and decay of vegetation, in the arbitrary destruction by storm and flood. In fact they knew they were surrounded by forces infinitely stronger than their own. The influence of the sun was so evident that it was a simple matter to believe that it was the abode of one or more of their gods. This was the first step in the growth of astrology. The next step followed easily from it. They had already seen, in watching the sky, that most of the stars remained in fixed positions relative to one another, and they knew of only seven exceptions to this. The exceptions were the seven planets of the ancients, namely the sun, moon, Jupiter, Saturn, Mars, Venus, and Mercury. These were seen to move, apparently at will, among the stars. The sun was certainly an abode of the gods. Then why not the other six? All seven were therefore taken to be abodes of the gods.

It was next inferred that a study of the appearances and movements of the seven planets would reveal the intentions of the gods towards the dwellers on the earth. Accordingly the Babylonians studied the positions of the planets among the stars and relative to one another, their proximity, their brightness, eclipses, the direction of the moon's crescent, its halo, and so on. At the same time they observed events among the people, and gradually came to associate certain situations among the planets with corresponding events among the people. If once a certain situation among the planets was followed by a certain event among the people, then they expected that in like circumstances the same event would follow again. Foretelling thus became possible. Rules for interpreting the conditions of the sky for human fortunes accumulated with the years, and astrology became established.

In the course of time the status of the planets as abodes of the gods gradually changed, and the planets came to be regarded as having themselves the powers of the gods and an exercising control over the affairs of men. Similar powers were later invested in the twelve signs of the zodiac, that is, the twelve equal parts of a belt in the heavens along the path of the sun, and also to certain other stars and constellations. An example of this is found in the *Book of Job*, where the Lord said to Job: "Cans't thou bind the sweet influences of the Pleiades, or

loose the bands of Orion?" Later still, notably in the Christian era, the polytheism of Babylonia had disappeared, and the heavenly bodies were considered to have these powers in their own right.

NEW INTELLECTUAL IMPULSE

Babylonian astrology pretended to determine only the fortunes of the people as a whole, or of the nation, or possibly of the king as representing the nation. When it burst beyond the borders of Babylonia and extended into Greece and Egypt, however, it not only enlarged its own scope, but it was accompanied by a new intellectual impulse in the study of scientific astronomy. The Greeks developed astrology very nearly to the highest point in its history, the point which it finally reached in the late middle ages. They raised the signs of the zodiac to a rank equal to that of the planets, and with equal power to control things on the earth. They extended the scope of astrology to include the control not only of human affairs but also of the sciences of the day, and of the materials with which the sciences dealt. For example, biology became merely a study of the rules by which the heavens controlled the functions of plants and animals; chemistry became a study of rules that governed colours and drugs and metals; anatomy and medicine became a study of the rules by which the heavens controlled the parts of the human body.

Possibly the best-known contribution made by the Greeks was the invention of the personal horoscope. Whereas the Babylonians considered that astrology had to do only with the people as a whole, the Greeks extended it to the private life of the individual. The horoscope was a chart made up of one square inside another, with the area between the two divided by straight lines into twelve parts. These parts were called the houses, and were made to correspond with the twelve signs of the zodiac. In these houses were marked the positions of the planets as they were at the date and hour of the birth of the person whose fortune was to be told. Certain other information was also inserted. The horoscope was then complete and ready to be interpreted by any astrologer who knew the rules.

In the heyday of astrology in the later middle ages the condition of Europe was a sorry one. The astrologer came to be a terror to the people, because if he was dishonest, as he often was, he could predict a good or bad future according to his liking for the victim. It was worth while to be a friend rather than an enemy of a recognized astrologer. For in some way the powers attributed to the stars were, in the popular mind, attributed also to the men who interpreted the stars; and the so-called art became a means for private vengeance. A dark future predicted for one from his horoscope seemed like the toll of fate, and the victim became more or less an outcast in his community. At that time astrology fully justified the definition given to it by someone as "the art by which knaves practise on fools." Kings engaged astrologers to fight their battles tor them in advance, and the ones who could make the most favourable predictions were held in the greatest favour. Science became the mouthpiece of astrology and adopted much of its nomencla-The practice of medicine became little more than an interpretation of astrology, and the physician could do nothing about it. The result of all this was a deadly fatalism which was sapping the power of initiative from the people. Europe was, in fact, tied hand and foot in the bonds of a great superstition.

WANE IN POPULARITY

Although there were always at least a few persons who did not yield to the bondage of astrology, yet at the beginning of the sixteenth century it did not seem hopeful that Europe could soon be free. Nevertheless by the end of the century freedom was well on the way. Several causes served to bring this about. Perhaps the earliest cause was the rottenness that had crept into astrology itself, when the honest ignorance of the earlier practitioner gave way to the deliberate crookedness of his successor. But the greatest reforming influence was doubtless the revival of learning in the sixteenth century which threw light into

many a dark corner. Astrology was particularly shaken about the middle of the century when the Copernican theory of the heavens showed that the earth itself was one of the planets. When once it began to lose its hold, its decline was rapid.

But it is not quite dead yet. We shall always have reminders of it in our language and in our literature. This is not surprising when we consider the intimate place it occupied for centuries in the lives of the people. Many of those now reading this article have had reminders of it, other than literary, in the past few weeks when almanacs were thrown in at their doors. These almanacs do just what their astrological predecessors did long ago. They advise concerning health, they predict the weather for the coming year, and they display on the first page the old picture of the disembowelled man surrounded by the twelve signs of the zodiac. This is a continuation of the old astrology. We also have reminders of it now and again when we read in some magazine an advertisement offering to tell us our fortunes by the stars. A number of good periodicals of today have at one time or another carried such an offer. We are also reminded that there are some among ourselves who religiously perform certain duties according to the phases of the moon. Thus astrology lingers on.

CONVOCATION SCHEDULED FOR FRIDAY, MAY 17

A JOINT Convocation ceremony will be held for the Faculties of Arts, Medicine. and Applied Science, in Grant Hall on Friday, May 17, thus bringing to a close the ninety-ninth session of the University.

The annual meeting of the Board of Trustees will be held in the evening at 8 o'clock in Room 221, Douglas Library. Other events scheduled for Convocation week-end include the annual meeting of the University Council and the semi-annual meeting of the Board of Directors of the General Alumni Association.

Although arrangements have not yet been completed it is expected that the Alumni Association will sponsor a Convocation dance in Grant Hall on the evening of May 17.

UNIVERSITY COMMITTEE HEARS WAR SERVICE REPORTS

REPORTS on the various phases of war work at the University since last September were presented at a meeting of the National Service Advisory Committee recently.

Lieut.-Col. R. O. Earl reported for the Queen's University Contingent, C.O.T.C.; Dean A. V. Douglas, for Levana; and Donald C. Brunton, Sc. '40, Ottawa, and Neil C. Davis, Arts '41, Kingston, for the undergraduates, whose profits from various social functions have been devoted mainly to war-aid purposes. Mr. Ross M. Winter, Arts '26, director of the department of University extension, told of the work being done for the troops in the educational field.

Dr. J. A. Gray, Chown research professor of physics, reported that a survey had been made of the University's facilities for assisting the National Research Council in furthering the country's war effort. Members of the committee in close touch with the technical and research situation in Canada voiced the opinion that there would be a great demand for technically and scientifically trained men during the period of the war.

The committee is composed of J. M. Macdonnell, Arts '05, Toronto, as chairman, sixteen members of the staff, and the president of the Alma Mater Society.

Work of Queen's Artists Represented In Exhibition of Water-Colours

A N exhibition of water-colours by Canadian artists, shown at the New York World's Fair last summer, was on display in the Old Arts Building March 4-17. The artists are members of the Canadian Society of Painters in Water-colours. Represented among the group were Mr. André Biéler, resident artist at Queen's, and Mr. Goodridge Roberts, former resident artist. Mr. Biéler spoke at a private showing on March 4.

PILOT OFFICER BISHOP KILLED IN ACTION

WORD was received in a cable from the War Office of the death on March 12 of Pilot Officer Lloyd George Bishop, Arts '39, in air operations somewhere in France. This marks Queen's first casualty of the war.

Mr. Bishop was born at Bishop's Mills, Ont., and received his early education at Newboro, Sydenham, and Albert College,

PILOT OFFICER L. G. BISHOP

Belleville. He entered Queen's in 1936, but left in October, 1938, to accept a commission in the Royal Air Force. After finishing his preliminary training, he was posted to service in France with Fighter Squadron 73, on February 16.

A short memorial service was held on March 20 in the Morgan Chapel, Old Arts Building. Among the survivors is a brother, Rev. Alfred Wesley Bishop, Arts '32, Port Arthur, Ont.

Naval Expert Spoke

THE Navy in Peace and War" was the subject of an illustrated address given in Convocation Hall on March 29 by Admiral Sir Howard Kelly. To a capacity audience Admiral Kelly described

the work of the Allied Navy, speaking highly of the work of the French fleet which was responsible in large measure for the safe crossing of the Canadian troops now overseas. Principal Wallace acted as chairman of the meeting, which was under the joint auspices of Queen's University and the Kingston Branch of the Canadian Institute of International Affairs.

G. C. BATEMAN, Sc. '05, ELECTED C.I.M.M. HEAD

GEORGE C. BATEMAN, Sc. '05, Toronto, was elected president of the Canadian Institute of Mining and Metallurgy at its forty-fourth annual meeting held in Winnipeg March 11-13. Mr. Bateman is the second member of his family to be honoured within a few months, his brother, Dr. Alan M. Bateman, Sc. '10, having been made president-elect of the Society of Economic Geologists at the annual meeting of that body at Minneapolis, Minn.

E. A. Collins, Sc. '05, Copper Cliff, remained as a member of the C.I.M.M. Council for 1940-41 as one of the past presidents. Mr. Collins is president of the General Alumni Association, and Mr. Bateman has also served in this capacity.

Another past president of the Institute, Principal Wallace, flew to Winnipeg to deliver the main address at the annual dinner. Dr. E. L. Bruce, Sc. '09, Arts '11, Miller memorial research professor in geology, also attended.

Several Queen's alumni took prominent parts in the business and technical sessions held throughout the convention. A. V. Corlett, Sc. '22, and G. D. McLeod, Sc. '20, both of Arntfield, Que., presented a paper entitled "Mining Method for Large Ore Bodies," W. H. Losee, Sc. '12, Ottawa, gave an address, "The Mineral Industry of Canada in 1939," and N. B. Davis, Sc. '11, Ottawa, read a paper, "Nepheline Syenite," on the first day. In the technical session on the second day, A. F. Matheson, Arts '29, and A. S. Bayne, Sc. '35, Port Arthur, discussed the geology and mining of the Little Long

Lac-Sturgeon River-Beardmore area, and C. S. Gibson, Sc. '22, Timmins, showed a film, "Ventilation and Dust Control." In the session on applied geology on the final day, H. C. Horwood, Sc. '31, Toronto, spoke on the Cochenour-Willans Gold Mine. Several alumni also took part in the discussions.

Ira C. Brown, Sc. '40, Ottawa, won a \$25 prize for his paper, "Mine and Mill of Sturgeon River Gold Mines, Limited." The accident prevention prize given by the Mine Safety Appliance Company was won by N. D. Bothwell, Sc. '11, safety engineer at Britannia Mines, Britannia Beach, B.C. J. F. Henderson, Sc. '29, and A. W. Jolliffe, Arts '29, won Barlow Memorial prizes.

TWO NEW MEMBERS ELECTED TO UNIVERSITY COUNCIL

TWO new members were chosen and seven retiring members were returned, to hold office until 1946, in the University Council elections which closed on March 31. There were fourteen nominees.

The newcomers to the Council are H. G. Bertram, Sc. '10, Dundas, and Dr. B. T. McGhie, Med. '16, Toronto. Mr. Bertram is vice-president and general manager of the firm of John Bertram and Sons Company, Limited, and is a director of the General Alumni Association. Dr. McGhie is deputy minister of health for the Province of Ontario.

Members who were re-elected are Dr. J. A. Bannister, Arts '98, Peterborough, Dr. Campbell Laidlaw, Arts '02, Med. '07, Ottawa, E. L. Longmore, Sc. '12, Timmins, B. E. Norrish, Sc. '08, Montreal, Dr. L. A. Pierce, Arts '12, LL.D. '28, Toronto, Mrs. R. O. Sweezey (Harriet Watson), Arts '09, Kingston, and Dr. James Wallace, Arts '98, Theol. '01, Med. '20, New York.

Science Student Dies

DOUGLAS RATTRAY, Sc. '41, Salmon Arm, B.C., died March 10 in Kingston General Hospital after a short illness. Company sergeant-major of the engineers, C.O.T.C., Mr. Rattray was a

well-known member of the Queen's contingent. A short service was conducted in Convocation Hall by Rev. Dr. J. R. Watts, acting principal of Queen's Theological College, assisted by Rev. J. D. Mackenzie-Naughton of St. James' Anglican Church.

MISS JEANNE LECAINE WINS \$1250 SCHOLARSHIP

MISS JEANNE S. LeCAINE, Arts '37, has been awarded the \$1,250 travelling scholarship of the Canadian Federation of University Women.

MISS LeCAINE

After a brilliant undergraduate record, Miss LeCaine graduated from Queen's with a B.A. in 1937, with first-class honours in mathematics. She was awarded the Arts Research Fellowship and continued her studies, gaining her M.A. in 1938 and win-

ning the Marty Memorial Scholarship. In 1939 she received the Whitney Scholarship from Radcliffe College.

The new scholarship will enable Miss LeCaine to continue her mathematical studies and complete her research under the direction of Prof. G. D. Birkhoff at Harvard University.

EXAMINATIONS AND TESTS END C.O.T.C. COURSE

WITH the practical examinations held during the last ten days of March, Queen's University Contingent, Canadian Officers' Training Corps, completed its year's work and all ranks are awaiting results of the final written examination.

On Saturday and Sunday, March 16 and 17, cadets wrote three-hour tests for the "O" certificate which qualifies them for the rank of lieutenant.

Practical tests peculiar to each of the arms were held to discover the cadets' ability to use their training received in

the drill periods, and for this purpose officers of the contingent were assisted by instructors from the permanent force.

All ranks received bonuses in proportion to the amount of time spent in parades and lectures, the men receiving five dollars as a maximum, and non-commissioned officers and officers being paid proportionately, according to their ranks.

TO OPEN NEW RESIDENCE FOR WOMEN STUDENTS

NEW residence for women students will be opened next fall on University Avenue, opposite Ontario Hall, in what was formerly a large, private home. Purchased by the University some time ago, the dwelling will house

twenty-two girls.

The Ban Righ Hall Administration Committee asked for the use of the building for a three-year experimental period, as more accommodation for first-year women students was needed. Permission was granted and the house is being renovated suitably, to be ready for occupation next term.

The suggestion has been made that the new residence be called "Muir House," in honour of the late Jessie Muir, Arts '07, formerly head of the modern languages department at Lisgar Collegiate Institute, Ottawa, and onetime president of the Queen's University Alumnae Association.

Mrs. R. C. Wallace Is Re-elected President of Faculty Women's Club

RS. R. C. WALLACE was re-elected president of the Faculty Women's Club at the first annual meeting held March 29 in Convocation Hall. Other officers for the coming year are: vicepresidents, Mrs. A. L. Clark and Mrs. John Matheson; secretary, Mrs. Arthur Jackson; treasurer, Mrs. F. A. Knox; convener of social committee, Mrs. W. A. Jones; convener of membership committee, Mrs. Donald Hebb.

The secretary's report showed that five general and six executive meetings had been held during the year, the average attendance at the former being more than one hundred. The club proved a resolution asking for affiliation with the Local Council of Women, naming Mrs. C. S. Melvin as its representa-

After the business session, members adjourned to the Principal's house, where tea was served by Mrs. P. M. Macdonnell, assisted by Mrs. W. A. Mackintosh (Jean Easton), Arts '26, Mrs. F. A. Cays, Mrs. C. A. Curtis, Mrs. J. A. Gray, Mrs. Jackson, Mrs. T. V. Lord, Mrs. J. F. Edwards (Evelyn Rickard), Arts '36, and Mrs. R. L. Dorrance. Tea was poured by Mrs. G. J. MacKay, Mrs. E. Flammer, and Mrs. W. P. Wilgar.

ENDOWS SCHOLARSHIP IN MEMORY OF DEAN CAPPON

ISS ALICE L. MACNEE of Kings-IVI ton has endowed a scholarship in memory of her brother-in-law, the late Dr. James Cappon, former head of the department of English and dean of the Faculty of Arts, it was announced during March.

The award, to be called the James Cappon Memorial Scholarship, has a value of \$40 and will be given to the best student in English 2 who, in the following session, proceeds to further work in English. The first award will be announced at the May Convocation.

The University is happy that Dr. Cappon's great services are thus being commemorated in so suitable and useful a way.

J. H. McDonald Appointed Judge For District of Algoma, Ontario

PPOINTMENT of John H. Mc-Donald, K.C., Arts '10, as senior judge of the district of Algoma was announced on March 12.

Judge McDonald received his B.A. at Queen's and then studied law at the University of Toronto, receiving the LL.B. degree in 1913. Since 1914 he has been practising at North Bay, Ontario. In December, 1934, he was created a King's Counsel. Judge McDonald assumed his new duties on March 15.

QUEEN'S MEN PROMINENT IN FEDERAL ELECTION

IVE graduates of Queen's, three honorary alumni, and one member of the Board of Trustees were elected to the Canadian House of Commons in the fed-

eral election of March 26.

The results in the nine "Queen's" constituencies showed that eight Liberal and one National Government candidates were successful. Prime Minister W. L. Mackenzie King, LL.D. '19, held his seat at Prince Albert, Sask. Hon. Norman Rogers, Rector of Queen's and former professor of political science, retained Kingston for the Liberals; the Minister of National Defence won his contest by a large majority.

In the riding of Nipissing, Dr. J. R. Hurtubise, Med. '08, Sudbury, was reelected by a large majority. Dr. Hurtubise has been a member of the House for many years. In the riding of Ontario, W. H. Moore, LL.D. '29, another veteran, was re-elected. Dr. J. J. McCann, Med. '09, Renfrew, a former star football player and gold medalist of Queen's, carried the seat of Renfrew South after a stiff fight. Dr. McCann was first elected in 1935. The National Government member is Hon. Herbert A. Bruce, LL.D. '33, former lieutenant-governor of Ontario, who won Toronto Parkdale riding.

F. D. MacKenzie, Arts '15, was reelected for Neepawa, Man., with a good majority, and Dr. H. R. Fleming, Arts '16, Med. '22, Humboldt, Sask., also retained his seat. In Edmonton East, F. C. Casselman, Arts '11, won a seat for the Liberals, and he is the only graduate who is new to the House.

AESCULAPIAN SOCIETY ENTERTAINS INTERNES

THE Aesculapian Society was host to the Canadian Association of Medical Students and Internes at its annual convention March 2 and 3. Delegates from eight of the nine Canadian medical schools attended.

Principal Wallace welcomed the delegates on behalf of the University and later he and Mrs. Wallace entertained them at tea. A banquet in the Students' Union was tendered the visitors by the

Aesculapian Society.

During the business sessions, addresses were given by Dr. D. W. Boucher, Med. '28, lecturer in surgery, Dr. Gordon Mylks, Arts '27, Med. '29, assistant in obstetrics and gynaecology, and Dr. Eldon Boyd, Arts '28, Med. '32, professor of pharmacology. Students gave reports dealing with student health and welfare, interne appointment and maintenance, medical text books, and medical publications. Drs. Boucher Mylks were re-elected as Queen's representatives on the advisory board for next year, and Dr. L. J. Austin, professor of surgery, was chosen as honorary chairman of the Canadian Interne Board.

Mr. Don Lloyd-Smith, McGill Rhodes Scholar, was elected president of the national executive, and the place of next year's annual meeting was set at Mont-The present executive consists of C. K. Benson, Med. '40, King, Ont., Hugh Megill, Med. '41, Ottawa, and H. G. Kelly, Med. '40, Kingston. Queen's delegates at the conference were Wilson H. Ford, Med. '40, Bear River, N.S., Clifford Scharf, Med. '40, Ottawa, W. L. Grimshaw, Med. '40, Toronto, J. W. Latimer, Med. '41, Seeley's Bay, Ont., and John Parry, Med. '42, Toronto.

ARMY LIST

CLLOWING is an additional list of alumni who have joined some branch of the defence forces of Canada or the Empire. Readers of the Review are asked to help keep the record up to date by notifying the editor of any alumni who have joined units of the active militia, air force, or naval service. Please include rank and unit where known.

Royal Canadian Air Force — H. H. Langford, Arts '37, E. C. S. Gould, Sc. '37.

Royal Canadian Engineers — Captain C. Ben Bate, Sc. '15, No. 5 Detachment.

Royal Canadian Corps of Signals — Lieut. J. B. Clement, Sc. '36, B Corps Signals.

Infantry and Rifles — Captain N. C. Fraser, Arts '24, Ontario Regiment

(Tank), C.A.S.F.

Royal Canadian Army Medical Corps —Captain R. R. Mutrie, Med. '34, Captain E. T. Mutrie, Med. '37, Captain K. B. Waller, Med. '29, Captain J. C. Pinch, Med. '33, Adjt., and Captain G. B. Macpherson, Med. '30, Arts '31, are all members of the 11th Field Ambulance, C.A. S.F. Other Medical alumni serving in various units, in addition to those mentioned in previous issues, are Drs. A. E. Harbeson, Med. '29, C. H. Leavens, Med. '35, J. C. Macfarlane, Med. '27, B. C. Miller, Med. '37, W. S. Millman, Med. '39, P. J. Maloney, Med. '31, R. T. Potter, Med. '39, W. R. I. Slack, Med. '34, J. B. Willoughby, Med. '29, E. A. Watkinson, Med. '39, and Captain C. R. Salsbury, Med. '24.

IMPORTANT SCHOLARSHIPS GIVEN QUEEN'S STUDENTS

UEEN'S will be ably represented at California Institute of Technology next year when Norman Z. Alcock, Sc.

LEON KATZ

Vancouver, '40, B.C., and Donald C. Brunton, '40, Ottawa, join Leon Katz, Sc. '34, Kingston, who has been there for the past year. Both honour students, Mr. Alcock and Mr. Brunton will do postgraduate

work at the Pasadena institute.

Mr. Alcock was awarded the Charles LeGeyt Fortescue fellowship, valued at \$700, and given by the Westinghouse Electric and Manufacturing Company in memory of C. L. Fortescue, Sc. '98, LL.D. '29. Dr. Fortescue, who was the first graduate in electrical engineering from Queen's, died in 1936 after having served the company for thirty-eight years, during which time he achieved international fame as an inventor.

In view of the history of the award, it is most fitting that a Queen's man should be the first to receive it. Especially notable is the fact that Mr. Alcock won the fellowship in competition with students from all other colleges and universities in the United States and Canada. Mr. Alcock came to Queen's on a pro-

N. Z. ALCOCK

D. C. BRUNTON

vincial scholarship and has won honours in each of his four years, including the Sir Sandford Fleming, the N. F. Dupuis, the W. W. Near, a University, and the Cohen scholarships, and the Fitch Company prize.

Mr. Brunton, final-year student in physics, received an assistantship valued at about \$500 at the California college. He also has had a brilliant record at Queen's. He entered with a Knights of Columbus scholarship and during his four undergraduate years has won five important awards, including three University scholarships, the W. W. Near scholarship, and the Reuben Wells Leonard fellowship. In the summer of 1939 he studied physics under Prof. J. K. Robertson at Queen's and will do further work here this summer. At California he will continue his research in physics.

Mr. Katz had a notable record of scholarship while at Queen's and received three National Research Council awards. For some time after receiving his degree he carried on postgraduate work in physics with Dean A. L. Clark, and last year went to California. Word has been received that his fellowship has been extended for another year. Mr. Katz has already made valuable contributions to scientific knowledge in his research in the ratio of specific heats of gases.

OUT OF THE PAST

A Story of Yesteryear

A MEMBER of the staff for more than fifty years, the late Rev. James Williamson, one-time vice-principal of Queen's, is one of the best beloved figures in the history of the institution. To the older graduates the name of Williamson represents all that is fine and good and distinguished about the University. As one of the "Makers of Queen's" he ranks with Principal Grant.

Dr. Williamson came to Queen's in 1842, the year classes were started, and he continued in active service until his death in 1895. Physics and mathematics were supposed to be his field, but he taught, at one time or another, nearly every subject on the curriculum.

To Dr. John R. Shannon, Arts '84, Med. '90, New York, the *Review* is indebted for the following reminiscences about this grand old gentleman:

"When I was at Queen's, 1880-90, the professor who possessed the love and affection of every one connected with the University was the Rev. James Williamson, who was vice-principal and professor of cverything! He was also 'Billy,' whom everyone adored—a man of great learning, yet a simple soul, guileless, with a quiet humour all his own, forgetful to a degree. Should the professor of Church history or of any other subject be absent, call on Billy!

"Billy's most conspicuous characteristic was his absent-mindedness, concerning which numerous anecdotes were told. When he lived at 'Heathfield,' out the Williamsville road, he drove to College with horse and buggy—sleigh in winter. And it was told that more than once he returned on foot, to be gently upbraided by his wife and reminded that he had left the horse tied in the College shed. In his own time, when the academic gown was obligatory, Billy came into the classroom one morning wearing his overcoat in-

stead of his gown, which hung near by in the cloakroom.

"In those days it was the pleasant custom for a professor to invite classes or bodies of students to a 'party' at his home. On one occasion, early in the session, some rascally sophomores (keeping the matter a dead secret) sent out invitations to the newly arrived freshman class, not as large then as now, for a party at Billy's house, at the corner of Earl and Sydenham Streets. The professor and his wife were quietly reading when the guests began to arrive, and Billy greeted the early comers with gracious courtesy; but when bunches of three or more began to come in, he took Mrs. Williamson to one side and said: 'My dear, I suppose I invited these boys, but I cannot remember it!' However, refreshments in plenty were provided (and I can recall that the best bottled beer was always to be had at Billy's) and 'a good time was had by all.'

"My eldest brother, the late R. W. Shannon, Arts '75, told of a little incident that happened in the geology class, temporarily in Dr. Williamson's charge. A number of specimens from the museum were on display, when one of the students, of the smart-Aleck type, asked, 'Professor, is this rock anything to the Rock of Ages?' Billy looked at him gently, and scathingly replied, 'M—, you will never be a gentleman.'

"I like to remember the experience of one of my contemporaries, Walter Hobart, whose father, George Hobart, was a leading druggist in my day, his store being on the northeast corner of Princess and Bagot Streets. Walter's name was Samuel Walters Hobart and Billy always called him 'Samuel,'everyone else, 'Walter.' One day, during class, a mischievous student interrupted matters by rattling a loose board in the floor. The professor looked up, and the only familiar face he saw was Hobart's, so he said, 'Samuel, I would like to speak with you at the end of the lecture.' When the hour was over, Hobart placed himeslf in front of the professor's rostrum, and waited. Billy was writing and did not notice him until Hobart coughed and said: 'Professor, you said you would like to speak with me at the end of the lecture.' Billy looked up, quite bewildered, having entirely forgotten the incident. Then his face beamed with a most beatific smile and he replied, 'Oh, yes, Sam-

uel, I wanted to ask you how your father was.'

"I was in Convocation Hall when Billy's portrait, still to be seen there, was presented to him. The dear old gentleman looked at it and said, 'I had no idea I was such a good-looking fellow.'"

STUDENT ACTIVITIES

THE furious haste with which undergraduates burned midnight oil in preparation for final examinations which started in the second week of April lends emphasis to a news item that appeared in March. It was stated that University officials were seeking some way to encourage students to get down to work earlier in the academic year, as Christmas examinations gave evidence of too much extra-curricular activity. The Alma Mater Society accepted an invitation to appoint a committee of four to meet with members of the staff for discussion on the question.

All year a number of students have been campaigning for "open house" two nights a month at the Students' Union. It was pointed out that there is no common room on the campus available to both men and women. The Constitution of the Union does not permit such gatherings. Principal Wallace has suggested that Grant Hall and the Red Room in the New Arts Building might answer the purpose. Here the men and women students could gather on Saturday nights for a game of bridge and dancing to a phonograph.

On March 20 the Levana Society fêted the graduating class at a banquet in Ban Righ Hall. Miss Ruth Hood, Arts '40, Gananoque, president of the Society, occupied the chair. Guests for the occasion were Mrs. R. C. Wallace, Dr. A. V. Douglas, dean of women, Miss Hilda Laird, Arts '18, of the German department, Miss Mary Macdonnell, Arts '09,

of the classics department, and Miss Jean Royce, Arts '30, registrar. Mrs. Wallace presented a plaque for outstanding athletic ability to Miss Isobel Matheson, Arts '40, Edmundston, N.B. This award is made only in exceptional circumstances and has been given but twice before. The banquet was followed by a dance.

The students took an active part in the federal election on March 26 and enthusiastic groups supported the two candidates in Kingston. Liberals joined the Norman Rogers Club in large numbers and nearly twelve hundred attended a dance held at the Liberal clubrooms downtown. National Government supporters rallied to the side of Col. T. A. Kidd and worked furiously on election day. The two parties disagreed fervently during the campaign, but both congratulated Mr. Rogers when he was re-elected.

Mr. Jean-Charles Harvey, editor of the Montreal *Le Jour*, visited the campus for the Arts Society's dinner, held in Grant Hall. This marks the first time in years that the function had been held, and Mr. Harvey's address proved a fitting climax to the banquet proceedings. The presentation of athletic and executive awards formed an interesting part of the programme.

Bishop Francis J. McConnell of the Methodist Episcopal Church, New York City, addressed the last University church service for the year in Grant Hall on March 3. All the services were well attended and thoroughly appreciated by the student body.

Various elections held during the month resulted as follows: C. R. Maundrell, Arts '41, Ottawa, president of the Arts Society; Miss Margaret Cross, Arts '41, Port Arthur, president of the Levana Society; Murray Luscombe, Sc. '41, Ottawa, president of the Engineering Society; M. B. Dymond, Med. '41, Toronto, president of the Aesculapian Society; and G. W. Payne, Theol. '41, pope of the Theological Society. Gary S. Bowell, Arts '41, Vancouver, was elected by members of the *Journal* staff as editor for 1940-41.

Students briefs: The Alma Mater Society has purchased a number of hoods which will be rented out to graduating students. . . . The Engineer arm of the C.O.T.C. contingent won the trophy for proficiency after the annual inspection by Brig.-Gen. H. E. Boak, D.O.C., M.D. No. 3 . . . A commmittee of the Alma Mater Society studied proposals for a combined pipe and brass band, to be composed of thirty-five pieces . . . A number of changes were made in the A.M.S. Constitution at the annual meeting of the society in Grant Hall on March 30.

ATHLETICS

Master of Ceremonies Reeve Helps Make Colour Night Success

WITH Ted Reeve, "The Moaner," former Queen's football coach, presenting the athletic prizes, the Alma Mater Society's fourth annual Colour Night on March 12 was voted the most successful to date. Both dinner and dance were held in Grant Hall this year, this arrangement being made possible by the enlargement of the kitchen facilities.

Chief among the athletic awards was the presentation of the new James Bews Intramural Trophy to Science '42. This was given by alumni to the University for intramural competition, and was named in honour of "Jimmy" Bews, for many years physical director at Queen's.

Great applause greeted the presentation of an honorary senior "Q" to Senator Powell. Ted Reeve pointed out that the Senator had put the boys in battle condition for many years, and had never failed to win their respect; it was most fitting that such an award should be made.

Ted spoke at some length of the ability of Nick Paithouski, who received the Johnny Evans Memorial Trophy as the most valuable member of the football team. The stellar centre was presented with the Athletic Stick also. Ted foresaw a bright future for Nick as a hockey

player, remarking that he had never seen a better stick handler with a knife and fork.

Ten students received membership in the newly formed Tricolour Society, instituted by the Alma Mater Society to honour undergraduates who have made outstanding contributions of student life. The presentations were made by Dean Etherington, honorary president of the A. M. S.

The complete list of awards made is as follows:

Tricolour Society: Donald C. Brunton, Sc. '40, Ottawa; Sylvia Woodsworth, Arts '40, Kobe, Japan; Allen Brady, Arts '40, Sault Ste. Marie, Ont.; Wilson H. Ford, Med. '40, Bear River, N.S.; C. K. Benson, Med. '40, King, Ont.; F. K. McKean, Sc. '40, Thornbury, Ont.; Ruth Hood, Arts '40, Gananoque; John Matheson, Arts '40, Quebec City; Peter Macdonnell, Arts '40, Toronto; Bruce G. McLiver, Sc. '40, Hamilton.

Senior "Q" with stars: Jerry Conlin, Sc. '40, Toronto, football (three stars); Bill Fritz, Sc. '40, Toronto, track (three stars); Hugh McGill, Sc. '40, Orillia, football and hockey (two stars); Douglas Annan, Sc. '40, Hamilton, football (one star); Nick Paithouski, Sc. '40, Sarnia, football (one star); William Lawrence, Arts '41, Galt, boxing and wrestling (one

star); George Silver, Arts '40, Amos, Que., boxing and wrestling (one star); James Burrows, Sc. '40, Listowel, hockey (one star); Harold Carter, Sc. '40, Toronto, hockey (one star); Peter Malachowski, Sc. '40, Oshawa, football and wrestling (one star).

Hockey: Mel Williamson, Sc. '40, Winnipeg, Norval Williamson, Med. '42, New Liskeard, James Neilson, Arts '41, Stratford, Robert Neilson, Arts '42, Stratford, Lenox Lane, Arts '43, Sudbury, William Osborne, Arts '40, Portage LaPrairie, Man.; Wilfrid Mable, Sc. '40, Thorold, George Hood, Sc. '43, Gananoque, William R. Musgrove, Sc. '40,

Winnipeg.

Football: George Carson, Med. '41, Ottawa, Ivan McDonough, Sc. '42, Cobalt, Harry Jones, Sc. '40, Hamilton, A. D. Marshall, Sc. '43, Toronto, Arthur Walker, Arts '43, Toronto, Kenneth Carty, Arts '42, Toronto, J. H. Brown, Sc. '40, Hamilton, Alan Clark, Arts '40, Toronto, Robert Simpson, Sc. '40, Ottawa, Jack Padden, Sc. '40, Paris, Robert Davis, Sc. '40, Ottawa, George S. Edwards, Arts '41, Cobourg, Jack Buckmaster, Arts '43, Toronto.

Boxing and Wrestling: Ernest J. Miron, Sc. '42, Sudbury, John F. Evans, Sc. '43, Sarnia, Peter A. Cain, Sc '43, Creighton, George Neumann. Sc. '40, Arnprior, Ira C. Brown, Sc. '40, Ottawa, Joseph

Loucks, Sc. '40, Winnipeg.

Track: G. M. Paul, Med. '44, Napanee, Rod. Dingwall, Med. '43, Kingston, Emmett McDonough, Sc. '42, Cobalt, Peter H. Humenick, Sc. '42, Windsor, M. A. Weaver, Med. '42, Burlington, Elbert Dowd, Sc. '41, Ottawa, Kenneth Carty, Arts '42, Toronto.

Gymnastics team: Hector Chaput, Sc. '41, Ottawa, Charles Matthews, Sc. '43, Kingston, J. R. Miller, Arts '42, Owen

Sound.

A. B. of C. Plaques: John F. Evans, boxing; Peter Cain, boxing; George Neumann, wrestling; Ira Brown, wrestling; Isobel Matheson, Arts '40, Edmundston, N.B., Levana, tennis. Bar to plaque, William Fritz, track.

C. I. A. U. Medals: William Fritz, silver and bronze, track; Peter Hume-

nick, bronze, track; John F. Evans and Peter Cain, bronze, boxing; George Neumann and Ira Brown, bronze, wrestling; Charles F. Matthews, bronze, gymnastics.

Special awards: Donald C. Brunton and Joseph Hoba, Senior "Q"; Johnny Evans Memorial Trophy, Nick Paithouski; Royal Todd Trophy, Kenneth L. Chapman, Sc. '42. Meaford.

In addition to the above awards, Q II's were given to fourteen members of the intermediate football team, ten members of the junior basketball team, and five members of the hockey team that won the Van Horne cup.

Veteran George Carson Chosen As Captain of 1940 Football Team

A T the final meeting of the senior football squad George T. Carson, Med. '41, Ottawa, was chosen captain for next year. He succeeds Doug Annan, Sc. '40, Hamilton.

One of the few veterans of this year's squad, Carson learned his football at Ottawa Glebe Collegiate Institute before coming to Queen's. He played as a junior in his freshman year and then made the jump to senior ranks, where he has been ever since. He was a member of the championship 1937 team.

Carson's experience was a great asset to this year's squad and he demonstrated his ability by collecting two touchdowns against Western, the last one coming in his twenty-fifth Intercollegiate game. Since he started to play at Queen's he has been an outside wing, and will hold down one of the end positions again next year.

Fritz Places Fourth

In his last race of the season, Bill Fritz finished fourth in the 600-yard indoor event at the Knights of Columbus games in New York on March 9. Jim Herbert cut 3-10 of a second off the former record to win in 1:10.8, beating Charley Belcher, national champion, and John Quigley. Fritz overhauled Wesley Wallace to take fourth place, a few feet back of the winner.

Bobby Neilson Scored Most Goals In Intercollegiate Hockey Series

W ITH a record of four wins and four losses, Queen's finished up the 1939-40 International Intercollegiate Hockey League in fifth place.

Owing to postponement because of the death of His Excellency, the Governor-General, the Tricolour defaulted its last game against McGill. Neither team stood to gain or lose by completing the schedule.

Although they won only four games, the Queen's players scored the second highest number of goals. The final standing was as follows:

O	P	W	L	D	\mathbf{F}	A	Pts.
Toronto	8	8	0	0	64	12	16
McGill	8	6	2	0	35	22	12
Yale	9	5	3	1	39	38	11
Princeton	9	4	4	1	29	46	9
Queen's	8	4	4	0	45	29	8
Dartmouth	9	2	7	0	29	56	4
Harvard	9	0	9	0	18	56	0

In the individual scoring, Bobby Neilson led the league with thirteen goals, one more than Norv Williamson. Dunbar of Toronto collected the greatest number of points, however, with twenty-eight. Bobby Neilson placed second in points, Mel Williamson was third, and Norv Williamson, fifth. Following are the Tricolour statistics:

the filedical statistics	J •			
	Ga.	G.	A.	Pts.
Bobby Neilson	7	13	8	21
Mel Williamson	7	7	13	20
Norv Williamson	7	12	5	17
Len Lane	7	5	3	8
George Hood	7	5	1	6
Hal Carter	7	0	3	3
Wilf Mable	7	1	2	3
Jim Neilson	7	1	1	2
Bill Osborne	7	0	1	1
Ding McGill	7	0	1	1
_				

Badminton Team Places Third

Queen's followed with nine, Western had

eight, and McMaster trailed with seven. The Tricolour team was made up of Dora Tottenham, Arts '42, London, Eng., Isobel Matheson, Arts '40, Edmundston, N.B., Frances Hayward, Arts '42, Hamilton, and Mary Hamilton, Arts '42, Kitchener.

Jack Mitchell To Captain 1940-41 Senior Basketball Team

JACK D. MITCHELL, Sc. '41, Moose Jaw, Sask., was named captain of next year's senior basketball team, succeeding Bob Davis, Sc. '40, Ottawa, who graduates this spring.

For two years Jack was a member of junior teams at Queen's, and in 1938-39 he played on the championship intermediate squad. In the season just ended he enjoyed considerable success as a guard on the senior team, usually leading in the scoring with Don Whyte, Art Walker, and Bob Davis. In addition to his basketball duties, Mitchell was also head cheerleader this year.

After the postponement owing to the death of His Excellency, the Governor-General, Queen's travelled to Montreal for the final game against McGill. Minus high-scoring Art Walker, the boys gave a good account of themselves, but finally lost 29-23. The Intercollegiate championship was shared by Toronto and Western, with McGill in third place and Queen's, with one win, in fourth.

Girls Win Consolation Series In Bronze Baby Competition

WESTERN recaptured the Bronze Baby, emblematic of the women's Intercollegiate basketball championship, on March 3, Queen's winning out in the consolation competition. In the first games, Toronto defeated the Tricolour 27-7 and Western eliminated McGill 34-12. Western defeated Varsity 23-20 in the finals, while the Queen's girls downed McGill 29-11 in the consolation match. The Queen's team was composed of Jean Merriam, Arts '41, Westboro, Donalda MacRae, Arts '42, Ottawa, Vivian O'Neil, Arts '40, Kingston, Helen Webb, Arts

'43, Calgary, Donalda Campbell, Arts '43, Ottawa, Dorothy Patterson, Arts '43, Kingston, Jane Currier, Arts '43, Ottawa, Marguerite Byrne, Arts '42, Ottawa, and Audrey Dickerson, Arts '42, Mount Royal, Que.

AT THE BRANCHES

Toronto

VERY available seat was filled at the L big dinner and smoker held in the Canadian Military Institute on March 8. R. C. McNeil, Com. '31, acted as chairman and toastmaster for the event, one of the best of its kind ever put on by the

Toronto organization.

The guest speaker was Col. Fraser Hunter, M.L.A., late of the Bengal Lancers, who gave a stirring account of the British war effort in the East during the vears 1914-18. Colonel Hunter stressed the importance of the Eastern campaign, where, he contended, the war was really won rather than on the Western battlefront. The address was illustrated with lantern slides, which added considerably to the interest of the subject material. The speaker was introduced by H. E. Armstrong, Arts '22, Com. '24, and the vote of thanks was moved by N. G. Stewart, Arts '11, Sc. '15.

Attendance prizes were won by Dr. Gerald S. Graham, Arts '24, assistant professor of history at Queen's, who was a guest at the meeting, and by C. A. Heard, Sc. '24. The prizes, which had been donated by the Canadian General Electric Company, were awarded by J. N. Milne,

H. J. Hamilton, Arts '32, secretarytreasurer of the General Alumni Association, conveyed the greetings of the University and the Association. Dr. Graham made a few witty remarks which were greatly appreciated.

An excellent programme of entertainment added much to the enjoyment. Mr. John Giordmaine gave an exhibition of legerdemain and magic that baffled and delighted his attentive audience. Mr. Jack McCreight, advertised as the Boy Wonder of the Xylophone, lived up to advance notices, his selections being greatly appreciated.

During the evening, community singing was enjoyed, under the direction of Mr. Stewart, and with Sam Ketcheson, Arts '33, at the piano. Dr. A. E. Lavell, Arts '91, led the gathering in a spirited rendition of the Queen's yell.

At the conclusion of the formal programme, the card room was placed at the disposal of the guests, and many took advantage of the opportunity. The other facilities of the Institute were also en-

joyed.

The committee in charge of this wellarranged function consisted of W. J. Ehmann, Com. '28, A. R. Foster. Sc. '23, Mace Mair, Arts '24, Norman McLeod, Arts '26, Mr. Milne, and Mr. McNeil (convener).

London

X/ITH Principal Wallace as the guest of honour and speaker, the annual dinner of the London branch was held at the Hotel London on March 20. The most enjoyable affair was attended by about ninety alumni and friends. W. R. Alder, Sc. '07, retiring president, was in the chair.

The dinner tables were attractively arranged under the supervision of Mrs. W. R. Hambly (Edna McGill), Arts '12. After the toast to the King, the film, "Paths of Learning," was shown to the delighted audience, and college songs were sung with gusto, reminding all present of their days at Queen's.

President W. Sherwood Fox, LL.D. '29, of the University of Western Ontario, introduced Dr. Wallace, and Dr. H. R. Kingston, Arts '08, moved the vote of thanks. The Principal delivered a much appreciated address called "Looking Forward." Afterwards bridge was enjoyed under the direction of W. H. Adamson, Arts '13.

The slate of officers for 1940-41, presented by W. M. Herron, Arts '29, was accepted unanimously as follows: honorary president, Dr. R. C. Wallace; past president, W. R. Alder; president, H. A. Stewart, Arts '26: vice-president, M. L. Entwistle, Arts '26; secretary-treasurer, W. J. Gilliland, Com. '30; executive committee, Miss Kathleen Dolan, Arts '24. Miss Winnifred Balfour, Arts '16, Mrs. O. S. Fells (Mabel Evelyn Anderson), Arts '34, Dr. H. R. Kingston, W. W. Baker, Sc. '28, Dr. G. B. Sexton, Med. '30, and T. W. Latta, Arts '33, Com. '34.

Hamilton

EIGHTY-TWO sat down to dinner at the Scottish Rite Club on March 9. The guest speaker was Dr. Gerald S. Graham, Arts '24, assistant professor of history at Queen's, who delivered an illuminating address on the part that the Balkans might be expected to play in the present war. The chairman and toastmaster was Dr. L. T. Williamson, Med. '27.

Grace was said by George S. Otto, Arts '10. The toast to the King was proposed by Major Fred Houston, Med. '16. The toast to Sister Universities was proposed by Mrs. J. H. Moxley (Irene Dunlop), Arts '15, and responded to by Dr. W. H. McNairn of McMaster University. K. F. Ettinger, Arts '13, proposed the toast to Queen's, and H. J. Hamilton, Arts '32, secretary-treasurer of the General Alumni Association, replied.

During the evening several vocal solos were rendered by Mrs. C. H. Drew. W. Maurice Warnick, Sc. '35, led in the singing of a group of Queen's songs, with Dorothy Dowsley, Arts '26, providing the piano accompaniment.

Dr. Williamson spoke briefly in expressing a welcome to those who had been able to attend. He mentioned that several loyal members of the branch, including the president, Dr. Hugo T. Ewart, Med.

'35, were now serving with the Canadian Active Service Force in England.

In his address, Dr. Graham said that he felt more and more that the outcome of the war would depend on the supply of oil. However, he did not think that Hitler would carry a lightning-war into Rumania for its oil, for fear of having to fight on two fronts.

The speaker carefully valued German, Russian, and Allied influences in the Balkan countries. He said that Jugoslavia and Bulgaria were overwhelmingly pro-British, and that none of the Balkan states had any desire to become a rawmaterials reserve for Germany. With regard to Italy, he predicted that that country would continue to sit on the fence until she knew who was going to win the war.

Dr. Graham was introduced by C. H. Drew, Com, '25, and Dr. M. G. Brown, Med. '16, moved the vote of thanks. The meeting came to a close with the singing of *Auld Lang Syne*.

Credit for the success of this venture belongs to every member of the executive, and particularly to Margaret Newton, Arts '36, Mr. Warnick, and Dr. Williamson.

Montreal

A TTENDED by about 350, the eighth annual supper dance of the Montreal branches of the General Alumni Association of Queen's University and the Alumni Federation of the University of Toronto was held at the Windsor Hotel on March 8.

The walls of the rooms were attractively decorated with flags, and the tables with spring flowers. Dancing was enjoyed in the Rose Room to the strains of Blake Sewell's orchestra. At the conclusion of the evening's entertainment, all voted the function one of the most successful ever held.

Mr. F. R. McDonald was chairman of the committee in charge of arrangements. Queen's members included Mrs. A. G. Racey (Phyllis Leggett), Arts '31, J. A. H. Henderson, Sc. '22, G. V. Roney, Sc. '26, and S. L. Whitton, Com. '36.

Saskatoon

COLLEGE days were vividly recalled to a large group of alumni on February 15 when they gathered at the Bessborough Hotel, Saskatoon, to welcome Dr. Charlotte Whitton, C.B.E., Arts '17, and hear her give an interesting talk entitled "Reminiscences of Queen's." In the annual election of officers, J. L. McKinnon, Arts '15, was elected president. The retiring president, Robert McGregor, Arts '13, was in the chair.

Dr. Whitton spoke of the part played by Queen's in the country's war effort and praised the advances made by the University since the first Great War. Great progress was to be seen in the Medical faculty, with the study of public health and the conducting of experiments in neurology and psychiatry. Dr. Whitton said that Arts had made a definite contribution in the fields of commerce and political science, and referred to the Faculty of Applied Science as "without peer."

Although the University had raised its standards and strengthened its faculties, its old-world setting in Kingston remained much the same. The city itself, Dr. Whitton maintained, was still the quiet, stable place it was when it harboured the sons and daughters of the last generation.

The speaker was thanked by Mrs. Griffith Binning (Katherine Quark), Com. '29. Mrs. Carl Nidernost contributed two vocal solos and J. H. Erwin, Arts '19, led in the singing of old Queen's songs, accompanied at the piano by Mayor Nidernost. The banquet hall was decorated with Queen's pennants and colours. Prof. W. W. Swanson, Arts '05, in a short address paid tribute to Queen's professors who had passed on during the past year.

Judge J. F. Bryant, Arts '01, conducted the election of officers, the complete slate being made up as follows: honorary president, Principal Wallace; honorary vice-president, Dr. J. A. Snell, Arts '90, LL.D. '17; president, Mr. McKinnon; vice-president, Stewart McKercher, Arts '19; second vice-president, Judge Bryant; secretary-treasurer, W. G. Manning,

Arts '31; executive committee, J. H. Erwin, Mrs. A. W. Brodie (Mary Shearer), Arts '17, C. P. Seeley, Arts '12, Mrs. M. A. Lindsay (Mabel Aylesworth), Arts '04, Prof. John Allely, Arts '29, and R. W. Asselstine, Arts '94.

Alumni who were present, other than those mentioned above, included D. M. Wilson, Sc. '14, Mrs. Evan Jones (Ella Stevens), Arts '22, H. M. Fisher, Arts '17. Mrs. W. W. Swanson (Grace Connor), Arts '05, W. A. Gilchrist, Arts '08, F. M. Brown, Arts '90, Dr. K. Lindsay, Med. '27, J. W. G. Scott, Arts '14, Rev. Dr. Nils Willison, Arts '26, Prof. A. N. Reid, Arts '35, Prof. Murdoch Matheson, Arts '07, Miss K. M. Jarvis, Arts '34, J. M. Singleton, Arts '15, C. P. Seeley, Arts '12, Very Rev. Dean W. L. Armitage, Arts '11, and D. H. Marshall, Arts '04, Theol. '08.

Lakehead

P. T. D. MACGILLIVRAY, Arts '02, Med. '05, was elected president of the Lakehead branch at the annual dinner meeting held March 9 at the Prince Arthur Hotel, Port Arthur. Prof. R. O. MacFarlane, Arts '24, of the history department of the University of Manitoba, was guest speaker.

Other officers elected at the business session were: past president, Robert Muir, Arts '28; vice-president, C. V. O'Connor, Arts '31; secretary-treasurer, Miss Belle Elliott, Arts '26; committee, Mrs. Kenneth McKay (May Gemmell), Arts '18, Rev. E. G. Turnbull, Arts '31, Theol. '32, and A. S. Bayne, Sc. '35.

In his address, Professor MacFarlane traced the events leading up to and following the Russo-German pact. There was nothing essentially different between the Russian and German revolutions, he declared. In each case the philosophy of government by consent of the people had been replaced by that of government by a small group which, by purges and otherwise, was kept pure in its beliefs and enthusiastic for its cause and thus was enabled to stay in power. The essence of each revolutionary group was to get into power, and in order to do that cer-

tain cries popular at the moment were taken up. But the technique of staying in power was different from that of getting in, and so as time went on the differences between National Socialism and Communism grew less, and their similarities emerged. The pact showed that power politics still dominate the scene in Europe, Dr. MacFarlane asserted.

The speaker was introduced by Mr. Muir, and Dr. J. A. Crozier, Arts '97, moved the vote of thanks, seconded by W. H. H. Green, Arts '14.

Donald C. MacDonald, Arts '38, lecturer for the Associates for Anglo-American Understanding, spoke briefly. Dr. C. C. McCullough, Med. '04, also made a few remarks. The toast to Queen's University was proposed by Rev. E. G. Turnbull, who recalled the founding of the University and its early history.

The Queen's film, "Paths of Learning," and a motion picture, "Swift Family Robinson," by courtesy of Trans-Canada Airways, were shown to the alumni. Community singing was led by Dr. McCullough, with Miss Alma Madill at the piano. R. J. Askin, Sc. '23, moved a vote of thanks for the work of the retiring president.

Ottawa

A T a smoker held in the Chateau Laurier on March 5, members of the Ottawa branch heard Gordon Wood, Trans-Canada Airways traffic representative in the Ottawa district, outline the growth of air transport. "Swift Family

Robinson," a coloured sound film, was shown to the gathering. The speaker was introduced by Dr. W. P. E. Paterson, Med. '26. A. K. Light, Sc. '18, president of the branch, was in the chair.

Kingston

I N honour of the graduating class of Levana, the Kingston alumnae held a tea at Ban Righ Hall on March 5. Guests were received by the president, Mrs. Norman Miller (Grace Jeffrey), Arts '14, and the dean of women, Dr. A. V. Douglas. During the afternoon Mrs. Miller addressed the girls, urging them not to lose touch with Queen's. Spring flowers and tall pink tapers in silver holders adorned the tea table, presided over by Mrs. A. L. Clark, Mrs. John Matheson, Miss May Chown, and Miss Jean Royce.

Thompson—On March 20, in Holy Trinity Church, Toronto, Winifred Gosling, Montreal, to Basil Thompson Wilson, Sc. '29. They are living at 226 Balliol Ave., Toronto.

White—At the home of the bride's sister, Mrs. C. A. Curtis, Kingston, Marjorie Wilson McBride, Smiths Falls, Ont., to Dr. Edwin Perry White, Med. '34. They will live in Kingston.

Deaths

Diamond—Dr. Arthur C. Diamond, Med. 21, died in hospital at St. John's, Newfoundland, on November 17, 1939, after an acute illness of several weeks. He was forty-five years of age. Dr. Diamond was born at Catalina, Newfoundland, and received his early education at Methodist College, St. John's. He came to Queen's in 1916 and received the degrees of M.D. and C.M. five years later. After his interneship, he commenced practice at Wesleyville, Newfoundland, in which district he was highly regarded both for his professional ability and his kindly manner to all. From time to time he was able to travel abroad for postgraduate work and his interest in modern medicine never lagged. He leaves to mourn his wife, five daughters, and one son, Arthur William, now three years of age.— J. R. T.

Fraser—Former Vancouver alderman, Dr. R. N. Fraser, Med. '84, died at his home on March 4, in his eighty-second year. Dr. Fraser was born at Westmeath, Renfrew County, and he enrolled at Queen's in 1880. After a year in Arts, he began his study of medicine and graduated with the degrees

Do You Need A PERSONAL LOAN?

of M.D. and C.M. in 1884. He served for a year as assistant surgeon with a Canadian Pacific Railway construction camp in Lake Superior division, and then went to London for postgraduate work. On his return in 1886 he settled in Thomasville, Ontario, and practised until 1921, when his health suffered a breakdown. Dr. Fraser moved to Vancouver, British Columbia, where the climate agreed with him. He began to take an active interest in the affairs of the municipality of West Point Grey. where he served four years on the council. He was an advocate of the amalgamation of Vancouver with neighbouring municipalities and was a chief member of the committee that prepared the plan of fusion. When the scheme was completed, he became a member of the greater city council. After his sixth acclamation and term of two years, Dr. Fraser retired in 1931. During the absence of the mayor in 1930 he served as acting mayor of Vancouver. Dr. Fraser was a member of the Greater Vancouver Health League and the Preventorium, which he helped establish. His affiliations included the Canadian Club, the West Point Grey Bowling Club, and University Lodge No. 91, A.F. and A.M. Funeral rites were under Masonic auspices. He is survived by his wife and one brother.

McGrath-Information was received recently regarding the death last June of Dr. George McGrath, Med. '93. Dr. McGrath died in Hamilton, Montana, at the age of seventy-three. Born in Northumberland County, Ontario, he attended Campbellford high school before coming to Queen's in 1889. Four years later he received his M.D. and C.M. degrees and went to New York to undertake postgraduate study. young man, he went to Montana, settling at Hamilton, and remained there the rest of his life. Actively identifying himself with the communities of the Bitter Root valley, Dr. McGrath practised forty-six years and was throughout that time a leading and highly respected citizen. He took great interest in the improvement of the town of Hamilton, from time to time acquiring property, and he erected one of the finest office buildings in the town. He was a director of the Ravalli County Bank and for many years operated the Bitter Root Drug Store. He was instrumental in establishing the first hospital in Hamilton, located in a few rooms in an office building, but before his death he saw a fine new structure erected, largely through his own efforts. He also successfully revived the Ravalli County Fair, two years ago. At his funeral held from St. Francis Roman Catholic Church, Hamilton, were residents from all the surrounding district who had known and respected Dr. McGrath in his role as a typical family doctor. He left his wife, five brothers, and one sister.

MacKinnon—Rev. John MacKinnon, Arts '94, Theol. '97, died in hospital at Sydney, Nova Scotia, January 22, aged seventy-five.

A native of East Lake Ainslie, Cape Breton, Mr. McKinnon received his early education at Pictou Academy. In 1890 he entered Queen's, studying first in Arts and later in Theology. He received the degree of B.A. 1894 and of B.D. in 1897. graduation he preached at Dalhousie Mills, Ontario, later accepting charges Mira and Louisburg, Nova at tia. In 1914 he was called to Baddeck, N.S., where he continued his ministry until his retirement in 1935. Moving to Sydney, he was taken into the session of St. Andrew's United Church and appointed visiting minister to call upon the aged and infirm. He served in this capacity, receiving the greatest respect from all who knew him, until his final illness. In Mr. MacKinnon, a stately Scot, sound judgment was combined with humour and a noble personality and his upright character was an example to all who worked with him. He is survived by three daughters.

McLean—For twenty years coroner of York County and medical officer of health for East York for the past twelve years, Dr. Charles Ernest McLean, Med. '12, died in Toronto on March 17. He was in his fifty-ninth year. Born at Athens, Ontario, Dr. McLean received his education at Athens high school and Toronto Normal School before coming to Queen's in 1908. In 1912 he received the degree of Bachelor of Medicine, and two years later took his M.D. and C.M. degrees. Dr. McLean served in the Great War with the 156th Battalion, returning to Canada with the rank of major. For some time he was surgeon at the Ontario Hospital at Brockville, and was also employed by the International Nickel Company. Later he was with Hon. Dr. J. M. Robb at the latter's hospital at Blind River. At the outset of war last September, Dr. McLean offered his services and for some time examined recruits. He is survived by his wife and two children.

McPherson — Miss Hattie Georgina Mc-Pherson, Arts '97, died at the home of her brother, Dr. C. F. McPherson, Med. '96, Prescott, Ontario, on April 1 at the age of sixty-five. She was born at Prescott and received her preliminary education in the local schools. She enrolled at Queen's in 1893, and received her B.A. in 1897. A specialist in English, history, and modern languages, she taught for many years in high schools at Morrisburg, Arnprior, and Leamington, as well as at Prescott, where she was a highly respected and loved member of the staff until her retirement some time ago. For several years she resided in Ottawa, where she was private secretary to the minister of public works. She is survived by two brothers, Dr. C. F. McPherson and Edgar McPherson, Arts '00, and one sister, the wife of Dr. W. J. Taugher, Med. '06, all of Prescott.

MacRossie—Prominent church educationist and minister, Rev. Dr. Allan MacRossie, Arts '84, died at Rye, New York, on March 2. He was born in Kingston, Ontario, in 1861 and was educated at Kingston schools. In 1880 he matriculated into Queen's College and for four years attended courses in Arts and Theology. He completed his theological training at the seminary of Drew University. Entering the New York East conference of the Methodist Church, from 1890 to 1901 he was pastor of churches in Hartford, Connecticut, and Mamaroneck Brooklyn, New York. In 1901 Dr. MacRossie joined the New York Conference and for the next ten years was minister James' Church, Manhattan. He was superintendent of the New York area 1911-16, and pastor of St. Andrew's Church 1916-21. During the war he served overseas for two years with the Red Cross. As educational director of the General Conference Commission on Courses of Study, Dr. MacRossie introduced changes in the methods of training young men for the Methodist ministry. His reforms proved so valuable that older ministers wanted to take advantage of the improved system, and courses for graduate study were arranged for them. When the three largest branches of the Methodist Episcopal Church were united in 1938 the combined organization adopted Dr. Mac-Rossie's educational programme. Dr. Mac-Rossie was a member of the executive and finance committees of the board of trustees of the Methodist Church, a trustee for Drew University, a director of the Methodist Hospital, Brooklyn, and for many years had been president of the board of the Deacon-

ess Home, New York. He is mourned by his wife, two sons, and two sisters, one of whom is the wife of Dr. F. J. McCammon, Arts '89, Med. '92, Brooklyn, N.Y.

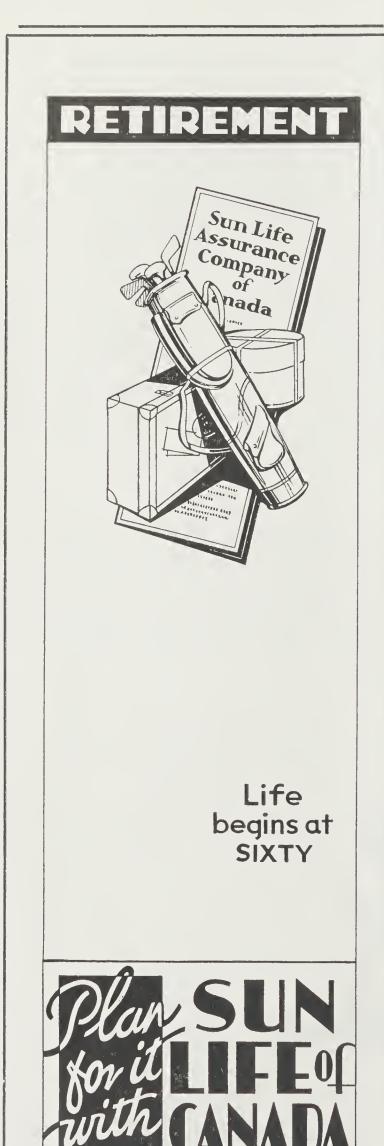

Raper—Dr. John Raper, Med '26, died at his home in Bashaw, Alberta, on December 29, 1939. He was fifty-eight years of age. Dr. Raper was born at Oxenhope, Yorkshire, England. He received his education at Durham University, where he was awarded the B.Sc., B.A., and M.A. degrees. After graduation he was ordained into the Anglican ministry and was rector of a church in England for nine years. He came to Canada in 1913, and, on the outbreak of war, enlisted with the Canadian army. On his return to Canada afterwards, he decided to study medicine and enrolled at Queen's in 1920. Two years later he transferred to the University of Manitoba, from where he graduated in 1924. For some years he practised in Manitoba and at Holden and Delburne, Alberta, before settling in Bashaw.

Notes 1890-1899

UNIVERSITY MEN AND WOMEN

Principal Wallace's Address to the Graduating Class at Spring Convocation, Grant Hall, May 17, 1940

TO-DAY you go out of Grant Hall with the mark of distinction that the university degree confers. We congratulate you. It is a recognition of your achievement, and it has not been won without effort. This is no time to minimize that effort and that achievement, for it is your day, and we are proud to do you honour. Rather is it our purpose today to appraise what you are, what you have done, and what is the significance of the process through which you have passed. What is a university and what is the special function of university men and women? You bear the honour today. To-morrow you carry the responsibilities. You will permit me to say a word or two to help you, if I may, to see both honour and responsibility in their real setting.

As you look back today on these years—and they have been happy years—that you spent within these buildings and on this campus, you ask yourselves why you came, and to what end you have achieved. To some the purpose was not clearly formulated. You came with a vague desire to get something from a university—friends, social contacts, inspiration, quickening of intellectual interests. Many came with the clear-cut idea of receiving a training for a profession, into which, after some further practical experience, you would go out. Still others came with a wish to understand what life means, what man means, what the purpose of the universe may be. All of you, as you look back, have had your expectations fulfilled in part. You have contributed to the fulfillment. So has the university. What I wish to discuss with you is the contribution that you have yet to make.

Have you asked yourselves what the university is, and how it is to be evaluated by those who have no direct familiarity with its processes and its operations? There is one simple way by which the quality of a university may be judged. The graduates, in a very real sense, are the university. Their Alma Mater is what she has meant for them. In the quality of their understanding, in the alertness of their perception, in the width of their sympathy and co-operation—in these things they show to others the standards that were set for them in their university days. If they are high, if they impress themselves on others as something to be emulated, then the university will stand high too. It will need no artificial praise. It will be mirrored in yourselves, your ideals, your actions. If you have, and continue to have, enthusiasm for the things of the mind, it was in the university that you caught the inspiration. If your judgment is to be relied on, the day-by-day problems that you faced here, the day-by-day discussions with your fellow-students, did much to mature and ripen your judgment processes. If your moral standards are high, there was an influence in your university life that set the standard. To

those who will know you as you go out to your several responsibilities in life, you are the ambassadors of Queen's in what you show yourselves to be.

I hope that you will not feel that we who remain here are shelving our duty by placing on your young shoulders a load that may seem to you too heavy to bear. There are others who will come after you. Unless we who are here strive to do our part without flagging, there will be little for them to obtain. It is only by successive groups of men and women going out, as you go out, with the will to do and to be what university men and women should continue to do, and to be, that the vitality of the institution will maintain itself. If we should be tempted to fall below the best that we know, these young people that come after you will inspire us, as you have inspired us, to continue on our way. But we remain here. You, and your successors, go into the wide world. Your contacts, taken in the aggregate, are vastly greater than ours can ever be. The world will know you; and, through you, the honour of the university will be known to the people of Canada and of many other countries where fate may carry you and your fellow graduates of Queen's.

There is a reason for this challenge. The question is being put today as to the value of universities and of the education that universities impart. The governments that support universities are asking whether they should do more than they are doing, or as much as they are doing, to help the universities to carry on. In the last analysis governments are the people of the cities and towns and villages and countryside that make governments possible, and whose views governments reflect as best they can. You, and we, must convince the people, by what we are and what we stand for, that it is worth while. It is by knowledge that our civilization endures. In and through the universities, and by the ability and enthusiasm of university men and women, knowledge is handed on and the boundaries of knowledge are ever widened. "Ignorance is the curse of God, knowledge the wing wherewith we fly to heaven." The knowledge that will make this world a better place in which to live is not easy to seek, nor to find. But it must be sought, and we have faith that it may be found. Those who have subjected their minds to the discipline of facts and to the analysis of causes are set apart to this task. Such are the men and women that the universities nurture and send out, we believe, with an enthusiastic desire to count for something in the way to better living in our time.

And if we wish to set the goal clearly before us, the great words of Newman should never be forgotten—"A university training aims at raising the intellectual tone of society, at cultivating the public mind, at purifying the national taste, at supplying true principles to popular enthusiasm and fixed aims to popular aspiration, at giving enlargement and sobriety to the ideas of the age, at facilitating the exercise of political power, and refining the intercourse of private life." Is the ideal too high for us? It is my honest belief that it is not. It is also my sincere conviction that our universities, and through them our university men and women, are doing much to achieve that high purpose. I am convinced that no organization except the university will

make any significant contribution to that end. If we are not doing enough, you will help us to do more by the things that you yourselves will do. Whether it be in other lands in defence of all that British and Canadians hold dear, or whether in our own land in the maintaining and furthering of a civilization based on moral and spiritual rights, what you do will not be for yourselves alone, nor for your country alone, but for the name and the increasing influence of the university that bids you Godspeed today.

Next year Queen's University will have reached the end of its hundredth year of service to education in Canada. If the war has not ended, the occasion will be celebrated in a quiet way. But whatever the mode of expression that may be adopted, the occasion will be a significant one. It will call forth the affection and loyalty of Queen's people, and a tribute of gratefulnesss for what Queen's has done through a hundred years of strenuous effort, not infrequently in the face of real difficulties. You are planning, with your fellow graduates of earlier years, to give practical effect to your loyalty and gratitude by becoming annual contributors to the Queen's fund. Be your contributions large or small, they will bind you still more closely to the old university. There could be no finer outward demonstration of the regard felt for Queen's than that when the hundred-year mark is reached all the alumni are found to be enrolled in support of their Alma Mater.

"Courage," exclaimed the Duke of Austria in facing battle in front of Angiers, "courage mounteth with occasion." I have tried in a few simple words, to indicate to you the occasion. I have no doubt as to your courage to meet it. You go from here at a moment when British people are sorely tested. Our hour of supreme peril has come. If we do not stand with courage, the lights of liberty will go out in Europe and across the seven seas, and brute force will possess the world. This must not come to pass. It will come to pass unless you and I and the multitude of people who believe with us in the decencies of life put every resource that we have and every ability that we have into the struggle. It is a supreme testing time. May we not fail in Canada and at Queen's in this dark hour.

From the bottom of our hearts we wish you well.

CONVOCATION CEREMONY ENDS NINETY-NINTH SESSION

S PRING Convocation on May 17 brought to a close the ninety-ninth session of Queen's University. Once again all faculties united in the one ceremony, a feature introduced last year; formerly Medical Convocation was held in June. A large audience of parents and friends filled every available seat in Grant Hall and overflowed into the corridors.

Honorary degrees were conferred upon three Queen's graduates who have distinguished themselves in the fields of social service and theology: Doctor of Laws—Colonel E. A. Baker, Sc. '15, general secretary and managing director of the Canadian National Institute for the Blind; Doctor of Divinity—Rev. John L. Nicol, superintendent of missions for Saskatchewan for the United Church of Canada, and Rev. A. J. Wilson, Arts '12, Theol. '15, editor of the United Church Observer. Colonel Baker replied on behalf of the recipients in a stirring address.

The Acting Principal of Queen's Theological College, Rev. Dr. J. R. Watts, read the scripture and led in prayer. Dr. Frank

Harrison, resident musician, provided incidental music at the console of the Bogart memorial organ. The Convocation proceedings were broadcast over Queen's radio station, CFRC.

The number of degrees granted by examination numbered 451 and were awarded as follows: B.D., 2; M.A., 18; B.A. (honours), 52; B.A. (pass), 145; B.Com., 29; M.Sc., 6; B.Sc., 136; M.Sc. in Medicine, 1; M.D. and C.M., 62.

Principal Wallace's address to graduating students is printed in full

elsewhere in this issue.

JORDAN ART COLLECTION PRESENTED TO QUEEN'S

D RESENTATION to Queen's of the art collection of the late Rev. W. G. Jordan, D.D. '99, was made at Spring Convocation in Grant Hall on May 17 by his son, Dr. Dennis Jordan, Arts '08, Med. '10, Toronto.

The valued collection consists of three oil paintings and thirteen water-colours. One of the oils is a large Japanese painting about fifteen feet long and six feet wide. The collection has been hung in the Red Room, which was recently redecorated.

Dr. Jordan occupied the chair of Hebrew and Old Testament exegesis Queen's for three decades. Noted over Canada as a churchman and teacher, he was one of the most popular members of the University staff.

Principal Wallace accepted the valuable gift on behalf of the University. It was pointed out that many more collections may be given to Queen's as a result of the efforts of the newly formed art foundation headed by Dr. Lorne A. Pierce, Arts

'12.

University Council Committee Makes Emergency Appointments

HE executive committee of the University Council has appointed Judge C. A. Cameron, Arts '13, Belleville, as a representative of the Council on the Board of Trustees in place of the late Alexander Longwell, Arts '00, Sc. '03. James Bartlett, Sc. '07, Kirkland Lake,

has been appointed to serve on the Council in place of Mr. Longwell, whose term of office expires March 31, 1942. Mr. Cameron was recently made senior judge of the district of Algoma. Mr. Bartlett is field engineer for the Cyril Knight Prospecting Company.

HON. C. A. DUNNING ELECTED CHANCELLOR

FORMER minister of finance in the Dominion cabinet, Hon. Charles Avery Dunning was unanimously chosen as chancellor of Queen's at the annual meeting of the University Council on May 16. Mr. Dunning succeeds Mr. James A. Richardson, who died on June 26, 1939. He will be formally installed in office at Autumn Convocation.

On behalf of the executive committee of the Council, Principal Wallace nominated Mr. Dunning for the responsible position. As there were no further nominations, Mr. Dunning was declared elect-

ed by acclamation.

In a statement to the press issued afterwards, Principal Wallace said: "It is a great satisfaction to graduates and friends of Queen's that Mr. Dunning has consented to accept this position. His high prestige in business and financial circles throughout Canada, his great services in Canadian public life, and his outstanding qualities of mind and personality combine to make Mr. Dunning a worthy successor to Sir Sandford Fleming, Dr. James Douglas, Sir Edward Beatty, and Mr. James A. Richardson, who have filled this office with such distinction in the past."

Other important items on the Council agenda included the presentation and discussion of reports by Principal Wallace, Vice-Principal and Treasurer McNeill, Dr. R. O. Earl on Queen's University Contingent, C.O.T.C., and Mr. G. J. Smith on the University's fund-raising programme. A feature of Dr. McNeill's report was the announcement that the budget had been balanced for the year.

The executive committee was re-appointed as follows: the principal, the viceprincipal, the principal of the Theological

College, a representative of the Board of Trustees (J. M. Farrell, Arts '89), an appointee of the Council (Francis King, Arts '89), the deans of the faculties of Arts, Medicine, and Science, and the secretary of the Council.

THREE GRADUATES RECEIVE HONORARY DEGREES

HREE honorary degrees were conferred at Spring Convocation on May 17. Colonel E. A. Baker, Sc. '15, general secretary and managing director of the Canadian National Institute for the Blind, Toronto, received the degree of Doctor of Laws, and the degree of Doctor of Divinity was conferred on Rev. John L. Nicol, Arts '06, Theol. '09, Ph.D. '10, and on Rev. A. J. Wilson, Arts '12, Theol. '15.

REV. DR. J. L. NICOL

Acting-Principal Rev. Dr. J. R. Watts of Queen's Theological College presented Dr. Nicol to Vice-Chancellor Wallace as follows:

"Mr. Vice-Chancellor, I have the honour to present Mr. John Lennox Nicol, M.A., Ph.D., that he may receive at your hands the degree of Doctor of Divinity.

"Dr. Nicol is a native of Haldimand County, Ontario, where he received his elementary education. He entered Queen's in 1902, received his master's degree with the medal in philosophy in 1906, his theological testamur in 1909, and his doctorate in philosophy in 1910. He held a fellowship in philosophy at Queen's for three years, lecturing during that period under Dr. S. W. Dyde and Dr. John Watson. Since leaving Queen's the province of Saskatchewan has been his home, where, as minister, social service worker, and missionary superintendent, he has helped to shape the developing life of that province. He was asked by Premier Martin to do educational work in the field of social service under the government of Saskatchewan. In 1929 he was appointed superintendent of missions for northern Saskatchewan by the United Church. During the trying years that province has experienced on account of the prolonged drouth, and the greatest internal migration ever seen in Canada, he has renderd valiant service to both the province and the Church. Few men know the province of Saskatchewan better than he, and none has served its best interests with greater fidelity, understanding, and courage."

Rev. A. J. Wilson

Of Mr. Wilson, the Acting-Principal said: "Mr. Vice-Chancellor: I have the honour to present, that he may receive the degree of Doctor of Divinity at your hands, Mr. James Alexander Wilson, B.A., B.D.

"Mr. Wilson is of Scottish birth but came to Canada with his parents when three years of age. Most of his childhood and youth was spent in Saint John, New Brunswick, where, before coming to Queen's, he served a four-year apprenticeship in marine engineering. He graduated with his B.A. in 1912 and B.D. in 1915. His first and only charge was Napanee, where for twenty-four years he was minister of St. Andrew's Church. During those years he was identified very closely with every phase of the commun-

ity's life.

"During the war years, 1915-18, while carrying on his ministerial labours, he put his engineering knowledge at the service of the nation by working as a tool-maker in the Napanee Iron Works and turning the earnings over to the Red Cross. For ten years he edited the Napanee Beaver, making it one of the most frequently quoted weeklies in the province. In 1936 he launched a new publishing venture, the Christian Advance, which was finally amalgamated with the new Observer, when at the call of the United Church he became editor of its official paper. Long before he was chosen for the honour I now ask you to confer, the community in which he lived and the Church of which he was a minister had borne ample testimony to his worth and gifts."

COLONEL E. A. BAKER

Vice-Principal McNeill presented Colonel Baker to Principal Wallace with the following citation: "Mr. Vice-Chan-

cellor: I have the honour to present to you for the degree of Doctor of Laws, Colonel Edwin Albert Baker, soldier of the first Great War, when he lost his sight; decorated for bravery by Britain and France with Military Cross and Croix de Guerre; heroic helper of his fellow-blind — in re-establishing blinded soldiers, in administering the Canadian National Institute for the Blind; for distinguished services made a member of the Order of the British Empire; beloved and honoured Queen's engineering graduate, who heeding his Alma Mater's voice — Cha Gheill, Cha Gheill, Cha Gheill—has ever most valiantly lived and most nobly wrought."

Colonel Baker replied on behalf of the honorary graduates. "There is a growing concern in Canada for humanitarian enterprise, so I accept this honour as a recognition of it," he said. To the students he said, speaking from his own experience, "If discouragement or disability comes to you, have courage. Some have obvious disabilities, others are not visible. There has been only one perfect man in this world, so there is some disability in all of us. I urge you to go through life never losing courage. Never forget to be loyal to your family, to your University, and to your country in which you have the privilege of being a citizen."

Eastern Ontario Fire Fighters Receive Instruction at Queen's

A TTENDED by more than seventy-five, a firemen's training school was held at Queen's on April 11 and 12. The school was arranged by the department of university extension with the co-operation of the fire marshal of Ontario and the Dominion Association of Fire Chiefs. This was the first time that such a course had been offered at Queen's.

The firemen, who came from all centres in eastern Ontario, were welcomed by Principal Wallace, civic officials, and the Ontario fire marshal. Lectures, illustrated in the laboratories, and a practical demonstration in the use of fire-fighting equipment by members of the Kingston fire department made up the highly interesting course.

Mr. Ross M. Winter, director of university extension, was in charge of arrangements. Prof. D. S. Ellis of the civil engineering department and Dr. A. C. Neish, head of the department of chemistry, delivered two of the lectures.

SUMMER SCHOOL TO BEGIN THIRTY-FIRST SESSION

QUEEN'S University Summer School will begin its thirty-first session on July 3 and will continue until August 15. Dean John Matheson will again be director.

The historical research division of the school will be held at the Dominion Public Archives, Ottawa, under the direction of Dr. G. S. Graham of the history department. The work will deal with Canadian history during the French regime and from the conquest to 1818, and the programme will include round table discussions and personal consultations concerning the special problems connected with each student's individual research. For the convenience of students and teachers who may not be able to spend the full term, a special short course, July 2-26, has been established.

History classes at the University will be conducted by Prof. A. E. Prince and Dr. W. E. C. Harrison, and those in political science by Professors C. E. Walker and J. L. McDougall, and Prof. Robert McQueen of the University of Manitoba.

Prof. J. A. Roy, Dr. E. J. Pratt of Victoria College, Toronto, and Dr. C. J. Vincent will have charge of the work in English, and Dr. Marcel Tirol, Dr. W. M. Conacher, and Mr. C. A. Chabot of Royal Military College, of the work in French. Special classes in oral French will be conducted by Mme. Jeanne McConnell, of Kingston.

Other departments will include philosophy and psychology. Drs. H. M. Estall and D. O. Hebb: mathematics, Drs. C. F. Gummer, A. V. Douglas. Norman Miller, and G. L. Edgett, and Mr. J. O. Watts: physics, Profs. J. A. Grav, J. K. Robertson, E. Flammer, H. M. Cave, and

H. W. Harkness; chemistry, Profs. J. A. McRae, L. A. Munro, J. F. Logan, and R. L. Dorrance; biology, Drs. John Stanley and Gleb Krotkov, and Mr. H. W. Curran; geology, N. D. Runnalls, Arts '33, Collegiate Institute, Collingwood, Ont.

The course in history of music will be conducted by Dr. F. L. Harrison, resident musician, and Mr. H. Garnard Kettle of Upper Canada College, Toronto, will have charge of the course in art. Three special courses in play production, school dramatics, directing, and stagecraft, and oral interpretation and acting, will be offered under the direction of Dr. William Angus.

INDUSTRIAL RELATIONS DISCUSSED AT CONFERENCE

A PPROXIMATELY seventy-five prominent representatives of Canadian and American companies, government officials, industrial counsellors, and members of university staffs attended the fourth industrial relations conference of the Industrial Relations Section, School of Commerce and Administration, Queen's University, April 10-12. This series was inaugurated in 1936 under the sponsorship of Queen's, the Montreal Personnel Association, and the Personnel Association of Toronto.

The programme consisted of talks and discussions on a variety of subjects, including such timely topics as "Machinery for the Prevention and Settlement of Industrial Disputes," "Training Personnel for Industrial Occupations," and "Wage Policy during the War." Prof. J. C. Cameron, head of the Industrial Relations Section, gave a report on the work of his department. Principal Wallace delivered the opening address, and also gave a summary of the proceedings at the close of the conference.

The sessions were held at the LaSalle Hotel. On the evening of April 11, the members of the conference were the guests of the University at a dinner meeting in Grant Hall, at which Dr. W. A. Mackintosh, director of the School of

Commerce and Administration at Queen's, spoke on "Wage Policy during the War."

The papers presented at the conference have been published in booklet form.

FIRST WOMAN STUDENT TO ENROL IN THEOLOGY

THE first woman student ever enrolled in Queen's Theological College will be Miss Alice Armstrong, Arts '40, Meaford, Ontario, who has decided to study for the ministry. Miss Armstrong completed her Arts course this year and an-

MISS ARMSTRONG

nounced her intention of enrolling in theology next fall.

Along with twenty-five other students, Miss Armstrong is going to the student mission fields this summer, her station being at Ex-

When she registers next fall she will be breaking a record of more than ninety years' standing. Until about three years ago, women were not admitted to the Theological College, but the decision of the United Church of Canada to permit their entry into the ministry opened the way. Miss Armstrong, however, is the first woman to make application.

panse in southern Saskatchewan.

H. A. Scott Appointed Secretary To Supervisory Air-Training Board

A PPOINTMENT of Harry Albert Scott, Arts '22, as secretary to the supervisory board of the British Commonwealth air-training plan was made recently by the Department of National Defence at Ottawa.

Mr. Scott received his B.A. in 1922 and joined the Commercial Intelligence Service, going to Liverpool as assistant trade commissioner. Later he spent two years with the export division of the Ford Motor Company at Windsor. Mr. Scott was a member of the Canadian staff of the Imperial Economic Conference held in Ottawa in 1932. Since then he has

been trade commissioner at Buenos Aires,

Shanghai, and London, England.

Mr. Scott served with the Royal Naval Air Service in 1917, later transferring to the Royal Canadian Navy. In his new position he will be secretary of a board that is being set up in Canada for the general supervision of the air-training plan. Chairman of the board will be Hon. Norman McL. Rogers, minister of national defence and rector of Queen's.

MR. J. M. MACDONNELL RE-ELECTED AS CHAIRMAN

AT the annual meeting of the Board of Trustees on May 17, Mr. J. M. Macdonnell was re-elected as chairman for another year.

The executive committee of the Board was also re-elected, consisting of the following members: J. M. Macdonnell, Arts '05, and J. C. Macfarlane, Arts '11, Toronto; J. M. Farrell, Arts '89, A. J. Meiklejohn, Arts '98, T. A. McGinnis, Sc. '09, Mr. J. M. Campbell, Mr. Elmer Davis, and Rev. Dr. G. A. Brown, Arts '04, Theol. '07, D.D. '19, Kingston; R. D. Harkness, Sc. '13, Montreal; A. E. MacRae, Sc. '14, Ottawa; and Dr. W. E. McNeill, secretary.

The following members of the Board whose terms had expired were re-elected: Hon. A. C. Hardy, Brockville, Dr. Dennis Jordan, Arts '08, Med. '10, Toronto, Rev. Dr. Leslie Pidgeon, Arts '12, Montreal, Fraser D. Reid, Sc. '04, Toronto. Additional elections to the Board not previously announced included C. Jackson Booth, Arts '86, and Mr. MacRae, Ottawa, re-elected by the benefactors, and Rev. Dr. Brown, re-elected by Queen's Theological College.

Professors P. G. C. Campbell and J. K. Robertson, whose terms on the Queen's Quarterly board had expired, were re-elected. Prof. Gerald S. Graham of the history department was appointed to serve during the absence of Prof. W. A. Mackintosh. Rev. Dr. G. A. Brown was re-elected as representative on the

Ban Righ Hall board.

Promotions of members of the University staff were announced as follows: Dr. C. H. McCuaig, assistant professor

of medicine in charge of psychiatry, was made professor of psychiatry and head of the department; Dr. Gordon Mylks, clinical assistant, was made lecturer in obstetrics and gynaecology; Miss Jean Richardson, Arts '35, a member of the registrar's staff for four years, was made assistant registrar.

Associate Professor Wilhelmina Gordon, on leave of absence during 1939-40, was given an extension of leave for 1940-41. During this period Mr. Murdoch McKinnon will be a member of the department of English with the rank of lecturer. Prof. W. A. Mackintosh, head of the department of economics, who is on loan to the Dominion department of finance, had his leave continued for another year. In his absence Professor Knox will be chairman of the department of economics, and the administrative work of the School of Commerce will be shared by Professors Walker and Smails.

ON MILITARY SERVICE

The following members of the staff are at present on leave for military service: Dr. C. R. Salsbury (anatomy), Mr. H. G. Conn (mechanical engineering), Mr. H. J. Styles (drafting), Dr. W. A. Jones (radio-therapy), Dr. S. W. Houston (surgery), Dr. A. E. Harbeson (anatomy), and Mr. A. O. Monk (drafting). Appointments will be made in due course to fill the existing vacancies.

When the Old Arts Building was fire-proofed some years ago the west end, which for many years had been used as a library, was not included in the work. This, however, will be fireproofed and reconstructed during the summer, partly to give protection to the biological museum now being reorganized under a grant from the Carnegie Corporation, and partly to provide additional space. Instead of the present two floors and two galleries there will be four full floors.

Space for office, private laboratory, and demonstration room accommodation in the department of obstetrics and gynaecology has been provided as well as an adequate sum for equipment.

The following special gifts were announced by the treasurer in addition to those mentioned in the Principal's *Report*: Principal Wallace and Mr. E. A.

Collins, Sc. '05, Copper Cliff, each gave the university \$700. The Principal's gift has been added to the special fund which is spent at his discretion. Mr. Collins' gift was divided equally between bacteriological research and the General Alumni Association. The late Dr. Edgar Forrester, Arts '82, Med. '84, of Toronto, left capital sums to establish a scholarship of \$40 for the student making the highest marks in final-year medicine and clinical medicine, and \$20 to establish a scholarship to be awarded to the student making the highest marks in oral French.

The Principal submitted his report in printed form, copies of which may be obtained on request. Dr. Wallace also gave an outline of plans for the Queen's centenary in 1941, and D. D. Calvin, Arts '02, who is engaged in writing a history of the University, reported that his work was practically completed.

In the absence of Mr. J. C. Macfarlane, Arts '11, Toronto, chairman of the endowment committee, Mr. Collins made a report, explaining the plan by which it is hoped to induce alumni and friends of the University to make annual contributions. This plan is being used successfully by many universities in the United States including Harvard, Yale, Cornell, and Chicago. At Queen's Mr. Gordon J. Smith, director of endowment, is in charge of the work.

Queen's Resident Artist Acclaimed By Canadian Newspaper Critics

CCLAIMED by critics everywhere, A an exhibition of paintings by Mr. André Biéler, resident artist at Queen's, has been shown in recent months in a number of centres, including Montreal, Quebec, and Ottawa.

Writing in the Windsor Daily Star. Mr. Liddell Franks referred to Mr. Biéler's painting career as "one of the brightest on the Canadian horizon and one of those most influential in changes in Canada's art."

Said Mr. Robert Ayre in the Montreal Standard, "Whatever he may feel about the state of the world, he doesn't show it in his painting. He isn't any kind of a missionary; he is a painter."

The art critic of the Quebec City L'Evenement wrote: "Biéler sketches boldly, with great ease, and a sure touch."

This summer Mr. Biéler will direct the University of Alberta's art course at Banff.

MISS MARY WHITE RE-ELECTED AS PRESIDENT

MISS MARY WITTE, The ronto, was re-elected president of ISS MARY WHITE, Arts '29, Tothe Queen's Alumnae Association at the annual meeting held in Ban Righ Hall on

May 18.

The following officers were elected: past president, Miss Eva Coon, Arts '17, Toronto; president, Miss White; vicepresidents, Miss Hilda Laird, Arts '18, Kingston, Mrs. J. E. MacKay (Eleanor Minnes), Arts '14, Ottawa. and Mrs. H. J. Rowley (Lucille Corbett), Arts '19, Quebec City; secretary, Miss Ferna Halliday, Arts '16, Toronto; treasurer, Mrs W. A. Mackintosh (Jean Easton), Arts '26, Kingston; councillors, Miss Eleanor Holland, Arts '28, Montreal, Miss Doreen Montgomery, Arts '28, Smiths Falls, Mrs. W. R. Hambly (Edna McGill), Arts '12, London, Miss Marion Brown, Arts '19, Walkerville, Mrs. H. P. Salter (Flossie Gray), Arts '22, Old Greenwich, Conn., Mrs. A. W. Brodie (Mary Shearer), Arts '17, Saskatoon, Miss Anne Smith, Arts '22, Hamilton, and Mrs. S. J. Schofield (Florence Tait), Arts '12, Vancouver.

After the meeting a luncheon was held at which more than a hundred guests were present, including a number of 1940 graduates. Dr. A. V. Douglas, dean of women, was the guest speaker, choosing as her subject "The Beloved Task of Women." Miss Laird moved the vote of thanks to Dr. Douglas.

Later in the afternoon the out-of-town members were entertained at a tea given by Mrs. Norman Miller (Grace Jeffrey), Arts '14, at her summer home on Lake Ontario.

"Principal's Report" Available

OPIES of the Principal's Report are now available, and may be obtained by writing to Miss Mary R. Anglin, Douglas Library, Queen's University.

MISS PHYLLIS GUMMER AWARDED \$750 SCHOLARSHIP

FOR two original musical compositions entered in a nation-wide contest, Miss Phyllis Gummer, Arts '40, daughter of Prof. C. F. Gummer of the mathe-

MISS GUMMER

matics department, was awarded the Canadian Performing Rights Society Scholarship valued at \$750.

Tenable at the Toronto Conservatory of Music, the scholarship is awarded to the student of either sex

and under twenty-two years of age whose compositions show the most talent and imagination. The works presented by Miss Gummer were of an advanced standard. One was a song, the musical composition being written to the poem *Requiescat*, by Oscar Wilde, and the other was an original piano sonata.

The young composer completed her course for an honours B.A., majoring in Greek, and graduated at Spring Convocation. She has been active in Kingston musical circles for several years and has specialized in piano and violin, although she is also proficient on the organ, viola, and flute.

Ashes of Dr. Henry Esson Young Buried in Vancouver Island Bay

In State of the late Dr. Henry Esson Young, Arts '83, were lowered into the waters of Bubbins Bay, Vancouver Island, in a moving ceremony on April 20. Dr. Young, noted educator and legislator and a member of the cabinet of the government of British Columbia for many years, died last October 24.

The simple rites took place from the deck of the *Sanitas*, the provincial quarantine and inspection boat. Taking part were members of Dr. Young's family, representatives of his department, and

other government heads, including provincial police officials.

Although it was in public health that Dr. Young's chief fame was earned, it will be recalled that he was often referred to as the father of the University of British Columbia and lived to see that institution rise from being classed as a "white elephant" to the place of prominence it occupies today. As provincial secretary, he also did much for the provincial museum, his interest in the early history of British Columbia making possible the present provincial library and archives.

TWO RECEIVE TESTAMURS AT CLOSING EXERCISES

CHARLES WESLEY HUTTON, Arts '39, Merrickville, and Fred Jerome Jackson, Arts '40, Sudbury, were presented with testamurs at the closing exercises of Queen's Theological College in the Morgan Memorial Chapel on April 24. A third member of the graduating class, Grant Meiklejohn, Arts '40, Campbellford, will receive his testamur next year when he finishes his Arts course. Acting-Principal Rev. Dr. J. R. Watts conducted the ceremony.

Rev. Dr. S. M. Gilmour read the Scripture and Rev. Dr. J. M. Shaw led in prayer; Dr. Thomas Gibson presided at the organ. Rev. Bert Howard, D.D. '37, principal of Albert College, Belleville, addressed the students.

"Never before has there been so great a need for the commissioning of men to preach as there is now, because of the forces attempting to annihilate the faith that is the life-blood of the British Empire," Dr. Howard told the students, "The challenge is also presented to many of the people at home who are taking lightly what men are giving their blood for in Europe." The speaker told the graduates that they must have something worth-while to preach and must live by what they preach if they are to do any good in this world.

Dr. Watts commented upon the shortage of theological graduates, saying that there are places for forty ordained men in Western Canada that cannot be filled. The rising cost of education was given as a possible explanation for the fact that so few were entering the ministry nowadays. However, work at the College has never been more thoroughly done than this year, and it was hoped that the high standard would never be lowered, he said.

SEVEN SCHOLARS RECEIVE NATIONAL RESEARCH AWARDS

NE fellowship, four studentships, and three bursaries were awarded to Queen's graduates and students by the National Research Council this spring.

Hugh LeCaine, Sc. '38, Port Arthur, was awarded the fellowship for special graduate research in physics. Mr. LeCaine had a brilliant record at Queen's and has been studying under Dr. J. A. Gray, Chown science research professor of physics, during the past year. Studentships were won by Miss Margaret Biehn, Arts '38, Parry Sound, G. L. Colgrove, B.A., London, J. A. Pearce, Arts '38, Regina, Saskatchewan, and E. J. Wiggins, Sc. '38, Trenton.

Gold medalist in biology and winner of a Reuben Wells Leonard fellowship, Miss Biehn has been studying at the University of Toronto under Dr. Wasteneys and Dr. A. M. Wyne, Arts '13. Mr. Colgrove took his B.A. at the University of Western Ontario and came to Queen's last year to work on a Master's degree in mineralogy. Mr. Pearce took his B.A. in 1938 with first class honours in chemistry. In 1939 he received his M.A. and went to McGill for further work. He will return there next year. Winner of three scholarships and a medal at Queen's, Mr. Wiggins received his M.Sc. at McGill in 1939. This year he has been working under Dr. Otto Maas and will continue on his Ph.D. course next fall.

The three who have qualified for bursaries are E. B. Paul, Arts '40, Lyn, who will work in physics at Queen's next year; M. S. Stanton, B.Sc., Winnipeg, and G. M. Wright, Sc. '40, Kingston, both of whom will do postgraduate work in geology.

UNIVERSITY SCHOLARSHIPS ANNOUNCED AT CONVOCATION

FOR the highest standing in the Faculty of Arts, Miss Clunas McKibbon, Arts '40, Trenton, was awarded the Prince of Wales prize; R. W. Kraft, Sc. '40, Kitchener, won the Governor-General's medal in Applied Science; and H. Garfield Kelly, Med. '40, Kingston, received the W.W. and Susan Near prizes for the highest standing throughout the entire Medical course, it was announced at Spring Convocation on May 17.

MISS McKIBBON

Miss McKibbon also won the departmental medal in mathematics. Mr. Kraft received the medal in chemistry and a resident research fellowship. Mr. Kelly won the medals in medicine and surgery, the David Edward

Mundell prize for the highest aggregate marks in the surgical applied anatomy final examinations of the fifth and sixth years, the Professor's prize in medicine and clinical medicine, the Professor's prize in obstetrics and gynaecology, and

R. W. KRAFT

H. G. KELLY

the Dean Fowler scholarship for the highest marks in the examinations of the sixth year.

The Marty Memorial scholarship, established by the Queen's Alumnae Association in memory of the late Dr. Aletta Marty, was awarded this year to Miss Anne Sedgewick, Arts '37, of Ottawa.

Other major awards to this year's graduating class in the Faculty of Arts included the research travelling fellowship, divided between Miss Lila Ross, Saint

John, N.B., and J. C. Lapp, Bradford: the Reuben Wells Leonard travelling fellowship, Miss Anna M. Wright, B.A., Rosetown, Sask.; Reuben Wells Leonard resident fellowships, C. J. Guselle, Arnprior, J. L. Engler, Ottawa, Miss Barbara E. Rooke, Kingston, and W. H. Agnew, Winchester; the Arts research resident fellowship, G. S. Dorrance. Kingston; the Sir James Aikins fellowship in Canadian history, Miss Kathryn E. Dawson, Ottawa; the George MacBeth Milligan fellowship in philosophy, A. W. Balson, Hampton; the Western Ontario Graduates fellowship in history, C. R. Maundrell, Ottawa.

The A. J. McNab fellowship for graduate study was divided equally between W. White, B.Sc., Winnipeg, and F. A. Killer, B.A., Stratford. E. B. Paul, Lyn, won a special Reuben Wells Leonard research award, and Miss Rooke was awarded the Wilhelmina Gordon Foun-

dation in English.

Winners of Arts departmental medals were as follows: German, Miss Roberta Brodie, Kingston; French, Mr. Lapp; English, Miss Rooke; history, Mr. Engler; economics, A. N. McLeod, Ottawa; philosophy, F. L. Marcuse, Montreal; mathematics, Miss McKibbon; physics, Mr. Paul; biology, Miss Mary Baker, St. Catharines. The McIlquham Foundation in English was won by R. S. G. Gooday, Ottawa; D. A. Rankin, Mabou, N.S., was awarded the M. C. Cameron prize in Gaelic, and G. S. J. Adams. Lakeport, won the Mary Fraser McLennan prize in Hebrew.

In the Faculty of Applied Science departmental medals were awarded as follows: mining engineering, B. G. McIver, Hamilton; chemistry, Mr. Kraft; mineralogy and geology, G. M. Wright, Kingston; metallurgical engineering, G. W. Neumann, Arnprior; civil engineering, C. N. Simpson, Port Arthur; mechanical engineering, W. M. Newby, Woodstock; electrical engineering, N. Z. Alcock, Vancouver; physics, D. C. Brunton, Ottawa. The L. M. Arkley prize of \$40 was awarded D. L. Rigsby, Chatham, and W. S. Keating, St. Catharines, won the postgraduate scholarship in chemical engineering. W. H. Stevens, Oshawa, and G. M. Wright, Kingston, also received resident research awards.

Jack G. Jenkins, Haileybury, awarded the medal in surgery, Faculty of Medicine, although the honour in that course was reserved for Mr. Kelly. Similarly, the Professor's prize in medicine and clinical medicine was awarded to Herman Sobol, Newark, N.J. C. K. Benson, King, won the Professor's prize in surgery and clinical surgery, and E. M. McLean, Harrow, was awarded the prize in obstetrics and gynaecology. In preventive medicine, the Professor's prize was won by C. W. E. Danby, Kingston. For the best series of pathological case reports the prize was divided between George E. Hayunga. Tuckahoe, N.Y., and Nathan Shklov, The Pas, Man. The Canadian National Committee of Mental Hygiene prize was awarded to T. E. Currier, Ottawa, and the Ontario Medical Association's prize to A. F. W. Peart, Westboro. J. W. B. Barr, Lanark, won the Victor Lyall Goodwill prize for an essay on some aspects of mental disease.

In addition, many awards were announced in the undergraduate division.

Major F. S. Wilder Placed In Charge Of Gas-Warfare Training in Canada

MAJOR F. STUART WILDER, Sc. '31, has been placed in charge of gas-warfare training in Canada, with the

rank of general staff officer.

Major Wilder joined the militia some years ago and was officer commanding "A" Company of the 4th Machine Gun Battalion previous to its amalgamation with the Princess of Wales Own Regiment. Two years later he left Kingston for Montreal as a chemist for the Consumers Gas Company and became associated with the Royal Montreal Regiment. At the outbreak of war he was on the reserve list of officers. Called to the colours, he was appointed to the machine-gun training centre at Montreal where he remained until his transfer to Ottawa.

Four Seamen Successful

FOUR certificates were granted to seamen who took courses at the Queen's School of Navigation during the winter months. There was a registration of eleven this year, a decrease compared with some other sessions. Captain Albert

Barrett conducted the school for the first term until obliged to retire because of illhea!th. Captain George N. Downey carried on the instruction and supervised the examinations.

WEEK-END OF OCTOBER 26 IS CHOSEN FOR REUNION

THE 1940 Reunion will be held on the week-end of October 26, to coincide with Fall Convocation and the Queen's-Varsity game, it was decided at the semi-annual meeting of the Board of Directors of the General Alumni Association held in the Douglas Library on May 17. President E. A. Collins was in the chair.

Plans formulated for Reunion weekend provide for a University reception on Friday evening, to be held in conjunction with the annual meeting of the Association, and for two dances on Saturday evening—one in Grant Hall, for the alumni and staff, and one in the Gymnasium, for the students.

A new feature of the Reunion programme will be a luncheon in the Gymnasium for the graduates and their friends. A charge of fifty cents a plate will be made. Last year the Athletic Board of Control gave a luncheon for all who had purchased grandstand tickets for the football game, and this year the Alumni Association is providing it as a service to the graduates.

Thirty-five classes are scheduled to return to the University next fall, as may be seen from the Reunion schedule on page 129 of this issue. The classes of Arts and Medicine '90 will be celebrating

their fiftieth anniversaries.

In his summary of the activities of the past six months, the President stressed the value of the revised Constitution in which provision had been made for the branches to play a more responsible role in the direction of affairs. This should result in a quickened interest and increased enthusiasm, he said.

The secretary-treasurer presented a detailed report upon the work of the Association. In connection with the Grant Hall and allied funds it was stated that a total

of \$1257.77 had been spent during the year in completing the payments on the public-address system, improving the dining-room facilities, and in acquiring new equipment. The Association had been assisted in meeting these obligations by gifts totalling \$514.64 from one of the directors.

In the absence of Dr. W. G. Cornett, chairman, the report of the student health committee was presented by Dr. E. T. Seaton, Arts '97, Hamilton. It was stated that a great improvement had been noted in the University's student health programme, which now compared most favourably with that of any institution. Dr. L. T. Williamson, Med. '27, Hamilton, was added to the committee.

D. A. Gillies, Arts '05, Arnprior, whose term as "additional" director was expiring, was re-elected for another one-year period. M. J. Aykroyd, Sc. '13, Toronto, was also appointed to the directorate for

one year.

In addition to the President, the following members of the Board or branch representatives were present: Miss Mary L. Macdonnell, Mrs. D. W. Boucher, Dr. E. L. Bruce, Dr. J. H. Orr, and Prof. W. P. Wilgar, Kingston; Dr. T. H. Farrell, Utica, N.Y.; Mr. G. C. Bateman and Mr. H. E. Armstrong, Toronto; Dr. G. G. McNab, Guelph; Rev. A. D. Matheson, Quebec City; Dr. E. T. Seaton, Hamilton; Dr. Bryce Stewart and Dr. Iames Wallace, New York; Mr. N. B. MacRostie and Mr. G. C. Monture, Ottawa; and Mr. H. A. Stewart, London.

New Sales Record

BREAKING all previous sales records with a circulation of almost 600 copies, the 1940 Tricolor appeared on the campus early in April. This year's book was edited by W. F. Rannie, Arts '38, and dedicated to Hon. Norman McL. Rogers, minister of national defence and rector of Queen's. Special emphasis was placed on the students' war work, with C.O.T.C. and home-nursing courses being given prominence near the front of the book. Bound with a red, leatherette, padded cover, the book proved popular with students and staff.

THE DIX PLAN FOR CLASS REUNIONS

ass							*	YEA	RO	FRE	EUNI	ON					
	1934	1935	1936	1937	1938	1939	1940	1941	1942	1943	1944	1945	1946	1947	1948	1949	195
	'34	'35 '32 '31	'36	'37	'38 '37 '36	'35 '34 '33 '32	'40		'40 '39	'38 '37 '36 '35	'34 '33 '32 '31			'40 '39 '33	'37 '36 '35 '34	'33 '32 '31	
		'30 '29	'28 '27 '26 '25	'24 '23			'30 '29 '28	'27 '26 '25 '24	'23		0.1	'30 '29 '28 '27	'26 '25 '24 '23		23	31 30	'2 '2 '2 '2 '2 '2
	'17 '16			'22 '21	'20 '19 '18 '17	'16		'16	'22 '21 '20 '17	'19 '18 '17 '16	'19	'20	'21	'22 '21 '20 '19	'18 '17 '16		
	'15 '14 	'13 '12 '11 '10	'11 '09	'12	'13	'15 '14 '13	'15 '12 '11 '10 '09				'15 '14 '13 '12 	'11 '10 '09			'15	'14 '13 '12 '11	, ,
			'08 '07 '06	'05 '04 '03 '02	'01			'08 '07 '06 '05	'04 '03 '02 '01	200		'08	'07 '06 '05 '04	'03 '02 '01			'('(
	'98 '97 '96 '95	'94 '93			'00 '99 '98	'97 '96 '95 '94	'93			'00 '99 '98 '97 	'96 '95 '94 '93	 '95	'96	'00 '97	'99 '98 '97 '96	'99 '95 '94 '93	'(
		'92 '91 '91	'90 '89 '88 '87 '86	'87 '86 '85 '84 '83	'88	'89	'92 '91 '90	'91 '89 '88 '87 '86	'92 '85 '84 '83			'92 '91 '90 '89	'88 '87 '86 '85	'84 '83		'92	26

By this plan each class returns 4 times in a cycle of 19 years, always with other classes of its generation at College. The 25th and 50th anniversaries are also observed. Follow your own class through its reunions. This fall's Reunion, October 25-26.

SOCIAL FUNCTIONS HELD FOR GRADUATING STUDENTS

S EVERAL interesting social functions were held in conjunction with Spring Convocation on May 17 for the new graduates, visiting alumni, and their friends.

Graduating students in Science were the guests of the staff at a luncheon held in the Gymnasium prior to Convocation. Approximately 225 were present. Dean A. L. Clark spoke briefly in welcome, and Mr. W. M. Newby, president of the graduating class, responded. Mr. G. A. Revell of the chemical engineering department was in charge of arrangements.

The final-year class in Arts held a luncheon at the LaSalle Hotel. Mr. J. R. Matheson, president of the Arts Society, proposed the toast to the University, and Dean Matheson responded. The toast to the Faculty was proposed by Miss Mildred Dougherty and response was made by Prof. J. A. Corry.

The recipients of honorary degrees—Colonel E. A. Baker, Rev. John L. Nicol, and Rev. A. J. Wilson—were entertained at luncheon at the Principal's residence.

After Convocation, tea was served in the Gymnasium for the graduates, their friends, and the University staff, by Kingston alumnae and nurses of the Kingston General Hospital. Mrs. H. W. Harkness (Eva Brownlee), Arts '13, was the convener.

Approximately 300 attended the annual Convocation dance held in Grant Hall under the auspices of the General Alumni Association. Music was provided by Roy McCormack and his Hotel LaSalle orchestra, and refreshments were served in the basement dining-room. Mrs. A. L. Clark and Mrs. John Matheson acted as patronesses.

Seventy-Four Per Cent of Cadets Qualify For Army Commissions

SEVENTY-FOUR per cent of the students who wrote examinations to qualify for commissions in one of the branches of the defence forces were successful, Lieut.-Col. R. O. Earl, officer commanding the Queen's University Con-

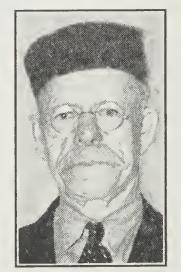

tingent, C.O.T.C., has anounced. Medical candidates passed 100 per cent, and altogether 388 are eligible for commissions. The total was made up as follows: artillery, 152; engineers, 123; infantry, 73; signals, 18; medical, 17. The Medical cadets qualify as captains and all others as lieutenants.

MR. JOHN BAKER DIES SHORTLY AFTER RETIREMENT

LESS than twelve months after his retirement, Mr. John Baker, faithful and efficient member of the University's

maintenance staff for more than thirty-two years, died at his home in Kingston on April 14.

Only two months ago he was honoured with a presentation at which many members of the University staff attended to pay tribute to one of the most popular figures on the campus. An account of the gathering is to

JOHN BAKER

be found in the Review for March.

The funeral service was held in Morgan Memorial Chapel, conducted by Rev. Dr. J. R. Watts, acting principal of Queen's Theological College, and Rev. J. D. Mackenzie-Naughton of St. James' Anglican Church.

Dr. John D. Detweiler To Head Canadian Conservation Association

DR. JOHN D. DETWEILER, Arts '13, of the University of Western Ontario, was elected first president of the Canadian Conservation Association when conservation enthusiasts met at Queen's on April 13 for organization purposes.

Dr. Detweiler said the first object of the association was to collect data on wild animal and plant life across Canada. He felt that the association should become the source from which other organizations and institutions could obtain accurate information on natural life. The delegates, thirty-six in number, were welcomed by Vice-Principal Mc-Neill. Members of the University staff who attended the meeting were: Dr. R. O. Earl, John Roberts Allan professor of biology, who was prominent in the movement to organize the association, Dr. John Stanley, Dr. Gleb Krotkov, and Mr. H. W. Curran, of the biology department; Dr. G. B. Reed, professor of bacteriology, and Dr. A. C. Neish, head of the department of chemistry. G. C. Toner, Arts '28, was a representative of the Kingston Rod and Gun Club.

Flight Lieutenant Timmerman Cited For Outstanding Gallantry

A FORMER student at Queen's now with the Royal Air Force, Acting Flight Lieutenant Nelles Woods Timmerman, Sc. '36, Kingston, was awarded the Distinguished Flying Cross recently for outstanding gallantry and devotion to duty.

The citation reads: "This officer has displayed great resourcefulness, determination, and enthusiasm in carrying out special night operations, often under adverse weather conditions." The young officer was the pilot of an aircraft returning to its base when an enemy machine was sighted, and he immediately gave chase. After a salvo of shots from his front gun he shot down the enemy, into the sea. Earlier in April he successfully attacked two enemy patrol vessels, destroying at least one of them.

Born in Kingston in 1913, he atended Kingston Collegiate Institute and spent three years in Arts and Applied Science at Queen's. He left in the winter of 1935-36, going to England where he received a commission. He was promoted flying officer in 1939 and acting flight lieuten-

ant last February.

Squadron-Leader Arthur Woods Given Important Military Post

SQUADRON-LEADER ARTHUR WOODS, Arts '14, formerly professor of mathematics and officer commanding the C.O.T.C. contingent at the University of Western Ontario, has been ap-

pointed chief supervisory officer and officer commanding Royal Canadian Air Force personnel at No. 1 air observers' school at Malton, Ontario. Squadron-Leader Woods saw service with the C. E. F., rising from the ranks to a commission in 1917, when he transferred to the Royal Naval Air Service, and later to the Royal Air Force. He was an instructor in flying boats at Felixtowe in 1918.

ARMY LIST

THE Review continues below its monthly list of alumni who have joined some branch of the fighting services, and again requests that readers who know of alumni who are serving with the forces, either overseas or in Canada, notify the office of their names, rank, and units, if possible.

Royal Canadian Air Force — Provisional Pilot Officer A. W. C. Tustin, Arts '38; Dr. K. H. Running, Med. '36.

Royal Canadian Engineers — Lieut. Fred Tremblay, Sc. '41, Lieut. Hardy Main, Sc. '40, Lieut. A. D. Carmichael, Sc. '39, Lieut. E. A. N. Prichard, Sc. '40.

Infantry and Rifles—Lieut. J. C. Newlands, Arts '38, Princess Patricia's Canadian Light Infantry.

Royal Canadian Army Medical Corps—Lieut. R. E. Ralph, Med. '34, Capt. C. H. Leavens, Med. '35.

Royal Canadian Ordnance Corps— Lieut. R. G. Struthers, Sc. '40.

Royal Army Medical Corps — Lieut. Jack R. Webber, Med. '38.

The following alumni have been selected through the Canadian Research Council for service with the British Admiralty and have been gazetted as sub-lieutenants: F. L. G. Askwith, Sc. '40, E. W. Brien, Sc. '40, and J. A. Jarvis, Sc. '40.

Flying Officers M. J. Andrews, Arts '38, and G. H. Newsome, Sc. '39, have arrived in England with the 112th (City of Winnipeg) Squadron, R.C.A.F. The 112th will function as a reserve for No. 110 (City of Toronto) Army Co-operation Squadron.

ATHLETICS

THE YEAR IN RETROSPECT

A THLETICALLY speaking, the season just closed produced several creditable records, with the football and assault teams greatly improved over last year and intramural sports in general enjoying perhaps their greatest success.

Coach Frank Tyndall came to Queen's for his first term last fall and everyone admitted that he had what was probably a hopeless task—to build a contending football team out of the remnants of the squad that had struggled through a winless season the previous year. Very few of the old stalwarts were back and practically a new team had to be trained.

Players and coach had hardly time to adapt themselves to one another before Queen's was called upon to tackle Western, but they travelled to London and gave the Mustangs a real scare, rolling up seventeen points before losing the game. McGill opposed them in the Richardson Stadium the following week, but the Tricolour gave no cause for enthusiasm, dropping a spiritless struggle, 4-2.

The new system began to tell, however, when a fighting Queen's squad stepped out before a cheering alumni Reunion crowd and beat Varsity 8-6; Frank Tyndall really was installed as a favourite when the Tricolour ground the Blues into the sod at Varsity Stadium the following week, 11-6. Not for a decade had the Tricolour trimmed Toronto in both games, but the team outkicked, outscored, and outran their opponents, who were superior only in fumbling.

In the return game against the Redmen, Queen's won a thrilling 12-6 decision and the following week lost their chance to play-off for the title by a scant three minutes. The Western Mustangs, with five straight wins behind them, trailed the Tricolour in the final game at Kingston, but despite the most valiant efforts of a tired Queen's team, the supe-

riority of the Londoners finally asserted itself and they won a fine victory in the dying moments of the game.

A scant point separated Queen's boxers and wrestlers from an assault champion-ship, in the meet at McGill. Ably coached again by Jack Jarvis and Gordie McMahon, the team won four titles and lost several more by narrow margins. The wrestling team will lose some of its best men through graduation, but the boxing squad will be practically intact for next year.

On the other Intercollegiate fronts Queen's was outshone by Varsity and McGill. The hockey team, after a good start, ran into a mid-season slump that put them out of the running. Next year the squad will have to find a new goalie, as both Musgrove and Burrows are graduating, and Fred Tremblay of the seconds has joined the army. In the basketball league the Tricolour ran into superior opposition and won only one game, against McGill.

Levana brought Queen's its sole Intercollegiate championship when the women's tennis team won the annual meet held this year at Kingston. Isobel Matheson, awarded the coveted L.A.B. of C. plaque for her outstanding contribution to Levana athletics, swept all opposition aside to win the singles title. Her mates meanwhile were rolling up enough points to lead the field, followed by McMaster, McGill, Varsity, and Western, in that order.

Minus the sterling services of Jimmy Courtright, the track and field team nevertheless put up a good display to place third in the Intercollegiate meet held at Varsity stadium. Bill Fritz gained the only first when he won the 880-yard event.

Perhaps the greatest achievements in athletics during the past year have been

made in intramural competition under the direction of Physical Director John Edwards, Arts '37. A new system of awarding points to year and faculty teams, by which each student competing gained marks for his year, with a win counting only a small amount more than was given for actual participation in any sport, created an enormous enthusiasm. The new set-up encouraged class athletic sticks to get as many members of the year into sports as possible, as emphasis was placed on participation rather than wins. The success of the plan is evident when it is told that more than 1,000 of the men students took part in intramural sports.

A new trophy for intramural competition was donated by interested alumni and dedicated to Mr. James G. Bews, former physical director. Won for the first time by Science '42, which had a big lead on its rivals, the trophy was presented on Colour Night. Next year a change will be made in the ratios of points given as it was found that the Medical years, which had fewer contestants, had little hope of coming out on top, but a good start has been made to put intramural sports on a firm foundation and all Queen's teams should benefit by the increased enthusiasm shown by the student body as a whole.

Bill Fritz Received Jenkins Trophy As Outstanding Athlete and Scholar

AWARDED annually to the student who has brought most hondent who has brought most honour to Queen's University by his athletic and scholastic ability," the coveted Jenkins Trophy was presented to W. D. Fritz, Sc. '40, Toronto, at Spring Convocation.

By winning the magnificent bowl, Bill Fritz was rewarded for four years of outstanding athletic achievement coupled with an excellent academic record. The award was not made last year as it was felt that no student was proficient enough in both departments to merit the honour.

Fritz first wore the Queen's colours in 1933 when he won the intercollegiate 220- and 440-yard events, equalling the record for the former. He was also a member of the international mile-relay team that defeated an American quartet at a meet in Hamilton. The following year he was with the Canadian Empire Games team which went to Australia. In

BILL FRITZ

this season he won the intercollegiate 100-, 220-, and 440-vard events, setting a new record in the latter. As a sideline he managed a championship boxing and wrestling team in the intercollegiate assault.

Out of college for three years, during

which time he represented Canada at the Olympic games in Berlin, Fritz returned in 1939 to complete his course. He won the 220-, 440-, and was third in the 100yard event in intercollegiate competition. During the winter he entered some of the big American meets. Although racing on indoor tracks was a new experience and he was unable to obtain proper training facilities, he placed second in the Millrose "600" at New York, and won the Hollis "500" at Boston and the highclass Buermeyer "500" in New York. He was again manager of the boxing and wrestling team in his spare time.

This last year Fritz placed first in the intercollegiate half-mile and second in the 440-yard events. He attended most of the big American invitation meets and although he did not win any firsts, his brilliant second in the American National A.A.U. indoor championships was achievement that ranks him with

world's best.

His running days, as far as big meets are concerned, are probably over for some time because his work in mining will not put him close to good organized competition, but Bill Fritz has already accomplished enough to go down in Tricolour athletic history as one of the greatest athletes ever enrolled at the University.

Hockey In Africa

NEWS has reached the Review that Queen's graduates were prominent in an important hockey game in South Africa on February 23, when an all-Canadian team played an all-star South

African aggregation. The Canadians had J. C. "Bubs" Britton, Arts '29, on the forward line, while Max Smith, Sc. '37, took care of goaltending. No mention was made of the score, which is probably the fault of the censors.

AT THE BRANCHES

Ottawa

DUNCAN K. MacTAVISH, Arts '20, was elected president of the Ottawa branch at the annual meeting held in the new Technical School on the evening of May 9. The retiring president, A. K. Light, Sc. '18, was in the chair. Approximately one hundred guests were present.

The complete slate of officers for the 1940-41 year is as follows: honorary president, C. J. Booth, Arts '86; honorary vice-presidents, Mrs. Adam Shortt (Elizabeth Smith), Med. '84, Mrs. T. K. Waddell (Jean Govan), Arts '20, Rev. Hugh Cameron, Arts '76, A. H. Brown, Arts '96, and Dr. T. J. Thompson, Arts '95, D.D. '29; past president, Mr. Light; president, Mr. MacTavish; first vicepresident, C. D. Wight, Sc. '28; second vice-president, Mrs. J. E. Plunkett (Edna M. Moffatt), Arts '26; third vice-president, J. J. Dunlop, Arts '15; secretarytreasurer, D. Ward McGill, Com. '32; committee—Miss Margaret Davis, Arts '37, Miss Kathleen Derry, Arts '30, Miss Marjorie Gray, Arts '33, Miss Helen Wilson, Arts '25, Dr. O. E. Ault, Arts '24, Ralph Bartlett, Sc. '12, C. R. Booth, Sc. '38, E. M. Medlen, Sc. '12, Dr. W. P. E. Paterson, Med. '26, Dr. Wallace Troup, Med. '24, W. B. Wallen, Arts '24, H. C. Redfern, Arts '38.

An athletic committee to co-operate with the Athletic Board of Control was appointed as follows: chairman, W. H. Losee, Sc. '12, Douglas Mallory, Sc. '20, and A. H. Brown, Arts '96. A. T. Batstone, Arts '17, and N. A. Irwin, Arts '14, were re-elected as auditors. The fol-

lowing alumni were appointed to the nominating committee: Mr. Light (chairman), Mrs. L. T. Lett (Eva Doak), Arts '27, W. I. Garvock, Arts '13, Dr. C. W. Kelley, Med. '28, and J. M. Wardle, Sc. '12.

The speaker of the evening was Dr. R. G. Trotter, head of the department of history at Queen's, who delivered a thought-provoking address on "North America and the War." He said that Canadians had no more right to tell the United States what its policy ought to be in relation to the war than Americans had to give orders to Canada. He said that American attitudes and policy were important to Canadians nevertheless.

"It is time Canadians realized that this war cannot be won by emphasizing the principle of limited liability and that sharing responsibilities in a precarious world involves some commitments," he said. "American repudiation of these principles is not an example for Canada to follow; rather it makes the need all the greater that those who are in the war should see it through with full determination."

The speaker was introduced by Mr. Light, and an expression of appreciation to Dr. Trotter was made by Dr. F. A. Jones, Arts '05.

The auditors' report, presented by Mr. Batstone, revealed a substantial credit balance for the year. Dr. McGregor Easson, Arts '12, moved a vote of thanks to the retiring executive. Mr. Wardle gave the report of the nominating committee. Mr. H. J. Hamilton, secretary-treasurer of the General Alumni Association, was introduced to the gathering.

W. B. Wallen, Arts '24, principal of the Technical School, with the aid of several student guides, conducted the alumni on a tour of inspection of the building. Dainty refreshments were served afterwards to bring the programme to a close.

South Africa

A T a most enjoyable meeting early in February several alumni gathered in Johannesburg, South Africa, to discuss Queen's and reminisce on college days.

Those present included J. C. "Bubs" Britton, Com. '30, and Mrs. Britton (Mary Lytell), Arts '29, H. F. Allan,

R. H. BAULD

H. R. RICE

Sc. '33, David Hutchinson, Sc. '35, Max M. Smith, Sc. '37, W. D. Keeley, Sc. '38, and F. W. Anderson, Sc. '39.

Mr. Allan had a great deal of interesting news of his recent visit to Canada to tell the alumni. Mr. and Mrs. Britton reported that they had made a trip to Capetown, where they had met J. C. Macgillivray, Arts '24, Canadian government trade commissioner. They also had met Mrs. Reginald Greer (Marjorie Devine), Arts '29, whose husband is a Canadian exchange teacher at the Cape.

Mr. Keeley and Mr. Smith had news from alumni in the copper belt of Northern Rhodesia, having spent seven weeks on a motor trip through southern and northern Rhodesia last fall. At the Roan Antelope Copper Mine at Luanshya they found the following Queen's alumni: R. H. Bauld, Sc. '28, A. W. McNeil, Sc. '28, H. R. Rice, Sc. '31, George Warren, Sc. '38, Donald C. McDonald, Sc. '38, and L. Reid, Sc. '38. They also reported that

Walter G. Dixon, Sc. '38, is with Mufulira Copper Mines, only ten miles south of the Belgian Congo border.

While in the north, the alumni had a gathering at which it was decided that it was too difficult to try to include all the alumni in the South African branch, as the Reef and the Copper Belt were some 2,000 miles apart. Therefore a new branch was formed and Mr. Bauld was unanimously elected president in the Copper Belt with Mr. Rice as assistant secretary to the secretary at the Reef. Officers in the south remain the same for next year, and are Mr. Britton, president; Mr. Allan and Mrs. Britton, vice-presidents, with Mr. Smith as honorary secretary-treasurer.

Porcupine

HILE visiting the Porcupine and Kirkland Lake branches of the Ontario Medical Association in April, Dr. L. J. Austin, professor of surgery, addressed several student groups and was entertained by alumni at impromptu meetings and luncheons. On April 5 Dr. Austin gave a talk to the senior and junior students of Timmins high school and the students of Schumacher and Porcupine high schools. At noon he was the guest of Dr. B. H. Harper, Med. '22, South Porcupine, at a dinner attended by several local Medical alumni. In the evening he was the principal speaker at a meeting of the Porcupine Medical Association.

The following day Dr. Austin held a hospital clinic, and was later tendered a luncheon by Queen's alumni. Those who attended included J. D. Elliott, Sc. '33, W. W. Tanner, Arts '24, J. M. Bracken, Sc. '33, Dr. Harper, C. S. Gibson, Sc. '22, Dr. Peter Wenger, Med. '35, E. L. Longmore, Sc. '12, Dr. William Taylor, Med. '33, G. S. Lowe, Sc. '09, I. M. Marshall, Sc. '17, J. C. Silver, Sc. '33, H. R. Park, Arts '36, J. M. Cormie, Sc. '33, Dr. G. D. Caldbick, Med. '37, W. S. Gardner, Arts '32, R. D. Lord, Sc. '38, E. C. Keeley, Sc. '16, E. O. Magnusson, Sc. '33, R. R. Mulcahy, Sc. '37, C. E. J. Bowker, Sc. '32, R. C. Ellis, Arts '33, V. A. James, Sc. '23, W. O. LaFontaine, Sc. '22, Dr. Joseph Giardine, Med. '38, A. E. Pugsley, Sc. '33, M. G. Fleming, Sc. '36, Douglas Argue, Arts '36, Dr. R. L. Empey, Med. '32, R. K. Kilborn, Sc. '27, J. M. Douglas, Sc. '24, E. P. Thompson, Sc. '31, W. S. Blake, Arts '24, J. C. Kirkland, Sc. '23, A. Jones, Rev. J. E. Woodall, P. A. Boyce, and M. L. Urquhart, Sc. '22. Medical alumni, other than those mentioned above, who met Dr. Austin included Dr. G. Watt, Med. '29, and Dr. C. Irvine, Med. '32.

Officers of the Porcupine branch elected at a recent meeting in Schumacher are as follows: honorary president, D. E. Keeley, Sc. '10; president, C. S. Gibson, Sc. '22; vice-president, Mrs. W. O. La-Fontaine (Mae Millan), Arts '22; secretary, D. W. Carriere, Arts '35; committee, Mrs. R. E. Delahunt (Cecelia Beaupre), Arts '21, R. K. Kilborn, Sc. '27, Claude Bowker, Sc. '32, A. W. Bromley, Sc. '26, E. P. Thompson, Sc. '31, R. R. Mulcahy, Sc. '37, and J. C. Silver, Sc. '33; athletic committee, W. S. Blake, Arts '24, chairman, A. E. Pugsley, Sc. '33, and A. F. Quinn, Sc. '30.

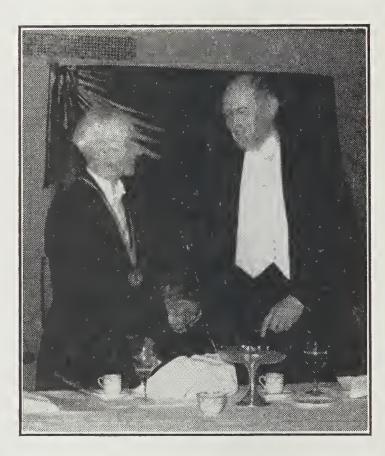

Toronto

THE annual spring luncheon of the Toronto alumnae was held at the Embassy Hotel on March 8. The guest speaker for the meeting was Prof. L. J. Rogers of the University of Toronto, who spoke on "Scientific Evidence in Court." At the head table were Professor and Mrs. Rogers, Dr. Margaret McKellar, Med. '90, LL.D. '29, who is celebrating the fiftieth anniversary of her sailing to India as a medical missionary, Mrs. D. G. Geiger (Goldie Bartels), Arts '22, Mrs. A. L. Scace (Jean Simmons), Com. '26, Mrs. A. E. Harkness (E. G. Rolston), Arts '14, Mrs. Frank Yeigh (Annie Laird), Arts '01, Mrs. George H. Ross (Isabel Bryson), Arts '05, Miss Flora B. Stewart, Arts '98, Mrs. F. A. Whitton (Maude McMaster), Arts '17, Miss Mary White, Arts '29, Mrs. W. R. Leadbeater (Ethel Jordan), Arts '10, Mrs. J. A. Cooper (Agnes Massie), Arts '95, Miss Florence Leggett, Arts '26.

Mrs. A. R. Foster (Margaret Porteous), Arts '23, Mrs. R. E. Dowsett (Jean Rose), Arts '19, Miss Edna Poole, Arts '07, Miss Helen Mackintosh, Arts '07, Miss Ferna Halliday, Arts '16, Miss Kathleen Elliott, Arts '26, and Dr. Viola Davidson, Arts '18.

Montreal

A PPROXIMATELY one hundred alumni and friends of the University gathered at the Ritz-Carleton Hotel on May 8 to pay their respects to Dean John Matheson, who had been selected

Courtesy, Associated Screen News
PRESENTATION OF THE MEDAL
President Stirling Congratulates Dean Matheson

as this year's recipient of the Montreal Medal. J. B. Stirling, Arts '09, Sc. '11, president of the branch, acted as chairman for the happy occasion.

Mrs. Matheson was also a guest at the meeting, and was presented with a beautiful bouquet of flowers. Among those present was Mr. H. J. Hamilton, secretary-treasurer of the General Alumni Association.

Grace was said by Rev. J. D. McCrae, Arts '13, Theol. '16, before the guests sat down to a sumptuous dinner. Afterwards, Mr. Stirling called upon J. K. McLachlan, Arts '20, to present Dean Matheson for the award. Mr. McLach-

lan referred to the Dean as one of the greatest teachers who ever taught at Queen's—"a very human man, approachable, possessing deep understanding and sympathy, yet a good disciplinarian." The president then hung the medal from the Dean's shoulders, and the meeting sang For He's a Jolly Good Fellow, and followed this with three hearty cheers.

Dean Matheson spoke in reply, saying that there were no words that could express what was in his heart at that time. "I would that my tongue could utter the thoughts that arise in me," he said, quot-

ing Tennyson.

"A university is a place for learning, but if the object of learning is the essential purpose, it is doubted whether universities can justify themselves on that basis," said the Dean. Education is useless unless accompanied by a growth of character. The value of learning lies in what can be done towards building up individual and national character, he said.

G. R. Maybee, Sc. '25, Arts '27, led the gathering in a spirited rendition of the

Queen's and Arts yells.

The formal programme came to a close with a preview of the new Associated Screen News short feature in technicolour, "Radiant Rockies," which was greatly enjoyed.

LIEUT.-COL. J. M. MORRIS, officer commanding the McGill University Contingent, C.O.T.C., was the guest speaker at a regular meeting held in the Mount Royal Hotel on April 17. Lieutenant-Colonel Morris described the differences in the training of officers between 1914 and 1939. Moving pictures of the war in Finland and of the scuttling of the *Graf Spee* were shown by courtesy of Associated Screen News. C. A. Root, Arts '19, was in the chair.

Ottawa

MRS. J. E. PLUNKETT (Marion Moffatt), Arts '26, was elected president of the Ottawa branch of the Queen's alumnae at the annual meeting held on April 23. More than eighty

guests were present at the banquet in the Chateau Laurier. Mrs. T. K. Waddell (Jean Govan), Arts '20, the retiring president, was in the chair.

"Sweden" was the subject of an address given by Mrs. M. J. Galarce, guest speaker of the evening, and a vote of thanks was moved by Miss Annie McGregor, Arts '05. On behalf of the members Mrs. J. J. Dunlop (Margaret McArton), Arts '20, expressed appreciation to Mrs. Waddell, who has been president for two years, and to the retiring executive.

Others elected to office with Mrs. Plunkett include: Mrs. Andrew J. Taylor (Edith Culbert), Arts '18, vice-president; Mrs. E. I. Holmes (Billy Nobes), Arts '25, secretary-treasurer; Mrs. John Young (Beatrice Parkinson), Arts '30, and Miss Iva Wilson, Arts '35, councillors. Mrs. W. I. Garvock (Ethel Guthrie), Arts '15, was convener of the nominating committee.

Kirkland Lake

K IRKLAND LAKE alumni enjoyed a surprise visit from Dr. L. J. Austin, professor of surgery, when he arrived on April 7 to visit the local branch of the Ontario Medical Association. Taking every advantage of the opportunity, they arranged a dinner the following day which turned out to be a great success.

More than thirty alumni attended what Dr. Austin calls an "emergency luncheon," and were treated to a most enjoyable talk as well as being brought up to date on campus news and gossip. Dr. J. J. O'Reilly, Arts '16, Med. '24, introduced Dr. Austin, and Miss Florena Cramp, Arts '35, president of the branch, moved the vote of thanks. Especially interesting to the listeners was the news of the effect of the war on campus life. After the speech questions were in order, and many a laugh ensued, making the affair most informal and enjoyable.

While in the northern city, Dr. Austin was received by the Medical Society of Kirkland Lake at the home of Dr. R. H. Armstrong. His Queen's host was Dr.

C. G. Teskey, Med. '35. A medical meeting which lasted from 9.30 p.m. until 4.30 a.m. was but one of the many functions crowded into the short time available to Dr. Austin.

Alumni and friends who attended the luncheon were J. R. Bridger, Sc. '32, and Mrs. Bridger, W. J. Graham, Sc. '23, and Mrs. Graham, Dr. O'Reilly, Dr. and Mrs. Teskey, H. P. Dickey, Sc. '30, and Mrs. Dickey, W. J. Kilgour, Sc. '30, H. A. Graves, Sc. '28, and Mrs. Graves (Mary Baker), Arts '31, C. E. V. McKnight, Sc. '33, Miss Cramp, Miss Barbara Gowans. Arts '35, Miss Marion Bartlett, Arts '35, Eric Holt, Sc. '23, Miss Bessie McIntvre, Arts '34, Miss Mary Ginn, Arts '36, Miss Mary Burke, C. D. Mathewson, Sc. '32, and Mrs. Mathewson, Ray Binch, Sc. '35, and Mrs. Binch, E. H. Orser, Sc. '10, Ruben Yourt, Arts '32, and Mrs. Yourt, D. K. Burke, Sc. '35. In Kirkland Lake Dr. Austin renewed acquaintance with Dr. D. H. Pollock, Med. '38, Virginiatown, and Dr. J. E. A. Lindsay, Med. '28, Noranda.

Edmonton

A LARGE number of Edmonton alumni and friends gathered at the Corona Hotel on April 4 for the branch's annual dinner and election of officers. Owing to the absence of the president, A. W. Haddow, Sc. '09, Mrs. F. C. Casselman (Cora T. Watt), Arts '12, vice-president, was in the chair.

Responding to the toast to the University, Rev. J. Gordon Brown, Arts '33, Theol. '36, gave an able and timely address, and the words of thanks from the chair were supported by hearty applause. During the evening the guests joined in

the singing of old Queen's songs and the Queen's film, "Paths of Learning," was shown, to the enjoyment of all.

In the business session, officers elected for next year were as follows: Principal R. C. Wallace, honorary president; Rev. Dr. S. W. Dyde, Arts '83, honorary vice-president; Rev. D. C. Ramsay, Arts '06, president; Mrs. J. W. Campbell (Ruby Kilgour), Arts '15, vice-president; A. H. Gibson, K.C., Arts '07, honorary secretary-treasurer; Dr. J. E. Carmichael, Sc. '09, Med. '11, Miss Edith Forester, Arts '12, Rev. J. Gordon Brown, Miss Kathleen Teskey, Arts '03, and Mrs. S. H. Gandier (N. M. Clinton), Arts '17, committee.

In addition to those named above there were present: Dr. J. O. Baker, Med. '08, and Mrs. Baker, Dr. M. R. Bow, Arts '08, Med. '11, and Mrs. Bow, Dr. J. F. Brander, Med. '06, and Mrs. Brander (May Purdy), Arts '04, Prof. J. W. Campbell, Arts '13, Mrs. J. E. Carmichael, Mrs. S. W. Dyde, F. C. Casselman, M.P., Arts '11, Rev. John E. Duclos, Arts '84, Miss Emma Embre, Arts '24, E. L. Fuller, Arts '07, and Mrs. Fuller, Mrs. A. W. Haddow, Dr. L. R. Dodds, Arts '17, and Mrs. Dodds, S. H. Mc-Cuaig, K.C., Arts '13, and Mrs. McCuaig, Prof. J. M. MacEachran, Arts '02, Ph.D. '06, W. W. Preston, Sc. '35, and Mrs. Preston, Hugh Gourlay, Arts '27, and Mrs. Gourlay, Dr. W. C. Redmond, Med. '01, and Mrs. Redmond, Rev. Dr. J. F. Smith, Med. '88, LL.D. '38, and Mrs. Smith, J. E. Somerville, Sc. '12, and Mrs. Somerville, Dr. G. E. Storey, Med. '07, and Mrs. Storey (Edith Malone), Arts '99, Mrs. J. C. Walton, Arts '22, Miss Ada Wilkie, Arts '16, Mrs. D. C. Ramsay, and Mrs. A. H. Gibson.

ALUMNI NEWS

Births

Batstone—At the Kingston General Hospital, on April 25, to Dr. H. L. Batstone, Com. '26, Med. '32, and Mrs. Batstone, a daughter.

Cooper — At Mount Hamilton Hospital, Hamilton, Ont., on April 29, to D. A. Cooper, Arts '28, and Mrs. Cooper (Marion MacAlpine), Arts '24, a daughter.

Ellis — At Porcupine General Hospital, South Porcupine, Ont., on May 9, to R. C. Ellis, Arts '33, and Mrs. Ellis, a son.

Gallagher—On April 1, to D. M. Gallagher, Sc. '39, and Mrs. Gallagher (Margaret Johnston), Arts '38, Kirkland, Lake, Ont.,

a daughter (Katherine Anne).

Gibbons—At the Grace Hospital, Ottawa, on March 25, to Dr. N. E. Gibbons, Arts '27, and Mrs. Gibbons (Alice Bennie), Arts '29, a daughter (Diana Marian).

Hanna—At the Ottawa Civic Hospital, on April 8, to Dr. H. E. Hanna, Med. '28,

and Mrs. Hanna, a daughter.

Leavens—At Prince Edward County Hospital, Picton, Ont., on April 22, to Dr. C. H. Leavens, Med. '35, and Mrs. Leavens, a son.

McIntosh—At Galt, Ont., on April 16, to Duncan McIntosh, Com. '34, and Mrs. Mc-Intosh (Mary McLennan), Arts '34, a son (John McLennan).

Pelton—At the Private Patients' Pavilion, Toronto General Hospital, on May 18, to G. M. Pelton, Arts '28, and Mrs. Pelton, a

daughter.

Roy—At the Kingston General Hospital, on May 5, to Phil Roy, Sc. '29, and Mrs.

Roy, a daughter.

Shaw—On May 3, at the General Hospital, Cornwall, Ont., to R. B. Shaw, Arts 38, and Mrs. Shaw, a daughter (Barbara Ann).

Wylie—At St. Michael's Hospital, Toronto, on May 17, to J. B. Wylie, Arts '26, and

Mrs. Wylie, a daughter.

Marriages

Allen—On April 10, at Blessed Sacrament Church, Ottawa, Margaret Eloise Hutton, to Dr. James Donald Allen, Med. '31, Ottawa.

Babcook—On May 1, at the Free Methodist parsonage, Westport, Ont., Alice Edna Babcook, Arts '32, to Manford Burleigh, Verona, Ont.

Brophy—In St. James's Chapel of St. Mary's Cathedral, Kingston, on May 4, Mary Augusta Brophy, Arts '34, to Cyril

M. Darling, of Kingston.

Brown — In St. Peter's, Eaton Square, London, England, on April 11, Marguerite Elkins Poe, of Kingston, to Lieut. Malcolm Corsan Sutherland Brown, Sc. '39, Royal Canadian Engineers.

Butler—In Toronto, on April 20, Eleanor E. Wilson, Wyman, Que., to Norris Ellwood

Butler, Com. '30, Toronto.

Cavers-In Miami, Florida, on April 30, Isabel Hawkins, Kingston, to Thomas Willard Coleman Cavers, Sc. '39. They are living at Nueva Gerona, Isle of Pines, Cuba.

Craig—At Beaches Presbyterian Church, Toronto, on May 18, Jean Macdonald to

James Smith Craig, Arts '31.

Fiddes-Wilson — In Princess Street United Church, Kingston, on May 18, Dorothy Pearl Wilson, Arts '37, to Dr. Gladstone William Fiddes, Med. '40. They will live in Ottawa, where Dr. Fiddes is on the staff of Strathcona Hospital.

Findlay—At Central Presbyterian Church, Montclair, N.J., on April 20, Margaret Gor-don French to Dr. John Hamley Findlay,

Arts '25, Sc. '27. They are living at 6 Stone-

henge Road, Upper Montclair.

Groves-Early in April, at the home of the bride's parents, Lindsay, Ont., Margaret Ethel Groves, Arts '34, to John E. Fowell.

Harshaw—On March 28, in Toronto, Margaret Jean Appleford to Lieut. Milford Wil-

liam Harshaw, Sc. '32.

de Hertel-On April 4, in the chapel of St. George's Anglican Church, Ottawa, Roberta Denise de Hertel, Arts '34, Perth, Ont., to Sherald Edward Stewart. They are living in Smiths Falls, Ont.

Lochnan—On May 18, in Ottawa, Elizabeth Jane Lumbers to Flying Officer Peter W. Lochnan, Arts '38. They will live in

Ottawa.

Poupore — On May 4, in Holy Rosary Church, Toronto, Cathleen Mary Callahan

to John Sebastian Poupore, Sc. '39.
Ralph—At the home of the bride's parents, London, Ont., Emma McKinnon Fox, daughter of Dr. William Sherwood Fox, LL.D. '29, president of the University of Western Ontario, to Dr. John Danby Ralph, Arts '24. They will live in London where Dr. Ralph is on the staff of the University of Western Ontario.

Robinson — On April 27, in the United Church, Grimsby, Ont., Agnes Mary Hewson, Grimsby, to Dr. Harry C. Robinson, Med. '30, Hamilton, Ont.

Smith — At First Presbyterian Church, Yonkers, N.Y., on April 13, Ruth Edith Fisher to Dr. Austin Edward Smith, Med. '38. They will live in Chicago where Dr. Smith is attached to the staff of the American Medical Association.

Deaths

Baskie—James Baskie, Sc. '34, who had been associated with several mining companies, died suddenly at his home in Toronto on March 24, at the age of thirty-

JAMES BASKIE

four. Mr. Baskie was Whitewood, born at Saskatchewan. He attended the public and high schools there and came to Queen's in 1929, enrolling in the Faculty of Applied Science in geology and mineralogy. He attendclasses for three years, and then spent twelve months at the Frood mine before fin-

ishing his course and receiving the degree of B.Sc. in 1934. In specializing in geology, Mr. Baskie was following a boyhood hobby. After graduation he went to the mining fields of Manitoba, Ontario, and Quebec. He was associated with Rice Lake Gold Mines, the Hans Lundberg Company, and later with Inspiration Mining and Development Company. At the time of his death he was living in Toronto. Mr. Baskie was very fond of sports, in which he excelled, enjoying hockey and baseball particularly. He is survived by his wife, the former Gladys Thompkins, a sister of Russell Thompkins, Sc. '33.

Bell—Dr. John Henry Bell, Med. '90, died at his home in Hamilton, Ontario, on May 8, after a notable career as physician and municipal officer. He was seventy years of age. Dr. Bell was born in Kingston and obtained his preliminary education at the local schools. He attended Medical classes at Queen's and Trinity College, Toronto, from 1883 to 1889, and graduated from Queen's with the degrees of M.D. and C.M. in 1890. Later he attended the Ottawa Normal School. Before going to Hamilton, where he gained recognition as a specialist in chest ailments, Dr. Bell was active in Kingston municipal affairs, holding the position of mayor. He continued his interest in civic affairs after moving to Hamilton; in 1926 he was elected alderman and the following year became a member of the Board of Control, a post he held four years. In 1932 he was a candidate for the mayoralty. During the Great War Dr. Bell served successfully as superintendent of the Queen Alexandra Sanatorium at London. Well known in fraternal circles, Dr. Bell belonged to many societies. For the past seven years he has been Grand Medical Examiner of the Canadian Order of Chosen Friends. Other societies of which he was a member included the Masonic Order, Scottish Rite, Knights of Pythias, Independent Order of Foresters, Canadian Order of Foresters, Canadian Order of Oddfellows, Royal Templars of Temperance, Loyal Orange Lodge, Hindoo Koosh Grotto, and Kilwinning Chapter, Eastern Star. John H. Bell, Arts '36, Hamilton, is a son.

Currie—For forty-three years in the active ministry of the Presbyterian Church in Canada, Rev. Edward Charles Currie, Arts '94, died at Creemore, Ontario, on May 13. He was seventy-six years of age, and had retired only a year ago. Mr. Currie was born at Newton, Quebec, the son of a Presbyterian minister. He attended Ontario schools at Brock, Sonya, Oakwood, and Port Perry, and matriculated in 1889 from Newmarket high school. He studied five years in Arts and Theology at Queen's and was ordained into the ministry in 1896. In the same year he accepted a call to the church at Delhi and subsequently occupied Ontario charges at Burns, Thornhill, Sarnia, Richmond Hill, Belleville, Hawkesbury, Lindsay, Sault Ste. Marie, and Creemore. He was a member of the Masonic Order and the I.O.O.F. Mr. Currie is survived by his second wife, six children, one brother, and three sisters.

Denny—An honorary graduate of Queen's, James J. Denny, Sc. '21, who was known widely for his outstanding achievements in the field of metallurgy and latterly for research work in silicosis, died in a Toronto hospital on May 1. For many years he had been an official of McIntyre Porcupine Mines at Schumacher, Ontario. Only a few

days before his death Mr. Denny had been offered an honorary LL.D. from Queen's, to have been conferred at Spring Convocation. Principal Wallace made the following announcement at Convocation: "It was the wish of the Senate to present James John Denny for the degree of Doctor of Laws, 'honoris causa.' I regret to say that death has intervened. Mr. Denny had won for himself a high reputation in his chosen field of metallurgy, and had been honoured both in this country and abroad. But his interests were not confined to his specialty. He was a moving force in the investigations in the use of aluminum dust against silicosis, which have attracted attention in all countries. We honour him in our thoughts today, and we would convey to his widow and family the sincere sympathy of the Senate and the University." Born in England, he came to Canada while an infant, his family settling in Kingston. He started his professional career as a laboratory assistant at Queen's. In 1907 he made his first contact with practical mining when he joined a survey party in British Columbia. Later on he went to Cobalt as an assayer for Coniagas Mines, and while there was responsible for improvements in the treating of Cobalt ores. In 1921 he was awarded an honorary M.Sc. degree by Queen's in recognition of his outstanding work. Two years later he went to the McIntyre Porcupine Mines where, as mill superintendent, he introduced refinements in the treatment of gold ore. At his death he held the office of metallurgical engineer at the mines. Mr. Denny gained wide recognition for his work with Dr. W. D. Robson, the mine's chief surgeon, and Dr. Dudley A. Irwin of the University of Toronto. Research work at Schumacher and in the department of medical research at Toronto under the direction of Sir Frederick Banting, LL.D. '34, resulted in the discovery of a metallic alumipreventive treatment for silicosis which was claimed to be as imposant a discovery as was insulin for diabetes. Denny also won distinction for a brilliant career in metallurgy and was the first to receive the International Nic' el Company's platinum medal, which was awarded in 1933, for "research and achievement valuable to the nation in the milling of gold and silver ores." He was also awarded the medal in 1934, the Leonard medal in 1939, and the Franklin Institute medal. He is survived by his wife, three sons, four sisters, and two brothers. One of his sons is J. Ronald Denny, Arts '40.

Dolan—One of the most prominent men in educational affairs in western Canada, George Robert Dolan, Arts '99, died suddenly on May 8 at his desk in Balfour Technical High School, Regina, at the age of sixty-one. For twenty-one years a noted citizen of Regina, Mr. Dolan gained eminence by his successful guidance of that city's educational system, particularly in

the vocational field. He was born at Almonte, Ontario, and received his early edution in the public and high schools of Lanark county. After leaving school he spent some time in the lumbering business at Ottawa, later entering Queen's. Throughout his undergraduate years he achieved high standing, taking honours in classics, English, and history. He graduated in 1898 with the degree of B.A., but returned for further work in education, winning the University gold medal in history the following year. He took an active part in athletics, was on the senior football team, and also figured in basketball, bowling, and curling. After graduation, Mr. Dolan took up teaching and was in schools at Renfrew and Kingston for a short time. Later he returned to Queen's and for some years was a member of the staff of the Faculty of Education. About 1912 he went to Saskatoon and two years later to Calgary, where he became principal of the collegiate insti-The vocational aspects of education interested him and in 1916 he was appoint-

ed vice-principal of the Institute of Technology and Art. A year later he became principal and was at the same time put in charge of the training of returned men in southern Alberta. In 1919 Mr. Dolan was the unanimous choice for the principalship of Central Collegiate Institute in Regina, and for the past twenty-one years has been head of secondary education in that city. He took an active part in civic affairs and was for many years a director of the Y. W. C. A. He was a member of the teaching council of Regina General Hospital where he was actively interested in the training of nurses. He also served as president of the Canadian Club and as secretary of the Regina branch of the National Council of Education, and was prominently connected with the St. John Ambulance Association. In an editorial, the Regina "Leader-Post" said of Mr. Dolan: "Students and adults alike will mourn this man of the helping hand. For he was without a doubt a man of the helping hand, a man of integrity, too, and one who was a credit to his native

Canada." Mr. Dolan leaves his wife, formerly Mabel Taylor, Arts '03, one daughter, two sons, two sisters, and three brothers. Ronald Dolan, Med. '44, is a son and John Henry Dolan, Arts '97, of London, is a brother.

Drummond—A general practitioner in Casnovia, Michigan, for more than forty years, Dr. Samuel James Drummond, Med. '97, died there recently at the age of seventy-three. Dr. Drummond was a native of Almonte, Ontario, and was educated at the Almonte high school. He entered Queen's with the Medical Council matriculation in 1893, receiving his M.D. and C.M. degrees in 1897. In his final year he won honours in jurisprudence. After graduation, Dr. Drummond carried on postgraduate work for several years in New York and then went to Casnovia, where he established a successful practice. He is survived by his wife, one daughter, two brothers, and five sisters.

Frye—A recent graduate in honour economics and history, John Waldron Frye, Arts '31, died in Brockville, Ontario, on April 23 after an illness of only a few days. He was in his thirtieth year. Mr. Frye was a native of Soperton, near Brockville, and received his early education there and at

Athens high school. In 1928 he entered Queen's and graduated with the degree of B.A. in 1931, specializing in nomics. Then he joined the staff of the John Stetson Company (Canada) Limited, upon its establishment, and won rapid promotion. He was made sales representative in Alberta and northern Saskatchewan a year ago, with headquar-

JOHN FRYE

ters in Calgary. In addition to his sales duties, he was assistant designer in the men's hat division and spent a month or more in the plant at Brockville each spring and fall. He was so engaged during April when suddenly stricken. Surviving are his parents, one sister, Miss Helen Frye, Arts '34, Toronto, and three brothers, including Douglas Frye, Com. '40, Brockville.

Fraser—Hugh Fraser, Arts '30, died in Kingston on April 6 at the age of thirty-six. Mr. Fraser was born at Embro, Ontario, and attended Kingston collegiate institute before entering Queen's. In 1930 he received his B.A., and afterwards taught school at Hanover, Ontario, for a short time. Later he went into business in Kingston with his brother, and finally joined the staff of the Kingston post office. In recent postal examinations Mr. Fraser achieved a standing of ninety-nine per cent. He is survived by his parents, two sisters, and a brother.

Longwell — A member of the University Council and Board of Trustees for more than twenty years, Alexander Longwell, Arts '00, Sc. '03, died at his home in Toronto on April 25 after a short illness. Mr.

ALEX. LONGWELL

Longwell was born at Foxboro, Ontario, in 1878. He attended Albert College, Belleville, and entered Queen's in 1896, receiving the degree of B.A. in 1900 and of B.Sc. three years later. The time of his graduation with a degree in mineralogy and geology cowith incided great silver strike at Cobalt, and Mr. Longwell immediately went north to the mines. From his

successful efforts developed the Coniagas Mine, of which he was vice-president. He turned his earnings back into mining for many years and was responsible in large measure for several successful ventures. The Canadian mining industry owes him much for the faith he had in its future. Mr. Longwell did not confine his activities to this field, however. He was president of the Ontario Rock Company and director of several others, including McFarren Brick, Limited, Disher Steel Company, and the Industrial Educational Publishing Company. In 1918 Mr. Longwell was appointed to fill a vacancy on the University Council and was made a representative of the Council on the Board of Trustees, positions he held until his death. He was a member of the Granite, National, Rosedale Golf, Scarboro Golf, and the Royal Canadian Yacht clubs. He is survived by his wife and one daughter, Dorothy Muriel (Mrs. C. B. Matson), Arts '28.

Hutton—Brilliant Greek scholar and one of the most popular professors at the University of Toronto, Dr. Maurice Hutton, LL.D. '03, died April 5 at the age of eightythree. He was born at Manchester, England, the son of an Anglican clergyman. Educated at Magdalen College School and Oxford University, Dr. Hutton won many scholarships for his academic achievements. In 1880 he came to Canada to take a position at the University of Toronto as a professor of classics, and throughout the next forty-eight years gained the love and profound admiration of all his pupils. In 1928 he retired and became emeritus professor of classics and emeritus principal of Un versity College. In 1903 he was awarded two LL.D's, by Toronto and Queen's, and in 1933 the University of Toronto Senate lished the Maurice Hutton scholarship in his honour. As an interpreter of the ideals and the message of Greek civilization, Professor Hutton became known to a wide

audience. He chose Greek as his field of study because, as he said in his valedictory, "the writings of the Greek philosophers, historians, and dramatists have a value and meaning which is literally eternal. There is not a modern problem in philosophy, history, or science which was not started then and does not still owe much to them." Professor Hutton wrote four books in which he developed the theory of the value of Greek culture which formed the basis of his university teaching. He was a member of the Royal Society of Canada and was president of its English section in 1918 and 1919. He was also president of the Canadian branch of the League of the Empire. Surviving are two children, both in England.

McDonald—A practitioner for forty-eight years in the rural districts of Cape Breton Island, and known to all as "Dr. Hudy," Dr. Hugh Neil McDonald, Med. '82, died at his birthplace, the village of Lake Ainslie, C.B., about May 12. He was eighty-three. Dr. McDonald was educated at Pictou Academy and at Queen's, graduating in 1882 in Medicine. Many stories are told of his exploits as a man of action. It is recounted that he knocked out the famed John L. Sullivan, then in his heydey. While he was still a Medical student he attained wrestling fame by defeating Lynch, wrestling champion of America; the following day he went out on the track and won a gold medal for his general athletic proficiency. Years later, while practising in Cape Breton, it is said that he once interrupted an operation long enough to "toss a bully over a nearby fence." Dr. McDonald attributed his strength to the physical characteristics he inherited from his Scottish ancestors and the training he received in Highland games. In his later years, "Dr. Hudy" devoted himself to a study of the Celtic MacDonald and MacKinnon families from which he sprung and from which families many Queen's alumni originate.

Ontario Ladics' Gllege

TRAFALGAR CASTLE, WHITBY, ONT.

Beautifully situated in 100 acres of grounds. Primary School to Honour Matriculation. Music, Household Science, Secretarial Courses and Dramatics, Art, Interior Decoration and Handicrafts. A Residential School for Boys

EDUCATION FOR MODERN LIFE

Pickering College offers the kind of education that inculcates in your boy an understanding that goes beyond mere academic learning. It is our endeavour to equip him for citizenship in a changing world. In addition to the Matriculation and Business Courses, school life at Pickering promotes the physical, social and spiritual development of its students by offering a wide range of interests and supplementary activities — lectures and discussion groups on current problems, civic and economic — specialized library service — hobby clubs — vocational guidance — musical, artistic and dramatic interests. Seasonal athletic activities throughout the year.

For full information, write the Headmaster, Joseph McCulley, B.A.

APPLICATIONS ARE NOW BEING RECEIVED FOR THE AUTUMN TERM.

McKinley — After an illness of four months, Dr. William Wallace McKinley, Med. '03, died in Toronto on April 21, in his sixty-seventh year. Dr. McKinley was born near Seeley's Bay, where he attended local schools. He enrolled at Queen's in 1899 and graduated with the degrees of M.D. and C.M. in 1903. In the years 1901-02 Dr. Mc-Kinley also took courses in Arts. Following his interneship, he established a practice at Port Hope, but left to do further work in medicine at Edinburgh, where he received his licentiate with the Royal College of Physicians and Surgeons. Returning to Canada, Dr. McKinley became coroner for the united counties of Northumberland and Durham, a position he retained for twenty years. He was chairman of the Port Hope Public School Board for a long period. In 1925 he began his practice in Toronto, where he lived until his death. Dr. McKinley was buried at Olivet cemetery, near Seeley's Bay. He is survived by a brother, Dr. J. Nathan McKinley, Med. '08, Toronto.

Wylie—Dr. Ernest Burnham Wylie, Arts '10, Theol. '12, died in hospital in Ottawa on April 14, in his fifty-fifth year. Born at Keene, Ontario, he received his early education in Peterborough and Sault Ste. Marie, entering Queen's in 1906. Throughout his Arts and Theological courses he achieved high standing, graduating with the degrees of M.A. in 1910 and B.D. two years later. He was awarded the Buchan No. 1 Scholarship in 1909, the Lewis Scholarship in 1911, and the Tawse Scholarship in 1912. He did postgraduate work and received his Ph.D. from the University of Chicago. For three years after graduation Dr. Wylie tutored in philosophy at Queen's under the late Dr. John Watson. He was then called to St. Stephen's Church, Chatham, New Brunswick, where he remained until 1919. that year he went to Calvin Presbyterian Church, San Diego, California, remaining two years, and finally taking up the position of minister of Erskine Presbyterian Church, Ottawa, where he was in charge for five years. Leaving the ministry Dr. Wylie joined the editorial staff of the old Toronto "Mail and Empire." Eight years later he became owner and publisher of the Scarboro "Post," and in March of this year he went to Ottawa again where he was engaged in the government service. son, he was a member of Birchcliffe Lodge. A.F. and A.M. Surviving are his wife, the former Gertrude Elliott, Arts '09, and three children.

Notes

1880-1889

J. M. Farrell, K.C., Arts '89, has been elected president of the Kingston Children's Aid Society. Mr. Farrell has been acting in this capacity since the president, Rev. Dr. H. A. Kent, principal of Queen's Theological College, went overseas as senior chaplain of the First Division, C.A.S.F.

Dr. T. H. Farrell, Arts '89, Med. '95, eye, ear, nose, and throat specialist in Utica, N.Y., will speak over radio station WIBX, Utica, at 4.30 p.m., on June 17. His subject will be "Hearing."

Dr. S. R. Walker, Med. '89, has completed fifty years of medical practice in Chebanse, Ill. A public reception is being held in Chebanse in honour of the event during the afternoon of June 2, and in the evening of the same day Dr. and Mrs. Walker will be guests of honour at a banquet given by local members of the medical profession and their wives. Dr. and Mrs. Walker will celebrate their fiftieth wedding anniversary in Canada during July.

1890-1899

Dr. S. A. Mitchell, Arts '94, LL.D. '24, professor of astronomy at the University of Virginia and director of the Leander Mc-Cormick Observatory, has been elected a member of the Council of the National

Academy of Sciences.

Dr. W. B. Munro, Arts '96, LL.D. '12, professor of history and government at the California Institute of Technology, Pasadena, has been nominated as a candidate to the Board of Overseers at Harvard University. After graduating from Queen's Dr. Munro went to Harvard for postgraduate work where he received his A.M. degree in 1890 and his Ph.D. in 1900. For many years he was on the staff of Harvard as professor of municipal government and later as Jonathan Trumbull professor of American history and government. In 1937 he was director of the First Special Session, Graduate School of Public Administration. From 1908 to 1929 he was university editor of the Harvard graduates' magazine and from 1906 to 1921 president of the Harvard Co-operative Society.

1900-1909

Dr. I. D. Cotnam, Med. '08, of Pembroke, Ont., was bereaved on March 31 by the death of his mother, Mrs. George W. Cotnam, Cobden, Ont.

Dr. A. T. Spankie, Med. '07, of Calgary, Alta., a director of Lions International, addressed the Lions Club of Kingston recently when the Kingston club was host to Ottawa, Brockville, Napanee, Gananoque, and Smiths Falls groups. Dr. Spankie is a son of the late Dr. William Spankie, Arts '82, Med. '85, who for more than forty years practised medicine on Wolfe Island and who represented Frontenac-Addington in the Dominion Government from 1929 to 1934. Dr. A. T. Spankie did postgraduate work at the Manhattan eye, ear, nose, and throat hospital in New York after leaving Queen's, and has been practising in Calgary for many years. Mrs. Spankie was Jennie Davison, Arts '11.

Mrs. H. F. Woodsworth (Ada Chown), Arts '09, has returned from Japan and is living at Apt. 8, Hampton Court Apts., 21 Avenue Road, Toronto.

1910-1919

Dr. J. Wesley Bready, Arts '13, explorer of social and industrial relationships, addressed the Empire Club, Toronto, on April 25. His subject was "Why Britain Still Leads."

K. A. Brebner, Sc. '14, is now plant engineer for Price Brothers and Company, at Riverbend, Que.

Miss Nora Cordingly, Arts '10, is librarian at the Roosevelt House Library and Museum, 28 East 20th St., New York City.

Dr. J. A. Dobbie, Arts '11, Med. '13, physician, and superintendent of the Ottawa Civic Hospital, was recently elected grand master of the Masonic Grand Lodge of Canada for Ontario. A banquet, attended by about a thousand members, was held in the Chateau Laurier on April 29 in honour of his election. W. J. Dunlop, Arts '12, Toronto, past grand master of Ontario, was one of the chief speakers. Dr. Dobbie was also honoured in Guelph on April 23 when he was given a civic welcome at a Board of Trade luncheon held in connection with the celebration of the 113th anniversary of the founding of that city. Dr. Dobbie is a native of Guelph.

W. I. Garvock, Arts '13, Ottawa, was elected president of the Princess Patricia Canadian Light Infantry Comrades' Club at the annual meeting held in Trafalgar House on April 22.

Dr. H. C. Hagyard, Med. '15, was reelected president of the Liberal Association of Perth, Ont., at the annual meeting held recently.

Dr. William Hale, Med. '10, of Utica, N.Y., was honoured on May 6 by the Medical Society of New York State when he was elected vice-speaker of the House of Delegates at the 134th annual meeting in New York. Dr. Hale has been a delegate to the House from Oneida County for six years. For fourteen years he was secretary of the Oneida County Medical Society and is a past president of that body. He is vice-president of the Medical Society of New York State for the fifth district. Dr. Hale is also a member of the staff of Faxton Hospital, consulting surgeon for Utica and Marcy State hospitals, a member of the Utica Academy of Medicine, a fellow of the American College of Surgeons, and diplomat of the American Board of obstetrics and gynaecology.

Prof. Watson Kirkconnell, Arts '16, of Wesley College, Winnipeg, spoke on the CBC's "Midweek Commentary" programme on April 10. His subject was "Norway and

its People."

Miss Ethel Lake, Arts '14, lives at 876

Bates Ave., El Cerrito, Calif.

B. F. Lamson, Sc. '12, is city engineer at

St. Catharines, Ont.

Mrs. W. R. Leadbeater (Ethel Jordan), Arts '10, is living at 137 Redpath Ave., To-

Miss Margaret Mackintosh, Arts '13, is head of the library and research division of the Department of Labour, Ottawa.

Miss Caroline McLaren, Arts '15, teaches in the high school at Chesley, Ont.

G. E. Marshall, Arts '19, has been principal of the Hon. J. C. Patterson collegiate institute in Windsor, Ont., since 1937.

Rev. John Murray, Arts '18, Theol. '19 (M.A. Chicago), is minister of Second Presbyterian Church, Jersey City, N.J.

W. P. J. O'Meara, K.C., Arts '15, has been elected president of the Ottawa Rotary

Club.

A. M. Shaw, Arts '12, is senior member of the firm of A. M. Shaw and Company, income tax consultants and accountants,

Montreal.

John H. Sissons, Arts '17, lawyer in Grande Prairie, Alta., was elected a member of parliament for Peace River in the recent elections. He is the first Liberal to win the constituency since 1911. News of his election did not reach the "Review" in time for his name to be included in the list of Queen's graduates elected to the Dominion Parliament which was published in the April issue. The list now numbers six instead of five, and Mr. Sissons is the second graduate new to the House.

E. W. VanBlaricom, Arts '12, is a member of the law firm of VanBlaricom and Hamilton, Tisdale, Sask. He received his LL.B. from the University of Saskatchewan in 1916 and was created a King's Counsel

in 1929.

1920-1929

A. C. Anderson, Arts '21, is principal of the continuation school at Bobcaygeon, Ont.

Miss Isabel Breckon, Com. '28, teaches in the collegiate institute at Niagara Falls, Ont.

Dr. George Danton, Med. '27, is in practice at Endicott, N.Y. He recently received

his F.R.C.S.(C.).

Mrs. Reginald Greer (Marjorie Devine), Arts '29, is at present living in Capetown, S.A., where her husband is an exchange teacher from Canada.

Miss Jean Wood, Arts '28, teaches in the collegiate institute at Lindsay, Ont.

Prof. A. L. Kuehner, Arts '24, represented the University of Bishops College, Lennoxville, Que., at the Canadian Intercollegiate Athletic Union's annual meeting in Montreal on March 30.

S. S. MacInnes, Arts '25, practises law in Welland, Ont., where his office is at 105

East Main St.

W. MacMillan, Arts '22, formerly principal of the collegiate institute in Lindsay, Ont., is now inspector of public schools in Sudbury, Ont. His address is 160 Patterson St. Mrs. MacMillan was Marjorie MacDougall, Arts '22.

P. A. Moreland, Arts '24, of Toronto, was elected president of the Ontario Commercial Teachers' Association at the recent meetings of the Ontario Educational Association.

Herbert Parliment, Sc. '29, is at the Lacoma Gold Mine, Senneterre, Que.

Miss Laura Ryder, Arts '22, who has taught for a number of years in the Robert Meek public school at Kingston, is retiring this summer.

Gordon Young, Arts '23, is inspector of schools for West Middlesex, Ontario, with

headquarters in Strathroy.

1930-1939

A. T. Ashley, Arts '31, is principal of the collegiate institute of Vankleek Hill, Ont.

Dr. C. J. Austin, Med. '37, was bereaved on April 18 by the death of his wife, at Inniskillen, Ont. Mrs. Austin was formerly Dulcie Jean MacPherson, a graduate of the Kingston General Hospital of the class of 1936. Dr. George MacPherson, Med. '37, is a brother.

Lieut. A. O. Barrie, Sc. '34, of the Public Works Department, Kumasi, Ashanti, Africa, is at present on leave in England and may be reached at the Junior Constitutional Club, Picadilly, London. He recently joined the Light Battery, Gold Coast Regiment, Royal West African Frontier Forces.

Dr. P. H. Bernstein, Med. '34, is practis-

ing at Cochrane, Ont.

Dr. D. C. Bews, Med. '35, is superintendent of the MacKay Memorial Hospital, Taihoku, Formosa. Mrs. Bews was Mary Woodsworth, Arts '36.

Miss Jean Cameron, Arts '34, is teaching French and German at the collegiate institute in Perth, Ont. After graduation Miss Cameron studied for some time at the Sorbonne.

Dr. W. L. Christie, Med. '32, Toronto, has been appointed associate coroner for York County.

L. M. Cordick, Arts '38, is teaching at the collegiate institute in Woodstock, Ont.

Dr. O. B. Dickinson, Med. '35, and Dr. J. S. Young, Arts '34, Med. '38, have been awarded the George Christian Hoffman fellowships by Queen's University for 1940. Holders of these fellowships must do research work outside Canada. The award was given to Dr. Dickinson for his work in surgery and to Dr. Young for further research in pathology. Both graduates are now in England.

Donald Fairbairn, Arts '38, who received his M.A. at Queen's at the Spring Convocation, is leaving shortly for Rochester, N.Y., where he will do postgraduate work at the School of Medicine, University of Roches-

ter.

Miss Christena Ferguson, Arts '38, has accepted a position with the Mutual Life Assurance Company of Canada, Waterloo, Ont.

C. H. J. Fournier, Arts '35, of Kingston, was bereaved on April 14, by the death of his father, Mr. Joseph P. C. Fournier.

A. L. Furanna, Sc. '39, has accepted a position in the engineering department of the Public Utilities Commission, London, Ont.

Miss Isa Galbraith, Arts '34, is teaching in the Queen Elizabeth school, Kirkland

Lake, Ont.

Frank Gascoigne, Arts '39, is now with the Department of Labour, Ottawa. He was formerly with the Combines Investigation Commission.

D. M. Giachino, Sc. '33, is chief engineer at Sladen Malartic Mines, Malartic, Que.

Miss Erma Glave, Arts '38, is principal of the continuation school at Burgessville, Ont.

Miss Helen Grenzebach, Arts '30, is teaching in the high and vocational school at Welland, Ont.

Miss Deborah Haight, Arts '37, is teaching in the Ontario School for the Blind at Brantford, Ont.

D. F. Hatfield, Sc. '37, is with the Hollinger Consolidated Gold Mines, Timmins, Ont.

A. H. Johnston, Sc. '34, is with Canadian Celanese Limited, Drummondville, Que.

Dr. J. E. Josephson, Med. '34, is director of the public health laboratories at St. John's, Nfld. He was formerly in the department of bacteriology at the University of Toronto.

W. D. Keeley, Sc. '38, of Modder Fontein East Mines, and M. M. Smith, Sc. '37, of the West Rand Consolidated Mines, Transvaal, South Africa, recently visited Queen's alumni in the Copper Belt area in Northern Rhodesia, while on a seven weeks' motor trip through Southern and Northern Rhodesia.

Donald Lapp, Arts '36, was recently appointed principal of Rideau Public School, Kingston.

THE GOVERNOR-GENERAL'S AWARD

Laura Goodman Salverson has again won this award for

CONFESSIONS OF AN IMMIGRANT'S DAUGHTER

best Canadian book (General Literature Class) published in 1939. "Captivating pages," said Frofessor W. T. Allison in a radio review, last December. "By far the ablest work that has yet appeared from her pen. In fact I think it is going to make her famous." Mrs. Salverson has the distinction of being the only author to win this Award twice. \$2.50

A QUAKER CHILDHOOD

By Helen Thomas Flexner. Just off the press. An autobiography that is arousing much enthusiasm. "Mrs. Flexner writes with sensitiveness and charm, frequently with beauty... often with humour. She has given us a picture of permanent value." — New York Times Book Review. \$3.50.

THE FRENCH CANADIAN PRESS AND THE WAR

By Florent Lefebvre. A comprehensive and illuminating digest of French-Canadian opinion as expressed through its newspapers. "Nothing else gives so good a perspective of the French Canadian press in so small a space."—Winnipeg Tribune. 25 cents.

Mine, Levack, Ont.

B. C. Robson, Arts '33, is doing private work as a consulting geologist in Toronto. His address is 1058 Avenue Road.

C. N. Rowse, Arts '39, is teaching in the

high school at Leamington, Ont.

Mrs. R. N. Savary (Margaret Rice), Arts '37, is doing missionary work with her husband in the Takada district, Japan. Her address is Nishi Shiro Cho 1, Chome 6, Ta-

kada, Shi, Niigata Ken, Japan. Robert Seright, Sc. '31, who has been teaching for the past few years at Gananoque, Ont., was recently appointed to the staff of the Kingston Collegiate Institute, as teacher of science, mathematics, and general subjects.

Dr. Samuel Shenkman, Med. '33, is chief resident neuro-surgeon in the neurological institute, Columbia Presbyterian Centre, New York City.

H. D. Short, Sc. '33, is sales engineer for the Canada Wire and Cable Company, Lea-

W. F. Stidwill, Sc. '39, has been awarded a scholarship at McGill University for fur-

ther study in chemical engineering.

D. C. Sunnucks, Sc. '38, has been with the Aluminum Company of Canada since gradu-He is now in technical control of casting operations at the Toronto plant.

W. J. K. Walker, Sc. '39, is with the Newfoundland Fluorspar Company, St. Law-

rence, Nfld.

Dr. S. A. Yaffe, Med. '36, has received his F.R.C.P. (London), and is now at the cas-

ualty hospital in Liverpool.

Dr. Howard M. Young, Med. '30, has been practising in Camden, N.Y., since 1932. His address is 129 Main St.

General

Dr. L. J. Austin, professor of surgery, addressed a meeting of the Bowmanville Lions Club and gave a University extension lecture at Trenton on April 22. At the former meeting the following Queen's people were present: Miss Betty Soper, Arts '33, Leonard Lucas, Arts '36, Byron Vanstone, Arts '39, Donald Williams, Arts '39, and Joseph M. O'Neill, Arts '16. Among those attending the Trenton gathering were Miss Alta McIntyre, Arts '26, T. W. Spear, Arts '29, Dr. F. L. Reid, Med. '16, C. V. Wilkins, Sc. '16, A. A. McNab, Arts '36, W. D. Whyte, Arts '38.

Prof. J. A. Corry, of the political science department, and Mr. J. J. Deutsch, of the department of economics, presented papers at the annual meeting of the Canadian Historical Association held in London from May 22 to May 24. Professor Corry's subject was "The Growth of Government Activities in Canada from 1914 to 1921," and Mr. Deutsch's subject was "War Finance and the Canadian Economy, 1914 to 1921."

Dr. E. M. Robertson, professor of obstetrics and gynaecology at Queen's, was recently admitted to fellowship in the Royal College of Obstetricians and Gynaecologists,

London.

Dr. A. M. Doyle, of the department of psychiatry, recently passed the examinations of the American Board of Psychiatry and Neurology and is now qualified to specialize in both departments. It is believed that only one other doctor in Canada has passed the examinations in both psychiatry and neurology.

Dr. L. H. Seelye, LL.D. '37, has retired as president of St. Lawrence University, Canton, N.Y., which position he has held for the past five years. Before going to Canton, Dr. Seelye was on the staff of Bennington College, Vermont, and for many years before that was in charge of the department of religious and philosophical studies at the American University in Beirut, Syria.

HON. NORMAN McLEOD ROGERS 1894—1940

No. 6

THE LATE NORMAN McLEOD ROGERS

ALL Canada heard with dismay the shocking news that Honourable Norman McLeod Rogers, minister of national defence, had been carried to his death on June 10 in an airplane accident at Newtonville, Ontario, while on his way from Ottawa to Toronto to deliver an address on Canada's war effort. Three members of the Royal Canadian Air Force who were accompanying him were also killed.

Nowhere was the sad news more keenly felt than at Queen's, where he was rector and where he had been professor of political science for several years. During his stay in Kingston he gained the admiration and respect of his colleagues and students and of the citizens, whose choice he was as a member of Parliament in the last two general elections.

To a hushed House of Commons Prime Minister Mackenzie King announced the tragedy, the same day that Italy declared war on Canada, and it was with a tremulous voice that the Prime Minister told it had been he who had advised Mr. Rogers to carry out the speaking engagement in Toronto. The defence minister had asked if he should cancel the engagement because of war developments, but Mr. King advised him to keep it. Mr. Rogers' last words, before his departure, had been, "Very well; I will carry on." "I believe those are the words he would have me give his colleagues and the people of this country," Mr. King said.

From every part of Canada, the British Empire, and the United States came expressions of sympathy for the great loss, and sincere appreciations of Mr. Rogers' integrity and worth. Heads of foreign governments joined with legislators from all political parties in Canada, both federal and provincial, in expressing genuine sorrow over the loss to the Dominion and the Empire. Moving tribute was paid to him in a simple funeral service at Ottawa, the first ever held in the Parliament Buildings, and in a memorial service at Kingston. After a private ceremony, the body was placed at the end of the Hall of Fame, the coffin draped with a huge Union Jack. Burial was made in Beechwood Cemetery, Ottawa.

Norman McLeod Rogers' career was one of constant struggle and unceasing personal effort, and his attainments were many. He was born at Amherst, Nova Scotia, July 25, 1894. He attended Acadia University, Wolfville, paying his own way by working in a car factory and by selling magazine subscriptions. At the outbreak of the first Great War, he left his studies and joined the forces. He served throughout as a private in the Sixth Mounted Rifles.

Upon his return from overseas, Norman Rogers resumed his academic education. In 1919 he was appointed Rhodes Scholar from Nova Scotia

and studied at Oxford, returning to serve as professor of history at Acadia. In 1927 he became private secretary to Prime Minister Mackenzie King. Two years later he was back in academic life, taking the chair of political science at Queen's, and in his years on the campus he became one of the most popular and respected members of the staff. When the rectorship of the University became vacant in 1938 Mr. Rogers was the unanimous choice of the student body for the honorary position.

Five years ago Mr. Rogers accepted the Liberal nomination for Kingston, a city that had been represented by Conservatives for a quarter of a century. His popularity with the people of his adopted city was revealed when he was returned with a comfortable margin. In the 1940 elections, despite spirited opposition, Mr. Rogers was re-elected by a large majority.

Shortly after going to Ottawa, Norman Rogers was selected as minister of labour, a position he handled with increasing success until he was promoted to the department of national defence last September. In a wartime government this was obviously one of the most important posts, and the spirit and fervour with which the new minister carried out his duties soon earned for him the respect of all. Shortly before his death he made an extensive visit to England and France, where he obtained first-hand knowledge of the war, especially in relation to Canada's contribution. His untiring efforts and quiet competence as minister of national defence earned for him a reputation of steadiness combined with brilliance; no minister was more able than he.

Norman Rogers was extremely modest and unassuming. A story is told of the day he took over his last position. As he entered the building of the defence department a guard stopped him and demanded his name. "Rogers," was the reply. "Wait a minute," said the sentry, "you will have to fill out a form stating your business." Mr. Rogers laughed as he made his explanations to the astonished guard.

Mr. Rogers was married in 1924 to Mary Frances Parker, of Toronto. Mrs. Rogers and two children survive.

Editorial tributes from newspapers throughout Canada and the United States show the esteem in which he was held by all who knew him and the value placed on his work by those who did not have that honour. The Kingston Whig-Standard said, in part: "The people of Kingston and the surrounding district are not thinking today about Norman Rogers as a great and good Canadian as about Norman Rogers as a great and good friend. The shock of the tragedy in which he lost his life is limiting the horizon of most of them to a deep personal grief and a great sympathy for those who have been bereaved. But if full understanding and appreciation will have to wait for the passing of the years, the writing of memoirs and histories, and the publication of documents which must now be closely guarded, some of the cutlines of what history will say of him are now clear. History will see that it was to Norman Rogers that the Prime Minister turned immediately to fill the most serious and responsible wartime cabinet post."

ы

An editorial under the caption, "A Canadian Statesman," in the New York Times read as follows: "Carada lost an able administrator, a patriotic citizen, and an eloquent exponen of the British tradition when Norman McLeod Rogers, her minister of defence, came to his death in the crash of an army 'plane in Ontario. She has lost Mr. Rogers, moreover, at a time when she has need for such nen as he. His whole life was characteristic of what may be accomplished by earnestness, industry, and high faith in a democracy such as the Dominion typifies. Physically he was no giant, and his health was never of the best. Nevertheless in the last war, as a boy of twenty, he unhesitatingly abandoned his studies at Acadia University and volunteered for active service. He returned from the war broken in health, invalided home, and was advised to plan a future free from strain and heavy responsibility. What he did, after a short essay at teaching history and economics, was to enter politics, in which strain and responsibility are daily breaking. It was characteristic of Norman Rogers that he 'died on duty.' "

The Ottawa Citizen: "No Capinet minister enjoyed greater respect. None had worked harder to merit Canadian public confidence. It is a heavy loss to this government. It must have profoundly shaken Prime Minister Mackenzie King personally; he had long regarded Norman Rogers with almost paternal interest."

The Montreal Star: "Norman Rogers' death was a fitting close to a brief life, much of which was built upon service and sacrifice. . . . The Prime Minister's tribute was, we may be sure, spoken with a very sore heart. His eloquent words will find echo widely throughout the country. Heaven help us, we shall have many a casualty list to mourn before this bitter business is at an end. Norman Rogers' name will stand high upon it."

St. Thomas *Times-Journal*: "A man of unostentatious ability and of a high sense of public service, he readily gave the best that was in him to his country."

Hamilton Spectator: "Vigorous in action, courteous in debate, high-minded, and a brilliant scholar, Mr. Rogers was an outstanding Canadian."

Oshawa *Times*: "A private in the last war and a brave soldier who was again serving his country in another capacity, he knew no danger when the lives of his people and the very fate of his country were at stake. He knew the seriousness of the situation and was working long hours and covering much territory in organizing Canada's war effort. That he died while on duty will go down as a lasting memorial to his name."

At the funeral service in the Parliament Buildings, Mr. Mackenzie King held in his hand a leaf from an office pad on which was written, in Norman Rogers' handwriting, the words of victory which were to have concluded his Toronto speech. With tears in his eyes the Prime Minister read the lines: "In the faith we will fight on, we will resist, we will endure, we will take the offensive, and we will win."

DR. AND MRS. R. BRUCE TAYLOR SAFE IN ENGLAND AFTER ESCAPING FROM FRANCE ON A COLLIER

R. Bruce Taylor, D.D. '12, and Mrs. Taylor are war refugees in England, their beautiful home in the hills a few miles above Cannes in the south of France now being in the hands of the Italians. Escaping to Liverpool via Gibraltar on a collier, they were able to save practically nothing of their personal possessions.

At the outbreak of hostilities last fall, the Taylors reacted characteristically; the good doctor offered his services to the British army in France as an ambulance driver, and Mrs. Taylor entered most enthusiastically into war work. The fruit of the vineyards and orchards of "Le Rucher," their home, was distributed freely to the French soldiers stationed in the district and to the troops who passed through.

In a letter home, written at Gibraltar June 26 and posted from Liverpool July 8, Dr. Taylor writes, in part, as follows:

"We were given a few hours to pack at "Le Rucher" and we had to leave everything, driving the car down to Cannes, with two suitcases apiece; and so the pretty little house is in the hands of the Italians. The collapse is inconceivable.

"As enemies, the British had to be evacuated in two colliers. Our ship did not even have the holds brushed down and for a week we lay on the steel deck in half an inch of coal dust. Seven hundred and twenty-one passengers in each ship. No sanitation at all; two toilets, one of them the captain's. Water rations of a pint in twenty-four hours. We had food for three days and our parcel was sent to the wrong steamer so that we had two biscuits each in the morning and two at night, also three times a slice of bullybeef, and twice a day half a cup of tea. We had some cheese and chocolate. I did not mind the starvation so much as the lack of water. I had a frightful thirst.

"Wednesday night, June 19, we set out in convoy from Marseille, nineteen ships. Our tub developed engine trouble and was sent into the nearest neutral port. While the engine was being repaired we get some vegetables which made soup. You can imagine how little cooking can be done on a galley range intended to serve a crew of thirty-four.

"We had a very narrow escape when proceeding on convoy, from an Italian submarine, quite close to the Spanish

DR. R. BRUCE TAYLOR

coast. She had been following us for a couple of hours and then opened fire. First shot short, second over the ship between bridgeheads and mainmast, then two torpedoes, the first quite wide, secend straight at us, and as the ship was running light it went under at the Number Four hold. I did not get out of my place on the floor of Number Three hold. Passengers were brought on deck, but there were only four very small boats with davits and gear in sheer decay; no lifebelts and only two rafts made of oiled canvass. I thought the position hopeless and my wife and I just waited the end down below; swimming would have been no good. But our gunner thinks he got home with his second round; anyway the sub broke off and may have been sunk. The only access to the holds was down vertical steel ladders except in Number Three, which had a ship's gangway. Old people had to sleep on deck without any shelter except tarpaulins over the beam; there were too many passengers for all to get under cover, and for two nights it poured. The vertical ladders made any escape from the holds impossible and we made up our minds to drown comfortably without scrambling.

"Now Gibraltar is full of refugees, and we did not get away in a troopship which left two days ago. We were in the tender going out to her when we were signalled back because she was full, but all the Dagoes with Italian passports managed it. Fact is, there was a great deal of graft on our coal boat. . . .

"I have two suitcases with me to represent a lifetime's work. I was sorry to leave the house and the books, and it was a shame to have to put away poor Toby and the cat, but they might have been unhappy.

"... My wife has been wonderful. On this dreadful trip she organized the women. What a job to get helpers for every half hour of the twenty-four hours to carry salt water from the pump, to get things in some kind of shape! And she went about those wet decks with all kinds of hot drinks that she prepared; but take it all round, the crowd so mixed behaved itself well and there was no panicking, although a great deal of justified grousing."

(Since this letter was received, Dr. and Mrs. Taylor have arrived in Canada.—Ed.)

Acting Flight Lieutenant Clancy Is Prisoner of War In Germany

A CCORDING to an announcement made by the British Air Ministry, Acting Flight Lieutenant Gordon D. Clancy, Sc. '36, is a prisoner of war in Germany. His mother, who lives in Semans, Saskatchewan, has been informed that he was taken prisoner in course of operations about May 25.

Mr. Clancy attended Queen's for three years, and was a popular student. He left to enlist with the Royal Air Force.

Commemorated By Tablet

A TABLET in memory of Pilot Officer Lloyd George Bishop, Arts '39, has been erected at Woodburn United Church, Pittsburgh township, near Kingston. Mr. Bishop, who was killed in air operations somewhere in France, was the first Queen's casualty of the war.

NO REUNION THIS YEAR ALUMNI DIRECTORATE DECIDES IN BALLOT

THE 1940 Reunion, scheduled for the week-end of October 26, will not be held, in accordance with a decision reached by the Board of Directors of the General Alumni Association in a letter-ballot. Previously, a recommendation to this effect had been passed by the advisory committee of the Board. This marks the first time since the Association was formed that there will not be a Reunion.

It was the feeling of the advisory committee, supported by the majority of the directors, that the alumni would not be in any mood to attend a Reunion at this time. The decision to abandon Intercollegiate sports for the duration of the war was also a determining factor, as the football game is one of the feature attractions of Reunion week-end.

Provision was made, at the same time, to hold the Reunion as scheduled, should the international situation show a marked improvement. The class lists for those years scheduled to return this fall have been ready since spring and can be mailed out on short notice. Several of the class organizers had already done a considerable amount of preparatory work when it was announced that the Reunion would not be held.

The directors were by no means unanimous in their decision to abandon plans for the Reunion. A representative cross-section of the replies received is as follows:

"The great majority of Queen's alumni in this district recommend that the annual Reunion not be held this year because of the war. A minority feel that the war is not good enough reason for cancellation of the Reunion and believe that it would strengthen the efforts of Queen's men in this respect."

"I heartily approve the recommendation."

"As my year was taking part, I was anxious to see the Reunion held, but in view of the war conditions, and especially after last night's announcement that all Intercollegiate athletic events had been

cancelled, I feel that the Reunion should not take place."

"Is it not the general objective in regard to the affairs of the University to keep things going as nearly normal as possible?"

"I agree, and I hope that those who save by cancellation of the Reunion trips will be sure to contribute to the annual endowment fund just opened."

"This decision meets with my full ap-

proval."

"While I agree that we should curtail expense in every way in connection with the holding of the Reunion, I do not think it should be cancelled. Everyone is under so much stress these days that it seems to me better not to deprive them of all opportunities of desirable relaxation."

"I quite agree . . . Our plant is working night and day on war work, and all our staff is under pressure so that I would not feel justified in taking the time off to visit Kingston. I have no doubt that many other graduates are facing the same situation."

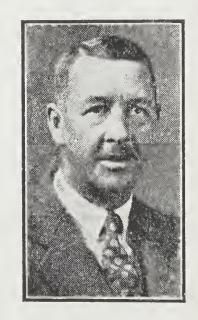

WILGAR

0142712441114101411147431)31031344311171023017331330137311417

By Alexander Macphail

A BELOVED personality has departed from the University. William Percy Wilgar, head of the Civil Engineering department, died at Ottawa on August 3, 1940, after a brief illness, at the age of sixty-three. There are few who will be so missed as he will be, or whose place so empty as his. For forty years his name

has been familiar to us all. His place in the class-room, the Faculty, and the Senate will be hard to fill. He took a very prominent part in every activity of Queen's, educational. letic, military, social, convivial, progressive. He exercised a profound influence on all student interests

W. P. WILGAR

—sports, self-government, improvement of living. He was an exponent of the harmonious relations that should exist between the staff and student body of a university, exemplified as nowhere else at Queen's. If I were not immune to the sin of envy I should envy him his unique place in the regard of the student body. I pay a tribute to his complete loyalty to his Alma Mater, his outspokenness in

debate, his keen opposition without trace of rancour, his intolerant tolerance of all contrary opinion, his supreme capacity for friendship.

He will be as greatly missed in the social life of the community outside the academic. Few had so wide a field of interest in the social life of the city. Many a gathering in the mess-room, perhaps now and then a group about the card-table, will be the less enjoyable by reason of his absence. To few has it been granted in so great a measure to be what is called the life of the party. Wherever he went there was merriment, humour, and good fellowship. There was kindly yet caustic comment on the foibles of humanity, there was solid, constructive discussion on the problems of the hour.

The scope of his activities is shown by this formal, brief record of his career:

Lieut.-Col. William Fercy Wilgar, D.S.O., born Cobourg, Ontario, 1877; educated in the schools of Cobourg, entered Queen's in 1899, and graduated in 1903 with B.Sc. in mining engineering; railway engineer on location, division engineer, and assistant district engineer, 1903-14; professor of civil engineering at Queen's since 1914, and head of the department since 1939; served in World War with Canadian Engineers as captain, 1915, major, 1915, and lieutenant-colonel, 1917; commanded 10th Field Company, and 10th Battalion, C.E.F., from organization until 1919; A.D.C. to His Excellency the Earl of

Bessborough, Governor-General of Canada, from 1934 to 1935; officer commanding the Queen's University Contingent, Canadian Officers' Training Corps, 1932-34; member of the Engineering Institute, of Canada, Association of Professional Engineers of Ontario, and the Canadian Military Institute; president of the Canadian Rugby Union, 1931, and honorary president 1932; president of the Canadian Intercollegiate Athletic Union, 1933; director of the General Alumni Association since 1936, member of the Athletic Board of Control since 1923, member of the Union House Council, and a member of the University Senate; consulting engineer, Department of Highways of Ontario.

Died at Ottawa on August 3, 1940, and was there buried with every mark of respect and affection. To his wife and his namesake son who is on the teaching staff of the Department of English at the University of Texas, and to his relatives, the *Queen's Review* extends most heartfelt sympathy.

His death is a cause of deep sorrow to me personally. For many years we were very closely associated, in war as in peace, on the battle-field as in the academic halls, in our homes as in our church, and during all those years our friendship was never marred by any slightest taint of discord. It is with deep emotion that I pay this small tribute to Bill Wilgar's memory, and with perhaps a wish that our roles might have been reversed, and he have performed this office for me. Yet I take satisfaction in reflecting that he died at the peak of his achievement, while his powers were at their height, and in the full flush of his activity.

I recall here some words which were written thirty years ago on the death of Professor A. K. Kirkpatrick, a predecessor of Wilgar's. They both had the same sincerity of character, the same honesty of purpose, the same pride in the profession of an engineer. Student, teacher, sportsman, soldier, engineer, Wilgar will long be remembered.

FOR THE END OF A ROAD

The works you hewed in wood and carved in stone And smote in steel shall long bear forth your name; But you have earned a meed more sweet than fame. In that you stamped on keen young hearts your own Fair sense of right and love for work well done. Bred as you were and trained to play the game, Strong in your praise and faint but in your blame, The roads you marked for them strike on and on.

Your own road ends just o'er the hard, steep grade Whence you might fare long years with feet light shod; And at its end, where heaves a mound of sod, This block, graved with a score of words, I laid:—
He held to those plain truths which shall not fade, His hearth, his friend, his King and to his God.

QUEEN'S TO CO-OPERATE IN COMPULSORY TRAINING

A T a meeting of Department of National Defence officials and university heads in Ottawa during July, plans were formulated whereby Canadian universities will co-operate with the Government in applying the mobilization act to train men for home service. Queen's was represented by Principal Wallace.

The new scheme will be fashioned along the lines taken by the non-permanent active militia in training privates. The regular Canadian Officers' Training Corps will continue to function, probably on a stepped-up basis, but a new organization will be formed to train the majority of undergraduates.

In a letter to Queen's students, Principal Wallace has outlined the case as fol-

lows:

"The government of Canada has established a programme of compulsory military service for home defence. After consultation with the Department of National Defence the Canadian universities have decided to require that every physically fit male student of British nationality take military training during next winter term. The time devoted to the course will be six hours a week during the term, and the work will be that laid down for men who are to be called out, according to age groups, to take military training for home defence. It is estimated by the Department of National Defence that the winter programme at the universities, together with two weeks in camp in the early spring for camp training and musketry practice, will fulfil the compulsory requirements laid down by the Government for home defence.

"The Commanding Officer of the C. O. T. C., with his staff, will select men to take the regular C. O. T. C. course. Such students may then enlist for C. O. T. C. training if they so desire, as heretofore, and they will not be required to take the training course outlined above.

"Under this plan, Queen's University will carry on with its regular courses, and will at the same time give the discipline and training needed for the defence of the country. The Government fully realizes the responsibility of the University in seeing to it that men and women be equipped in the sciences and the humanities for the demands which must be faced during and after the war.

"Special arrangements will be made for women students, in order that they may receive adequate training while they are taking their regular academic courses, to meet the exigencies which war conditions may impose."

It is expected that most of the universities will again provide C. O. T. C. courses for graduates, the classes being given in the evenings and including lectures, drill, and perhaps small-arms firing instruction.

WAR CONDITIONS AFFECT UNIVERSITY'S LIBRARIES

Some decrease in the number of books issued from the University's libraries during the past year is reported by Mr. E. C. Kyte. The librarian states that the drop is caused by war conditions and the amount of time taken in the C. O. T. C. work of the students. A total of 104,528 books were issued in the season just ended, compared with 105,568 for 1938-39, a decrease of less than 1 per cent.

While the number of loans from the reserved and reference shelves, periodicals, and circulation departments dropped, the total of documents investigated by students increased more than 1,200. "Students are now making intensive use of documents," Mr. Kyte stated. "Documents are in themselves a special study, and only constant use enables students to realize the vast wealth of material they contain."

Nearly 5,000 volumes were added to the Douglas Library during the year, bringing the total to 193,546. The majority of the additions were purchased, but some were received as gifts or as exchanges from other libraries. Many volumes of periodicals were bound and a number of books from Miller Hall were catalogued and the cards added to the main catalogue drawers in the Douglas Library.

"It is pleasant to be able to say that the number of books missing when stock was taken in May, 1939, was eighty-four, the lowest ever recorded," comments Mr. Kyte. Since then, nearly half of the missing volumes has been recovered.

REV. REINHOLD NIEBUHR TO GIVE LECTURE SERIES

REV. REINHOLD NIEBUHR, professor at Union Theological Seminary, New York City, will deliver the Chancellor's Lectures at the forty-eighth annual conference of Queen's Theological Alumni Association October 28 to October 31. His general subject will be "Theological Reconstruction in a Day of World Crisis."

Several members of the Queen's staff and noted alumni will deliver papers during the conference. Among those participating will be Dr. W. A. Mackintosh, Arts '16, Sir John A. Macdonald professor of political and economic science and director of the School of Commerce and Administration, now serving as an adviser in an economic capacity to the Dominion Government; Dr. F. L. Harrison, resident musician; Rev. J. R. P. Sclater, D.D. '35, Toronto; Rev. S. M. Gilmour, associate professor of New Testament literature and criticism; Rev. N. M. Leckie, Arts '02, Theol. '02, D.D. '30, Grimsby; and Rev. T. J. Thompson, Arts '95, D.D. '29, Ottawa. All addresses will be followed by discussion periods.

Faculty Women's Club Organizes To Provide Homes For Refugees

THE Faculty Women's Club has established a committee to provide homes for British refugee children within the Queen's community. It is hoped in this way to be able to place the children of University parents in an environment where they will be most happy. All children, except those who are guests of relatives, will be wards of the Children's Aid Society and will come under the government scheme.

The Club has also been supplying knitted woollen garments to the men of the minesweepers and trawlers.

SEVEN HUNDRED STUDENTS ATTEND SUMMER SCHOOL

MORE than seven hundred students attended the 1940 session of the Queen's Summer School, according to official figures released by the department I University extension. There were 490 enrolled in the regular Arts course, 181 ineducation, and 45 in upper-school work. Special features of the curriculum included a course in elementary conversational French and three courses in play production. Art and music were offered as redit courses.

The student forum and the Sunday evening services continued to play an importat role in the extra-curricular activities. Speaking at the forum were J. M. Macdonell, Arts '04, chairman of the Queen board of trustees, and Capt. E. J. T. Philops, who recently resigned from the Brish foreign service. Speakers at the serves included Principal Wallace, Dr. A. libert Douglas, and Dr. E. J. Pratt, hea of the English department of Victoria Gllege, University of Toronto. Rev. Dr. J. B. Clarke was the preacher at the annul church service held in Chalmers Unite Church. A music recital was provide at Sydenham Street United Church with Dr. F. L. Harrison, resident musician, andMr. Kenneth Meek at the organ.

As usual, a vide variety of social activities was arraged and included dances, boat trips, sing-ings, picnics, and several athletic tournamets.

Will Repisent Queen's

PRINCIPAL WALLACE will represent Queen's to the Bicentennial Week Celebration of the University of Pennsylvania, which vill be held from September 16 to 21. Tresident Franklin D. Roosevelt, who was given an honorary degree at Queen's in 1938, will be the guest of honour on Sotember 20.

To Head Committee

MR. ROSS M. WITTER, director of the department f University extension, has been apported chairman of the Royal Canadian & Force training committee in connection with the educational programme of the Canadian Legion War Services.

FALL CONVOCATION TO BE HELD AS USUAL

FALL CONVOCATION will be held on the morning of October 26, a scheduled. Features of the programme include the installation of Hon. Charls Avery Dunning as chancellor and the pe-

sentation of honorary degrees.

There is a chance that the University reception planned for the evening of October 25 will still take place. A pln is now under consideration to hold this vent in honour of the new chancellor. I this is done, the annual meeting of the General Alumni Association could be seld in conjunction, and the Reunion Address could be delivered. Col. E. A Baker, Sc. '14, consented last spring togive the Address, choosing as his subjet, "Our Horizons."

J. W. Gibson, Arts '08, T Adapt Correspondence Courses for Army

W. GIBSON, Arts '08, President of the Victoria branch of the General Alumni Association and diector of correspondence instruction for the British Columbia department of ducation, has been lent to the Canadia Legion War Services for a few monts to adapt correspondence courses to army requirements. It is expected at upwards of a dozen courses, selected by the men themselves, will be availale. These will include arithmetic, aumotive and diesel engineering, electricy, radio, business management, and ouer subjects. All are expected to have imediate value in improving military fficiency and to be of importance in airing the educational standing of the me enrolled.

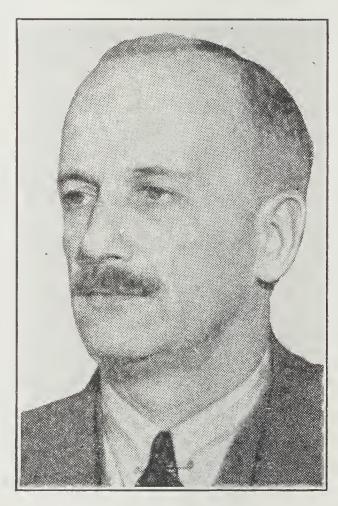

Women Students At Summer School Take Special Hone-Nursing Course

A T the 1940 session of Summer School more han one hundred women students took he special home-nursing course outlined in the syllabus of the

St. John Ambulance Association. Members of the Faculty of Medicine and Miss Louise D. Acton of the Kingston General Hospital volunteered their services as instructors, and facilities were made available at the Hospital for the necessary practical work.

SUMMER STUDENTS TAKE MILITARY TRAINING

PART of the work required for a commission in the army was offered to Summer School students by the Queen's University Contingent, Canadian Officers'

LIEUT.-COL. D. M. JEMMETT

Training Corps, and more than 150 took advantage of the opportunity.

A very high percentage of the students passed the medical examination, only two being turned down. Lectures and drill parades were arranged in such a way as not to interfere with regular classroom work.

Approximately one-third of the full course required for qualification for a commission was given in Summer School, and candidates will have to write the first paper (common to arms) in December, and will then complete the drills and lectures with local units in their home towns before writing the second examination.

They will also have to pass a practical examination before being fully qualified.

Major G. S. Melvin, second in command, is in charge of the Contingent in the absence of Lieut.-Col. R. O. Earl, O.C., who was in Toronto in his capacity of examiner-in-chief for the Department of Education. Lieut.-Col. D. M. Jemmett, D.C.M., acted as chief instructional officer.

ALUMNI ARE URGED TO FILL IN RECORD FORMS

WITHIN the next few weeks the alumni-employment record forms will be mailed to all graduates and former

students of Queen's.

The alumni are urged to fill in these forms in as much detail as possible and to return them promptly, and to keep their records at the Employment office up to date at all times. The office should be notified immediately of any change in positions or of the outcome of efforts made on behalf of the graduates. Only by constant and complete co-operation can the Employment Service render efficient assistance to employers and alumni; at a time of national emergency this is vitally important.

During the past few months the Employment Service has been extremely busy. The demand for technically trained men is the greatest in the history of the bureau. This is particularly true for electrical, mechanical, and chemical engi-

neers and chemists.

The facilities of the Service are free to graduate, student, and employer.

PRINCIPAL WALLACE TO HEAD ROYAL SOCIETY

A T the closing session of the annual convention of the Royal Society of Canada in May, Principal Wallace was chosen as president for the ensuing year. The Principal succeeds H. M. Tory, LL.D. '38, Ottawa.

Accepting the office, Principal Wallace said that the present, when Britain is fighting for her very existence, is a good time to test the worth of the Society to Canada and the British Empire.

Two other members of the Queen's staff were also honoured, with Mr. J. K. Robertson, the Robert Waddell professor of experimental physics, being elected secretary of Section Three (chemical, mathematical, and physical sciences), and with Dr. G. B. Reed, professor of bacteriology, being chosen secretary of Section Five (biological sciences). Dr. M. Y. Williams, Sc. '09, Vancouver, was elected vice-president of Section Four (geological sciences).

Next year the annual meeting of the Society will be held at Queen's.

UNIVERSITY IS PRAISED IN NEWSPAPER EDITORIAL

THE following appeared as an editorial in the St. Thomas *Times-Journal* of May 22, under the heading "Fine City and University":

"The announcement of the appointment of Hon. Charles A. Dunning, former Dominion minister of finance, to the chancellorship of Queen's University, in Kingston, has served to focus public attention again on this famous institution of learning. Nearly every adult Canadian is familiar with the notable scholastic achievements of Queen's, with the names of many of the great men who have been connected with it, and with the signal contribution it has made to the progress of the nation through its distinguished graduates.

"But what many Canadians, except those who have had the good fortune to visit the historic Limestone City, do not know is that the physical setting of the University is one of striking beauty. A great pile of stately buildings in extensive, well-kept grounds presents as pleasing a sight as one could vision. Recently, representative of the Times-Journal, who had been denied the pleasure of seeing the many attractions of Kingston, had the privilege of visiting the city and found much to admire and much to enthuse over. He found Queen's as beautiful as its most enthusiastic admirer had pictured it. He found, too, much to delight the eye in the city itself, with its striking combination of historical quaintness and of visible evidences of a progressive people, who, although proud of the city's past, do not live in the past, but build enduringly for the future. While Queen's is beautiful in itself, its beauty is enhanced by the environment which the city provides with its grand parks and its noble buildings, included in which are the Court House and City Hall, both of which would be a credit to any city."

FIREPROOFING COMPLETED IN OLD ARTS BUILDING

FIREPROOFING of the west end of the Old Arts Building and alterations to Muir House, new women's residence on University Avenue, were the only large items on this summer's building and renovation programme at Queen's.

The east wing of the Old Arts building was fireproofed some years ago, but the west end, formerly the library, was left in its original state. Instead of two floors and two galleries as before, it now consists of four full floors, completely modernized. The new wing will include accommodation for the biology museum which is being reorganized under a grant from the Carnegie Corporation.

The recently acquired property at 138 University Avenue was renovated and altered to house twenty-one women students. The large dwelling will be named in honour of the late Miss Jessie Muir, Arts '07, noted Ottawa teacher, and will provide much-needed accommodation.

Many routine tasks were completed during the summer, including a new asphalt roof over the swimming pool in the gymnasium, and quarters in the Craine Building for Dr. E. M. Robertson, professor of obstetrics and gynaecology.

Combination of English and Latin Offered For Specialist Standing

A COMBINATION of English and Latin for specialist standing is being offered at Queen's this year for the first time. Previously, students have been offered combination courses in English and French, English and history, and Latin and French.

Students completing the four-year course will be admitted to the qualifying

examination for the specialist course in English and Latin which will be offered by the College of Education in 1944-45.

DR. E. F. BEACH TO DIRECT McGILL COMMERCE SCHOOL

DR. E. F. BEACH, Arts '34, has been appointed acting director of the School of Commerce at McGill University. At present assistant professor of statistics and economics at City College, New York, he will assume his new duties September 1.

Dr. Beach had a brilliant scholastic record while at Queen's, and in his final

DR. E. F. BEACH

year he won the Prince of Wales' prize, awarded to the student with the highest standing in the Faculty of Arts. He also won an Arts research scholarship, under the terms of which he went to Harvard University for graduate study.

Harvard awarded him a Master of Arts degree in 1936 and a Doctor of Philosophy degree in 1938, and appointed him instructor in economics while he was still pursuing graduate studies. In 1936 he joined the faculty of the College of the City of New York.

Hon. C. A. Dunning, Chancellor, Pays Informal Visit To Queen's

HON. C. A. DUNNING, chancellor of Queen's, paid an informal visit to the University on July 25 and 26. He met a number of University officials, members of staff, and such trustees as happened to be in the city at the time. Principal Wallace entertained Mr. Dunning at lunch, at which the Kingston trustees, the vice-principal, and the deans of the faculties were also present.

Appointed To Board

G. C. BATEMAN, Sc. '05, secretary-treasurer of the Ontario Mining Association, has been appointed to the Wartime Industries Control Board es-

tablished as a further step in the mobilization of Canadian industry for war purposes. Mr. Bateman will be in charge of metals production.

ENGINEERING "PROCEEDINGS" TO APPEAR IN SEPTEMBER

THE 1940 edition of the *Proceedings* of the Engineering Society of Queen's University, Volume Number 29, will be off the press next month.

Publication costs are met by contributions from Science alumni, receipts from advertising, and an annual fee of fifty cents collected from each undergraduate in engineering. However, alumni are urged to send in the information forms with the data about their positions and about their present and permanent addresses, regardless of whether they desire to contribute financially. Additional forms may be secured on request.

Any information about Science alumni who are serving with the forces, either overseas or in Canada, will be greatly appreciated. All communications should be addressed to the Editor, *Engineering Proceedings*, Queen's University.

Lieut. Jack Irving Seriously Injured While Serving With Medical Corps

WHILE serving with the Canadian Army Medical Corps in England, Lieut. Jack Irving, Med. '39, was seriously injured in an accident, according to a cable sent to the Department of National Defence. No details were given.

Dr. Irving had a brilliant scholastic and athletic record at Queen's. He held the Intercollegiate lightweight boxing title in 1935 and 1936.

Met At Queen's

NINETEEN delegates from contingents all over Canada attended the Canadian Officers Training Corps conference held at Queen's on August 1. Discussions and decisions were private, reports being sent to National Defence headquarters, Ottawa, at the conclusion of the conference. Lieut.-Col. R. O. Earl, of Queen's, acted as convener.

ARMY LIST

CONTINUED below is the monthly list of those who have joined some branch of the fighting service. Readers are requested to send in news of alumni who are serving with the forces, either overseas or in Canada. If possible, such details as rank and unit should be given.

Royal Canadian Naval Volunteer Reserve—Lieut. F. J. Flynn, Arts '36, D. J. Monteith, Arts '39, Temporary Acting Lieutenant E. T. Sherwood, Arts '36.

Royal Canadian Artillery — Lieut. G. M. Henderson, Arts '42; Captain W. D. Kirk, Sc. '28, Survey Battery, 1st Survey Regiment; Lieut. J. R. Matheson, Arts '40, Lieut. J. H. Mitchell, Arts '43, Lieut. Alex. Perley-Robertson, Arts '42, Lieut. N. J. Robinson, Arts '37, Lieut. W. R. Goodwin, Arts '40, Lieut. R. T. Mac-Alpine, Sc. '40, 1st Survey Regiment, Lieut. Gilbert Howitt, Com. '41.

Royal Canadian Engineers—Lieut. A. D. Carmichael, Sc. '39, Capt. A. B. Dove, Sc. '32.

Royal Canadian Army Medical Corps—Lieut D. W. Clare, Med. '40, Major J. V. Williams, Med. '15.

Infantry and Rifles—Lieut. I. C. Campbell, Arts '40, Hastings and Prince Edward Regiment; Major S. C. Clegg, Arts '29, No. 1 Infantry Training Centre; Lieut. G. W. Dennis, Arts '39, Lieut. D. L. Simpson, Arts '43, Lieut. R. A. Smith, Arts '41. D. F. MacRae, Arts '29, Brigade Staff Officer (Intelligence), 4th Canadian Infantry Brigade, Lieut. A. E. Wood, Arts '38, Governor-General's Foot Guards.

Royal Canadian Air Force — Flight Lieutenant R. C. C. Brown, Sc. '33, Flying Officer M. J. Fitzpatrick, Arts '39, Flying Officer G. H. McMahon, Sc. '36, A. H. Laidlaw, Arts '39, Flying Officer J. W. Skidmore, Arts '42, George Lemon, Arts '40, Aircraftsman, John D. Murray, Sc. '25, educational officer, Montreal Wireless School, Provisional Pilot Officer A. W. C. Tustin, Arts '38.

Royal Canadian Ordnance Corps—Lieut. R. G. Struthers, Sc. '40, Lieut. J. J. R. Cannon, Arts '36.

Queen's University Contingent, C. O. T. C.—Major A. E. Prince, staff.

Lieut. A. O. Barrie, Sc. '34, is serving in the Light Battery of the Gold Coast Regiment, Royal West African Frontier Force.

Chancellor Heads Firm

HON. C. A. DUNNING, chancellor of Queen's, has been appointed chairman of Allied Supplies Limited, a company concerned with the administration of the munitions and explosives programme on behalf of the British government and joint British-Canadian developments.

ATHLETICS

Intercollegiate Sports Programme Abandoned For Duration of War

AS a result of a decision reached by Canadian university heads and the Department of Defence, there will be no Intercollegiate sports for the duration of the war.

The news came as part of an announcement that all male students in Canadian universities would receive compulsory military training. Intercollegiate sports were abandoned to give undergraduates more time to devote to training.

Generally speaking, the decision means that Canada's campus playing fields will become drill grounds except for intramural sports which will continue as part of physical training. At Queen's, more and more emphasis has been placed on the intramural programme of sports during the past few years so that the change will be less marked than it would have been otherwise.

Details of the cancellation of the Intercollegiate sports will not be made known until the plan for compulsory training has been worked out. It is understood, however, that the ban applied to all sports events.

Percy Page, Arts '13, Announces Retirement of Edmonton Grads

PERCY PAGE, Arts '13, coach of the Edmonton Commercial Grads, who dominated women's basketball for twenty-five years, has announced the retirement of his world-famous team. This decision

was reached after the public lost interest in the perennial champions.

During the quarter of a century they ruled women's basketball, the Grads played 548 games, winning 526 of them. They travelled more than 100,000 miles, attended four Olympic games, where they won every time, and met fifty-seven of the top-ranking teams from the United States. The Grads scored 20,051 points against their opponents, while only 8,924 were scored against them. Their record is without parallel in the history of the realm of sport.

Former Stars of Tricolor Teams Have Joined Fighting Service

A MONG the Queen's alumni who have joined some branch of the fighting service are the following athletes: Squadron Leader D. A. Harding, Arts '25, Pilot Officer C. M. Krug, Arts '39, Dr. K. H. Running, Med. '36, Flying Officer G. H. McMahon, Sc. '36, Lieut. George Sprague, Arts '38, Lieut. G. W. Dennis, Arts '39, Lieut. Jerry Conlin, Sc. '40, Capt. G. B. Macpherson, Med. '30, Arts '31, Lieut. W. J. Ewen, Med. '38, Lieut. J. A. Irving, Med. '38, Lieut. J. H. Hamlin, Med. '35, Surgeon-Lieut. M. G. Peever, Med. '35, Capt. P. A. McLeod, Arts '21, Med. '26, Lieut. A. D. Carmichael, Sc. '39, Bernie Thornton, Sc. '40.

Ex-football-coach Ted Reeve, who led Queen's to three Intercollegiate champion-ships during his six-year regime, is now in charge of athletics for a Toronto Highland regiment.

AT THE BRANCHES

Porcupine

THE alumni in the Porcupine area turned out en masse to greet their old friends from the Queen's teaching staff—Profs. S. N. Graham, D. S. Ellis, and T. V. Lord—who paid a brief visit to that district. On July 12 a dinner was held in the spacious community hall of the McIntyre Mine at Schumacher, with about seventy-five in attendance. Most of those present were engineering alumni, although there was a sprinkling of representatives from the other faculties, including Dr. B. H. Harper, Med. '22, Rev. J. A. Lyttle, Arts '17, and A. N. MacIntosh, Arts '21.

At the head table were C. S. Gibson, Sc. '22, president of the Porcupine branch; D. E. Keeley, Sc. '10, honorary chairman; E. L. Longmore, Sc. '12, E. C. Keeley, Sc. '16, J. W. Dougherty, Sc. '21, J. M. Douglas, Sc. '24, and the guests of honour.

After an excellent dinner, the roll call was made by each man rising and giving the name and faculty and year of his neighbour. This served to refresh dulled memories and to introduce those who had not previously known one another as fellow alumni.

Brief talks were given by the visiting staff members who, handicapped by the lack of the customary blackboards, notes, and slide-rules, nevertheless managed to hold their audience. News of Queen's proved to be highly popular.

At the request of the chairman, the question of having a Reunion this fall was considered. Influenced by the fact that there will be no Intercollegiate sports programme this year, the meeting voted unanimously in favour of abandoning the project. At the same time it was regretted that such action was necessary

Breaking up into small groups, the alumni spent the rest of the evening in visiting together and talking over old times. For the three professors it was a

golden opportunity to renew friendships that distance and the passage of time had affected.

Sarnia

MR. R. M. WINTER, director of the department of university extension at Queen's, was guest speaker at a meeting of the Sarnia branch, May 15, in the Embassy restaurant. Alumni who attended received a first-hand and up-to-date review of current activities at Queen's from Mr. Winter, who also gave a short summary of world affairs, much appreciated by his audience. Rev. Dr. J. M. Macgillivray, Arts '10, was in the chair in the absence of the president, Dr. C. M. Carruthers, Med. '21. So popular was the Queen's film, "Paths of Learning," that it was run through several times.

Kitchener-Waterloo

DR. J. W. FRASER, Med. '14, Arts '22, was elected president of the Kitchener-Waterloo branch at its annual meeting in the Oak Room of the Walper House, Kitchener, on May 13. The dinner was attended by about forty alumni and guests and was addressed by Mr. Ross M. Winter, director of the department of university extension at Queen's.

Other officers elected were: honorary presidents, Col. W. M. O. Lochead, Arts '96, and H. W. Brown, Arts '12; executive committee—Dr. A. E. Broome, Med. '17, J. M. Barry, Sc. '36, J. P. Devenny, Sc. '22, Mrs. J. R. Dier (Helen Baxter), Arts '17, D. J. Emrey, Sc. '22, D. A. Macdonald, Sc. '36, E. O. D. Nettleton, Arts '30, Mrs. C. S. Wilson (Angeline Benson), Arts '29, and K. S. Rabb, Arts '20. From this committee other officers will be chosen.

"Fundamentals Underlying the War" was the subject of Mr. Winter's address. After prefacing his remarks with a description of the effects of the war upon

the University, Mr. Winter gave a history of the German people since 1918. He pointed out that they were ready to follow any party holding out promises of improved conditions. When the Nazi regime attained power, force was used to crush out all opposition. Mr. Winter stressed the Nazi policy of force and said he believed the German people prefer regimentation to freedom.

The tables were attractively decorated with the Tricolour. Mr. Brown, the retiring president, was in the chair. Violin and piano music for the dinner was played by Mr. and Mrs. V. F. Peterson,

and was much enjoyed.

Peterborough

CARICATURES from Pinnochio looked down, gnome-wise, on the annual spring supper party held by Queen's people of the Peterborough district on May 11 in the new recreation room of the Y.W.C.A.. Small tables decorated with coloured pussy willows added to the friendly informality of the occasion.

President Leo Copp, Arts '25, in his words of welcome called upon Dr. J. A. Bannister, Arts '98, for a toast to the King, and upon the guests for the singing of *Rule Britannia*. Mr. Arnold Haftall acompanied at the piano. Mr. Copp explained the situation at Queen's and told of the plans made by the committee on finances. He asked the alumni to read the statement prepared by the committee and sent to members by the Peterborough executive.

After supper and a spirited sing-song, R. F. Downey, Arts '07, took the floor as master of ceremonies. An old-fashioned spelling match and a hoop-race were typical of the group stunts prepared for this part of the programme by such merriment-makers as Miss Alexandria Howson, Arts '09, Mrs. H. R. H. Kenner (Mary Williams), Arts '04, V. R. Henry, Arts '13, Mr. Copp and R. G. Corneil, Sc. '23. Prizes and forfeits were paid by laughing guests who came provided with five pennies each for the purpose.

Afterwards, the Summer School group under the leadership of President Percy Windrim took charge of dancing which was enjoyed for the remainder of the evening. The spirit of good fun was everywhere evident, even though such valiants as Dr. H. G. Carleton, Arts '23, Med. '26, and other alumni of the 'twenties suddenly became contented onlookers only, as the mazes of square dancing proved too trying and drove them to cover.

Altogether the party was a tribute to the efforts of every member of the alumni and Summer School executives. Of these, not mentioned above, were A. B. Gates, Sc. '11, prevented from attending by last-minute business, and the decoration committee composed of Miss Connie Wagar, Mr. John Londerville, and Jack Mark, Arts '37.

The new slate of officers brought in by Mrs. Kenner for the alumni executive was accepted as follows: honorary president, Mr. Copp; president, Miss Howson; vice-presidents, Dr. Bannister, Dr. C. M. Scott, Arts '12, Med. '14, Miss Verna Burgess, Arts '38; secretary, Mrs. R. G. Corneil (Mildred Tape), Arts '27; treasurer, V. R. Henry, Arts '12; assistant secretary, to be appointed by the Q. S. S. A.; chaplain, Rev. V. E. R. Zufelt, Arts '30, Theol. '31; executive committee, Miss Amelia Thompson, Arts '22, E. H. Greig, Arts '15, Campbellford, J. F. Harvey, Arts '02, Lakefield, Dr. Carleton, Norwood, A. B. Gates, Sc. '11, and Mr. Mark.—M.C.

Edmonton

A DELIGHTFUL gathering took place on June 11 when members of the executive and others held a dinner at the Macdonald Hotel in honour of Mr. Ross M. Winter, director of University extension. The president, Rev. D. C. Ramsay, Arts '06, was in the chair.

Among those present were A. H. Gibson, Arts '07, J. W. Campbell, Arts '13, Mrs. Campbell (Ruby Kilgour), Arts '15, Hugh Gourlay, Arts '27, and Mrs. Gourlay (Edith Forester), Arts '12, Rev. J. Gordon Brown, Arts '33, Theol. '36, Dr. J. F. Brander, Med. '06, A. W. Haddow, Sc. '07.

The alumni were greatly interested in news of Queen's, and Mr. Winter was able to give them many details of the University in recent years.

Vancouver

A MOST enjoyable gathering was held at the home of Judge A. M. Harper, Arts '00, and Mrs. Harper, on the evening of June 6, with Mr. Ross M.

ROSS M. WINTER

Winter, director of the department of University extension at Queen's, as guest of honour.

The hostess was assisted in receiving by Mrs. S. J. Schofield (Florence Tait), Arts '13. At supper the following poured tea: Mrs. W. H. MacInnes, Mrs. R. B. Crummy (Ruth Harrop), Arts '18, Mrs. M. Y. Williams (Lulu Philp), Arts '09, and Mrs. E. C. McLeod (Ella Percival), Arts '18. The Queen's colours were attractively arranged in yellow iris, red sweet peas, and blue cornflowers, in the table centrepiece.

An outline of the University's contribution to the Canadian war effort was given by Mr. Winter. Not only are many of the graduates enlisting, but extensive

research valuable to the government is being carried on. Educational facilities for the troops are also being arranged under the auspices of the University.

Aldermac

N July 16, alumni in the Aldermac Mine area gathered at the camp to welcome Profs. S. N. Graham, D. S. Ellis, and T. V. Lord. Among those present were A. V. Corlett, Sc. '22, and Mrs. Corlett, G. D. McLeod, Sc. '20, and Mrs. McLeod (Muriel Waterhouse), Arts '19, H. H. Lockwood, Sc. '39, Eddie Dubac, Sc. '41, and D. H. McGuire, Sc. '40, of Aldermac; A. D. Carmichael, Sc. '12, and Mrs. Carmichael, and H. L. Ames, Sc. '30, and Mrs. Ames (Muriel Pierce), Arts '31, of Noranda.

After a delicious dinner at the camp, the meeting adjourned to the Corlett home, where a most enjoyable evening was spent. A feature of the programme was the showing of moving pictures taken by Mr. Ames on his recent trip to Finland. The excellent pictures stimulated interesting discussion. It was on a most happy note that the party finally broke up around midnight.

Regina

A N informal luncheon was held at the Drake Hotel on May 30 in honour of Mr. Ross M. Winter, director of the department of University extension at Queen's. The president, L. A. Thornton, Arts '01, Sc. '06, acted as chairman.

A brief outline of the financial position of the University was given by Mr. Winter, who dealt particularly with the special problems that had arisen as a result of the war. It was explained that one solution was for each alumnus to make an annual contribution. Some progress had already been made in getting this plan under way.

Among those present were J. W. D. Farrell, Arts '12, Sc. '15, Dr. J. H. Mc-Kechnie, Arts '01, D. A. R. McCannel, Sc. '14, C. D. Campbell, Arts '96, J. P. Molter, Com. '28, J. F. Galloway, Arts '30, Dr. G. B. Stillwell, Arts '07, and W. F. Marshall, Arts '98.

Winnipeg

A DELIGHTFUL luncheon meeting was held at Moore's Restaurant dining room on June 28 in honour of Dr. A. Vibert Douglas, dean of women at Queen's, with approximately thirty in attendance. Dr. Douglas gave a very interesting address which was greatly appreciated. The speaker was introduced by D. H. Laird, Arts '98. Rev. P. T. Pilkey, Arts '10, acted as chairman for the occasion.

* * * *

The next meeting is planned for September, with Mr. André Biéler, resident artist at Queen's, as guest of honour. Mr. Biéler, who is teaching at the Banff Summer School of Art, will be passing through Winnipeg between September 17 and 21.

It is hoped to arrange an exhibition of Mr. Biéler's paintings, perhaps at the Winnipeg Art Gallery, and to have him meet the graduates and others interested in his art exhibit. The programme will likely start with a dinner, followed by an address by Mr. Biéler and a social hour.

Hamilton

THE annual picnic was held on June 22 at the summer residence of Dr. R. M. Stringer, Med. '29, on Lake Ontario. With approximately twenty-five families in attendance, the affair was adjudged to be highly successful. The committee in charge of arrangements was composed of J. L. Milton, Sc. '37, Dr. Stringer, and C. H. Drew, Com. '25.

* * * *

The next event on the social programme is an outdoor stag party. This is a new endeavour for the Hamilton branch and is expected to appeal particularly to the younger graduates.

* * * *

The executive for 1940-41 is as follows: past president, Dr. H. T. Ewart, Arts '26, Med. '35; president, Dr. L. T. Williamson, Med. '27; first vice-president, J. C. Cooper, Arts '30; second vice-president, Mrs. K. H. Trebilcock (Nor-

een Hubbs), Arts '30; treasurer, Dr. R. M. Stringer, Med. '29; secretary, W. M. Warnick, Sc. '35; executive committee—Mrs. H. S. Winfield (Arleigh McKone), Arts '34, Miss Margaret Newton, Arts '36, Mrs. W. G. Cornett (Jessie Ewart), Arts '21, G. S. Otto, Arts '10, K. F. Ettinger, Arts '13, Dr. H. L. Thoman, Med. '39, G. T. Wright, Sc. '39, C. H. Drew, Com. '25, F. H. Sherman, Sc. '39, H. A. Kerr, Sc. '39, J. L. Milton, Sc. '37, Dr. J. S. Goodbrand, Med. '37, J. J. Wood, Arts '24.

Lanark County

A T the annual meeting held at Carleton Place on June 21, A. D. Lamont, Arts '15, Carleton Place, was elected president for the ensuing year. The retiring president, E. A. Fleming, Arts '25, was in the chair.

Other officers elected were as follows: honorary presidents, Dr. Margaret O'Hara, Med. '91, LL.D. '32, Smiths Falls, T. C. Smith, Arts '05, Perth, and J. C. Spence, Arts '02, Paed. '09, Carleton Place; vice-presidents, Rev. R. A. Cameron, Arts '31, Theol. '34, Watson's Corners, W. F. Thom, Arts '36, Almonte, and Harry Ricker, Arts '25, Smiths Falls; secretary-treasurer, Miss Hilda Cram, Arts '34, Carleton Place; councillor for Perth area, Miss Jean Cameron, Arts '34. Dr. W. G. Blair, Med. '16, Perth, was appointed branch liaison officer with the Queen's Athletic Board of Control.

The meeting passed a motion of appreciation to Rev. Dr. D. N. Morden, Theol. '07, D.D. '34, and expressed regret that he was leaving the county. Dr. Morden was largely responsible for the organization of the branch and was its first president. Rev. A. D. Cornett, Arts '07, Theol. '11, another former president, who is leaving for his new field in Oshawa, also received best wishes.

An account of the work of the General Alumni Association was given by Mr. Fleming. In connection with the renovation of Grant Hall, it was pointed out that the Association had paid in more than \$15,000 during the past few years.

Toronto

THE annual golf tournament was held June 3 on the beautiful grounds of the Mississauga Golf and Country Club, Port Credit. Perfect weather greeted the guests, and a most enjoyable afternoon was spent on the fairways. A sumptuous dinner was served at 8 o'clock at which the number present was augmented by the business men who had not been able to get away during the day.

After dinner a dazzling floor show was put on by Evelyn Lackie and her "Lackettes," which was greatly enjoyed. College songs were heartily rendered by the "boys," and a few appropriate remarks were made by the president, H. E. Armstrong, Arts '22, Com. '24. The remainder of the evening was spent in renewing acquaintances and in reminiscing.

The committee in charge was composed of Dr. W. R. Patterson, Arts '02, Med. '06, chairman; Dr. G. N. D. Furse, Sc. '24, V. S. Murray, Sc. '28, B. D. Poyser, Sc. '22, Mace Mair, Arts '24, R. C. Mc-Neil, Com. '31, and J. A. Bell, Sc. '24.

Victoria

A PPROXIMATELY twenty attended the dinner held for Mr. Ross M. Winter, director of University extension, on June 5. H. S. Pringle, Arts '99, presided. Mr. Winter spoke briefly regarding Queen's and also answered many questions about the University. An honoured guest at the meeting was Archibald Ferguson, Arts '83, who ranks near the top in the seniority list of Queen's graduates.

FROM THE "PRINCIPAL'S REPORT"

C INCE the last report was submitted, the university has suffered a sad loss in the death of our beloved chancellor, Mr. James A. Richardson, who passed away suddenly on the morning of June 26, 1939. Among all his public obligations he placed his responsibility to his university first. He was quick to praise, slow to blame; and one never failed to find in him a discriminating judgment based on solid knowledge and keen intuition. To the position of chancellor he brought a prestige and a reputation for integrity which were a source of satisfaction to all Queen's people. He elevated his office, and, in so doing, he elevated his Alma Mater in the councils of the universities. His openhanded benefactions were given with a generosity of spirit that enriched both the giver and the recipient. A great and good friend has gone from among us.

* * * *

The Senate has appointed a representative committee, on which sit as well students selected by the Alma Mater Society executive, to examine carefully the work of the first term, the activities that absorb student time and interest, the special problems of the freshmen, and such

constructive action as may be advisable to make the first months of the university year as effective as the later months of the term now are. The committee will report in time to give effect to its proposals for the coming university year. If they commend themselves to the good judgment of the university community—staff and students alike—as in the best interests of the university life, they will prove to be of real value in Queen's University.

Members of the staff have kept in close touch with the National Research Council, in order that any services in which the laboratories at Queen's might be of assistance, whether in research problems related to the war or in the training of men for scientific and technical positions in war work, might be made fully available. Special war research is being carried on, and as the problems become clearer, more research men will be called on to give their service in this way. A very complete inventory has been made of the special qualifications and abilities of members of the staff, and of the equipment of laboratories for war needs. There has been the wish, in which all have shared, to place abilities and equipment fully at the disposal of the Government.

* * * *

The educational programme for the troops has been worked out under the auspices of the Canadian Legion and the Canadian Association for Adult Education. In Military District No. 3, extending from Lindsay to Petawawa, Mr. Ross Winter, director of extension services at Queen's University, is in charge of the programme. Members of Queen's staff have given generously of their time to conducting classes in conversational French and German, mathematics, machine design, shopwork, and electrical engineering. Special arrangements have been made with the department of education of the Province of Ontario by which men in Military District No. 3, who are recommended by Queen's University for junior matriculation standing, should be granted that standing. The tuition is carried on by qualified high-school teachers in the respective cities, or through correspondence courses under the extramural department of Queen's University. Under this system it is hoped that men not only qualify, as far as academic standing is concerned, for promotion in the Services, but may as well continue their studies in England and after demobilization.

* * * *

The value of Latin as a background for linguistic studies, including English, needs no argument. The importance of mathematics in the whole realm of science, including phases of human science, is fully accepted today. Both are disciplinary subjects, demanding clear thinking and precise articulation. For many students —probably the majority—both subjects together form a good educational background for cultural and professional life. There are other students, however, to whom one or other subject makes little appeal. They may be very able in language, and completely unable to appreciate the method of mathematical analysis. They may, on the other hand, have high mathematical ability, and an inability to obtain an education through the medium of Latin. It would seem to be wise procedure, in such cases, to give freedom to

follow the path of the natural aptitudes. There seems to be no valid reason that a student with linguistic ability should not come to the university equipped in four languages, as well as English; and that a student with mathematical and scientific aptitudes should not be well and widely equipped in these fields, on entering university. This is the way by which the process of education takes place in actual life. We educate ourselves through the subjects in which we have a natural ability and natural interest. These interests widen and deepen; and intellectual and human contacts grow in the process. We are on the way to a liberal education.

The time is critical and the universities of Ontario are giving much thought to the issue. If we maintain an exclusive and academic attitude, men and women of ability may go elsewhere for the education which they feel that they need for the demands of modern life. But, above everything else, it is men and women of ability that universities need. It may prove to be a heavy responsibility to maintain the position that such ability can only prove itself through a single means of culture.

* * * *

. . . . In the final analysis the alumni have the security of the university in their hands. If we, who have had the opportunity that a university affords in mental discipline and spiritual enrichment, show not only in our professional life but in our responsibilities as citizens that the university is an enriching influence which moulds and directs the minds and spirits of men, then the position of the university is secure. After all, the university is no more than it has made us to be. The nine thousand alumni of Queen's can place their Alma Mater in an unassailable position of security by their contribution to the life of their community and to the welfare of their country. From what I know of them, they will not fail. If every graduate of Queen's University enrols himself as a regular contributor, year by year, to the Queen's fund, no matter how small an individual contribution may be, we will be in a positon to look forward, at the end of the first

hundred years, to a future of expanding service to Canada and Canadian life. For it is not only the financial assistance that will count, important though that is. It will be the intimate relationship between alumnus and Alma Mater that grows up with the habit of annual contribution, which will count even more than the material assistance. That is the goal we want to reach by October 16, 1941. Is it too much to expect that the loyalty of Queen's people will prove equal to the challenge?

* * * *

At the beginning of the year the Board of Library Curators resolved to obtain such British parliamentary papers as would fill almost the whole of the gaps in the library's set. The total order, amounting to many hundred documents, was shipped from England in January last by the S.S. Beaverburn, which was sunk by the enemy. So far the library's loss is almost limited to this, which is, however, a loss sufficiently grievous. Steps are being taken to claim for the loss, but it is probable that we shall not now be able to obtain the documents required until after the war.

* * * *

So far, the war has had but little effect on the researches in the various departments, but in some of them preliminary work is being done. It is probable, however, that in the near future some of our men will be spending a considerable amount of time on war research. All of us would be glad to contribute, as effectively as possible, to this kind of work. It may be noted that some of our past students are already actively engaged in war problems and more will be later on, as opportunity occurs.

It is of the first importance that our ordinary researches should be prosecuted as vigorously as possible. It would be a grave mistake to allow our work to lapse after such a long period of development. This is true not only because one of the main functions of a university is that of extending the boundaries of our knowledge but, if the war continues for a long time, the help of men trained in research laboratories will be urgently required. Also, if what is just as important, such

men will be invaluable, when the war ends, in solving the problems that will arise owing to the dislocation caused by the war.

* * * *

Increasing attention is now being paid to the provision of courses in the history, theory, and educational practice of music in the public and high schools in Ontario. It is very desirable that careful thought should be given to the part which the universities of the province can and should play in the general plan of musical education. Provision should be made for the adequate training of those who are to become teachers of the subject. The quality of our musical education will depend largely on the quality of the teaching, and a full realization of the value of music in education seems to call for a more liberal course of preparation than that contemplated by the present arrangements.

all freshmen students was carried out at the start of the session. The examinations were much more detailed and extended over a longer period of time. Urinalysis, tuberculin tests, and tests of visual acuity were included in each examination. Every tuberculin positive reactor was X-rayed. Four hundred and ninety-seven freshmen were examined and of these only four were permanently exempted from compulsory physical training. A total of four hundred and thirty-five tuberculin tests were performed, sixty-two

The routine physical examination of

total of four hundred and thirty-five tuberculin tests were performed, sixty-two freshmen having been tested prior to admission to the university, and found normal. One hundred and forty-four positive reactors were found and each of these X-rayed. Two of the cases X-rayed will be observed closely during the course;

the remainder presented normal X-ray

plates.

It is deemed of the greatest importance that the resident artist's opportunity for creative work should be carefully safeguarded in all plans for strengthening the programme in art. In the interest of his university students it is vital that they continue to be introduced to the appreciation as well as the practice of art by a teacher whose approach is constantly

freshened and invigorated by his own creative activity. Fortunately Mr. Biéler's productivity as an artist has been continuous since he came to Queen's and his reputation has grown steadily as one of

Canada's outstanding painters. hibition of his paintings and drawings is being shown this spring in Montreal, Quebec, and Ottawa, and is to go west later in the year.

ALUMNI NEWS

Births

Bates—At the Mount Hamilton Hospital, Hamilton, Ont., on May 24, to J. M. Bates and Mrs. Bates (Marjorie Purtelle), Arts '26, a son (John MacFarlane).

Bews-At the Ottawa Civic Hospital, on July 12, to K. F. Bews, Sc. '34, and Mrs.

Bews, a son.

Biesenthal—On March 10, to C. G. Biesenthal, Sc. '36, and Mrs. Biesenthal, Gati-

neau, Que., a daughter (Donna Jean). Blaine—At the Private Patients' Pavilion, Toronto General Hospital, on July 23, to Squadron Leader D. S. Blaine, Sc. '34, and

Mrs. Blaine, a daughter.

Brown—At the Ottawa Civic Hospital, on July 25, to H. M. Brown, Com. '27, and Mrs.

Brown, a daughter.

Calvin—At the Private Patients' Pavilion, Toronto General Hopsital, on June 16, to A. A. Calvin, Arts '31, and Mrs. Calvin, a son (Edmund Senkler).

Connors—At the Ottawa Civic Hospital, on July 27, to Dr. R. V. Connors, Med. '14,

and Mrs. Connors, a daughter.

Doherty—At the Hotel Dieu Hospital, Kingston, on June 25, to R. A. Doherty, Sc. '33, and Mrs. Doherty (Margaret O'Connor), Arts '31, a daughter (Sheila).

Falkner—At Nicholls Hospital, Peterborough, Ont., on July 4, to Graeme Falkner, Arts '31, and Mrs. Falkner, a son.

Fleming—At the General Hospital, South Porcupine, Ont., on June 21, to M. G. Fleming, Sc. '36, and Mrs. Fleming (Helen Paulsen), Arts '35, a son (Jonathan Greig).

Hartman—At the Kingston General Hospital, on June 8, to R. H. Hartman, Sc. '36,

and Mrs. Hartman, a daughter.

Helmer—At the Red Cross Hospital New Liskeard, Ont., on July 10, to R. E. Helmer,

Arts '32, and Mrs. Helmer, a son.

Herron-On May 31, at Victoria Hospital, London, Ont., to W. M. Herron, Arts '28, and Mrs. Herron (Ruth Redick), Arts '32, a daughter (Mary Janet).

Johnston—At the Private Patients' Pavilion, Toronto General Hospital, on July 19, to C. S. Johnson, Sc. '23, and Mrs. Johns-

ton, a daughter.

Kinkead—At Goderich, Ont., on June 12, to J. H. Kinkead, Arts '32, and Mrs. Kinkead, a son.

Lazier-At the General Hospital, South Porcupine, Ont., on June 18, to T. A. Lazier, Sc. '35, and Mrs. Lazier, a daughter (Mary Catherine).

McCaig—At the General Hospital, Welland, Ont. on July 23, to D. G. McCaig, Com. '33, and Mrs. McCaig, a son (John Doug-

las).

Mackey—At the Ottawa Civic Hospital, on July 31, to William Mackey, Arts '34,

and Mrs. Mackey, a daughter.

Marshall—At the General Hospital, Niagara Falls, Ont., on June 4, to D. W. Marshall, Arts '34, and Mrs. Marshall (Helen Kennedy), Arts '34, a son (William Ross).

Murphy—At the Hotel Dieu Hospital, on June 1, to C. K. Murphy, Arts '31, and Mrs. Murphy (Jane Knowland), Arts '36, a daugh-

Palmer—At the Private Patients' Pavilion, Toronto General Hospital, on June 18, to J. B. Palmer, Arts '34, and Mrs. Palmer, a son (William John Michael).

Purvis-At the Toronto East General Hospital, on June 20, to Dr. W. M. Purvis, Med. '33, and Mrs. Purvis, a daughter (Cath-

erine Marie).

Puttenham — At the Kingston General Hospital, on June 6, to Rev. G. A. Puttenham, Arts '29, Theol. '37, and Mrs. Puttenham, a son.

Ramsay—At the Private Patients' Pavilion, Toronto General Hospital, on July 11, to D. G. Ramsay, Sc. '19, and Mrs. Ramsay,

a son.

Rorke—At Bowmanville Hospital, Bowmanville, Ont., on June 3, to C. J. Rorke, Sc. '34, and Mrs. Rorke (Gwen Wannamaker), Arts '30, a daughter (Beverly Jane).

Ruffman—At the Private Patients' Pavilion, Toronto General Hospital, on July 10, to K. C. Ruffman, Arts '35, and Mrs. Ruffman (Dorothy Stuart), Arts '35, a son.

Strong—At the Private Patients' Pavilion, Toronto General Hospital, on June 28, to A. E. Strong, Arts '30, and Mrs. Strong, a son (William Thomas).

Taylor—At the Ottawa Civic Hospital, on June 3, to R. F. Bruce Taylor, Com. '24, and Mrs. Taylor, a son.

Thoms—At the Kingston General Hospital, on June 11, to Dr. A. E. Thoms, Med. '36, and Mrs. Thoms, Madoc, Ont., a son.

Deaths

Clerihew — One of the first doctors in New York City to perform a blood transfusion, Dr. E. M. Clerihew, Med. '90, died on April 24. Dr. Clerihew possessed a very large practice in New York for many years, but he had been more or less retired since 1920. Born at Aberdeen, Scotland, in 1866, he came to Canada at an early age, and he received his preliminary education in the schools at Brockville, Ontario. He entered Queen's in 1885 and obtained his M.D., C.M. degrees in 1890. After graduation he served as a clinical assistant, O.P.D., of the New York Ruptured and Crippled Hospital for two years. He was also on the staff of the Northwestern Dispensary and connected with the Vanderbilt Clinic and the Skin and Cancer Hospital, all of New York City.

Carrel—One of Canada's most prominent newspapermen died at Quebec City on July 30 in the person of Hon. Frank Carrel, LL.D. '19, aged sixty-nine. Noted for his

HON. FRANK CARREL

efforts to promote Canada's newsprint and maple sugar industries, the pubvigorously lisher champion'ed his causes in public addresses, through the columns of his newspaper, and on the floor of the Quebec Legislative Council. He had been member of the council since 1918. One of Canada's most travelled journalists he went abroad on a number of occasions as a

good-will ambassador for the press of his country. In 1927 he went to Gen'eva as representative of Canada and the Canadian Press at the League of Nations international press conference, and he was one of the Canadian delegates to the Imperial press conferences in London and South Africa five years ago. Mr. Carrel was born at Quebec and received his preliminary education in the schools of that city and at Stanstead Wesleyan College and Quebec Commercial Academy. He joined the staff of the "Daily Telegraph" more than forty years ago, and on the death of his father in 1891 succeeded him as proprietor and editor-in-chief. He later served until 1937 as vice-president and president of the "Quebec Chronicle-Telegraph." He was a director of the Prudential Trust Company of Montreal, the Twin City Rapid Transit Company of Minneapolis, the Canadian Insurance Sales Limited of Toronto, and the Canada Steamship Lines of Montreal. He served as president of the Canadian Daily Newspapers Association in 1926, and as president of the Quebec Literary and Historical Society in 1930-32. He was the author of several books and articles, and compiled and published various guide books. Among the survivors is his wife.

Durham—Operator at the Niagara Falls Hydro sub-station for the past eight years, George Duncan Durham, Sc. '29, died on June 22 as a result of injuries received in an automobile accident about three miles outside of Hamilton, Ontario. He was en route to meet his wife at St. Catharines and failed to make a detour where the road was under construction. The car turned over twice and then plunged down a twenty-foot embankment. Mr. Durham never regained consciousness. He was born at Niagara Falls, Ontario, in 1905, and received his early education there. He entered Queen's in 1925 and graduated as a civil engineer four years later. As a student he was ac-

tive in basketball and football, and in 1929 he coached the Queen's basketball team. He had been called up for service with the Royal Canadian Engineers and expected to leave in a week's time. He is survived by his wife, a daughter, his mother, and two sisters.

Ferguson—Dr. Alexander D. Ferguson, Arts '99, Med. '09, passed away in the Pennsylvania Hospital in Philadelphia on July 3. Dr. Ferguson was born at Williamstown, Ontario, in 1874, and received early education in the schools of that district. In 1895 he enrolled at Queen's and took an Arts course for several years. Later he transferred to Medicine and received his M.D., C.M. degrees in 1909. He went to McGill Medical School for postgraduate study, and served his internship at the Jay Hood Wright, the New York General, and the Lying-in Hospitals, all in New York City. He took up his general practice in Eddyston'e, Pennsylvania, twenty-six years ago. During the World War, Dr. Ferguson was head physician at the Remington Arms in Eddystone. He was highly respected in the community in which he lived. Burial was made at Williamstown.

Finlayson—A life member of the General Alumni Association', Murdoch Donald Finlayson, Sc. '03, died in his sleep on June 13 at St. Ann's, Cape Breton Island. Mr. Finlayson was born at Grand River, Nova Scotia, in 1879, and he received his early education at Pictou Academy. He entered Queen's in 1899 and graduated four years later with his B.Sc. degree in mining. From 1904-10 he served as transitman in charge of party, and resident engineer for the National Transcontinental Railway. He was engineer for the mines and quarries department of the Dominion Iron and Steel Company at Sydney and Newfoundland for the next four years. From 1916-19 he served with the Royal Canadian Engineers, C.E.F., in Canada, England, and France. On his return to Canada he worked as a highway engineer for the Nova Scotia highway board. In 1928 and 1929 he was employed as a resident engineer for the Hudson Bay Railway, and from 1929 until his death he was resident engineer for the Canadian National Railway.

Fitzgerald—Director of the School of Hygiene and Connaught Laboratories, University of Toronto, Dr. John Gerald Fitzgerald, LL.D. '25, died at Toronto June 20 at the age of fifty-eight. For some years a member of the health committee of the League of Nations at Geneva, he was one of its four public health assessors. He was dean of the faculty of medicine in the University of Toronto from 1932 to 1936. In 1934 Dr. Fitzgerald visited Ceylon and India as a member of a Rockefeller Foundation group making a survey of the cause and prevention of hook worm. Some years ago he did research work at the Pasteur Institutes

in Paris and Brussels, and in 1927 was the Canadian representative at an international rabies convention in Paris. At the University of Toronto he created a research field in anti-toxins and hygiene. Dr. Fitzgerald was born at Drayton, Ontario, and he graduated from the University of Toronto in medicine in 1903. He served in the last war with the rank of major, working in a mobile laboratory attached to the British Fifth Army as adviser in pathology. He had been associated with the University of Toronto since 1913. Among the survivors are his wife, one daughter, and one son.

Fotheringham—Major-General John Taylor Fotheringham, C.M.G., M.D., LL.D. '19, one of the fathers of the Canadian Army Medical Corps and noted physician, died at his home in Toronto on May 18. He was in his eightieth year. Dr. Fotheringham was a native of Kirkton, Ontario. He graduated from University College, Toronto, in 1883 with first-class honours in classics, and devoted the next several years to teaching, being at one time classics master at Upper Canada College. In 1891 he graduated from Trinity Medical College with the degree of M.B., winning the silver medal. He enlisted in 1879 with the Queen's Own Rifles. When the Great War began he joined up for active service, with the rank of colonel, serving with the Second Canadian Division. In 1917 he was recalled from France to reorganize army medical services and was made director-general of military medical services for Canada, which office he held until 1920. On his return to Ottawa he was made a majorgeneral. In 1919 Queen's recognized his outstanding services by awarding him an LL.D. Many honours came to Dr. Fotheringham during the long period he served as a member of the medical faculty of Trinity College and later the University of Toronto. He received an honorary LL.D. from his Alma Mater in 1918, and was also created a Knight of Grace, the Order of St. John of Jerusalem. From 1919 to 1922 he was honorary surgeon to the Governor-General. He was also a member of many medical associations, university boards, and hospital bodies.

Gillis — Dr. Angus Bernard Gillis, Med. '88, passed away at Los Angeles, California, on July 18, at the age of eighty-eight. Dr. Gillis entered Queen's in 1883 and obtained his M.D., C.M. degrees five years After graduation he practised medicine with Professor Faulk of New York City. He then went to Oregon where he established a thriving practice at Salem and Portland. During his lifetime he did postgraduate work in Vienna, London, Berlin, and Paris. He was surgeon-general of the Oregon National Guard and also served on the staff of three state Governors. Dr. Gillis was a thirty-second degree Mason, and was on the state board of medical examiners for sixteen years. Upon his retirement a number of years ago he went to California to reside. Among the survivors is his wife.

Lowe—A Christian Science practitioner and teacher whose life was dedicated to the service of others, George R. Lowe, Arts '95, died at his home in Ottawa, Ontario, June 20 at the age of sixty-nine. Born at Redwood, New York, Mr. Lowe came to Cobden, Ontario, at an early age with his After receiving his preliminary education at Cobden, Mr. Lowe entered Queen's in 1888. He was very popular as a student and held many important executive positions, including the editorship of the "Journal." After obtaining his B.A. degree, Mr. Lowe studied in theology and, although he qualified to enter the ministry of the Presbyterian church, he never did so. He moved to Ottawa about 1900, and since that time had been a member of the First Church of Christ, Scientist. Among the survivors are his wife, a daughter, Barbara, Arts '32; a brother, William D. Lowe, Arts '02, and a sister.

McQuarrie—Wife of Rev. W. J. McQuarrie, Arts '05, Rhoda Mills, Arts '98, died at the Keady charge, Grey presbytery, Ontario, on April 21. Born in Kingston in 1875, Mrs. McQuarrie attended the schools of that city and entered Queen's on a scholarship in 1894. After graduating with her B.A. degree in 1898, she taught school at Cataraqui, resigning in 1905 to become the wife of Rev. Mr. McQuarrie, then minister of the Presbyterian Church, Pittsburgh, Kingston presbytery. In 1908, Mr. and Mrs. McQuarrie went to the west, where they served for fourteen years at Yellowgrass, Saskatchewan, Fernie, British Columbia, and Kenora, Ontario. In 1922 Mr. McQuarrie was called to Port Credit, Ontario, and after Church Union in 1925 he and his wife moved to East Toronto, where they served at Birchcliffe and Glenmount churches. In 1935 they were appointed to the Keady charge in the Presbytery of Grey. On April 21 Mr. McQuarrie closed his ministry at Keady, having accepted a call to Martintown, and that night Mrs. McQuarrie suffered a heart attack and passed away. Mrs. McQuarrie always took a particular interest in missions and was a lifelong and enthusiastic member of the Women's Missionary Society.

Polson—One of the founders of the Ontario College of Pharmacy, Toronto, and a member of its council for many years, Neil Currie Polson, Med. '88, passed away in Kingston, Ontario, on July 1, after a long illness. Mr. Polson was born at Moy House, Bowmore, Islay, Scotland, in 1852. At an early age he came to Canada with his parents. He received his preliminary education at Belleville, Ontario, and later became a qualified druggist. In 1877 he established his own drug business in Kingston, and this firm has continued in Montreal as N. C. Polson and Company, Limited, manufacturing and wholesale pharmacists. He entered Queen's in 1885 and studied medicine for three years. Always maintaining a deep interest in the civic and educational welfare of Kingston, he served for many years as member of the board of education and as alderman. In 1893 he was elected mayor by acclamation, and he also served as president of the Kingston Liberal Association. His wife predeceased him in 1923; among the survivors are seven children, including Miss Jessie Polson, Arts '96, Mrs. H. W. Davis (Isabella Polson), Arts '10, Miss Una Polson, Arts '16, Neil C. Polson, Arts '02, Dr. James A. Polson, Arts '07, Med. '10, Major Stuart M. Polson, Arts '05, Med. '10, and two sisters, of whom Mrs. James Rollins (Susan Polson), Arts '96, is one.

Thompson—A bright young life was brought to a close in the sudden death of James Vincent Thompson, Com. '30, at Kirkland Lake, Ontario, during July. Mr. Thompson was born at Stanleyville in 1905, and attended Westport high school. He entered Queen's in 1926. For the past several years he had been a resident of Kirkland Lake. The survivors include three sisters and four brothers.

Tucker—Mrs. Walter Tucker (Mabel Ellen Boyd), Arts '98, was drowned at Kingston, Ontario, on May 19. She was sixty-five years of age. Born at Kingston, she attended the local collegiate and later entered Queen's. After graduating with the degree of B.A. in 1898, she taught at the Ottawa Ladies' College and was principal of that school for many years. When she married she gave up teaching, but continued to reside in Ottawa where her husband was a civil servant until his retirement a short time ago. She is survived by her husband and two sisters, one of whom is Miss Annie A. Boyd, Arts '98, Kingston.

Woodbridge — Frederick James Eugene Woodbridge, LL.D. '19, Johnsonian professor of philosophy at Columbia University, and until 1929 dean of the graduate faculties, died in New York on June 1 at the age of seventy-three. Professor Woodbridge was a native of Windsor, Ontario, and was a graduate of Amherst College, Union Theological Seminary, and the University of Berlin. His first teaching post was at the University of Michigan, where he was appointed professor of philosophy in 1895. In 1902 he joined the staff of Columbia University and two years later was named to the Johnsonian chair. In 1912 he was made dean of the faculties of political science, philosophy, pure science, and fine arts. In 1929 he resigned to devote his time to research and writing. He was one of the founders and the first editor-in-chief of the "American Journal of Philosophy," and he was also editor of "The Archives of Philosophy" and the author of several books. On his seventieth birthday, members of the philosophy departments of Columbia, Amherst and Minnesota presented him with a special copy of his collected essays and addresses, published for the occasion by the Columbia University Press. In a statement issued in

Life begins at SIXTY

1929 by Dr. Nicholas Murray Butler, president of Columbia University, he was termed a "chief guide and counsellor in the development of all the university's policies." Among the survivors are three sons, a daughter, and a sister.

Notes

1890-1899

Rev. Dr. John R. Hall, Arts '97, D.D. '32, has retired from the ministry of St. Paul's United Church, Sarnia, Ont., where he has served for forty-one years. Clergymen and outstanding citizens of the community gathered in honour of the occasion and presented Dr. and Mrs. Hall with a purse. Altogether Dr. Hall has been forty-eight years in the ministry.

Prof. R. A. Low, Sc. '28, of the Civil Engineering department at Queen's, was bereaved in June by the death of his father,

at Ottawa.

Joseph McGrath, Com. '27, Montreal, and Dr. John McGrath, Med. '30, Poughkeepsie, N.Y., were bereaved in June by the death of their brother, Henry Edward McGrath. Kingston.

G. L. McRory, Sc. '23, is with the Anaconda Sales Company, 25 Broadway, New

York City. He lives at 101 Ellwood Ave., Mount Vernon, N.Y.

Herbert Parliament, Sc. '29, formerly of Lacoma Gold Mines, Senneterre, Que., is now with Malartic Gold Fields, Limited, Halet, Que.

Rev. G. A. Puttenham, Arts '29, Theol. '37, was inducted as minister of the United Church in Mallorytown, Ont., early in July.

J. L. Shearer, Sc. '28, is assessor for the

city of Ottawa.

J. E. Thicke, Sc. '28, is now superintendent of the Isle Maligne Power House of the Saguenay Power Company. He lives at 12 Cothran Drive, Isle Maligne, Que.

Dr. W. A. Thompson, Med. '29, is on the staff of Rockland State Hospital, Orange-

burg, N.Y.

W. A. Thorn, Sc. '24 (M.A. Toronto), is superintendent of the British Columbia division of the Meteorological Service of Canada.

Dr. L. E. Watts, Med. '29, is on the staff of Hudson River State Hospital, Poughkeepsie, N.Y.

W. S. Webb, Arts '29, teaches at James Short School, Calgary, Alta.

Rev. G. E. Wood, Arts '22, Theol. '24, has been minister of King Street United Church, London, Ont., for the past five years.

For Prospectus and Informationwrite

THE PRINCIPAL, MISS G. E. MILLARD

COLLEGE TORONTO

DAY and BOARDING SCHOOL for GIRLS

From Kindergarten to Honour Matriculation; also Business, Household Science and other special subjects. Music, Art, Science, Gymnastics, Dancing. Excellent, well equipped buildings. Out-of-door games in beautiful playing grounds of over thirty-five acres. Modern Junior School.

Ottawa Ladies' College

(Founded 1869)

A Residential and Day School for Girls

Courses from Primary to Honour Matriculation, Music, Art and Handicraft, Dramatics, Secretarial Course, Physical Education, Winter and Summer Sports.

Fall Term begins Wednesday, Sept. 11th.

Boarders—Tuesday, Sept. 10th.

Write for prospectus to the Principal,

MISS KATHLEEN E. BOWLBY, B.A., Ottawa Ladies' College.

1930-1940

Miss Betty 'Adsit, Arts '32, is now in England serving with the R.C.A.M.S., C.A.S.F. Before going overseas she was the nursing sister at the Military Hospital, Fort Osborne Barracks, Winnipeg, Man., for two

Miss Edna Ashbury, Com. '40, has taken a position with Seagrams Limited, Water-

loo, Ont.

D. K. Atkinson, Arts '30, is now illumination manager for the Northern Electric

Company in Montreal.

P. E. Auger, Sc. '36, received his D.Sc. from the Massachusetts Institute of Technology, Cambridge, Mass., this spring. He is now attached to the geological staff of the Quebec Bureau of Mines.

Dr. L. F. Baker, Med. '34, formerly of Kipling, Sask., is now practising in Vis-

count, Sask.

E. G. Berry, Arts '36, has been appointed to a lectureship in the department of classics at the University of Chicago. He expects to receive his Ph.D. degree from Chicago this summer.

Dr. W. E. Blair, Med. '30, is municipal doctor at Walpole, Sask.

J. M. A. Bleau, M.Sc. '32, formerly on the staff of the Royal Military College, Kingston, has accepted a position with the Quebec Department of Mines, Parliament Bldgs., Quebec City.

Dr. E. M. Bohan, Med. '31, of Wilmington, Delaware was bereaved recently

death of his father at Bath, N.B.

R. C. E. Bray, Sc. '37, has joined the engineering staff of the Pamour Porcupine Mines, Pamour, Ont. He recently received

his M.Sc. from McGill University.

Miss Barbara Craig, Arts '37, who worked on a graduate fellowship in French at Bryn Mawr College during the past year, has been awarded a fellowship for further study at the same institution during 1940-41.

Dr. G. C. Caughey, Med. '37, is on the staff of the Ontario Hospital at Whitby,

Ont.

K. C. Dennis, Sc. '38, of Ottawa, is an inspector for the British War Supply Board.

D. J. Dewar, Sc. '37, recently received his

Ph.D. from McGill University.

R. P. Graham, Arts '37, has been awarded a statutory assistantship at Columbia University, New York City, where he is at present working on a fellowship in the department of chemistry. This new award will allow him to complete work for his doctor's degree.

F. W. Gussow, Arts '34, is with Alexander Murray and Company, Limited, Montreal.

Miss Margaret Halligan, Arts '30, is with Messrs. Montgomery, Ward and Company, 75 Varick St., New York City.
F. A. Hamilton, Arts '34, has been appointed to the staff of the North Toronto

Collegiate Institute.

C. C. Hilmer, Com. '37, is on the sales staff of the Burroughs Adding Machine Company, Toronto.

L. H. Hunter, Sc. '35, is with the Northern Electric Company, Montreal, as cable sales specialist. He lives at 5830 Monkland

C. V. Koehn, Arts '38, has won a scholarship at Columbia University, where he will do work in accounting this fall. He is employed for the summer by the Saskatchewan' Provincial Tax Commission.

M. W. Lever, Arts '37, has been appointed to the staff of the collegiate institute at

Smiths Falls, Ont.

Orian E. B. Low, Arts '34, and John J. McKenna, Arts '33, have opened law offices in the Central Chambers, Ottawa, under the name of Low and McKenna. Mr. Low was recently elected first vice-president of the Ottawa Junior Board of Trade.

C. W. McDougall, Com. '38, formerly assistant manager of the Queen's Employment Service, is now doing personnel work with Canadian Industries Limited, Montreal.

D. W. Marshall, Arts '34, has been with the Norton Company of Canada, Chippawa, Ont., since graduation. He is research analyst.

Dr. N. E. Morrison, Med. '34, is practising

in Nelson, B.C.

George Neumann, Sc. '40, left recently for Nicaragua, where he has obtained a position as engineer with Ventures Limited.

Douglas Newby, Arts '39, is now with the de Havilan'd Aircraft Company as assist-

ant personnel manager.

Rev. R. C. Nunn, Arts '33, is doing missionary work for the United Church of Can-

ada at Ham Heung, Korea.

Miss Eva Ranson, Arts '30, Jack Blacklock, Arts '38, and J. W. Marriott, Arts '36, are teaching at the collegiate institute in Owen Sound, Ont.

W. F. Rannie, Arts '38, has left the "Queen's Review" staff to take a position with the Hudson's Bay Company in Winni-

Dr. L. G. Reid, Med. '39, has started in

private practice in Pembroke, Ont.

G. W. Robinson, Sc. '36, is with the Stadacona Mine, Rouyn, Que.

K. W. Scobie, Sc. '38, is with the Preston East Dome Mines, South Porcupine, Ont.

Miss May Shaw, Com. '40, has joined the staff of the Bank of Canada, Ottawa.

Miss Elizabeth Soper, Arts '33, is teaching English and French at the high school in Bowmanville, Ont.

N. S. Spence, Sc. '36, has been appointed chief research engineer at the Copper Refining Division of the International Nickel Company, Copper Cliff, Ont.

R. M. Sternberg, Arts '35, received his Ph.D. from the University of Toronto early

in June.

E. R. Stuart, Arts '38, has been appointed to the staff of the Kingston Collegiate Institute, where he will teach English and general subjects.

Duncan Whitmore, Arts '39, has been awarded a fellowship in geology by Prince-

ton University.

UNIVERSITIES IN WAR-TIME

An address by Dr. W. Hamilton Fyfe, Principal of Aberdeen University, and former Principal of Queen's, in the series "Britain Speaks," over the network of the British Broadcasting Corporation

Life in Scottish universities during this year of war has been a strange medley of the normal and abnormal. The students who are left to us have carried on much as usual, and have been able to

DR. W. H. FYFE

get the full benefit of mental, social, and athletic activity; and as for their academic industry, the examinations at the end of the session showed that they have never worked harder and to such good effect. The sound of the siren seems somehow to have served as a stimulant!

But the session has had its abnormal features also. I wonder, for instance, how many of my listeners overseas appreciate the expense of providing airraid shelters, and "blacking out" our spacious acreage of windows. Hitler certainly has not depressed the spirit of our universities, but he has succeeded in draining our pockets.

There are other strange aspects of university life in war-time which have be-

come so familiar that we have ceased to notice them—the appearance of air-raid wardens, graduate and undergraduate, of both sexes, draped with tin-helmet, gasmask, and other contrivances of A. R. P. and looking rather like the White Knight in Through the Looking Glass-or, still more strange, some reverend professor in the uniform of the Home Guard, resembling nothing so much as a brown-paper parcel incompletely secured with string. One has come to regard such sights no longer with astonishment, but fortunately still with humour. As one of our janitors said the other day, "We're queer. Here we are leeving in the ja's o' deeth, but we maun be humorous."

In war-time we inevitably question the value of many institutions which we complacently take for granted in time of peace. So the fact that the universities have been allowed to carry on raises two questions: What is the function of a university? and What is the value of that function?

I think much the same answers would be given in Great Britain, in the Dominions, and in the United States. Fundamentally the aims and methods of all British and American universities are very similar. Here, even for those of us who are over military age, there is not much leisure left in these days for quiet meditation. But there is some, and in such leisure as there is, we search our hearts and question the past with an anxious eye on the future.

The value of a university is this. It provides an environment in which certain people can best complete their growth—and by growth I mean the development of all their powers of body, mind, and character—growing into the

best of which each is capable. Human beings vary greatly in what I may call the length of their educational tether. I am sure none of them get to the end of their real tether at fourteen or even at fifteen. But some do at sixteen, and their development is warped or retarded if they stay at school too long. There are some—not many, what in Scotland we call "a good few"—who develop best if they continue to work in an academic environment until they are in their early These are no better than the others; they are merely different. Their development suffers, if they are denied the opportunity which universities provide; if they make good use of the opportunity, they are a valuable element in the community—valuable not only because they have, as a rule, been trained for some particular profession, that might be done equally well elsewhere—no, their real value lies in the fact that by their free association with each other and with their teachers they have acquired the habit of impartial enquiry; they know how to find facts and to face them when found. University graduates are the product and should therefore be the bulwark of freedom.

Unity of British

We see that today more clearly than ever before. Freedom of thought and speech is the only basis on which university education can be built—in Milton's words, "the liberty to know, to utter and to argue freely according to conscience." That is what we are fighting for and we academic people have better reason than anybody else to know it. We know also that freedom goes hand in hand with responsibility. In the doldrums of the last quarter of a century we have failed to face that fact. We have proclaimed our ideals, national and international, have not fully thought out their implications. The result has been hesitation, ambiguity, and a policy that moved in contrary directions. We shirked the responsibility on which freedom rests, and misunderstood the true nature of loyalty.

The crisis of war has cleared our minds. We see now that our loyalty to

the British Commonwealth and to the ideals which it shares with the United States derives its reality from something far wider and more universal—the spirit of justice and of human brotherhood. There is no bunk about that. At last we are sure of the difference between good and evil. At last our slogans ring true. And we are resolved not only to win victory but to deserve it.

BASIS OF EDUCATION

I certainly do not mean to suggest that this resolve is confined to university peo-In that resolve British people are more united at this moment than they have ever been about anything before. There is no doubt about that. And certainly neither I nor anyone else now alive has seen anything like the confident enthusiasm with which the country responds to the Prime Minister's leadership. That enthusiasm runs like a warming fire throughout the United Kingdom and, as I well know, throughout the great Dominions overseas. We all share what he has so boldly expressed, a sense of pride at the realization that, when France fell by the way, we were left to champion freedom by ourselves.

For six years I had the privilege of working at a Canadian university, and enjoyed many a warm welcome in American universities. So I know what your feelings are. You share to the full our ideal of freedom. You hold as firmly as we do the belief that the good life means the opportunity for all men and women, and all nations, great and small, to develop their own personality to the full and make their own characteristic contribution to the good of the whole. The only world in which happiness is possible is a world of free men and women.

CRUSADE FOR FREEDOM

I said you share our ideals. That is an understatement of fact. The people of the United States have led the world in the crusade for human freedom. You planted the flag of liberty higher and more firmly than ever before, and have proudly served under it ever since. You have

always hated tyranny and injustice and oppression. Freedom is your middle name. We all know that and our assurance of your sympathy gives us vast encouragement.

Here in Scotland it is long past midnight, just the hour when people are most inclined to face facts coldly, and without illusion. And as I look at our task, it does seem to me immense. But we are ready to face all that is coming to us with the grim determination of the stoic and the high-hearted happiness that is the root of Christian courage. And our confidence is based on the knowledge that your deepest moral feelings are the same as ours and our ideals for the future of Europe are the same ideals which you so stoutly uphold in the western continent.

SECURITY FOR THE FUTURE

Moreover, we are fighting not only to win the war but to establish peace. And there I know you are with us, because Americans and British folk alike believe that the strength of men and of human societies consists not in force and wealth. but in their inner moral quality. That is what governs their ultimate destiny. That truth demands dedication to a task of national and international regeneration. And it is our job in the comparatively peaceful atmosphere of a university to hold fast to that ideal and to think out the practical means for its realization. The natural sciences have achieved their marvels; the future lies with the social sciences. Security is the goal—security for the full development of each nation and of every person in each nation. It is a vast task, but the more clearly we face the issue, the stouter will be our resolution to win—and indeed victory in war would not be worth the winning, unless it promised a sure lease of life to liberty, justice, toleration, and compassion. There lies the bright hope of the future. We mean to win that victory too. Whatever happens we shall hold our hope; and if in the meantime the university collapses. as it may well do, on our heads, you will find us sitting full of confidence among the ruins.

CHANCELLOR DUNNING TO BE INSTALLED OCTOBER 26

Avery Dunning as chancellor of Queen's University and the conferring of honorary degrees on Mr. Dunning and Mr. Joseph Burr Tyrrell will make Autumn Convocation on October 26 a most significant occasion. The ceremony starts at 10.15 a.m., Eastern Daylight Saving Time. Mr. Dunning will reply on behalf of the recipients of honorary degrees and his address will be broadcast over the C.B.C. network from 10.30 to 11 o'clock.

Mr. Dunning has had a long and distinguished career as a statesman. Born at Croft, Leicestershire, England, he came to Canada at the age of eighteen, and was engaged in farming in Saskatchewan for several years. During the Great War he was a member of the Canadian Food Board as director of food production. He has served as minister of railways and canals and minister of finance in the Dominion cabinet. He has also been premier, president of the council, provincial treasurer, minister of railways, minister of telephones, and minister of agriculture for the Province of Saskatchewan.

Mr. Tyrrell is an outstanding geologist, mining engineer, and explorer. Born at Weston, Ontario, he received his preliminary education there and at Upper Canada College. He holds the degrees of B.A., M.A., and LL.D., from the University of Toronto, and the degree of B.Sc. from Victoria University. As an explorer, Mr. Tyrrell has received many honours in recognition of his endeavours, including the Daly Medal of the American Geographical Society, "not for a single exploration, but for expeditions in almost every part of the Canadian hinterland." Since 1925 he has devoted his talents largely to mining company administration and management.

Muir House Open

Muir House, the new women's residence on University Avenue, is now occupied by undergraduates.

KWANSEI GAKUIN UNIVERSITY

By Dr. C. J. L. Bates, Arts '01

Ed. Note: Dr. Bates is the third president of Kwansei Gakuin University, which celebrated its fiftieth anniversary last year. Like Queen's, this institution had a humble beginning, from which it has developed steadily until today it enjoys a position of national importance and influence.

K WANSEI GAKUIN, which being interpreted means "West Japan College," is an institution for boys and

young men situated midway between the great cities of Osaka and Kobe on the outskirts of the smaller city of Nishi-no-Miya, which means "The Western Shrine." This institution was founded fifty years ago plus one. It then consisted of a secondary school for teen-age boys and a Theological College. It began

DR. C. J. L. BATES

small, as most living things do, but, as it had life within, and favourable surroundings without, it has flourished with the years.

For the first twenty years Kwansei Gakuin carried on, with the two departments mentioned above, as a small intimate family. At the end of that time it had fewer than three hundred students altogether. But within that period it had had some students who are now prominent men in political, judicial, economic, religious, and artistic circles.

The School was founded by the Southern Methodist Church, whose headquarters were in Nashville, Tennessee, but in 1910 the Canadian Methodist Mission in Japan united in this work with the Southern and Japanese Methodist Churches. Mrs. Bates and I were the first representatives of our Mission to join the work of Kwansei Gakuin.

From that time—be it cause or coincidence—the school grew rapidly. In 1912 a College of Literature and Commerce was started, which a few years later di-

vided into a Literary College with courses in English literature, philosophy, psychology, and sociology, and a Commercial College with courses in economics and commercial science and practice.

The institution continued in this form until 1934 when the University was opened with the permission of the Imperial Japanese Government. Four classes have graduated from the five-years' courses of either the Faculty of Law and Literature, or the Faculty of Commerce and Economics.

At present there are three thousand students in all departments: one thousand boys in the middle school, one thousand in the professional colleges, and another thousand in the university courses.

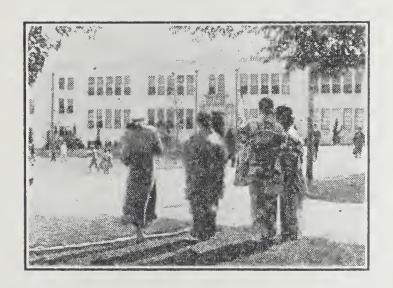

It is fully recognized by both the government and the community that Kwansei Gakuin is founded upon Christian principles and gives instruction in the Bible, and also has daily Chapel services, in all departments, which are attended by more than two thousand students and teachers every morning. And up to the present no official objection has been raised to these practices.

The teaching of English has been emphasized from the beginning, and is one of the most attractive features in the institution.

The teaching staff numbers more than two hundred, among whom are six Canadians and six southerners, the rest being Japanese. The presence of these three nationalities ensures an international aspect to the school that is highly appreciated by many, even though internationalism is at present under a shadow on account of the strife of nations in East and West. Even though this may be so in the world at large, the relation of "foreigners" and Japanese in this institution, in spite of the international conditions, has been one of unbroken friendship, courtesy, and co-operation. That is due to the innate culture and kindness of the Japanese, to the tact and sympathy of the missionaries, and most of all to the fundamental unity of Christian faith and love.

Our Japanese students are very attractive young men. They come for the most part from well-to-do homes of education and culture. They are interested in sports, in music, in painting, in oratorical contests in both Japanese and English, and some of them in social and religious work. All games known may be found here, except cricket. We have produced one Davis Cup tennis champion and one national skating champion. In all sports our students excel. Four ageold Japanese sports have come down from the remote past to the present. They are archery, fencing, judo, and sumo. The latter two are forms of wrestling peculiar to Japan.

In music our students have clubs in both Japanese and Western music. They have a glee club that won the annual national contest in Tokyo three years in succession. In addition they have a string orchestra, a mandolin club, an harmonica band, and a brass band. So that the air is full of music, "sounds and sweet airs that give delight and hurt not"—sometimes.

FIELD DAY VISITORS

It has fallen to my lot to represent Queen's on the Kwansei Gakuin staff, but for a goodly number of years I was supported by Mrs. Woodsworth, the wife of our very able Dean of the Literary College and University, the late Dr. H. F. Woodsworth. He was a Toronto graduate, but Mrs. Woodsworth was an alumnus of Queen's. She was formerly Miss Ada Chown, and grew up on University Avenue in the Chown house across the street from Grant Hall. She

has had two daughters at Queen's: Mary, now Mrs. D. C. Bews of Formosa, and Sylvia, who graduated in Arts last spring. Both of these girls played as children on the Kwansei Gakuin campus.

GREAT OLD DAYS

I myself belong to the "great" days of Queen's. The great days of an institution are always, of course, the days when we ourselves were there. But my time was when "Geordie" himself reigned supreme; and Watson laboured to get the minds of bewildered students in intelligent relation to Plato, Aristotle, Kant, and Hegel, and Cappon unfolded the rich beauties of English literature, and Dupuis improved on Euclid. Those were great days indeed. There were giants at Queen's then. And no doubt there are now.

Mrs. Bates and I came to Japan in 1902, on the old *Empress of India*. The Rev. and Mrs. Thurlow Fraser were on the same ship en route to Formosa. They were both graduates of Queen's.

The thirty-eight years we have spent in Japan have been years of great significance and interest in this far-eastern world, so-called. Japan was then regarded by most people of the West as a picturesque fairyland lighted by paper lanterns and inhabited by samurai and geisha—feudal soldiers and singing girls. And Chinese men still shaved the front half of their heads and wore their hair in queues hanging down their backs or rolled under turbans.

Two years after our arrival, however, the great struggle between East and West began with the Russo-Japanese War. It was not recognized as such, because on the surface it appeared to be Russia against the world, inasmuch as the Anglo-Japanese alliance was in force and Japan had the sympathy of Great Britain, the United States, and many other nations.

The result was, on the face of things, a check on Russian advance in the Far East, but more profoundly it was the awakening, encouraging, and stimulating of all the Asiatic peoples to rise up and

resist the encroachment of Western nations in Asia, especially in China.

After the war thousands of Chinese students flocked to Japan to find out how it was done. At one time there were thirteen thousand Chinese in the city of Tokyo. And one of the things they learned was that they must return to China and set their own house in order. This was doubtless one of the influences that hastened the Chinese revolution of 1911 in which the Manchu dynasty was overthrown and a republic established, in name at any rate.

Since then, the "unchanging East" has moved at an ever-increasing rate, more especially since the World War of 1914-18, and particularly since the Russian Revolution of 1917 and the spread of communism across Siberia and into China. The full significance of these tremendous movements can be appreciated only when one keeps the map of Asia before one's eyes. Forty years ago the partition of Asia among European powers was almost complete. Russia had extended all across the north of Asia to the shores of the Pacific and had taken the island of Saghalien, one of the group of islands which otherwise constitute Japan. She had also extended southward to the borders of Afghanistan on the north-west of India, which was and is a member of the British Empire.

At that time also the "carving of the melon," in other words the dividing up of China, was definitely in process of realization. France had taken Indo-China; Russia was in control of Manchuria, Great Britain dominated the Yan-Tse valley from Shanghai and South China from Hong Kong, and Germany had established herself in the province of Shantung and built up the fine German city of Tsing Tao.

And what was Japan doing all that time? Quietly preparing for the new day, which broke in the war with Russia in 1904-5. Since then the pace has been fast and furious, the changes kaleidoscopic, and the significance of these new movements tremendous.

At present a new order is being born in East Asia. Just what it will be, time

will tell. One thing, however, is sure, and that is that the rule of the West in the East is broken and the destiny of the Asiatic peoples will be, under God, in their own hands.

This is as it should be. It does not mean that there will be no more contact of East and West, however. The surprising fact is that while the autonomy

THE ARCHES, COMMERCIAL COLLEGE

of the East vis a vis the West is being insisted and realized, the westernization, more specifically the Americanization of all the oriental countries, is proceeding rapidly. In dress, in food, in education, in culture, in economic and political thinking this is obvious, on all sides, in every Eastern land, whether it be Japan, Korea, China, the Philippines, or Siam. The ideological conflicts that take place in Europe are mutatis mutandis, going on in this great eastern world not so much among the nations as within each nation, and victory is on the knees of the gods. Great issues are at stake, and are demanding supreme sacrifice and are receiving it.

Thirty-eight years ago at a student volunteer convention, held in Toronto under the leadership of Dr. John R. Mott, two challenging cables were read; one was "North China calls, 'Fill up the gaps.'" It was just after the Boxer rebellion in China, when 250 missionaries and 20,000 Chinese Christians were killed. Three hundred young men and

women rose in response to the call and volunteered to give their lives in Christian service in China.

The other telegram was "Japan is leading the Orient—but whither?" These two challenging messages might be repeated today with but slight change. There are many gaps in China again. Japan is leading the Orient, in many respects; militarily, industrially, educationally there is no question of Japan's ascendancy in the Far East.

COMPULSORY SCHOOL LAW

Sixty-seven years ago the compulsory school law was enacted in Japan, and to-day the census reports that more than 98 per cent of the children of public school age are at school. This is an achievement that is unsurpassed anywhere in the world, and is one of the two chief reasons for the amazing progress of Japan in the arts of war and peace, the other being the spirit of loyalty and sacrifice that animates the people universally whenever the interests of the nation are at stake.

I do not mean this article to be in any an appraisal of contemporary events. That must wait for a later more favourable occasion when "the clouds have left the hill tops, and the mists have cleared away." I have written as I have in order, if possible, to convey to the reader some sense of the significance of what is taking place in this great eastern world today, and in the importance of education in these movements. Other things need to be said to make the tale complete. The vision which challenged us nearly forty years ago is still unrealized, but the efforts put forth for its realization have been abundantly worth while, and have not been fruitless.

PEACE THROUGH CO-OPERATION

What is needed, not in this eastern world alone but in Europe, and indeed everywhere, is a new spirit of co-operation, justice, and good will that will make possible permanent peace among the nations.

Kwansei Gakuin University is, we believe, one of the institutions that is contributing in some measure to the realizing of this vision which has inspired the world since the angels sang in the light of the star of Bethlehem.

UNIVERSITY RECEPTION PLANNED FOR OCTOBER 25

A N opportunity to meet Hon. and Mrs. Charles Avery Dunning will be afforded to alumni and members of staff at a University reception to be held in Grant Hall on the evening of October 25. Mr. Dunning will be formally installed as Chancellor of the University at Fall Convocation the following morning.

Ordinarily, the annual meeting of the General Alumni Association would be held in conjunction with the reception and the Reunion Address would be delivered, but as there will not be a Reunion this year other arrangements had to be made. It is planned now to hold the annual meeting in the Red Room immediately after the meeting of the Board of Directors on the afternoon of October 25. Tea will be served.

Col. E. A. Baker, Sc. '15, LL.D. '40, who was to deliver the Reunion Address, has kindly consented to speak at the first Reunion held after the war.

Queen's Film, "Paths of Learning," Still Available For Distribution

THOSE branches that have not yet seen the Queen's film, "Paths of Learning," are reminded that it is available for distribution and may be obtained by writing to the Secretary-Treasurer of the General Alumni Association. This moving picture has been exhibited at many of the branch meetings during the past year and it never fails to please.

The film is 16-mm. size and can be shown only on a sound projector. The latter can usually be borrowed from schools or industrial concerns.

The 35-mm. film, for use in commercial theatres, has been shown in many of the larger cities in Canada. Graduates would be doing the University a valuable service if they would ask their local theatre managers to obtain this picture, which may be secured without charge from the

Associated Screen News in Montreal. The smaller film is also available to any interested groups.

INDUSTRIAL RELATIONS DISCUSSED BY EXPERTS

FOR the fifth industrial relations conference held at Queen's September 18-20, approximately one hundred prominent representatives of Canadian and American companies, government officials, industrial counsellors, and members of university staffs were in attendance. The conference was held by the Industrial Relations Section of the School of Commerce and Administration.

The well-planned programme consisted of addresses and discussions on such topics as "The Present and Future Labour Supply," "Foreman Training," "Trends in Social Security Plans," "The Unemployment Insurance Act, 1940,"

and "Payroll Deductions."

An address of welcome to the visitors was given by Dr. W. E. McNeill, vice-principal and treasurer of Queen's. Prof. J. C. Cameron, head of the Industrial Relations Section, spoke at the concluding luncheon. Among the speakers at the conference was Dr. Bryce M. Stewart, Arts '11, director of research for Industrial Relations Cousellors, New York City.

The sessions were held in Grant Hall and the visitors were accommodated in

Ban Righ Hall.

Dr. Bryce M. Stewart Appointed Deputy Minister of Labour

P. BRYCE M. STEWART, Arts '11, research director for Industrial Relations Counsellors, Incorporated, New York City, has been appointed Canadian deputy minister of labour for the duration of the war, it was announced by Prime Minister Mackenzie King at Ottawa on October 3.

Dr. Stewart is now returning to the department in which he started a notable career. From 1914 to 1916 he served on its staff as a research worker and statistician. In 1917 he became editor of the Labour Gazette, and from 1918 to 1922

he was director of the Employment Service of Canada.

He left Ottawa to take charge of administration of the employment exchanges under the unemployment insurance programme established by the Amalgamated Clothing Workers of America. In 1927 he became a member of Industrial Relations Counsellors, in 1930-31 he was a member of President Hoover's Emergency Council on Employment, and since 1930 he has been a member of the State Advisory Council of the New York Employment Service. For the past seven years he has been a member of the Federal Advisory Council of the United States Employment Service and consultant of the New York State Unemployment Insurance Administration.

Dr. Stewart is a member of the Queen's Board of Trustees. An enthusiastic alumnus, he is on the executive of the New York branch of the General Alumni Association.

ONE NEW MEMBER ELECTED TO ALUMNI DIRECTORATE

N the annual elections of the General Alumni Association, which closed on October 1, the following members were returned as directors for the ensuing three years: Dr. E. L. Bruce, Sc. 09, Arts '11 (Ph.D. Columbia), Miller Research Professor of Geology, Queen's University; Dr. W. G. Cornett, Arts '19, Med. '21, physician, Hamilton; A. G. Fleming. Arts '04, Sc. '07, chief chemist, Canada Cement Company, Montreal; C. S. Gibson, Sc. '22, ventilation engineer for the Ontario Mining Association, Timmins; and Dr. W. A. Mackintosh, Arts '16 (Ph.D. Harvard), Sir John A. Macdonald Professor of Political and Economic Science and Director of Commerce Courses at Queen's, now on leave of absence as economic adviser to the Canadian government, Ottawa.

Mr. Gibson, who is the only newcomer to the Board, received his B.Sc. degree in mining engineering in 1922. For three years after graduation he was employed with Braden Copper Company, Rancagua, Chile, as shift boss and foreman, and from 1925 to 1932 he was with the An-

glo-Chilian Nitrate Corporation, Tocopilla, Chile, as railway electrician, chief mine engineer, assistant general mine superintendent, and finally as mine superintendent of the Maria Elena mines. Since 1935 he has been engaged in silicosis research for the Ontario Mining Association.

COEDS MAKE COMFORTS FOR AIR RAID VICTIMS

A S their contribution to Canada's war effort, many women students volunteered early in the term to make quilts and children's clothing for the victims of Nazi air raids on England. A large, bright room on the top floor of the biology wing of the Old Arts building has

been placed at their disposal.

Three projects have been planned at a total cost of \$265. With \$10 donated by women students of the Queen's Summer School and with \$20 collected among themselves, the girls were able to purchase enough material to begin work soon after the session started. The old silk curtains that formerly hung in the Red Room have been commandeered as covers for quilts.

The Kingston Red Cross Society has promised to supply all wool necessary for knitting articles for the fighting forces. The branch is also lending a sewing ma-

chine to the students.

A large group is enrolling for the St. John Ambulance course and many are taking motor mechanics, typing, and cooking at the Kingston Collegiate and Vocational Institute.

Served as Chairman

HON. C. A. DUNNING, chancellor of Queen's, served as chairman of the National Subscription Committee for Canada's second war loan, which was conducted during September. Mr. Dunning filled a similar position during the first war-loan campaign.

Convened in Kingston

A T the third annual meeting of the Ontario Association of Pathologists which convened at Kingston in Septem-

ber Dr. J. F. A. McManus, Med. '38, New York, and Dr. L. S. Jolliffe, Med. '36, Boston, were among the speakers. Members of the Queen's staff who took a prominent part were Prof. James Miller and Dr. W. L. Hay, Arts '14, Med. '21.

STAFF APPOINTMENTS MADE BY TRUSTEE BOARD

PROMOTION of Prof. D. S. Ellis, professor of civil engineering to the head of the department, was one of the appointments made at a recent meeting of the executive committee of the Board of Trustees. Professor Ellis succeeds the late Prof. W. P. Wilgar.

Mr. William A. Wolfe has been appointed lecturer in mechanical engineering, replacing Capt. H. G. Conn, who is on military leave. Mr. Wolfe is a graduate of the University of British Columbia. He had a teaching fellowship in the Case School of Applied Science, Cleveland, Ohio, 1937-39, securing his M.Sc. in 1939. From 1939-40 he worked with a research

company in Vancouver, B.C.

Dr. Vyner Brooke was appointed lecturer in Spanish and Italian, and in charge of the department, in the absence of Prof. J. H. Brovedani, who is interned in Italy. Dr. Brooke is an honours graduate of Queen's, having secured his B.A. degree in 1925. In 1928 he received an M.A. from Harvard and last year obtained his Ph.D. degree there, writing his thesis on "The Military Novel in France from 1886 to 1896." Dr. Brooke has carried on postgraduate work at the Sorbonne and at the Bibliotheque Nationale in Paris. He has done full-time university work at Dartmouth and Bowdoin. He taught for seven years at Bowdoin and two years at Dartmouth, and left in 1937 to finish his doctorate at Harvard. He also did part-time teaching at the latter insti-

Mr. David McGinnis has been appointed lecturer in civil engineering. Mr. McGinnis graduated from Queen's in 1938 with an honours B.Sc. degree and the departmental medal in civil engineering. In 1937 he was awarded a W. W. Near Scholarship. In 1939 he took his M.Sc. after a brilliant course at Cornell.

Full leave for war work has been granted to Profs. L. E. Law and R. A. Low; Prof. L. T. Rutledge is on part-time leave. Full leave has also been granted to Dr. S. W. Houston, who enlisted with the Royal Canadian Army Medical Corps.

ALUMNI AND BENEFACTORS MAY MAKE NOMINATIONS

A S provided in the by-laws of the University Council that govern the elections of the administrative bodies of Queen's, graduates and graduate-benefactors are hereby notified that nominations of candidates for election to these bodies may be made as stated below. Printed forms for these nominations are not sent out, except to the elective members of the University Council and to the non-graduate benefactors in the case of the Trustee elections.

Nominations of Trustees by the Graduates

Graduates of the University (except those who are elective members of the University Council, from whom nominations are solicited as stated above), may nominate two members of the Board of Trustees to succeed V. K. Greer, M.A., Toronto, and O. D. Skelton, M.A., Ph.D., F.R.S.C., LL.D., Ottawa, whose terms expire on March 31, 1941. Mr. Greer and Dr. Skelton are eligible for re-election. No other present member of the Board should be nominated and no member of the University staff is eligible. Candidates must be nominated by five or more electors in order to qualify. Nominations must be in writing, signed, and received by the Registrar of the University on or before December 31, 1940. The Trustees elected will serve until 1944.

Nominations of Trustees by the Benefactors

Graduate-benefactors who have contributed \$100 or more to the University may nominate two members of the Board of Trustees as follows:

(a) Under the Act of 1912 (General) —One Trustee to serve until March 31, 1945, in succession to T. A. McGinnis, B.Sc., Kingston. Mr. McGinnis is eligible for re-election.

(b) Under the Act of 1916, providing for representation of the "School of Min-

ing" (Special Science)—One Trustee to serve until March 31, 1944, in succession to Mr. J. M. Campbell, Kingston. Mr. Campbell is eligible for re-election.

No present member of the Board, other than Messrs. McGinnis and Campbell, should be nominated, and no member of the University staff is eligible. Candidates must be nominated by five or more electors in order to qualify. Nominations must specify the category, whether "General" or "Special Science," and must be in writing, signed, and received by the Registrar of the University on or before December 15, 1940.

Nominations to the Council by the Graduates

Graduates of the University may nominate nine candidates to succeed the following members whose terms expire in 1941: J. C. Elliott, M.A., Toronto; J. F. Houston, M.D., C.M., Hamilton; Rev. N. M. Leckie, B.A., B.D., D.D., Grimsby; A. A. MacKay, B.Sc., Montreal; A. G. MacLachlan, B.Sc., Ottawa; G. G. Mc-Nab, M.A., D.Paed., Guelph; G. C. Monture, B.Sc., Ottawa; D. W. Stewart, B.A., Renfrew; N. B. Wormith, M.A., Toronto. Retiring members are eligible for re-election. No other present members of the Council should be nominated. Candidates must be graduates of Queen's and must receive five or more separate nominations in order to qualify. Nominations must be in writing, signed, and received by the Secretary of the University Council on or before December 15, 1940. The members elected will serve until March 31, 1947.

Photo by Karsh

The excellent picture of the late Hon. Norman McLeod Rogers that appeared in the August issue of the *Review* was taken by Karsh Studios, Ottawa.

Purchased War Bonds

THE University's subscription of \$125,000 was near the top of the Ontario list, according to official figures. As the issue was over-subscribed, the University ultimately received \$93,800 in bonds. This figure does not include purchases made by individual members of the staff.

MILITARY TRAINING OUTLINED FOR STUDENTS

A T the beginning of the University session the following statement was issued by Lt.-Col. R. O. Earl, Officer Commanding the Queen's University Contingent, C.O.T.C.:

"In accordance with the regulations of the Government and with the decision of the universities of Canada, all male stu-

LT.-COL. R. O. EARL

dents of British nationality who are physically fit and at least eighteen years of age will receive military training this session. During October all those students who are not now members of the C.O.T.C. or otherwise qualified for a commission will take the same course. This will follow the syllabus laid down for the training centres established for compulsory military training.

"At the end of October, candidates for admission to courses leading to qualification for a commission will be selected and those accepted will thereafter follow those courses. The others will be enlisted in the auxiliary battalion and will complete the syllabus referred to above. This will require about six hours work per week and in addition two weeks service in camp at the end of the session. Members of the C.O.T.C. will also attend this camp. Pay will be issued to all ranks for camp training, but not for service

during the session. Paid employment during the winter will be available to a limited number of instructors."

In accordance with this policy, all those taking military training were organized into forty platoons of about thirty men each, selected alphabetically within years and faculties. Thus, for example, platoons 1-15, inclusive, are from the Faculty of Arts. An elaborate time-table has been worked out which provides for examinations, drill, physical training, map-reading, and musketry, at hours that do not conflict with University classes.

As soon as selection of candidates for qualification for commissions has been made, special training will be provided for the following arms: Artillery, Engineers, Infantry, Signal, and Medical. A special course for Ordnance Mechanical Engineers may also be arranged.

Military education is in the capable hands of Lt.-Col. D. M. Jemmett, D.C.M., chief instructional officer. He will be assisted by a small staff of full-time and part-time instructors. Appointments have not yet been made, but should be announced next month.

The work of the Contingent is proceeding very well indeed. The bearing of the men on parade is good and the spirit excellent. With the experience of last year to help, there should be confidence that the high standing of Queen's University Contingent will be maintained.

Seventy-Eight Degrees Awarded

A total of seventy-eight degrees were awarded at Queen's this fall as follows: M.A., 3; B.A. (honours), 9; B.A. (pass), 49; B.Com., 2; B.Sc., 15.

1940-41 Session Opens

Registration for the 1940-41 academic year opened at the University on September 23 and the first classes were held on the twenty-sixth.

Held Own Registration

National registration was held in the Douglas Library on September 14 for employees of the University. Mr. Gordon J. Smith, director of endowment, was in charge.

CORRESPONDENCE COURSES TO BE OFFERED SOLDIERS

CO-ORDINATION of the facilities for the education of Canadian armed men on active service, including the establishment of correspondence courses, was arranged at a conference held at Queen's August 27 and 28 under the auspices of the Canadian Legion Educational Services. Official approval was given to the proposal that courses for enlisted men carry uniform credit in all provinces.

The conference was attended by the deputy minister of education from each Canadian province and from Newfoundland, prominent educationists from all over the Dominion, representatives of the military, naval, and air forces, and members of the curricula committee of the Educational Services.

The correspondence courses have been adapted from those regularly in use in several of the provinces at the present time. These might be regarded as self-instruction courses, since no formal teaching is necessary, and students taking them may proceed individually and as rapidly as possible. For each course successfully completed, definite units of credits will be granted, valid throughout Canada.

Dr. W. E. McNeill, vice-principal, welcomed the delegates to the conference. Among those present were the following: Lieut.-Col. Robert England, Arts '21, V. K. Greer, Arts '11, Dr. J. H. Mc-Kechnie, Arts '01, Dr. H. B. King, Arts '13, Dr. O. E. Ault, Arts '24, J. W. Gibson, Arts '08, R. M. Winter, Arts '26, and Dr. A. E. Chatwin, Arts '32.

Colonel England was the speaker at the banquet in the LaSalle Hotel on the evening of August 27. In his address he said that everything possible should be done to keep Canadian soldiers overseas interested in their home country. Principal Wallace moved the vote of thanks.

Safe In Finland

THE many friends of Eino Josef Tuovinen, Sc. '34, will be delighted to learn that he came safely through the Finnish-Russian war. He had returned to Finland in February, 1939, to work for the International Nickel Company, and when the invasion began he joined the Technical Corps. His address is Aänekoski, Finland.

THREE QUEEN'S DOCTORS PRACTISE IN FAR NORTH

In the remote and bleak North West Territories, far from any large centres of civilization, three Queen's doctors are rendering a valuable humanitarian service. They are Dr. A. W. Truesdell, Med. '22, at Fort Simpson, Dr. J. P. Harvey, Med. '33, at Fort Norman, and Dr. L. D. Livingstone, Med. '28, at Aklavik, well inside the Arctic Circle.

News of these graduates was conveyed in a letter to Principal Wallace from Rev. Hugh Alexander McLeod, Arts '18, Victoria, B.C., who visited that part of the world during August. At the time he wrote, he had seen Dr. Harvey and Dr. Livingstone and hoped to have a chance to meet Dr. Truesdell before returning home. In a later letter he mentioned David Hutchison, Sc. '24, superintendent of the Mackenzie River Transport for the Hudson's Bay Company.

Mr. McLeod had many interesting facts to tell of these hardy men. Dr. Harvey, for example, serves a territory that corresponds in size to that of Spain. Dr. Livingstone has been at Aklavik for two years; he is a veteran of the North, having spent considerable time in the eastern Arctic, Baffin Land, and Greenland.

Says Mr. McLeod, "I am writing to you because this trip, as every trip I make anywhere, makes me proud of Queen's . . . I recall your saying to us at Edmonton once that Queen's appealed to you because it bred pioneers; well, here are three of them along the Mackenzie River."

Professor Interned In Italy Unable To Return to Queen's

NABLE to get out of Italy either before or after that country's declaration of war, Prof. J. H. Brovedani, head of the department of Italian and Spanish and a member of the Queen's staff since 1914, will not be at the Univer-

sity this year. He went to Europe at the close of the 1939-40 academic year. After several futile attempts to leave Italy he sent the following discreet cable: "Sorry must be absent this scholastic term."

Dr. Duncan McArthur Appointed Ontario Minister of Education

DEPUTY minister of education since 1934, Dr. Duncan McArthur, Arts '08, has been appointed to the post of minister of education for Ontario, in succession to the late Dr. L. J. Simpson.

Dr. McArthur graduated from Queen's with a B.A. in 1907 and a M.A. in 1908. He received the honorary degree of LL.D. from his Alma Mater in 1935, from the University of Western Ontario in 1936, and from the University of Toronto in 1937.

From 1907 to 1912, Dr. McArthur carried on historical research in the Dominion Archives. Called to the bar of Ontario in 1915, he opened a law practice in Toronto. He became estates man-

ager of the Canada Trust Company in 1917 and assistant general manager of the London and Western Trusts Company in 1919. He served as head of the history department at Queen's from 1922 to 1934.

Among those who welcomed the new minister to the Ontario Cabinet was Hon. Eric W. Cross, Arts '24, minister of welfare. As a student at Queen's, Mr. Cross had studied under Dr. McArthur.

Dr. James Park Thomson Cited For Achievements In Queensland

FOUNDER of the Royal Geographical Society of Australasia (Queensland), Dr. James Park Thomson, LL.D. '03, was cited in a booklet recently published which presented a review of that organization. At the age of eighty-six, he is still actively associated with the branch established fifty-five years ago.

Many honours have come to Dr. Thomson and his talents have been lent to many projects, but it is safe to say that the work of the Queensland branch of the

COMING EVENTS

October 25—3 p.m., semi-annual meeting of the Board of Directors of the General Alumni Association, Room 208, New Arts Building.

4.30 p.m., annual meeting of the General Alumni Association, Red Room. Tea will be served.

8.30 p.m., University reception for Hon. and Mrs. C. A. Dunning, Grant Hall.

October 26—10.15 a.m., Autumn Convocation, Grant Hall. Hon. C. A. Dunning will be installed as Chancellor. Mr. Dunning and Mr. J. B. Tyrrell will receive honorary degrees.

10.30-11 a.m., Chancellor Dunning's address will be broadcast over the C.B.C. network.

2.30 p.m., autumn meeting of the Board of Trustees, Room 221, Douglas Library.

Royal Geographical Society ranks with the greatest of his achievements. In a tribute paid to him recently it was said that "his untiring efforts have enabled the Society to achieve an important part in the dissemination of reliable information covering the scientific, pastoral, agricultural, commercial, and educational life of the Australian nation."

Dr. Thomson has always maintained a deep interest in Queen's. Some years ago he donated to the University an ethnological, concological, and economical mineralogical collection that is highly prized.

ARMY LIST

NUMBER TEN in the series of monthly lists of those who have joined some branch of the fighting service is presented below. Readers are requested to send in news of alumni who are serving with the forces, either overseas or in Canada.

Appointment of Lieut.-Colonel L. F. Grant, Sc.. '26, as General Staff officer at Headquarters of Military District No. 3, Kingston, was announced by the Department of National Defence during September. Colonel Grant was formerly associate professor of engineering at Royal Military College, Kingston.

Lieut. Samuel Adelkind, Com. '39, who has been serving since last fall as Staff Sergeant for the Queen's C.O.T.C., recently received his lieutenant's commission. He is Acting Adjutant of the Contingent.

Royal Canadian Naval Volunteer Reserve—Sub-Lieut. Ronald C. Merriam, Arts '38.

Royal Canadian Artillery—Lieut. G. H. Lochead, Arts '32; Lieut. G. W. Wright, Sc. '40; Lieut. Freeman Waugh, Arts '34; Lieut. H. B. Zavitz, Sc. '28.

Royal Canadian Engineers—Lieut. M. A. Buell, Sc. '34; Lieut. A. C. Cluff, Sc. '36; Lieut. M. H. Hastings, Sc. '31;

Lieut. D. F. Morton, Sc. '40; Capt. T. D. K. Rooney, Sc. '26; Capt. K. J. Southern, Sc. '34; Lieut. G. E. Wilson, Sc. '31, Arts '35.

Royal Army Medical Corps — Capt. Colin S. Dafoe, Med. '36, i/c Warwick Military Hospital, Warwick, England.

Royal Canadian Army Medical Corps —Lieut. G. W. Blenkinsop, Med. '36; Major T. M. Brown, Med. '30, deputy assistant director of medical services; Lieut. W. G. Breckenridge, Med. '38; Lieut. G. D. Caldbick, Med. '37; Lieut. G. C. Caughey, Med. '37, i/c Warwick Military Hospital, Warwick, England; Lieut. G. H. Graham, Med. '36; Lieut. R. C. V. Gray, Med. '38; Capt. W. E. Glass, Med. '35; Capt. J. W. Hiltz, Med. '33; Capt. M. J. Kennedy, Med. '17; Lieut. J. G. K. Lindsay, Med. '27; Major G. F. McFadden, Arts '15, Med. '16; Capt. A. G. Minnes, Med. '36; Capt. H. S. Mitchell, Arts '25, Med. '27; Capt. P. A. Scott, Med. '24; Capt. Isaac Sutton, Med. '30; Lieut. D. W. A. Templeton, Med. '35; Capt. F. A. Vokes, Med. '29; Lieut. C. H. A. Walters, Med. '30; Lieut. N. L. Walker, Med. '28; Lieut. W. A. C. Watson, Arts '27, Med. '29; Capt. J. C. Whyte, Med. '30: Major H. M. Stephen, Arts '25, Med. '27 (Air Arm).

Infantry and Rifles — Lieut. Hilson Holland, Arts '28, Hastings and Prince Edward Regiment; Lieut. Arnley Holland, Arts '35, Hastings and Prince Edward Regiment; Lieut. Douglas McDonald, Arts '42; Lieut. D. B. Whytock, Com. '31, Hastings and Prince Edward Regiment; Lieut. Graham Thomson, Arts '34, P.W.O.R. (M.G.).

Royal Air Force—Capt. John S. Davies, Med. '36.

Royal Canadian Signals—Lieut. G. O. Gamble, Arts '32; Lieut. C. S. Juvet, Com. '33.

Royal Canadian Army Pay Corps—Norman Chalmers, Arts '38, Com. '40.

Royal Canadian Air Force — Flight-Lieut. P. Y. Davoud, Sc. '34; Pilot Officer N. S. Edgar, Sc. '39; Flying Officer B. W. King, Sc. '36; Pilot Officer Archie James, Arts '36; Flight Lieut. R. D. Mc-Roberts, Sc. '38; Flying Officer W. T.

Miller, Com. '32; Flying Officer A. W. Roberts, Com. '29; Flight Lieut. W. M. Stephen, Arts '36; Flying Officer Guy Minard, Sc. '28.

Fourth Bulletin Issued

BULLETIN Number Four in the series of publications brought out by the Industrial Relations Section of the School of Commerce and Administration was recently issued. Entitled The Economic Welfare of Canadian Employees, it is a study of occupations, earnings,

hours, and other working conditions, during the years 1913-1937.

Union Purchases Cooker

THE meals at the Students' Union should be even better than ever this year, now that the management has added a new "Aga" cooker to the cafeteria equipment, at a total cost of \$1700. It is interesting to note that in spite of advancing prices the charge to students remains the same as in previous years.

ATHLETICS

Intercollegiate Football Fans Have To Be Content With Memories

THE Richardson Stadium is strangely silent these days. Usually, at this time of the year, the gridiron is covered with aspiring and perspiring football players running, tackling, drilling, while the shouts of the athletes mingle with the comments of the students on the sidelines. But with Intercollegiate sport abandoned for the duration of the war, the grand old game of football has been laid on the shelf, and the undergraduates are busy elsewhere.

During the last Great War, no Intercollegiate football was played in 1915, 1916, 1917, and 1918. It is sincerely hoped that fans will not have to wait so long this time for a glimpse of their favourite sport.

Now would appear to be an excellent time to review the Tricolour's record in Intercollegiate football since the C. I. R. F. U. was formed in 1898. In the first game played Queen's dropped a 3-2 decision to McGill in Kingston. Trailing 2-0 at the end of the first half, the Tricolour tied the score in the second half, only to see the Redmen take the lead again and the game by a one-point margin.

The complete summary of all games is as follows:

	Won	Lost	Tied	For	Agst.
Varsity	123	69	7	2460	1607
Queen's	95	95	9	1776	1982
McGill	79	102	7	1723	1859
Western	24	36	2	472	562
Ottawa Coll	13	29	2	405	707
R. M. C	2	4	0	69	142

A complete record of all Queen's games won, lost, and tied is as follows:

	Won	Lost	Tied	For	Agst.
1898	0	3	0	10	23
1899	2	2	0	20	23
1900	2	1	1	43	26
1901	1	3	0	30	43
1902	1	2	1	13	27
1903	0	3	1	28	58
1904	4	1	Ô	77	32
1905	1	4	1	75	105
1906	2	3	0	77	63
1907	2	3	1	53	71
1908	5	1	0	102	50
1000	3	3	0		
1010			_	84	63
4044	3	3	0	67	53
1911	0	6	0	59	124
1912	2	4	0	42	74
1913	2	4	0	46	121
1914	0	4	0	46	93
1919	0	4	0	9	126
1920	0	4	0	13	108
1921	2	2	0	28	46
1922	4	1	0	62	54
1923	4	0	0	70	14
1924	4	0	0	51	27

Intramural Sports Programme Should Receive New Impetus

INTERCOLLEGIATE competition having been ruled out for the duration of the war, interest in the programme of intramural sports inaugurated at Queen's last year may be expected to receive a new impetus. Every student registered at the University will be given ample opportunity and inducement to participate in some line of athletic endeavour.

Mr. John Edwards, director of physical education, has prepared a booklet in mimeographed form that sets forth the organization, rules, and other information relative to the operation of the new programme. The sports covered include indoor softball, hockey, basketball, touch football, track and field events, swimming, cross-country running, tennis, skiing, handball, badminton, gymnastics, boxing, wrestling, golf, table tennis, and bowling.

The competition is intervear and interfaculty, and the system of allotting points is such that the titles and championships are not the prime factor in deciding the annual winner. Emphasis is laid on mass participation in sports rather than the development of individual stars or teams. The James G. Bews Trophy, presented to Queen's last year by the various alumni branches, is emblematic of the intramural athletic championship.

Sport Shorts

ANY Queen's football stars of former years are still participating in their favourite sport. . . . Doug Annan, George Sprague, Chuck McLean, Bernie Thornton have been playing with Toronto Argonauts. . . . Bill Brass is a member of the Toronto Balmy Beach team. . . . Abe Zvonkin is still wearing the colours of the Hamilton Tigers. . . . Jack Brown is also with the Tigers. . . . Joe Turner is a standout star with Calgary Bronks, strong contender in the Western Interprovincial League. Murray Griffin and Ted Edwards have been turning out with the Ottawa Rough Riders. . . . Jerry Conlin, now stationed Camp Borden, is counted on for the military team in the O. R. F. U. senior series. ... J. S. McDonell, for several years secretary-treasurer of the Athletic Board of Control at Queen's, is now a member of the personnel department of the Kingston plant of the Aluminum Company. . . . Ken Preston is doing some fine plunging with Regina Rough Riders. . . . Nick Paithouski has lined up with the new Sarnia team.

AT THE BRANCHES

Winnipeg

WITH Principal Wallace and Mr. André Biéler, resident artist at Queen's, as guests of honour, a highly successful dinner-meeting was held at the Hudson's Bay Company store on Sep-

tember 14. Approximately sixty alumni and friends were in attendance, including many theological graduates who were in the city as delegates to the meetings of the General Council of the United Church of Canada. R. D. Guy, Arts '05, president, was in the chair.

Mr. Biéler, who had spent the summer as director of the University of Alberta's summer school of art, was the chief speaker, his subject being "Art and Its Place in the Interpretation of Our Times." D. H. Laird, Arts '98, introduced the speaker; and a vote of thanks was moved by Prof. V. W. Jackson, Arts '02. Principal Wallace, a Council delegate, also spoke, outlining Queen's contribution to the Canadian war effort.

Seated at the head table were Mrs. Robert Laird (Henrietta Odell), Arts '95, Mrs. James A. Richardson, Mr. and Mrs. Guy, Mr. and Mrs. W. J. Phillips, Mr. D. H. Laird, Mr. Biéler, and Principal Wallace.

During the evening Rev. P. T. Pilkey, Arts '10, led the gathering in college yells. Mr. Pilkey made no secret of the fact that he believed theological alumni were the best products of Queen's.

Among those present were Rev. G. D. Campbell, Arts '95, Theol. '98, Rev. T. C. Smith, Arts '05, Rev. D. D. Gaynor, Arts '29, Theol. '30, Dr. R. L. Cockfield, Med. '31, Rev. R. W. Beveridge, Arts '04, Theol. '07, Rev. D. A. MacKeracher, Arts '03, Theol. '06, Dr. L. H. McLean, Arts '96, Theol. '03, Rev. W. N. Omond, Arts '09, Theol. '13, Rev. A. J. Wilson, Arts '12, Theol. '15, D.D. '40, Rev. G. M. Thompson, Arts '78, Theol. '81, Rev. Mr. Pilkey, J. K. Allen, Arts '04, Professor Jackson, Mrs. L. M. Macdonnell (Ursilla Macalister), Arts '00, C. E. Joslyn, Sc. '16, and Mrs. Joslyn, H. M. McIntosh, Arts '12, J. E. S. Dunlop, Arts '04, S. F. Ryan, Arts '27, and Mrs. Ryan (Kathleen Whitton), Arts '26, V. C. Jones, Sc. '23, Miss Muriel Lewis, Mrs. Myrtle Lewis, Arts '10, Miss Eliabezth Francis, Arts '07, Miss Ann Francis, Miss Luella Scholes, Arts '13, Mrs. R. M. Fisher (Mable Scholes), Arts '13, Miss Betty Laird, Arts '36, W. F. Loucks, Arts '10, L. I. Crocker, Arts '26, and Mrs. Crocker, Mrs. W. W. Cross (Katharine McConkey), Arts '03, Prof. G. H. Herriott, Sc. '07, and Mrs. Herriott (Marion Hewton), Arts '11, Mr. and Mrs. Lawrence Palk, J. L. MacDougall, Arts '31, James A. Richardson, Arts '43, and W. F. Rannie, Arts '38.

Ottawa

Competing against a field of some of Ottawa's finest golfers, R. W. Warwick, Arts '09, captured the prize for low gross score at the annual tournament held by the Ottawa branch, August 28, at the Gatineau Country Club. A. G. Timmins, Sc. '27, won the second low gross, Mr. L. A. Kane the low net, and W. H. Losee, Sc. '12, the second low net prizes. Mr. Losee and D. Ward McGill, Com. '31, Arts '33, were in charge of play.

At the dinner held afterwards, Dr. C. W. Drury, Sc. '09, chairman of the Athletic Board of Control at Queen's, gave a preview of the Intercollegiate sports programme. In the absence of President D. K. MacTavish, Arts '20, A. K. Light, Sc. '17, acted as chairman. He was assisted in his duties by Dr. O. E. Ault, Arts '24.

New York

A MOST interesting news letter has been sent out to all graduates and former students of Queen's in the New York area in an effort to keep alive interest in the General Alumni Association and in Queen's. It is planned to issue similar letters from time to time.

The Society has passed a resolution that the Association offer an award each year to the branch that has the highest percentage of paid-up members. This suggestion will be considered at the meeting of the Association on October 25.

Toronto

THE first meeting of the luncheon group for 1940-41 was held on October 7 at the Picadilly hotel with a large number of alumni in attendance. Squadron Leader Dave Harding, Arts '25, was the guest speaker, and his remarks were greatly enjoyed.

Niagara Peninsula

At the business meeting held October 2 at Niagara Falls, Ontario, A. L. Brooks, Arts '14, Welland, was elected president for the ensuing year.

ALUMNI NEWS

Births

Acton—At the Ottawa Civic Hospital, on August 16, to W. A. Acton, Sc. '29, and Mrs.

Acton', a son.

Anderson—At the Kingston General Hospital, on August 29, to Capt. W. A. B. Anderson, Arts '37, and Mrs. Anderson, a son.

Batzold—At Jackson Heights, N.Y., on June 29, to H. A. Batzold, Sc. '23, and Mrs.

Batzold, a daughter.

Billingsley—On' August 26, at the General Hospital, Sarnia, Ont., to A. D. G. Billingsley, Arts '33, and Mrs. Billingsley (Ruth Bald), Arts '34, a son (James Barrie).

Caswell—On September 13, in the General Hospital, St. Catharines, Ont., to Dr. C. B. Caswell, Med. '36, and Mrs. Caswell,

a daughter (Juliana).

Dickson—At the Western Hospital, Toronto, on September 12, to Capt. R. C. Dickson and Mrs. Dickson (Constance Grant), Arts '34, a son.

Evely—At the Private Patients' Pavilion, Toronto General Hospital, on September 7, to N. H. Evely, Com. '32, and Mrs. Evely, a

son.

Hart—At St. Joseph's Hospital, Sudbury, Ont., on August 22, to R. C. Hart, Sc. '33, and Mrs. Hart (Marion Truscott), Arts '31, a daughter.

Hoffman—At the Youville Hospital, Noranda, Que., on September 21, to W. A. Hoffman, Sc. '34, and Mrs. Hoffman (Carmel Milne), Arts '33, a daughter (Margot Sally).

Love—At the Kingston General Hospital, on August 10, to G. C. Love, Sc. '27, and

Mrs. Love, a son.

McQueen—Recently in Bloomfield, Ont., to Dr. K. E. McQueen, Arts '27, Med. '30,

and Mrs. McQueen, a daughter.

Miles—At the Ottawa Civic Hospital, on September 21, to Flight-Lieutenant Charles Miles and Mrs. Miles (Edith Peacock), Arts '35, a daughter.

Moore—At the Kingston General Hospital, on September 24, to Dr. A. H. Moore, Med. '35, and Mrs. Moore, Mattawa, Ont., a

son.

Morse—At the Port Hope Hospital, Port Hope, Ont., on September 10, to E. W. Morse, Arts '35, and Mrs. Morse, a daughter (Wendy Diana).

Murray—At the Kingston General Hospital, on September 1, to Dr. R. B. Murray, Med. '35, and Mrs. Murray (Helen Mylks),

Arts '33, Markdale, Ont., a son.

Smith—On May 28, at Nakurn War Memorial Hospital, to L. M. A. Smith, Sc. '36, and Mrs. Smith (Evelyn Shillington), Arts '35, of Kitere, Kenya Colony, a son.

Stevenson—At the Civic Hospital, North Bay, Ont., on September 24, to J. G. A. Stevenson, Sc. '28, and Mrs. Stevenson, a daughter

Storms—On August 10, at the Mountain Hospital, Hamilton, Ont., to R. G. Storms, Sc. '34, and Mrs. Storms, a daughter.

Walker—On October 7, at Toronto Western Hospital, to Stanley Walker, Com. '34,

and Mrs. Walker, a daughter.

Watt—At St. Mary's Hospital, Timmin's, Ont., on September 10, to Dr. W. Gordon Watt, Med. '29, and Mrs. Watt, a son.

Marriages

Armstrong—On September 21, in the Presbyterian Church, Cobourg, Ont., Helen Sarah Christine Armstrong, Arts '26, to Mr. John A. Layton, Great Village, N.S.

Baird—Recently at Knox College Chapel, Toronto, Evelyn Maud Worthington to Robert Frank Sherman Baird, Arts '23, Toronto.

Binks—On September 28, in Queen Street United Church, Kingston, Erma Mae Reynolds to Wyman Rodger Binks, Sc. '40.

Blay—On August 31, in St. Andrew's Church, Gananoque, Ont., Doris Mae Gray to Roy Albert Blay, Sc. '38. They are living at Apt. 103, 2651 Bloor St. W., Toronto.

Brock—On September 24, at Ridley College Chapel, St. Catharines, Ont., Elizabeth Stacey Brock, Arts '39, to Mr. Norman Albert Chapter Cont.

bert Creet, Sudbury, Ont.

Brunton—At St. James's Cathedral Chapel, Toronto, on July 1, Helen Thompson (Arts '30, Saskatchewan), to Ray Brunton, Arts '34, of the staff of the high and vocational school, Timmins, Ont.

Burr—On August 24, in the Church of St. John the Evangelist, London, Ont., Mary Eloise Tennent to Douglas Gordon Burr, Arts '36. Dr. Ronald Burr, Med. '32, Kingston, was groomsman and Whitney Shannon, Arts '36, was an usher.

Byrne—In St. Lawrence's Church, Barry's Bay, Ont., on October 1, Norah Murray to Dr. John Vincent Byrne, Med. '35. They will live in Trenton, Ont.

Clazie-Pannell—On August 31, in Glebe United Church, Ottawa, Ont., Donn'a Jean Pannell, Arts '36, to Lieut. James Arthur Clazie, R.C.E., C.A.S.F., Arts '35, Sc. '37.

Coldwell-Dunn—On August 24, in Elgin, Ont., Helen Elizabeth Dunn, Arts '41, daughter of Mrs. James Dunn and the late Dr. Dunn, Med. '10, to John Major Coldwell, Arts '40.

Cole-Howard—Recently in Talara, Peru, Ruth Enid Howard, Arts '38, to Charles Othel Cole, Sc. '38, of the International Petroleum Company, Talara.

Conlin-Byrne — Recently in Toronto, Helen Margaret Byrne, Arts '42, to Lieut. Gerard (Jerry) Herbert Conlin, Sc. '40.

Davis—At Our Lady of Mount Carmel Church, Ridgewood, N.J., on October 12,

Greene—On September 5, in the chapel of Holy Blossom Synagogue, Toronto, Rita Merle Hands to Lorne Hyman Greene, Arts '37, Toronto.

Hallett—On August 17, in St. Catherine's Church, St. Catharines, Ont., Marion Patricia Welsh to Robert Edwin Hallett, Sc. '33. Wilfrid Newman, Sc. '33, was an usher.

Hamilton — On September 28, in the Church of Emmanuel, Belleville, Ont., Lois Birdie Hounslow to William Gerald Hamilton, Arts '38, Sc. '40. W. H. Mable, Sc. '40, was groomsman. They will live in Toronto, where Mr. Hamilton is on the staff of the Ontario Hydro-Electric Power Commission.

Hancock—On June 20, at St. Thomas' Church, Hamilton, Ont., Eileen Maude Hancock, Arts '35, to Mr. F. Kenneth Kent, Toronto.

Hazelgrove—On September 16, at St. James' Church, Kingston, Alice Axford to Alan Ronald Derrett Hazelgrove, Sc. '39. They will live in Toronto.

James—On August 31, in Toronto, Wanda Isobel Till to Francis Edward James, Sc. '31, Montreal.

Keith—On September 21, at the home of the bride's parents, Schumacher, Ont., Mary Erma Skavlem to Dr. MacKenzie Lawrence Keith, Sc. '36 (Ph.D. M.I.T), of the geological staff at Queen's. Kerr-Martin—On September 16, in St. Paul's Church, Stirling, Ont., Ruth Eleanor Martin, Arts '39, to Hugh Archibald Kerr, Sc. '39, Hamilton, Ont. Thomas Kerr, Sc. '38, was groomsman, and G. T. Wright, Sc. '39, was an usher.

Kraft—On September 2, in St. Mary's Cathedral, Kingston, Carmel Rita Lambert to Dr. Karl Augustine Kraft, Med. '30, Hamilton.

Lochead—On September 7, in the Anglican Church of St. John the Evangelist, Kitchener, Ont., June Forsyth to Lieut. George Herbert Lochead, R.C.A., Arts '32, son of Col. W. M. O. Lochead, Arts '96, and Mrs. Lochead. Lieut. James Lochead, Arts '32, was groomsman, and A. B. Miller, Arts '33, was one of the ushers.

McCann—In Knox Presbyterian Church, Westport, Ont., on August 31, Marie Emma McCann, Arts '35, to Mr. Edgar E. Bilton.

Macdonald-Morgan—On August 24, at "The Retreat," Arnprior, Ont., Ruth Morgan, Arts '38, to Dr. Arthur Goodwin Macdonald, Med. '39, son of Dr. D. J. Macdonald, Med. '06, and Mrs. Macdonald, Cloverdale, B.C. They will reside in Ottawa.

McIlraith-Soper—On September 28, at Christ Church Cathedral, Ottawa, Patricia Soper, Arts '38, to Kenneth MacLeod McIlraith, Arts '30.

McLaughlin—On July 20, in Toronto, Ethel Wattie to W. E. McLaughlin, Arts '36. They are living at 61 Maxwell Ave., Apt. 18, Toronto.

Marett — On September 9, at St. Andrew's United Church, Marmora, Ont., by Rev. Dr. W. P. Fletcher, Arts '96, Dorothy Jane Marett, Arts '35, to Mr. Robert Gordon Bond, Kingston'.

Muir—In Chalmers Church, Kingston, on August 24, by the Rev. Dr. G. A. Brown, Arts '04, Theol. '07, Margaret Elizabeth Muir, Arts '40, to John Athcarne Partridge,

Kingston.

Newman — In St. George's Cathedral, Kingston, on September 2, Freda Lilian Hird to William Charles Newman, Arts '39.

They will live in Toronto.

Ostrosser—On September 14, in St. Matthew's Anglican Church, Timmins, Ont., Marion Ostrosser, Arts '39, to Mr. F. Evans.

Peck—In September, at St. Monica's Church, Toronto, Barbara Helen Flinn to Charles Carroll Peck, Arts '39, Chicago, Ill.

Peters—In St. Paul's Anglican Church, Toronto, on August 29, Mabel Elizabeth Coulson to James Hathaway Peters, Com. '36, Toronto. R. W. Southam, Arts '36, Ottawa, was groomsman.

Pollard—On August 31, in Toronto, Margaret Adelaide Oliver to William Austin Pollard, Sc. '40. They will live in Toronto.

Sargent—At Kingston, on August 24, by the Rev. J. R. Watts, Arts '01, Theol. '04, Dorothy Estelle Gage to Dr. Bernice Weldon Sargent, Arts '26, of the physics staff at Queen's.

Sharp—At the home of the bride's parents, Hamilton, on August 31, Mary Constance Stephens to Roy Clement Sharp, Arts '33. They will live at 189 Cottingham St., Toronto.

Swingler-Morris—On September 28, in St. John's Anglican Church, Smiths Falls, Ont., Wanda Ethel Morris, Arts '37, to Russell Henry Swingler, Sc. '37, Ottawa.

Teal—On September 16, in the chapel of St. Michael's Church, Fort Erie North, Ont., Charlotte Kathryn Rebstock to Joseph Kent Teal, Sc. '37. They will live in Timmins, Ont.

Thompson—At St. George's Cathedral, Kingston, on September 11, Edith Margaret Ward to Charles Allan Thompson, Sc. '37, Kitchen'er, Ont.

Thompson—On August 10, in St. John's Anglican Church, York Mills, Ont., Frances Margaretta McClelland to Melville William Thompson, Arts '38. They are living in Weston, Ont., where Mr. Thompson is teaching in the collegiate institute.

Weir—On September 9, at Newman Club Chapel, Toronto, Madeline Byrnes to John Thomas Weir, Arts '35, Toronto.

Whyte—Recently in the vestry of Westminster United Church, Regina, Sask., Helen May McKay Jeffrey to Captain John Clinton Whyte, R.C.A.M.C., Med. '30.

Zufeldt—At the home of the bride's parents, Tamworth, Ont., on August 10, Mildred Margaret Anna Redden to Franklin Clare Zufeldt, Arts '37, Ottawa.

Deaths

Bryson, Arts '99, died at her residence in La Jolla, California, on September 4. Dr. Bryson had moved to the United States twenty years ago after having established a successful medical practice in her home town, Ottawa, Ontario. Born at Ottawa in 1874, she attended Coligny College before entering Queen's in 1895. After graduating with her B.A. in 1899, she enrolled at the University of Toronto, where she obtained her M.D., C.M. degrees. She started a practice in Ottawa, which she carried on until forced to retire because of illness. Left to mourn her loss are one brother and five sisters, including Mrs. G. H. Ross (Mary Bryson). Arts '05.

Conway—In ill health for some time, Morris H. Conway, Com. '33, died at Kingston,

Ontario, on September 8. Mr. Conway had been receiving treatment in Hamilton General Hospital before going to Kingston. Born at Nile, Ontario, in 1911, Mr. Conway received his preliminary education at Woodstock High School. He entered Queen's in 1929 and graduated four years later with his

M. H. CONWAY

B.Com. degree. For a time he was in the accounting department of the Canada Life Assurance Company, and then he joined the staff of the Canada Dry Ginger Ale Company, where he was made supervisor of sales for the Montreal branch. Later he was transferred to Hamilton, where he was stationed for three years. He is survived by his mother and his wife (Helen

Matheson, Arts '34). Gates—Engineer for the Canadian General Electric Company, Archibald B. Gates, Sc. '11, died suddenly at his home in Peterborough, Ontario, on September 7, at the age of fifty-two. He had joined the Company immediately after graduation from Queen's, enrolling for the test course. Later he was transferred to the engineering department, where he worked until 1915, when he left to try his hand at sales work. He returned in the early part of 1917 and had been associated with this firm ever since. Mr. Gates was a general engineer and had charge of searchlight and refrigeration engineering. His driving force made itself felt through the organization, and he was particularly successful in conducting the refrigeration programme of work since its beginning in 1931. In the fall of 1937 he collapsed while attending a meeting of the Engineering Institute of Canada at Toronto and was ill until the latter part of 1938. His health had not been good for the past year, but he had been fairly active. Mr. Gates was born at Kingston, Ontario, and was educated in the schools of that city. He

entered Queen's in 1907 and graduated four years later with his B.Sc. in electrical engineering. His interests were many. He was a past president of the Kiwanis Club, superintendent of Trinity United Church Sunday School, a member of the Church Official Board, and a Councillor of the Engineering Institute of Canada. Among the survivors are his wife and two sons.

McKenty—Prominent in Canadian medical annals, Dr. James McKenty, Med. '90, died at his home in Winnipeg, Manitoba, on August 11, after a lengthy illness. Dr. McKenty was born at Collins Bay, Ontario, in 1860, and attended the public school there and the collegiate institute at Kingston. He entered Queen's in 1886, and graduated with his M.D., C.M. degrees four years later. The following year he went to Gretna, Manitoba, where he practised until 1902, when he moved to Winnipeg. As a city doctor he had greater opportunity to specialize and he turned to surgery. His skill won him wide acclaim not only in Winnipeg but all across Canada. He served as president of the Canadian, Manitoba, and Winnipeg Medical Associations. He was formerly professor of surgery at the Manitoba Medical College and was on the board of governors of that institution. Dr. McKenty was, at various times, chief of staff of St. Boniface, St. Joseph's, and Misericordia hospitals. From 1931 until 1939 he was one of two representatives for St. Paul's College on the senate of the University of Manitoba. He took postgraduate work at Berlin and Vienna and was awarded an F.R.C.S. Three years ago he retired from active practice. Among the survivors are three daughters, two sisters, and a brother, F. D. Mc-Kenty, Arts '98, Winnipeg.

MacLachlan—Distinguished educationist, missionary and founder of the International College at Smyrna, Turkey, Rev. Alexander MacLachlan, Arts '84, D.D. '11, died at his home in Kingston, Ontario, on September 8. Had he lived ten more days he would have been eighty-two years of age. It has been said of Dr. MacLachlan that he did more than any other single man for the education of the Turks. Born at Erin, Ontario, he was educated in the schools of that district and at Toronto. He enrolled at Queen's in 1880 and received his B.A. degree four years later. He began the theological course at Queen's, but later transferred to Union Seminary in New York. In 1887 he was called by the American Board of Commissioners for Foreign Missions to establish a memorial college to St. Paul at Tarsus in Cilicia, Turkey. When this school had been founded, he was asked to take charge of educational work in Smyrna. Beginning in 1891 and carrying on through the depression of the nineties with practically no support from the mission board, he developed a school of such excellence that in 1903 the institution was chartered as International College. The college was placed under the charge of an independent

board of trustees, though continuing in close relationship with the American board. In 1910-11, while on furlough in Canada, Dr. MacLachlan was presented with honorary degrees by Queen's and New York University. He secured such large gifts for his International College that the institution soon embarked on a new era of prosperity. During the Great War, Dr. MacLachlan, as a British subject, was technically a prisoner of war, but he continued in charge of the College. At the end of the War, he was host to more than 2,000 British and Indian prisoners of war, exchanged through the College at the request of the Turkish Government. He organized a huge Near East relief unit and then left for home on furlough. On his return he found the College facing seemingly insurmountable difficulties, but he persevered and led the institution to even greater success. He was seriously injured by brigands during the Symrna disaster in 1922 and for a while he lived in Greece, but not until he had completed arrangements for the operation of the College during his absence. He retired and came to Canada in 1926, but six years later, although still broken in health, he returned to his beloved College, where he was able to render the most important service of his life by reorganizing the institution for an almost exclusive Turkish constituency. Dr. MacLachlan introduced football and other Canadian sports into the Smyrna area, and himself won an open tennis championship

when he was more than fifty. He built and equipped an observatory at the College which gave time to the community. His records of earthquake and meteorological information were valued in Cairo and London. He installed the first electric lighting plant in Turkey. During all his years in Smyrna he was assisted by his wife, who survives him. Other members of his immediate family are one brother, one daughter, and three sons: Grant, Sc. '22, Ian, Sc. '25, Arts '26, and Capt. Bruce, Arts '14. His will provided that money that otherwise would have been spent in an elaborate funeral should be turned over to the Kingston branch of the Red Cross Society for relief purposes.

Mabee—Country doctor in the same community for more than half a century, Dr. James Edmond Mabee, Med. '87, died at his home in Odessa, Ontario, on August 20, at the age of eighty-nine. For fifty-three years

carried on medical practice in Odessa, and for all but one year of that time he was medical health officer for the Township of Ernesttown, a record believed to be equalled anywhere in Canada. Dr. Mabee was born near Beamsville, Ontario, and his family moved Odessa to when he was six years old. He received his early educa-

DR. J. E. MABEE

tion there and later attended Sydenham High School and Toronto Normal School. Entering Queen's in 1884, he secured his M.D., C.M. degrees three years later. Immediately after graduation he bought a practice in Odessa, which he carried on for the rest of his life. Dr. Mabee was the typical country doctor and was respected all over the countryside as a confidant, friend, and counsellor. Despite his long years of practice he had not actually retired from the profession, though in latter months he had not done extensive work. He was a life member of the Ontario Medical Association. Three years ago he was honoured by the Kingston and Frontenac Medical Society at a dinner held in the Kingston General Hospital, on the occasion of his fiftieth anniversary as an active practitioner. He was presented with a gold-headed cane and the warm congratulations of his fellow doctors. Dr. Mabee had taken a warm interest in the militia in his younger days and for a time he was commanding officer of the old 47th Regiment, which had a company in Odessa. During the first Great War he took part in the work of the Red Cross. Included among the survivors are his second wife and his son, Dr. Horace C. Mabee, Med. '10, Kingston.

Marcellus—After an illness of a year, Dr. Eathen Henry Marcellus, Med. '95, died at his residence at Iroquois, Ontario, August 31, at the age of sixty-seven. Of United Empire Loyalist stock, he was born at Williamsburg. He received his early education at Iroquois and Morrisburg, and entered Queen's in 1891, graduating four years later with his M.D. degree. For twenty years he practised medicine at Finch, also serving as reeve of that community. During the Great War he served in England and France as a captain with the Royal Canadian Army Medical Corps. On his return to Canada he opened a practice at Iroquois. Active in municipal affairs Dr. Marcellus had been a member of the Iroquois High School Board for fifteen years. He was keenly interested in all sports. Among the survivors are his wife, one daughter, and one son, Dr. C. R. Marcellus, Med. '37.

DesRochers—After an illness of ten days, Alphonse Alexander DesRochers, Arts '15, died at Kingston, Ontario, on September 19, at the age of fifty-one. Born in Kingston and educated in the schools of that city, he entered Queen's in 1909, and obtained his B.A. degree in 1915. Surviving are his mother and one sister. Interment was made in St. Mary's Cemetery, Kingston. Among the pall-bearers were W. O. Dwyer, Arts '07, Sc. '09, and Dr. F. X. O'Connor, Med. '14.

O'Hara—One of Queen's most distinguished graduates, beloved by all who knew her, Dr. Margaret O'Hara, Med. '91, LL.D. '32, died at her home in Smiths Falls on August 28, after a long illness. Dr. O'Hara had been a medical missionary in India for thirty-four years. The three great enthusiasms of her life were said to be the Presbyterian Church, Queen's University, and the British Empire, all of which she served faithfully and well. Dr. O'Hara was born at Port Elmsley, Ontario in 1855. She attended schools in Smiths Falls and enrolled at Queen's in 1887. Four years later she obtained her M.D. degree and almost immediately proceeded to Central India as a representative of the Presbyterian Church in Canada. A few years later she was the pioneer missionary in Dhar, where she established a medical mission. To this work she devoted her life, and her hospital became not only a haven but a training-school to which she transplanted the traditions of the Queen's Medical Faculty. She remained in Dhar for thirty-two years. In recognition of her "public services in India," Dr. O'Hara was one of the first to receive the proud distinction of the Kaisar-I-Hind medal. In 1927, at the age of seventy-two, she retired from active service and returned to Canada. Her retirement proved to be merely nominal, however, as she was soon engaged in missionary work again, this time travelling across the Dominion, telling Canadians of the work of the church in India. To the end of her days she was a staunch Queen's supporter, and in 1932 her Alma

THE EMPIRE

THE DESTINY OF THE DOMINION

Out of the melting pot of geography and history, simmering for four hundred years over a rich fire set by Mother Nature, there is arising to-day a vital cog in the world's greatest Empire . . . a new nation . . . Canada.

The people are part and parcel of that nation and Canadians do well, therefore, to think about their country, its resources, industries, and position . . . and to be thankful for the riches which Nature stored away in mining areas, forests, wheat fields and waters.

Reminding themselves of these things, they cannot fail to thrill to Canada's future, squaring back their shoulders with determination to see each job through, proud that Canada has come into her own as a vitally important part of the great British Commonwealth of Nations. Canada can indeed be proud of the service she is rendering the Empire by contributing, in

such great measure, those vital essentials necessary to keep the Heart of Empire throbbing. The Explosives Division of Canadian Industries Limited is proud, too, of the part C-I-L Explosives are playing in the development of mine, forest and farm which enables Canada to push back still further her frontiers of trade.

Mater gave her an honorary LL.D. degree. Every year since the formation of the Lanark County branch of the General Alumni Association in 1936, she had been appointed honorary president. Added to her other achievements was a book, "Leaves of the Lotus," which won her considerable fame. Among the survivors are two sisters and one brother. The University was officially represented at the funeral by Principal Wallace and Vice-Principal McNeill.

Putman — One of Canada's outstanding educationists, Dr. John H. Putman, Arts '99, died at his home in Ottawa, Ontario, on September 12, after an illness of some months. Dr. Putman had served as chief inspector of schools at Ottawa since 1910, and he was the first to introduce special classes for both mentally and physically handicapped children, an example of which has since been followed in the leading centres of the Dominion. Born at Lincoln, Ontario, in 1866, he attended Smithville public school, St. Catharines high school, and Toronto Normal School, before coming to Queen's in 1896. He obtained his B.A. degree three years later, his B.Paed. in 1907, and his D.Paed. in 1910. He also held an honorary degree of LL.D. from the University of Toronto. He taught school in several communities, includin's Seneca Township, Ancaster, Toronto, and Ottawa. In 1910 he was appointed chief inspector of Ottawa schools. He served as chairman of the conciliation board of the department of labour, established in 1919 to settle the wages of printers in Ottawa; chairman of the commission appointed by the Ontario Government to investigate irregularities in the departmental examinations, 1921; and chairman of the commission established to investigate the educational system of British Columbia, 1924-25. He was a member of the commission which administered teachers' pensions for Ontario from 1917 to 1935. many offices in organizations, including the secretaryship of the Canadian Educational Association and the presidency of the Ontario Educational Association. The author of four books, he made numerous other contributions to literature in the form of reports and articles on education to various newspapers and journals. He was a member of the Ottawa Board of Control. Among the survivors are four son's, including C. V. Putman, Sc. '15, and Cecil E. Putman, Arts '19, and four daughters, of whom Miss Irene Putman, Arts '29, is one. deceased him last January. His wife pre-

Van Blaricom—Editor of the "Canadian Lumberman," George B. Van Blaricom, Arts '92 died at his home in Toronto, Ontario, on July 23. Mr. Van Blaricom was born of United Empire Loyalist stock at Belleville, Ontario, and received his preliminary education in the schools of that city. Later he attended Queen's for two sessions, being enrolled in the Arts faculty. For several years he held editorial positions in Peterborough, Woodstock, and Ottawa, and was

engaged in trade journalism. Later he became a noted authority on problems in the lumbering business. He was secretary of the Toronto Hoo-Hoo Club and the fraternal organization of lumbermen, and he was a member of the Ontario Committee of Savethe-Forests.

Notes

1880-1889

Dr. Hugo Erichsen, Med. '83, Birmingham, Mich., celebrated his eightieth birthday on June 22 last. Dr. Erichsen is in charge of the cremation department of the publication, "American Cemetery," and was the author of an article called "After Eighty Decades," which appeared in the July, 1940, issue.

Rev. John A. MacDonald, Arts '88, is

spending the winter in Victoria, B.C.

Alexander H. D. Ross, Arts '88, is now retired and living at 651 Lyon St., Ottawa. After leaving Queen's Mr. Ross taught for several years in the high schools at Almonte, Morrisburg, Ottawa, and Tillsonburg. From 1904 to 1906 he did postgraduate work in forestry at Yale University, where he received his Master of Forestry degree. Since then he has divided his time between forestry work and teaching. In 1906 he was technical adviser to the Forestry Branch, Department of the Interior, Ottawa, and from 1907 to 1914 lecturer in forestry at the University of Toronto, during which time he also acted as consulting forester to Canadian Pacific Department of Natural Resources, Calgary. He has been principal of the high schools in Bowmanville, Barrie, Arnprior, and Watford, and was mathematical master for several years in the Fort William Collegiate Institute. In 1927 he published the first comprehensive history of the founding and growth of Ottawa. Since his retirement in 1939 he has been engaged in writing and is now completing an extensive work on the explorers of Canada—from earliest times to the latest findings of various branches of the federal services. He is also revising a piece of work entitled "The Magical Properties of Numbers."

1890-1899

Rev. J. R. Frizell, Arts '97, is minister of St. Paul's Presbyterian Church, Vancouver, B.C.

Rev. Dr. R. J. Hutcheon, Arts '92, of Orlando, Florida, preached for four weeks this summer in the Church of Our Father, Unitarian, Ottawa.

Rev. William McDonald, Arts '99, Theol. '01, recently retired from the active ministry and is now living at 35½ Dennistoun

Ave., Peterborough, Ont.

Dr. W. B. Munro, Arts '96, LL.D. '12 (Ph.D. Harvard), professor of history and government at the California Institute of Technology, Pasadena, had an interesting article entitled "Some Economic Repercussions of Medical Progress" in the August, 1940, issue of the "Scientific Monthly." The

article has since been published in booklet form.

Rev. Robert Young, Arts '90, Theol. '98, is now retired and living at Stouffville, Ont.

1900-1909

Dr. F. C. Anderson, Arts '00, Med. '12, Ottawa, has been appointed attending physician for the Glebe and Lisgar Collegiates, Technical High School and the High School of Commerce, Ottawa.

Dr. S. Gordon Chown, Arts '09, Med. '11, Winnipeg, was one of the lecturers at the two-day convention of the public health nursing service held recently in Winnipeg in connection with the annual meeting of the Canadian Public Health Association.

Dr. J. J. McCann, Med. '09, Renfrew, Ont., was elected second vice-president of the Canadian Public Health Association at the annual meeting of that body held in Winnipeg in September.

Brig.-General C. H. Maclaren, Arts '02, Ottawa, has been elected a director of both the Toronto General Trusts Corporation and the Corporation's Advisory Board in Ottawa.

Dean John Matheson, Arts '01, Queen's University, and Rev. Dr. A. D. Matheson, Arts '12, Theol. '16, of Quebec City, were bereaved on August 20 by the death of their mother, Mrs. John Matheson, of Cornwall, Ont.

Rev. Dr. D. N. Morden, Theol. '07, LL.D. '34, Perth, Ont., concluded forty-nine years

in the active ministry and six years as pastor of St. Paul's United Church, Perth, on June 23 last. The occasion was marked by a presentation ceremony at his church, when an address of appreciation was read and a presentation made to both Dr. Morden and his wife.

Rev. Dr. M. N. Omond, Arts '09, Theol. '13, and Mrs. Omond (Olga Harvey), Arts '12, were recently honoured by the congregation of St. Andrew's United Church, North Bay, on the occasion of their silver wedding anniversary. The twenty-fifth anniversary of Mr. Omond's ordination was also celebrated at the same time.

1910-1919

Burton Asselstine, Sc. '11, is district manager for the Commercial Oil Company, Belleville, Ont.

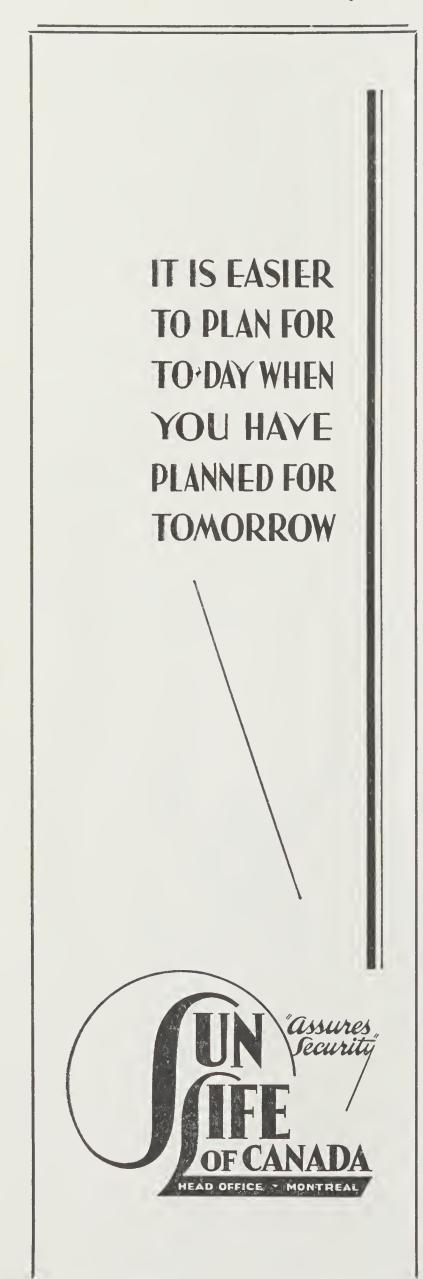

Joseph Bennett, Sc. '11, is superintendent of the elevator department of the Alberta Wheat Pool, Vancouver, B.C.

'A. F. G. Cadenhead, Arts '13, was elected president of the Canadian Institute of Chemistry at the annual meeting of that body held at the Seigniory Club, Que., last May.

Lt.-Col. H. C. Craig, Sc. '15, is treasury officer in the Department of Finance, Ottawa. He lives at 340 Second Ave., Ottawa.

R. A. Elliott, Sc. '10, has been promoted to the position of general manager of the Deloro Smelting and Refining Company, Deloro. Ont.

D. C. Fraser, Sc. '14, is office manager for Henry K. Wampole and Company, Perth, Ont.

Rev. C. C. Gilbert, Arts '19, Theol. '24, is minister of the United Church, Kenmore, Ont.

Dr. B. T. McGhie, Med. '16, Deputy Minister of Health for Ontario, was elected a vice-president of the Canadian Public Health Association at the 29th annual meeting held in Winnipeg recently.

S. E. MacGregor, Sc. '12, is a consulting metallurgist at Detroit, Mich. He lives at

945 Campbell Ave., Windsor, Ont. W. H. Slinn, Sc. '16, is superintendent of construction for the Bell Telephone Company of Canada, Toronto.

G. O. Vogan, Sc. '17, is now chief engineer of power plants for the Quebec Streams Commission. His headquarters are at 59 St. James St. W., Montreal.

Rev. J. F. Wedderburn, Arts '14, Theol. '17, has been inducted into the pastorate of St. Andrew's Presbyterian Church, Kingston.

1920-1929

J. W. Eggleston, Arts '26, is one of the press censors for Canada.

Dr. Maxwell Gosse, Arts '24, Med. '26, Poughkeepsie, N.Y., was bereaved on July 1 by the death of his wife. Mrs. Gosse was killed in a motor accident near Lakewood, N.J., when the car she was driving left the highway and struck a tree. Her two children who were in the car were only slightly injured.

Dr. C. H. Kindle, Arts '26, of New York City, Dr. E. D. Kindle, Arts '30, Ottawa, and L. F. Kindle, Arts '26, Ottawa, were bereaved on August 29 by the death of their father, Dr. Edward M. Kindle, one of Canada's outstanding geologists.

Dr. L. R. Morse, Med. '26, formerly of Norwich, Conn., is now at Cedar Crest Sanitorium, Hartford, Conn.

R. B. Patterson, Sc. '26, is with the Northern Electric Company, Montreal.

Dr. J. D. Ralph, Arts '24 (Ph.D. Chicago), was recently appointed head of the department of classics at the University of Western Ontario, London, Ont.

Chris Sanford, Sc. '23, of the Royal Canadian Signals, has been promoted to the rank of Lieutenant-Colonel commanding the First Canadian Division of Signals, C.A.S.F.

Rev. Gordon R. Taylor, Arts '28 (M.A. McGill), formerly pastor of St. Andrew's Church, Fredericton, N.B., has been named assistant to the Rev. Dr. George H. Donald at the Church of St. Andrew and St. Faul, Montreal.

E. B. Taylor, Com. '29, has been appointed manager of Messrs. R. Moat and Company's office in Kingston.

N. J. Taylor, Sc. '22, is manager of the American Allsafe Company, Buffalo, N.Y.

W. A. Thorn, Sc. '24 (M.A. Toronto), who for the past four years has been superintendent of the Dominion Meteorological Observatory at Victoria, B.C., is returning to

Toronto to join the staff of the Toronto observatory.

M. L. Urquhart, Sc. '22, is now assistant to the general manager at the McIntyre Porcupin'e Mines, Schumacher, Ont.

William Wallace, Com. '23, is head of the actuarial department of the South Carolina Life Insurance Company. His address is Star Route, Swansea, S.C.

T. G. Wood, Sc. '22, is combustion engineer for the Aluminum Company of Amer-

ica, Massena, N.Y.

K. B. Woodward, Arts '29, is inspector of schools at Rossland, B.C.

1930-1940

N. Z. Alcock, Sc. '40, left recently for Pasadena, Calif., where he will do research work during the coming year at the Califormia Institute of Technology.

H. G. Ames, Arts '40, is geologist at Per-

ron Gold Mines, Perron, Que.

Dr. E. G. Berry, Arts '36, received his Ph.D. from the University of Chicago early in September. He has been appointed lecturer in classics at the University of Manitoba, Winnipeg.

Harry Buckles, Sc. '32, is manager of Gold Eagle Gold Mines, Mackenzie Island, Mrs. Buckles was Ruth Shaver, Arts

'29.

Dr. J. S. Davies, Med. '36, medical officer in the Royal Air Force stationed near Birmingham, England, recently sat for his fellowship in surgery at Edinburgh.

H. G. Dickie, Sc. '40, is aircraft draftsman for the Canadian Car and Foundry Com-

pany, Fort William, Ont.

Dr. Gladstone Fiddes, Med '40, and Mrs. Fiddes (Dorothy Wilson), Arts '37, left recently for Hazelton, B.C., where Dr. Fiddes has been appointed head of the United Church Mission Hospital.

Flying Officer E. C. S. Gould, Sc. '37, was one of the first seventeen officers who graduated recently from the R.C.A.F. Aeronautical School of Engineering, Montreal. He is now at No. 4 Service Flying Training

School, Saskatoon, Sask.

Miss Lorna Horwood, Arts '31, formerly superintendent of nurses at the Ontario Hospital, London, Ont., is now superintendent of nurses at McKellar Hospital, Fort William, Ont.

T. H. Lewis, Sc. '39, of the Hydro Electric Power Commission of Ontario, has been transferred from Smiths Falls to the Toronto district, where he is junior relay engineer. He is living at 365 Bayview Ave. R. D. MacDonald, Arts '38, has been ap-

pointed to the geological staff of the Uni-

versity of Western Ontario.

Miss Margaret McQuade, Arts '30, is teaching in the collegiate and vocational institute at Napanee, Ont.

Miss Earla MacVannel, Arts '38, has joined the staff of Wellington Consolidated

School, Wellington, Ont.

G. M. Malcolmson, Com. '35, is in charge of the fur trade depot of the Hudson's Bay Company at Winnipeg.

BOOKS OF THE HOUR

They tell the Story behind the News

TWO WAYS OF LIFE

By W. J. Lindal. "The whole story of why we are at war, and must continue at war till victory, is covered in these hundred and fifty pages. I hope that every Canadian high school will be instructed to use Two Ways of Life as a compulsory text this fall. Every adult should get it at once, digest it carefully and pass on its contents as a patriotic duty."—W. A. Deacon in C.B.C. Broadcast. \$1.75.

THE ROWELL-SIROIS COMMISSION

By S. A. Saunders and Eleanor Back. An accurate summary of the Rowell-Sirois Commission Report, giving an outline of the story told, the principal recommendations, and the gist of the argument. No. 5 in The Contemporary Affairs Series. 40 cents.

ENGLISH ECONOMIC HISTORY

By C. R. Fay. The broad lines of English economic history from 1776 to the present. As a leading economic thinker, Dr. Fay is well known to Canadians. \$1.75.

WHY WAR SAVINGS?

By C. H. Herbert. A simple explanation of the economic principles behind the Canadian plan for war savings, this explains clearly how every Canadian can assist the Canadian war effort. No. 7 in the Contemporary Affairs Series. 10 cents.

CHANCELLOR DUNNING'S INSTALLATION ADDRESS

Queen's University, October 26, 1940

WISH to express my appreciation of the great honour conferred upon me today.

To be called to the position of chancellor of Queen's University is to be inspired to emulate the example of service to Queen's, and through Queen's to Canada, of many distinguished men who during the past hundred years have occupied this place.

My immediate predecessor and friend of many years, the late James Richardson, was devoted to the cause of this university in a manner which caused him to be a living expression of Queen's, no matter where he might be. I share your regret at his loss and am proud of being thought worthy to follow him. In return I can only offer my best endeavours to maintain the traditions of this great university during the trying times through which our country, our commonwealth, and the whole world are now passing.

Seldom in the world's history has it been possible for people then living to recognize a great turning point in the history and development of humanity. Usually these great milestones have become visible to historians generations later. The signs today are so clear and visible to all thinking men and women as to be unmistakable.

Slowly, painfully, and with some setbacks, the past several hundred years have witnessed a steady growth in the dignity, the importance, and the power of the common man and woman. From a condition of submission by the masses to brutal force, there has gradually evolved what we refer to all too lightly as "the principles of democracy," which in essence really means that each man and woman within a country shares the responsibility of determining who shall govern and who shall make the laws under which they live.

We have become so accustomed through generations to the orderly exercise of the privileges of democracy and to the freedom which we enjoy that we have come to take these things for granted, just as we take for granted the rising and setting of the sun, and it is not too much to say that we do not value as we should this priceless heritage of human freedom. Our forefathers, who fought and suffered for it, valued it because they had experience of its alternative. For many generations past we have automatically become its beneficiaries and humanity is so constituted that anything that comes freely or easily is seldom accorded its true value.

Now we are faced with the most definite, the most ruthless attack upon the accepted rights of the common man and woman that the world has ever known. In plain cold terms, our enemies definitely intend to force mankind backward to a condition of abject slavery. It is vital, therefore, that the young manhood of today should clearly appreciate that simple issue. No matter how cleverly it may be disguised by sophistry, the truth is that slavery for the common man and woman is an essential condition of dictatorship.

True, the past records rare instances of beneficent dictators, but it is also true that the only effective means of eliminating a bad dictator is by violence, since dictatorship must be self-perpetuating in order to maintain itself as a system.

There are still some voices, even in this country, asserting how much better the dictatorships do some things than the democracies. Of course instances can be cited because obviously one individual can make decisions more quickly than millions of individuals can reach agreement on their decision. While democracies have leaders, these leaders always govern "with the consent of those governed" and must therefore carry public opinion with them in all vital decisions. This fact explains why backward peoples find it difficult to make a success of democratic government. On the other hand, can it be said truthfully that anything can be accomplished more efficiently by a dictatorship than by the will of a free and enlightened people? The only limit to the efficiency of a free people is their own will to efficiency or lack of it.

It is a fair indictment against the free peoples of the last generation that their aggregate will was much more concentrated upon seeking peace, personal ease, and security than upon defending their freedom. To all of us it appeared that the fight for human rights had been won; that there could be no effective challenge to the right of the common man and woman to an equal share in their own government.

We took it for granted, and it has taken a whole year of brutal attack by the enemies of these principles to really arouse us.

It is only a very few years ago that the phrase "It couldn't happen here" was applied by people in Great Britain, in the United States, and in Canada to many of the happenings on the Continent.

There is no doubt today in the minds of the people of Great Britain regarding the issues at stake, and every day we have increasing evidence that they value what they are fighting for more than life itself.

We in Canada, up to the present thousands of miles removed from daily bombings, are naturally slower to appreciate how vital the issues are to ourselves and to succeeding generations of Canadians. But gradually the same grim unity of purpose which now actuates the people of Great Britain is spreading across Canada. Our little differences, sectional and political, are disappearing in the face of the all-absorbing challenge to our continued existence as a free people.

What then should be the policy of a great university in relation to this most vital struggle of mankind and to Canada's share in it? I think it can be stated briefly in the words so frequently heard in Great Britain today, "Carry on." "Carry on" in the spirit in which Queen's has grown in usefulness to Canada and its people for nearly one hundred years, remembering

that throughout all that long period the greatest work done by this university has been done during periods when it was labouring under the greatest difficulties.

I do not know any institution which more clearly confirms the belief that the law of life is the law of struggle than Queen's University. Time and again it has been demonstrated that the problems of this institution constituted its opportunities, and time and again throughout the last hundred years great souls have seen in apparently insoluble problems a magnificent road to progress. More than that, time and again in the history of Queen's it has been proved that the very existence of problems and difficulties demonstrates to bright minds of sincere purpose that great opportunities exist.

Many young men tell me how much they envy the opportunities which awaited my generation of young manhood thirty or forty years ago when the geographic frontier of Canada was developing, when the great task of laying the foundations of new provinces, new communities, and new industries created great problems and as a consequence offered wide opportunities to youth.

It is true that while we shall have the geographic frontier in Canada for many years yet, the days of its most rapid expansion are over—but the problems created by that rapid expansion are still with us and in them lies the seed of opportunity for the youth of today.

I do not share the view of those who believe that there is lack of opportunity for the youth of today. To my mind, there never was a time in history when opportunity was as challenging as it is at the present time.

The word "opportunity" may mean different things to different people. Does it mean to you the chance of acquiring material things? Well, if it does there are more opportunities for the man or woman of very modest means to acquire those material things which contribute to ease and comfort than ever before. Our grandparents, however wealthy, could not command the comforts and luxuries which we enjoy in the automobile, the radio, electric light and power, the electric refrigerator, the modern heating furnace, the airplane, and countless other material blessings which the men of science have brought within our reach during the last thirty or forty years. We take for granted the daily use and enjoyment of many things which all the money in the world could not have purchased when Grant was principal of Queen's.

Perhaps "opportunity" means to you the chance to perform soul-satisfying service to your day and generation in the fields of the arts or sciences, and you suffer from the feeling that all the great things in your line of endeavour have already been accomplished.

It is curious to note how each generation throughout history tends to regard the point then reached as the ultimate, but nevertheless, each generation has produced its thinkers, striking out beyond the then-known bounds of human possibilities, social, moral, and economic; its inventors and engineers, developing and adapting hitherto unknown forces of nature; its medical research men, penetrating ever more deeply into the endless and fascinating mystery of the human body; its chemists, finding ever more combinations and divisions of matter, and harnessing ever more and more of the natural

resources of this planet in the service of mankind; and its leaders in every walk of life, who do not accept the present as final, but who draw upon the rich store of recorded thought and deed of the past in order to build an ever better world.

Because of this great fact, opportunities of service are ever growing, each new forward step bringing into view new questions, new problems, new difficulties to overcome, all of which means "opportunity" in the greatest sense for the trained mind with imagination and courage. It is for these reasons that I contend that the arts and sciences offer a greater diversity of possible achievement today than ever before.

To those pessimists who see no hope for youth because of the great problems of today, all our history gives the answer that these difficulties create the real opportunities in every walk of life.

One could continue through all of the fields covered by the studies of Queen's men and women of today and show that in every one of them there are new frontiers, new problems awaiting the keen, imaginative intelligence and courage of those before me now.

Let us face the fact at once that in the world of today those who go forth from these halls of learning cannot possibly have an easy time, but, ladies and gentlemen, is that cause for despair? On the contrary, it is a true saying that just as the steel which has not been tempered by fire has no strength, so the life which has not been tested by problems and difficulties will never know the real glory of achievement.

Past generations, by facing and overcoming the problems of our geographic frontiers, laid the foundations of this nation. To all succeeding generations comes the privilege of building and beautifying the edifice.

Opportunity for constructive endeavour never ceases. The eternal challenge, the eternal struggle will remain the great law of nature as long as life exists.

Men and women go out from this place to many diverse activities. Two great bonds they will have in common. They will be united in the great fellowship of Queen's, which is distinctive and indeed unique in this Dominion. They will be united also in democratic citizenship, in mutual responsibility for maintaining and broadening the frontiers of human liberty under laws made by and for citizens themselves.

Here in this place you will find that the emphasis is placed on teaching you how to think, rather than endeavouring to teach you what to think. Here is illustrated one fundamental difference between ourselves and our enemies of today. Under dictatorship the individual is ordered what to think and is discouraged in the most brutal fashion if he shows evidence of knowing how to think.

Here at Queen's you have available to you in both the printed and the spoken word the results of the thinking of thousands of individuals whose thoughts will be o'f value to you in directing your own powers. This is a great heritage from the ever-broadening bounds of human freedom during past centuries. Imagine how much of this wide range of human thought on

every subject would be available to you if the principles against which we are now fighting had ruled during those centuries.

Dictatorships now determine what their people shall read, what they shall hear, what they shall say, what they shall see, and through their educational system are trying to determine what future generations shall think.

In German universities today, the recorded thoughts and ideas of great minds past and present are not available to students unless they can be twisted into supporting the principle of totalitarian dictatorship. Can you imagine what humanity would be like after one hundred years of such a system?

Can there be any doubt that we stand at a great crossroad of human history? Here we must stand and fight for all that is dear to the individual human soul, and for the right to hand on the torch of freedom to those who come after us. After the fight is won, the necessity of complete reformation of the world social and economic order will be upon us.

It is grand indeed to be young in these times—to have the advantage of all that Queen's can give by way of intellectual equipment, and to have the great privilege of thinking out and helping to work out the problems and difficulties of a new world order in an ever-evolving democratic civilization.

Can Queen's rise to the occasion? One hundred years of her history gives the answer. She can and will inspire Queen's men and women everywhere to bear their part in sacrifice and service, and to develop their own individual powers, to the end that the best good of all, under God, may be served.

FORMAL RECEPTION HELD FOR MR. AND MRS. DUNNING

A LUMNI, members of staff, and friends of the University were given an opportunity to meet the new chancellor of Queen's, the Hon. Charles Avery Dunning, and Mrs. Dunning at a formal reception held in Grant Hall on the evening of October 25. The guests were introduced by Mr. Gordon J. Smith to Chancellor and Mrs. Dunning, Principal and Mrs. Wallace, and Mr. J. M. Macdonnell, chairman of the Board of Trustees, and Mrs. Macdonnell.

The University Glee Club, under the direction of Dr. F. L. Harrison, resident musician, sang several numbers, and a male quartette also contributed two groups of songs. Later refreshments were served by the Kingston alumnae under the convenership of Mrs. P. S. Rutherford (Phoebe Weir), Arts '36. Her committee included Mrs. E. T. Munro (Barbara Graham), Arts '37, Mrs. V. B. Crothers (Mary Free), Arts '14. Mrs.

H. W. Harkness (Eva Brownlee), Arts '13, and Mrs. Norman Miller (Grace Jeffrey), Arts '14. Miss Charlotte Abbott, Arts '37, was in charge of the punch table, assisted by Mrs. A. J. Meiklejohn (Jean Ramsay), Arts '30, and Mrs. G. G. Thomson (Mildred Mahood), Arts '34. The long tables, lighted with candles, were presided over by Mrs. Frederick Etherington, Mrs. A. L. Clark, Mrs. John Matheson, and Dr. A. Vibert Douglas. Students and graduates assisted in the serving.

Faculty Women's Club Sends Knitted Articles To England

PLANS for the season were made at the general meeting of the Faculty Women's Club held in Convocation Hall on October 9. It was reported that eight parcels of knitted articles have been sent to England since May and that all have been acknowledged as having arrived safely, with the exception of the last two which were mailed on September 18.

After the business session, the meeting was adjourned to the home of the president, Mrs. R. C. Wallace, where tea was served.

HON. CHARLES A. DUNNING INSTALLED AS CHANCELLOR

Avery Dunning as chancellor of Queen's and conferring of the honorary degrees of Doctor of Laws on Mr. Dunning and on Mr. Joseph Burr Tyrrell at Autumn Convocation in Grant Hall on October 26 made this ceremony one to be long remembered. A large number of graduates, students, staff members, and friends viewed the proceedings.

The new chancellor is a distinguished Canadian statesman. He has served as minister of railways and canals and minister of finance in the Dominion cabinet. He has also been premier, president of the council, provincial treasurer, minister of railways, minister of telephones, and minister of agriculture for the Province of Saskatchewan.

Dr. Tyrrell is famous as a geologist, mining engineer, and explorer. As a young man he conducted expeditions into almost every part of the Canadian hinterland. Since 1925 he has devoted his talents largely to mining company administration and management.

Mr. Dunning was presented to Vice-Chancellor and Principal Wallace by Vice-Principal McNeill, who spoke as follows: "I have the honour to present to you for the degree of Doctor of Laws, Charles Avery Dunning; distinguished for diverse powers and fruitful achievement, knowing Canada and its problems in wide-visioned view—prairie farming and wheat, elevators and milling, markets and credit, transportation and industry and finance; sometime Saskatchewan treasurer, minister of railways, of telephones, of agriculture, prime minister; sometime Dominion minister of railways and canals, a Canadian delegate to the League of Nations, a famous minister of finance; his active life an epic story, an Odyssey of modern times; and now, awaiting the next adventure, counsellor and sage in business and government and education, trophied with a nation's praise, worthy of the highest honour."

After Mr. Dunning had been hooded by Dean A. L. Clark, he was installed as chancellor of Queen's University. The Declaration of Fidelity was administered by Dr. Wallace. The chancellor received his robes of office from J. M. Farrell, Arts '89, and Francis King, Arts '89, rep-

resenting the University Council.

Said Dr. Wallace: "Mr. Chancellor, may I welcome you to your office. In what you are, and in what you stand for, you will be an inspiration to the young men and women who are now, and who are to be, students at Queen's University. The duties of the office are not heavy, but the influence which you will exert for Queen's and all that Queen's stands for will be profound. You have a very warm welcome from Trustees, Council, staff, students, and graduates. We think that you will be happy in your associations with us. We are proud to have you as the senior officer of Queen's University."

In reply, Chancellor Dunning delivered a thoughtful address, which is printed in full as the leading article in this issue. The address was broadcast over the C.B.C. network.

Mr. Tyrrell was presented to the chancellor by Dr. Wallace, who spoke as follows: "I present to you Joseph Burr Tyrrell, geologist, explorer, historian, whose name is writ large in the story of the development of our country. There are not many men who, after they have become absorbed in large-scale industrial life, retain their enthusiasm for scientific investigation and historical research. Mr. Tyrrell is such a man. Himself a geologist and explorer of the first rank, his work at the head of large mining enterprises has not interfered with his interests as a scientist and a recorder of the travels of those who mapped the waterways of the Canadian West. We honour a Canadian who has done great things for his country, in presenting Joseph Burr Tyrrel to receive the degree of Doctor of Laws, honoris causa, at your hands."

In reply Dr. Tyrrell spoke of the achievements of Queen's graduates in the

world at large. His remarks are printed in full elsewhere in this issue. Principal Wallace also gave an address, which appears on another page.

Winners of provincial, Ontario honour, and locality matriculation scholarships were introduced by Dr. McNeill to the gathering, Chancellor Dunning personally greeting each one.

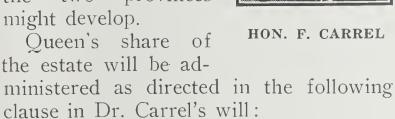

Convocation was opened with a Scripture reading and prayer, and closed with the Benediction, by Dr. J. R. Watts, acting principal of Queen's Theological College. At the beginning and end of the ceremony, music was provided by Dr. F. L. Harrison, resident musician, on the Bogart Memorial Organ.

BULK OF CARREL ESTATE BEQUEATHED TO QUEEN'S

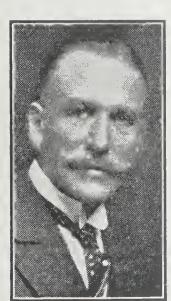

NDER the will of the late Hon. Frank Carrel, LL.D. '19, distinguished Quebec publisher and industrialist, the bulk of his estate comes ultimately to Queen's University to be used to educate students from Quebec, it has been announced.

While the exact amount of the bequest was not revealed, it was said to be a substantial sum. The purpose of the gift is to facilitate the coming of students from Quebec to Ontario. It was Dr. Carrel's expectation that friendlier relations between the two provinces might develop.

Queen's share of

"To Queen's University, Kingston, the rest and residue of my estate, to be added to its endowment fund and ninety per cent of the net yearly revenue therefrom to be applied towards defraying the expense of the education, at the University, of Protestant boys from the City and County of Quebec and the Gulf Division

of the Legislative Council of Quebec, as at present constituted, as the Principal of that institution may decide, and the remaining ten per cent of the net yearly revenue therefrom to be supplied towards defraying the expense of the education, at that University, of Roman Catholic boys (Irish or French-Canadians as equally as possible) to be selected by the Rector of Laval University, Quebec."

BOARD OF TRUSTEES LEARN OF WAR EFFORT

UT of 1360 male students Queen's this year 1300 are taking compulsory military training, Principal Wallace informed the Board of Trustees at the autumn meeting held in the Douglas Library on October 26. The others are under eighteen or are not physically fit.

During the meeting, the 1300 students marched past the Library where Brigadier Armstrong took the salute, while the Trustees adjourned their business watch the imposing spectacle.

Present from out-of-town were Chairman J. M. Macdonnell, Mr. J. C. Macfarlane, Mr. D. I. McLeod, Mr. F. D. Reid, Mr. R. M. Smith, and Mr. D. D. Calvin, Toronto; Chancellor C. A. Dunning, Senator H. H. Horsey, Mr. A. E. Mac-Rae, Mr. Jackson Booth, Ottawa; Mr. R. D. Harkness and Mr. John Irwin, Montreal; Judge C. A. Cameron, Belleville; Dr. T. H. Farrell, Utica, N.Y.; and Mr. E. A. Collins, Copper Cliff.

The Principal reported on the various ways in which the University was contributing to the war effort. In addition to the 1300 undergraduates taking military training, the women students were receiving first-aid instruction and were actively engaged in Red Cross work. The University has adapted various courses to war needs. It has provided men and material for special and highly important research, some of it supported by grants from the National Research Council.

The Treasurer's interim report showed that though the falling off in registration in most branches of the University work, due chiefly to enlistments, had resulted in a loss of fees amounting to about \$40,000, the estimates of last spring had anticipated this decrease, and the various activities in teaching and research will be carried on as provided for in the budget. It will now be necessary, however, for the University to exercise the strictest economy, he said.

In connection with the celebration of the Centenary in 1941 a committee was appointed to mark in an appropriate manner the Avenue from Stuart Street to the Old Arts Building, which on April 27, 1881, had been formally designated "Founders' Avenue." At that time trees were planted on each side of the drive, one for each of the founders. The Trustees will also erect a tablet to be placed with other commemorating brasses, possibly in the lobby of Grant Hall.

The Board received with great satisfaction, through Mr. D. H. Laird of Winnipeg, papers and documents relating to the early history of the University. These had been in the possession of Mrs. Frank Drummond. Among them was a draft of specifications for a boarding-house for Queen's College, 1841. At that time the University had owned property running north from King Street from a point near Alwington House, and it had been intended to erect the University buildings there.

Mr. Macfarlane, chairman of the endowment committee, made an interesting progress report.

The Board adopted resolutions of appreciation of the services of the late Rector, the Hon. Norman Rogers, and of the late Prof. W. P. Wilgar.

Dr. S. A. Mitchell Officiates At Opening of New Observatory

S. A. MITCHELL, Arts '94, LL.D. '24, director of the Leander Mc-Cormick Observatory at the University of Virginia and one of the world's outstanding astronomers, formally opened the new Hume Cronyn Memorial Observatory at the University of Western Ontario on October 25. At the autumn convocation ceremonies on the evening of the

same day, he was granted an honorary LL.D. degree. He spoke on "The Astronomer and His Telescope."

MR. E. A. COLLINS TO SERVE SECOND TERM

E. A. COLLINS, Sc. '05, Copper Cliff, was re-elected president of the General Alumni Association for the ensuing year at the semi-annual meeting of the Board of Directors held at the University on the afternoon of October 25. Dr. W. G. Cornett, Arts '18, Med. '21, Hamilton, and D. A. Gillies, Arts '05, Arnprior, were re-elected as first and second vice-presidents, respectively.

Mr. Collins paid tribute to the late Prof. W. P. Wilgar, who had served as a member of the Board since 1936. He mentioned the interest and affection that Professor Wilgar had always maintained for everything pertaining to Queen's. A motion of appreciation of his services was placed on record in the minutes.

The president reported briefly upon the activities of the Association during the past year. He pointed out that the cancellation of the Intercollegiate sports programme had meant a heavy financial loss. Each year the alumni have sponsored dances after the football games in Kingston and this source of revenue has now been cut off. Steps are being taken to offset the loss.

Mention was made of the increase in membership over the previous year, and the Toronto and New York Lranches were cited for their achievements along this line. It was reported that seventy-one meetings and social gatherings had been held by the branches during the year, at many of which members of staff had been present as guest speakers.

The audited financial statement, published in detail elsewhere in this issue, revealed that the Association had had a small surplus. The grant from the University had been the smallest in history.

The report of the Grant Hall Fund showed that all commitments had been met and that there was a small balance in the bank. It was decided to spend \$50 for additional improvements to the Hall,

including a handrail for the stairs leading to the basement and a partition that would improve the passage-way to the dining-room.

As co-optive members of the Directorate for the coming year, the following were appointed: Dr. T. J. Goodfellow, Arts '07, Med. '09, Saratoga Springs, N.Y.; Dr. J. J. McCann, Med. '09, Renfrew; and D. G. Geiger, Sc. '22, Toronto. Mrs. D. W. Boucher (Thelma Bogart), Arts '27, Kingston, was nominated to complete the term of the late Professor Wilgar. Dr. C. W. Drury, Sc. '09, Toronto, and G. C. Monture, Sc. '21, Ottawa, were appointed as Alumni representatives on the Athletic Board of Control.

The following directors or branch representatives were present: President E. A. Collins; Past Presidents Dr. T. H. Farrell and Mr. A. E. MacRae; Miss Mary L. Macdonnell; Drs. G. G. McNab, J. H. Orr, and A. E. Lavell; Prof. D. S. Ellis; Messrs. A. G. Fleming, D. A. Gillies, and the Secretary-Treasurer.

Additional Staff Appointments Made To Fill Existing Vacancies

In addition to those announced in the last issue of the *Review*, appointments to the Queen's staff have been made to fill several existing vacancies.

Dr. A. M. Doyle, M.D., C.M. (University of Toronto), has been named assistant professor of medicine, in charge of neurology. Dr. G. E. Large, M.D., C.M. (Queen's), has been appointed to the department of anatomy for the session, replacing Dr. C. R. Salsbury, who is on military service. Dr. Thomas Tweddell, M.D., C.M. (Queen's), has been named clinical assistant in surgery. Mr. W. L. Poole, M.A., (Alberta), who has had graduate work at the Universty of Chicago, has been added to the staff of the economics department in the absence of Professor Mackintosh. Mr. C. Brown has been appointed instructor of welding in the department of mechanical engineering, succeeding Mr. W. E. Connolly, who has retired because of illness after twenty years' service.

NEARLY 1700 STUDENTS REGISTER AT QUEEN'S

THERE was a decrease of 113 students or 6.3 per cent in the enrolment at the University this year from the 1939-40 record. Total intramural registration is 1692 at time of writing.

An increase of three is reported by Queen's Theological College, with twenty-one students in attendance. This is the largest figure in many sessions, and does not include those registered in Arts.

The Department of University Extension had an enrolment of approximately 1000 on November 1. Final figures will not be available until next spring. Last year the total net registration was 1649.

Tabulated totals for intramural registration are as follows:

	1938	1939	1940
Arts—			
First Year	277	261	261
Other Years	640	621	568
Science—			
First Year	180	189	167
Other Years	465	456	432
Medicine—			
First Year	46	44	46
Other Years	236	236	221
	1044	1005	1.605
Gross Total	1844	1807	1695
Less registered in			
two faculties	3	2	3
	1841	1805	1692

Principal R. C. Wallace Opens 1940-41 Series of Radio Programmes

THE 1940-41 series of quarter-hour radio programmes presented by Queen's over the University station CFRC was opened on October 14 by Principal Wallace, who spoke on "The War and the Universities." Others who participated during the month included Dr. H. W. Harkness, Mayor H. A. Stewart, Mr. Bruce Jay, Mr. F. P. Smith, Miss Idele Wilson, Prof. M. B. Baker, Dr. G. C. Lindsay, Mr. George Lilley, Mr. E. C. Kyte, Rev. Dr. A. J. Wilson, Rev. Dr. Neil Neckie, Rev. C. D. McLellan, and Miss Betty Jean Reid.

The programmes are broadcast from 7.15 to 7.30 o'clock each evening from Monday to Friday, inclusive. In addition to individual topics, various series will be presented this year dealing with the war and the home front, public health, drama, and local history.

DR. JOSEPH BURR TYRRELL GAVE CONVOCATION ADDRESS

S PEAKING on behalf of Chancellor Dunning and himself, as recipients of honorary degrees, Dr. Joseph Burr Tyrrell delivered the following address at Autumn Convocation on October 26 in Grant Hall:

"Queen's University has always appealed to me as one of the important constructive forces in Canadian development. I like to think of that great man, the Rev. George M. Grant, leaving his parish in Nova Scotia in 1872 and, in company of Sir Sandford Fleming, the engineer, afterwards the chancellor of this university, and Prof. John Macoun, the botanist, travelling across the continent on trails many of which subsequently became very familiar to me. He learned to love northern and western Canada, then a vast unsettled wilderness, as he loved his native Nova Scotia, and he told others about it in the splendid account of the trip which he wrote under the title Ocean to Ocean. He saw that its fertile soil was capable of producing an abundance of grain and other foods, enough to feed millions of people and vast herds of domestic animals, that its forests would furnish an abundance of lumber, that its lakes, rivers, and surrounding oceans were teeming with the finest fish, and that its rocks would supply useful minerals in inconceivable quantities. He may have thought of the country as Conan Doyle wrote of it half a century later as the "Mother of a mighty manhood, land of glamour and of hope from its eastern sea-swept islands to its sunny western slope." The prospect was magnificent, the need for men to develop the rich and fertile country was great, but the competent and available labourers were few.

"He wanted to help, but what could he, a clergyman in a remote parish in Nova Scotia, do to assist in such a tremendous undertaking?

OPPORTUNITY AT QUEEN'S

"However, a few years later he became principal of this university, where he was the centre of a group of scientific and literary educationists of the highest type. He must have recognized his opportunity at once, for he could now have young Canadians properly trained to take their places as men of thought and action, prepared and willing to devote their knowledge and abilities to the exploration and development of their great inheritance in which they would establish new industries, and build noble cities. His professors taught their students what was known of the various subjects in their curriculum, and how to apply that knowledge to the best advantage of the community. They also taught them to be industrious, to work hard, for the amount of work to be done to develop the resources of this magnificent country, than which there is no better anywhere, was beyond computation.

"My own observations of these students were chiefly confined to those who had studied the subjects of geology and mining. For year after year the young men whom you had trained in these subjects, and who were leaving your portals to take up their duties as citizens of Canada, were welcomed into the ranks of the great civilian army of miners. Very few were ever left out or kept waiting. Wherever I went, from Newfoundland Nova Scotia on the east to British Columbia on the west, and from the shores of the Arctic Ocean on the north down to the American boundary line, and even further south throughout the mining districts of the United States, I met graduates of Queen's everywhere among the foremost and most efficient men in the mining industry. They were almost always among those who were directing the intellectual and industrial progress that Canada has made during the past fifty years. If I were told that a man was from Queen's, I regarded that as a guarantee that he was industrious, well-trained, and that he was fully competent to do or direct the work on which he was engaged.

"I have no doubt that the young men graduated in other scholastic subjects are equally well taught and efficient, and that they too have and are taking their places as constructive citizens ready with their energy and trained judgments to assist in making Canada a comfortable beautiful country. You, Mr. Chancellor, and you, Mr. Principal, left your homes in Great Britain to come to us and take honoured, if laborious, positions among us when you undertook to continue the training of our youth to be efficient and industrious citizens. May you be amply rewarded by seeing the people of this, your adopted country, grow surely, if slowly, to be one of the great and strong nations of the world."

Mrs. Frederick Etherington Presents Organ To Convocation Hall

THROUGH the generosity of Mrs. Frederick Etherington, whose keen interest in the cultivation of the arts at Queen's is well known, an organ has been installed in the gallery of Convocation Hall. It is a two-manual Warren pipeorgan of nine stops, and has a particularly sweet and pleasing quality of tone.

An opening recital on the organ was given by Dr. F. L. Harrison, resident musician, on October 25.

"Curtain Call" Praises Work Of Queen's Summer Theatre

A FINE tribute to the courses in play production offered at Queen's Summer School and to the director, Dr. William Angus, is contained in the October issue of the *Curtain Call*. In connection with the presentation of *Gaslight*, a Victorian thriller in three acts by Patrick Hamilton, the reviewer said "the realistic staging was considered an achievement, in this electrical age, with its gas lights that looked like gas lights and behaved as

such through numerous atmospherically and dramatically necessary changes of illumination."

EFFECT OF WAR ON QUEEN'S TOLD BY PRINCIPAL WALLACE

THE effect of the war on life at Queen's was told by Principal Wallace at Autumn Convocation in Grant Hall on October 26. The text was as follows:

"We are entering on a second year of war with our student population only slightly affected and our staff almost up to strength. These statements are relative. We have suffered, both in students and staff. Particularly in the senior years men have gone, overseas and into technical war work. Thirteen members of the staff are on service, in uniform, in industry, or on Government requisition, and many more have been giving all their time during the summer months, and what time they can spare during the term, to the needs of the war. For the thirteen hundred men who are in training at Queen's for home defence, several members are heavily engaged, in addition to their ordinary duties, in providing the necessary instruction, and they are being assisted by a corps of senior students and graduates who are qualified to give help. Research on war problems is going on in our laboratories, and some courses of instruction have been introduced to fit men for special war needs.

"All of this, together with our constant preoccupation with the war and its progress, has a very definite effect on the life of the university. We are fortunate indeed that we can carry on, when the British universities are harassed and stricken. We owe an obligation to our cousins across the sea which even the greatest effort that we can make will not repay. They are standing between us and destruction. They are doing so at the cost of their whole normal occupation, their peace of mind, their very lives. Education is being interrupted over there. Research, except for war purposes, is They are in the almost non-existent. front line of danger. We, who are one

step further removed, must carry on all the more strenuously to make good the deficiencies which the war has created, On our shoulders, and on those of our sister dominions, has fallen the heavy task of carrying on in the universities for the whole British people, and in seeing to it that higher education and the advancement of knowledge shall go on. The time may come when we too are in the front line, and when the peace and quiet of university life has disappeared. Against that time, if it comes, we are preparing; and our task will then be a sterner one. God grant that it do not come. To prevent it, we must put every ounce of energy and ability and determination that we possess into the assistance of the British across the seas, who are facing battle with a courage and a fortitude that will live in history as long as the human race shall endure. We must not fail them in this hour.

"The enthusiasm with which the men of the university have gone into military training and the spirit that is shown by both men and women of the university in their co-operation in war effort are evidence that the gravity of the issues is in no question. All the things for which a university lives are at stake. We must win, if the light of free learning is not to go out.

"I cannot close without paying tribute to one who has gone from among us. W. P. Wilgar had a great affection for this university, and he showed it in very many fields of service. Students will not soon forget what he did for them in promoting the finer things in student life. Engineers knew his quality and his enthusiasm in his chosen field. Military men counted him as an officer of very high ability, conspicuous in his service in the last war. Above all, he was a great gentleman. He has left an empty place in our hearts."

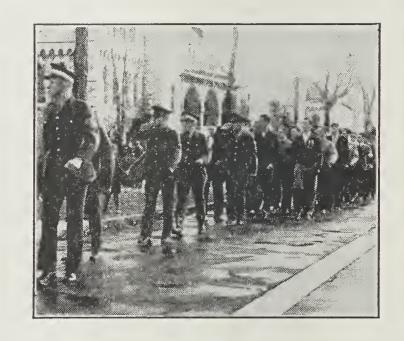

Gun Building Erected On Campus For Queen's C.O.T.C. Training

A GUN building for the Queen's Contingent, Canadian Officers' Training Corps, has been erected on the campus between the old Mill Building and the

Mechanical Laboratory Building. Cost of the twenty-four by seventy-foot wooden structure was borne by the C. O. T. C.

STUDENT SOLDIERS SHOW GOOD SPIRIT IN TRAINING

THE preliminary military training programme for male students announced in the last issue of the *Review* has now been completed. On October 26 the Contingent was reorganized into two main groups—one taking the courses of

PARADE ON OCTOBER 26

the Canadian Officers' Training Corps and the other being incorporated into the Auxiliary Battalion.

The former has been divided by arms for special training as follows: Artillery, 290; Engineers, 257; Signals, 63; Infantry, 174; Medical, 121—total 905. The Auxiliary Battalion numbers 390, and will carry out the syllabus of the Training Centres for those persons who have been called out for the first period of military service. The total strength of the Contingent, including the Headquarters staff, is 1307.

The bases for selection among those who wished to take the courses of instruction have been (a) previous military training, (b) stage in academic course, (c) reports of instructors, (d) personal interviews, (e) physical fitness. Medical category "A," without qualification, was required. Great difficulty has been experienced in working out time-tables,

since Saturday is the only day on which parades or lectures can begin before 5 p.m.

The Auxiliary Battalion has to do part of its training once a week between the hours of 9 and 11 at night. The concentration of the military programme in the evening interferes seriously with what are called "extra-curricular activities," but the students are undertaking this work without complaint. As previously stated, "the bearing of the men on parade is good and the spirit excellent."

On October 26 the University Contingent, headed by the Queen's Pipe Band, marched past Brigadier F. Logie Armstrong, O.B.E., D.O.C., Military District No. 3. The members of the Board of Trustees and many others in Kingston for Convocation were among those who watched the parade, which took ten minutes to pass the saluting base.

Efforts are being made to co-ordinate military training with sport. Certain provisions have been made for football, and now a C.O.T.C. hockey team is being organized. Other athletic activities are under consideration.

REPORTS PROGRESS MADE BY ALUMNI ASSOCIATION

A N outline of the achievements of the General Alumni Association during its brief history was given by President A. E. Collins at the annual meeting held in the Red Room on the afternoon of October 25.

In his report, Mr. Collins stressed the value of the Association to the University. He said that the branches were doing particularly fine work in stimulating the interest and enthusiasm of the graduate body.

The Secretary-Treasurer's report revealed that the Association had had a small surplus for the year ending September 30, 1940. The paid membership in the Association was 1624, a slight increase over the total for the previous twelve months. Problems in connection with the rising costs of the publication of the *Review* were mentioned.

There are now 9453 living and 2161 deceased graduates of Queen's. The dis-

tribution of the former is as follows: Canada, 7688; United States, 975; other countries, 265; no addresses on file at present, 525.

The following nominating committee was appointed for the ensuing year: D. R. Roughton, Sc. '22 (convener), Kingston; Miss Irene Benger, Arts '15, Port Arthur; Dr. S. A. McNeight, Sc. '31, Niagara Falls, N.Y.; E. A. Thomas, Com. '26, Montreal; Dr. O. E. Ault, Arts '24, Ottawa; and Dr. W. R. Patterson, Arts '02, Med. '06, Toronto.

The question of freshmen regulations and the attendant adverse publicity was discussed at some length. It was finally decided that further consideration might profitably be given to this matter.

Tea was served by a group of girls under the direction of Miss Aileen O'Grady, Arts '39.

THEOLOGICAL ALUMNI HOLD FORTY-EIGHTH CONFERENCE

PROF. REINHOLD NIEBUHR, noted philosopher and theologian on the staff of Union Theological Seminary, New York, delivered the Chancellor's Lectures at the forty-eighth annual conference of the Theological Alumni Association at Queen's, October 28 to 31. "Theological Reconstruction in a Day of World Crisis" was the general theme of the lectures. A record number of alumni and friends attended the sessions.

The topics of Professor Niebuhr's addresses were as follows: "The Destruction of the Medieval Theological Synthesis," "The Victory of the Renaissance over the Reformation," "The Inadequacy of Renaissance Theology for Our Day," and "Is a Reconstructed Theological Synthesis Possible?" These lectures were greatly enjoyed by the large and enthusiastic audiences.

An outstanding address was given by Dr. W. A. Mackintosh, Arts '16, Sir John A. Macdonald professor of political and economic science and director of courses in commerce and business administration at Queen's, now on leave of absence as economic adviser to the Dominion government. Dr. Mackintosh spoke on "The

Post-War World." This address was so well-received that it is being mimeographed for further distribution.

Other prominent speakers and their topics included Dr. F. L. Harrison, resident musician at Queen's, "The Development of Church Music;" Rev. J. R. P. Sclater, D.D. '35, Toronto, "Dante and the Preacher;" Rev. Dr. S. M. Gilmour, Queen's Theological College, "Eschatology and Ethics in the Teaching of Jesus;" Rev. N. M. Leckie, Arts '97, Theol. '02, D.D. '30, Grimsby, "Religion and Modern Poetry;" Rev. T. J. Thompson, Arts '95, D.D. '29, Ottawa, "The Ministry in Retrospect."

Devotions during the conference were conducted by Rev. C. D. McLellan, Napanee; Rev. W. R. Alp, Arts '16, Perth; and Rev. J. F. Wedderburn, Arts '14, Theol. '17, Kingston.

A reception for members and friends was held in the Red Room in Kingston Hall on the afternoon of October 30 by Mrs. J. R. Watts, Mrs. J. M. Shaw, Mrs. S. M. Gilmour, and staff.

In the election of officers Rev. A. D. Cornett, Arts '07, Theol. '11, Oshawa, was returned as president. Other officers include Rev. A. P. Menzies, Arts '09, Theol. '12, Ottawa, vice-president; Rev. H. W. Cliff, B.D., Kingston, secretary; and Rev. J. R. Watts, Arts '01, Theol. '04, D.D. '26, Kingston, treasurer.

St. John Ambulance Course Offered To Women Students

A ST. JOHN Ambulance course in first aid is being offered to women students again this year, under the directon of Dr. T. N. Tweddell, Med. '36. In practical work Dr. Tweddell is assisted by Mrs. E. M. Robertson, Miss Barbara Rooke, Arts '40, and Miss Helen McRae, Arts '40.

Youth Hostelers Met

A JOINT conference of representatives of the Ontario and Quebec branches of the Canadian Youth Hostels Association was held at the University over Thanksgiving week-end. It is hoped to establish hostels in the Kingston area.

OUT OF THE PAST

A Story of Yesteryear

MANY stories have been told about the absent-mindedness of the late Rev. James Williamson, one-time viceprincipal of Queen's, and a member of the

REV. DR. WILLIAMSON

University staff for more than fifty years. One of the best of these was related by the late Adam Shortt, Arts '83, LL.D. '11.

Dr. Shortt and a friend came to Queen's, in their first year, with letters of introduction to Dr. Williamson from former graduates. These were duly presented and the young men were warmly welcomed by the good doctor.

Shortly afterward, the friend ran afoul of Dr. Williamson by committing some misdemeanor in the junior mathematics class. For this he was reprimanded and fined one dollar, the standard form of discipline laid down by the professor.

Deeply humiliated, the freshman was anxious to pay and apologize immediately, but to his further embarrassment he found he was without sufficient funds. That night, upset by the incident, and unable to wait until the following day, he called upon Dr. Williamson. Much to his surprise, he was received most cordially, invited to enter the house and sit down, and entertained with friendly conversation. It was only after considerable time had

elapsed that the young man was able to confess the purpose of his visit. The doctor appeared unable or unwilling to remember the incident of the morning and refused to accept payment. Instead, he invited the freshman and Shortt to dinner the following Friday evening.

Elated at this turn of events, the boys put on their best clothes and arrived at the doctor's house in what Dr. Shortt later described as "rather unnecessarily good time." The doctor brought the boys into his study and engaged them in general conversation, without giving any hint that their visit had been anticipated. Eventually he must have gathered that he was in some way responsible for their presence, but apparently he could not remember the reason. Whereupon he blandly issued a dinner invitation for another evening, explaining that in his limited household unexpected guests could not be accommodated. The boys realized that they had been the victims of one of Dr. Williamson's absent-minded spells and withdrew in considerable confusion.

In the end the doctor was as good as his word, of course, and the young men enjoyed an excellent dinner.

ARMY LIST

NUMBER ELEVEN in the series of the monthly lists of those who have joined some branch of the fighting service is presented below. Readers are requested to send in news of alumni who are serving with the forces, either overseas or in Canada.

Royal Canadian Naval Volunteer Reserve—Lieut. D. K. MacTavish, Arts '20; Sidney R. Watson, Arts '40; N. Keith McKinnon, Com. '39; Surgeon-Lieut. T. G. Davis, Med. '39.

Royal Canadian Artillery — Lieut. R. A. Kirkpatrick, Sc. '27; Lieut. H. P. M. Smith, Com. '33; Lieut. Bruce S. Taylor, Sc. '29; Lieut. G. M. Wright, Sc. '40; Lieut. Alexander Perley-Robertson, Arts '42; Lieut. H. P. Davidson, Com. '33; Lieut. J. S. Corbett, Sc. '33.

Royal Canadian Engineers—Lieut. E. L. Hartley, Sc. '32; Lieut. J. A. Clazie, Arts '35, Sc. '37; Lieut. W. M. Robinson, Sc. '37; Lieut. J. J. Denovan, Sc. '40; Lieut. C. R. Booth, Sc. '38.

Royal Canadian Army Medical Corps—Major S. M. Polson, Arts '05, Med. '10, commanding officer, Kingston Military and Barriefield Camp Hospitals; Lieut. E. F. MacIntosh, Med. '29; Lieut. K. I. Murray, Med. '21; Lieut. Malcolm Dingwall, Med. '40; Lieut. H. C. Burleigh, Med. '26; Lieut. D. C. MacDonald, Med. '39; Lieut. C. A. Campbell, Med. '38.

Infantry and Rifles—Captain J. W. Leavens, Sc. '30, Hastings and Prince Edward Regiment; Lieut. J. G. Alley, Arts '38, Queen's Own Rifles of Canada; Lieut. P. L. P. Macdonnell, Arts '40, Seaforth Highlanders; Lieut. W. A. Neville, Arts '38, Queen's Own Cameron Highlanders of Winnipeg; Lieut. J. A. Edmison, Arts '26, Royal Highland Regiment of Canada.

Royal Canadian Air Force—Pilot Officer Leonard Lucas, Arts '36; Flying Officer A. McLean Haig, Arts '24; Pilot Officer V. A. Oille, Sc. '35; Pilot Officer J. E. Bowles, Arts '37; Pilot Officer H. A. Johnson, Arts '30; Flying Officer G. W. Wilson, Arts '26; Flying Officer G. W. Richardson, Arts '35; Lieut. T. L. Doolittle, Com. '30; Lieut. K. C. Rappell, Arts '17; Lieut. G. H. Conlin, Sc. '40; Flying Officer L. P. Valiquet, Arts '32 (administrative branch).

Royal Canadian Signals—Lieut. Bruce Clement, Sc. '36; Lieut. E. F. Burbank, Sc. '29; Lieut. W. A. Taylor, Sc. '24; Lieut. J. K. Hall, Sc. '34; Lieut. J. M. Hitsman, Arts '39.

Royal Canadian Ordnance Corps—Lieut. D. R. Peart, Com. '39; H. A. Taggart, Sc. '23.

Canadian Forestry Corps—Capt. E. A. Thomas, Com. '26.

General Staff, National Defence Headquarters—Capt. M. B. MacLachlan, Arts '14, Adjutant-General's Branch; Major F. G. Bird, Sc. '14.

Military Training Centres—Lieut. R. C. McNeil, Com. '31, Military Training Camp, Long Branch, Ont.

STUDENT ACTIVITIES

SCIENCE and Medicine made a clean sweep of the contested offices on the Alma Mater Society executive at the annual elections October 23. James Courtright, Sc. '41, Ottawa, won the presidency by a substantial majority, with Malcolm Young, Med. '41, Seeley's Bay, polling the second highest number of votes and thereby being declared vice-president. John Parry, Med. '42, Toronto, nosed out Robert Motherwell, Sc. '42, Ottawa, in the junior contest; Mr. Parry will hold the position of secretary, and Mr. Motherwell will serve as treasurer.

The election campaign was a lively affair, with all four faculty societies backing their candidates enthusiastically. Levana was particularly ingenious in spreading propaganda, organizing a large parade. The girls carried banners and signs, and paraphrased the engineers' yell with "We don't give a damn for any damn man who won't give a vote for us." All candidates had an opportunity to speak to the student body at an open meeting in Grant Hall October 17, but only two hundred undergraduates attended. The theatre party on the eve of the election was more successful, numerically at least, as even standing room was at a premium; remarkable to relate, not one dollar's damage was done—a new record.

The campaign buffoonery became a matter for official concern on the morning of October 22 when the Science men attacked the Arts Building, but the fracas was not nearly so bad as painted in the public press. The previous night some Arts men had advertised their candidate on a sign placed on top of the mechanical engineering laboratory and in various other ways. In retaliation the engineers arranged to have a campus fight the following morning, but the Arts students were forbidden to take part. The result was an attack on Kingston Hall, with eggs, tomatoes, and flour flying freely. Principal Wallace made an appearance and soon put a stop to hostilities. damage will be paid by the Arts and Engineering Societies, and a fine will be collected, the proceeds being turned over to the Queen's War Aid Commission.

* * * *

One of the major problems facing student government at the moment is the relations of the students and the soldiers stationed in Kingston. There were a few manifestations of bad feeling between

JAMES M. COURTRIGHT

groups and individuals in the term and there was some danger of the situation becoming more general. The tension has been eased with the military authorities threatening stern measures and with the Alma Mater Society making a proclamation "that any student who wilfully incites unrest between the soldiers in this district and the undergraduate body will be prosecuted in the A. M. S. Court, and the maximum penalty of expulsion will be requested." Freshmen are no longer required to wear tams or other identification after 5 p.m. Steps are also being considered to improve relations by offering the soldiers certain privileges.

* * * *

Prominent off-the-campus speakers were featured at the meetings of several student organizations. Dr. Barnett R. Brickner, rabbi of the Euclid Avenue

Temple, Cleveland, Ohio, spoke on "Where is God?" at the first of the monthly University church services on October 6. Dr. George H. Whipple, famous chemical pathologist, Nobel prize winner, and Dean of the School of Medicine in Rochester, New York, addressed the Aesculapian Society on October 18 on "Protein Construction and Exchange in the Body." Queen's own Dr. W. A. Mackintosh, now on leave of absence as economic adviser to the Dominion government, was the guest speaker at the Commerce Club luncheon on October 29. Prof. Reinhold Niebuhr, famous philosopher and theologian of Union Theological Seminary, New York City, spoke before a joint meeting of the Student Christian Movement and the International Relations Club on October 29 on "American Foreign Policy and the Attitude of the Churches Towards It."

* * * *

Miss Mary Hamilton, Arts '43, Kitchener, was chosen as "Queen of Queen's" in a popularity contest conducted on the campus. The pretty winner was presented with an orchid corsage at the Arts '43 year dance. . . Despite the fact that there are not any football games this fall, pep rallies are being held as usual in order

that the freshmen may learn how to put the right emphasis into the University yells. . . . The Levana Society has attempted to meet the demands of the students for a University common room by holding an "open night" in Ban Righ Hall. The affair on October 19 was a great success, a large number of students taking advantage of the opportunity to play bridge, ping-pong, and other games, to dance, and to take part in a sing-song. This may be the first of a series of such events. . . . The Levana Red Cross has been given a room on the top floor of the Biology Wing of the Old Arts Building. Its projects are being financed by a generous grant from the Queen's War Aid Commission, a student organization. . . . The Queen's Pipe Band is still carrying on, although there is not the same need for a unit this year. Several public appearances are planned. A levy of ten cents has been made on each student in an effort to help meet expenses and enlarge the band equipment. . . . Twentythree British Columbia students held their annual banquet on October 2. . . . The traditional candlelighting ceremony took place in Grant Hall October 9, when the freshettes were officially admitted to membership in the Levana Society.

THE BOOKSHELF

Linguistic Study

THE STORY OF OUR LANGUAGE. By Professor H. Alexander. Published by Thomas Nelson and Sons, Limited, Toronto. \$1.00.

THE book is accurately named, for it is precisely the story of our language. It contains a lucid description of the sources of the language, the changes it has undergone, with a comprehensive survey of what it has become. The keynote of the book is that language is fluid and ever changing. The method is much like that of a scientist who views the development of a biological specimen under the micro-

scope and observes all the unpredictable changes it may undergo, with the purpose of noting not what should be but what is. This observation is carried out not only over the forms of the past but in active research in the speech-habits of groups of people in isolated sections of the country where curious survivals of old forms are heard and where processes may be observed parallel to those which have taken place in past stages of the language.

Like the head of Goldsmith's schoolmaster, the book is unique because of its size. It is a microcosm. The story of the language is seen in the perspective which only a vast knowledge of the whole field of linguistic development—vocabulary, sound, form, syntax and meaning—could give. An enormous store of interesting, detailed, and scholarly information about words and their changing forms and the various influences to which they were subjected is presented as a coherent story.

TECHNICAL CHAPTERS

It has been suggested in the preface that the reader may, if he wishes, omit the more technical chapters on the structure of Old English and Middle English. The student will, however, welcome these chapters particularly because of the orderly condensation of essential information and the simplification of shifting and involved processes otherwise difficult to understand.

The brilliant chapter on levels of language will be of wide general interest. Here is a discussion of a problem which all must face—the use of colloquial language and of slang, old and new (for it must not be imagined that slang is new). The modes of creation, the advantages and disadvantages, and the vocabulary of this informal language are discussed with a good deal of zest and an abundance of entertaining illustrative material.

The comparison of British and American English has been the subject of fiery controversy and occasionally still produces ill-feeling. There is in this book a scientific analysis of the differences between the speech of the two countries, a subject that is not without its humorous aspects. We see the Englishman taking his torch at night instead of a good flashlight, going to the draper's, or perhaps to the vicar's or curate's to play draughts. He speaks of petrol, of being ill, of mods and greats and many things we do not understand, and he, in turn, is puzzled by our cheer-leaders and their functions, bleachers, campus, notion-counters, chores, shivaree, pie-à-la-mode, hoosegow, and

There is a fascinating section on loan-words in American English which carry

with them a flavour of the adventure and romance of earlier days. "All this," we are reminded, "is in line with the tradition of English which has throughout its long history absorbed new words and phrases without regard to their origin. In the course of time almost every source has been drawn upon to enlarge the boundaries of English speech and the result is the wonderful copiousness of our vocabulary and its capacity to convey the most delicate shades of meaning and produce the most varied emotional effects." It is suggested that if American borrowings add anything valuable to the resources of the language they ought to be welcomed. This shows a refreshing absence of prejudice.

LINGUISTIC GEOGRAPHY

The final chapter deals with linguistic geography, a new subject in North America. It is a systematic study of the speech habits of people in different regions, but usually in isolated communities where the speech has not been exposed to the levelling influences of education, the radio, and the film, and whose members have not travelled far from their native place. From the records linguistic atlases are made which are of interest to the historian, the ethnologist, and the sociologist as well as to the student of languages. This research has been carried on by the author for two summers in Nova Scotia, and already many interesting features have been observed, for instance the double standard of speech and the existence of older English forms such as chamber, tempest, granfer, deef, sassengers, clumb, and ris.

To Professor Alexander's students at Queen's the style will be quite familiar. He has effectively reduced a great mass of material and presented it in a vigorous manner, making the subject live before our eyes. He has brought order into the chaotic processes by which the language has been built up so that at least we may know something of the character of the processes which have taken place and are taking place, and so be in a better position to pass judgment on questions of usage. The clarity and orderliness which are

characteristic of his lectures are evident also in the book. The tone, as has been said, is scientific and scholarly, never dogmatic. The rigid purist may be disappointed if he seeks confirmation of his particular foibles, but may realize that language is more revealing and vital than he ever imagined.

—J. H.

ATHLETICS

Well, Who Was The Greatest Player In Queen's Football History?

WHO was the greatest individual football player who ever wore the Tricolour?

It is extremely doubtful whether that question could be settled to the satisfaction of all graduates. In fact, such a topic would probably precipitate enough argument to last through the long winter months and would likely result in the termination of many life-long friendships. The older grads would plump for the gridiron greats of yesteryear; the younger lads would sing the praises of men whose feats are recent history; while in between there is a large group who would grow apoplectic at the suggestion that any real football was played before or after the Batstone-Leadlay-McKelvey era.

Of course such differences of opinion are only natural. A man who can remember his football heroes playing the game the hard way, without pads, and unhampered by a lot of silly rules that have crept in since, is bound to look down his nose at the latter-day gladiators who trot out on the field in expensive equipment, including sweaters that match. On the other hand, the johnny-come-latelies who have not been eligible to vote on more occasions than they have fingers will scoff at any comparison between the representatives of what they feel is the stoneage of Intercollegiate football and those of the present day.

The truth of the matter is that there is no satisfactory answer. A graduate is perfectly justified to stick to his own school of thought and to deride any who take an opposite view. Perhaps all are right to some degree.

For what it may be worth in such an argument, although freely admitting that there are many more factors to be taken into consideration, the *Review* presents the following statistics to show the topranking scorers of all time:

1.	Leadlay	135
2.	K. Williams	123
3.	Carter	73
	J. Munro	73
5.	Leckie	73

AT THE BRANCHES

Montreal

E. T. STERNE, Sc. '13, of the Allied Supplies Board, was the guest speaker at the annual meeting of the Montreal Alumni, held at the Mount Royal Hotel recently. He spoke on "The Burma Road."

Elections brought Claude Root, Arts '19, to the president's chair in succession to J. B. Stirling, Sc. '13. Elected also were Gordon Maybee, Sc. '25, Arts '27, as first vice-president, A. F. White, Sc. '27, second vice-president, Reginald A. Blakely, Sc. '28, secretary, and G. V. Roney, Sc. '26, treasurer.

Though social activities during the coming season will be curtailed owing to war conditions, the well-attended meeting voted for active continuation of regular meetings along new lines.

An afternoon tea and evening bridge was held at the home of Prof. J. V. Mac-Ewan, Sc. '22, and Mrs. MacEwan (Eleanor Smith), Arts '22, on November 2.

Niagara Peninsula

In the picturesque setting of the restaurant at Victoria Park overlooking historic Niagara Falls, the Niagara Peninsula branch held its annual fall business meeting and a most enjoyable evening of bridge and refreshments on October 2.

Some forty-five members turned out to elect Dr. S. A. McNeight, Sc. '31, Niagara Falls, New York, honorary president and A. L. Brooks, Arts '14, Welland, president for the coming year. To F. S. Durdan, Sc. '33, Welland, goes the

position of secretary, and first, second and third vice-presidents are, respectively, Jack Pattison, Arts '37, Niagara Falls, Ont., Reginald Campbell, Com. '31, St. Catharines, and Miss Mildred Metler, Arts '32, Welland.

Ottawa

THE Ottawa alumnae recently held a very successful tea and money shower at the home of Mrs. A. E. Mc-Rae (Irene McAllister), Arts '14. The president, Mrs. J. E. Plunkett (Edna Moffat), Arts '26, assisted the hostess in receiving.

Mrs. J. J. Dunlop (Margaret McArton), Arts '20, and Miss Iva Wilson, Arts '35, were conveners of the tea, and presiding at the tea table were Mrs. T. K. Waddell (Jean Govan), Arts '20, Mrs. Fred Jeffrey (Winnifred Law), Arts '29, Mrs. N. B. MacRostie (Annie Callander), Arts '13, and Mrs. W. I. Garvock (Ethel Guthrie), Arts '15. Assisting were Misses Margaret Fenton, Com. '39, Margaret Huband, Arts '40, Lillian Gardner, Arts '39, Katherine Archibald, Arts '40, Marion Gordon, Arts '40, Patricia Lipsett, Arts '40, May Shaw, Com. '40, K. Revell, and Lorene Denise Piper, Arts '40. Misses Betty McRae and Joan Waddell opened the door to the guests.

Guelph

DR. G. S. GRAHAM, professor of history at Queen's, will be the guest speaker at the annual meeting of the Guelph branch on November 22.

ALUMNI NEWS

Births

Archer—At the General Hospital, Sarnia, Ont., on September 3, to D. B. Archer, Sc. '35, and Mrs. Archer, a son (Jackson Wentworth).

Ault—At the Ottawa Civic Hospital, on October 25, to Flight Lieutenant G. A. Ault,

Arts '35, and Mrs. Ault, a son.

Baker—At St. Michael's Hospital, Toronto, on October 21, to A. B. Baker, Arts '25, and Mrs. Baker, a son (James Michael).

Bigelow—At Grace Hospital, Ottawa, on November 6, to Major P. J. Bigelow, Arts '32, and Mrs. Bigelow (Margaret Austin), Arts '32, a daughter.

Campbell—At the Plummer Memorial Hospital, Sault Ste. Marie, Ont., on July 25, to H. J. Campbell, Com. '32, and Mrs. Campbell, a daughter (Heather Graham).

Evans—At the Plummer Memorial Hospital, Sault Ste. Marie, Ont., on August 20, to O. A. Evans, Sc. '33, and Mrs. Evans, a

daughter (Mary Elizabeth).

Fairbairn—At the Massachusetts General Hospital, Boston, Mass., on July 8, to Dr. H. W. Fairbairn, Sc. '29, and Mrs. Fairbairn, a daughter (Ann').

Finn—At the Ottawa Civic Hospital, on October 21, to Mr. T. D. Finn and Mrs. Finn (Amy M. Fraser), Arts '17, a daughter.

Griffin—At the Frivate Patients' Pavilion, Toronto General Hospital, on November 3, to H. S. Griffin, Sc. '23, and Mrs. Griffin, a daughter.

Harris—At the Mountain Hospital, Hamilton, Ont., on October 5, to T. M. Harris, Sc. '32, and Mrs. Harris, a son (Morgan

Thomas).

Hartley—On August 12, 1939, at the Vancouver General Hospital, to Lieutenant E. L. Hartley, Sc. '33, and Mrs. Hartley, a son (Sydney Frederick).

Higgins—At the General Hospital, Oshawa, Ont., on October 14, to E. G. Higgins,

Arts '39, and Mrs. Higgins, a son.

Kennedy — At St. Joseph's Hospital, Guelph, Ont., on October 15, to C. E. Kennedy, Arts '30, and Mrs. Kennedy, Acton, Ont., a son.

Richmond—At the Public Hospital, Clinton, Ont., on October 30, to Dr. C. R. Richmond, Med. '37, and Mrs. Richmond (Marion Lyons), Arts '36, Ethel, Ont., a son.

Russell—At Victoria Hospital, London, Ont., on September 8, to O. S. Russell, Sc. '30, and Mrs. Russell, a daughter (Roberta

Jean).

Smith—On September 25, at Windsor, Ont., to E. R. Smith, Arts '24, Com. '25, and Mrs. Smith (Jean Gray), Com. '29, a daughter.

Stanyar—At the Ottawa Civic Hospital, on November 1, to Captain S. B. Stanyar, Arts '33, and Mrs. Stanyar, a son.

Stewart—At the Kingston General Hospital, on October 26, to H. H. Stewart, Sc. '26, assistant professor of electrical engineering at Queen's University, and Mrs. Stewart, a daughter (Mary Elizabeth).

Westington—At the Ottawa Civic Hospital, on November 1, to D. M. Westington, Arts '32, and Mrs. Westington (Janet Little), Arts '32, a son (Ralph McClelland).

Marriages

Andrew — On October 12. in Scarboro United Church, Calgary, Alta., Margaret Isabel Horner to Robert Murray Andrew, Com. '35, Edmonton.

Benson—In October, Bessie Schneider, daughter of Mr. and Mrs. Louis H. Schneider, Listowel, Ont., to Dr. Cyril Kenneth Benson, Med. '40.

Carmichael—In St. Patrick's Church, Fort William, Ont., on June 25, Mary Josephine Muldoon to James Irving Carmichael, Sc. '36. Mr. Carmichael is production engineer in the planning department of the Canadian Car and Aircraft Company, Fort William.

Davis—In Dominion United Church, Ottawa, on November 9, Mary Margaret Davis, Arts '37, to Roderick Watson MacLean. They will live at 149 Patterson Ave., Ottawa.

Howard—On' October 14, at Our Lady of Perpetual Help Church, Ottawa, Kathleen O'Meara to Patrick Arthur Howard, Arts '37, Ottawa.

Henderson—On October 10, in St. Matthew's Anglican Church, Ottawa, Elizabeth Taylor Bennett to Dr. James Fenwick Henderson, Sc. '29 (Ph.D Wisc.). Dr. A. W. Jolliffe, Arts '29, was best man.

McCormick—On October 12, at Glebe United Church, Ottawa, Margaret Edith Wallace Gardner to Dr. Albert Mowat McCormick,

Med. '07, Ottawa.

Macnab—On September 14, in Emmanuel Anglican Church, Arnprior, Ont., Marguerite Evelyn Maquire to Lieutenant R. S. Macnab, Com. '38, Camp Borden, Ont.

MacRostie — At Southminster United Church, Ottawa, on October 26, Norma Alberta MacRostie, Arts '37, daughter of Norman B. MacRostie, Sc. '11, Arts '14, and Mrs. MacRostie (Annie Callander), Arts '13, to Richard Nesbitt Dobson, son of Mrs. W. A. Dobson (Ethel Nesbitt), Arts '11, and the late Rev. W. A. Dobson, Arts '09, Theol. '16.

Parnell-Matheson—At Chalmers Wesley United Church, Quebec City, on October 17, Dorothy Gertrude Matheson, Arts '40, daughter of Rev. A. D. Matheson, Arts '12, Theol. '16, and Mrs. Matheson (Gertrude McCuaig), Arts '15, to Douglas Edward

Parnell, Arts '40. The bride's father officiated.

Shenkman—On June 30, at The Spanish-Portuguese Synagogue, New York City, Thea Tyler to Dr. Samuel Shenkman, Med. '33.

Simmons—At St. Luke's Anglican Church, Kingston, on October 19, Marjorie Jean Compton to James Herbert Simmons, Arts '41. They will live in Hamilton, Ont.

Tanner-Sword—On October 19, in Morgan Memorial Chapel, Queen's University, Janet Elizabeth Sword, Arts '38, to Charles Jewell Tanner, Sc. '39, Central Patricia, Ont

Taylor—In Copper Cliff, Ont., in October, Muriel Hambley to William E. Taylor, Sc. '35. They are living in Montreal, where Mr. Taylor is on the staff of the Allied War Supplies Corp.

Deaths

Allan—While taking soundings in connection with power development, Robert Gage Allan, Sc. '37, was drowned in the Musquash River, near Bala, Ontario, on Oc-

tober 13. Mr. Allan was working with two other men when his canoe overturned in the fast-running water. While his two companions clung to the boat and were eventually swept to safety, Mr. Allan, a strong swimmer, struck out for shore, but failed to reach it. Born in China in 1907, Mr. Allan received his preliminary education at Stanstead,

R. G. ALLAN

Quebec, and later attended the University of Cincinnati before entering Queen's. As a student he spent his summers working with the Ontario Hydro Electric Power Commission, and after graduation he became a permanent member of the staff. Among the survivors are his wife, his mother, two sisters, and on'e brother.

Clark—Pioneer teacher of British Columbia, George Whitcomb Clark, Arts '98, died suddenly at his home in Vancouver on October 6. Mr. Clark had been a member of the teaching staff of King George High School since 1918. He was said to be one of the most eloquent teachers of English literature in the Vancouver secondary schools and many of his pupils later became English honour students at the University of British Columbia. Mr. Clark was born at Kingston in 1878. He entered Queen's in 1895 and obtained his B.A. degree in 1898 and his M.A. the following year. In the fall of 1899 he went to British Columbia to teach at Nelson. In 1903 he opened the high school at Grand Forks, and three years later he was transferred to Ladner. He also opened the high school at Ladysmith in 1908. He went to South Vancouver High School in 1914 and four years afterwards was appointed to the staff of King George High School. Mr. Clark was a charter member of the B. C. Teachers' Federation when it was formed in 1916, and in 1926-27 he served as president. For six years he was a member of the senate of the University of British Columbia, with which he had been connected since its founding. Surviving are one daughter and two sons.

Conn—On September 22, at her home in Toronto, Ontario, Mrs. J. R. Conn (Edna Millions), Arts '01, died at the age of sixty-four. Born at Carleton Place and educated in the schools of that town, she graduated from Queen's with her B.A. degree in 1901. Those who survive include her husband, Rev. J. R. Conn, Arts '96; two sons, Capt. H. G. Conn, Sc. '31, and Dr. W. R. Conn, Arts '32; and two daughters, of whom Miss Elsie Conn, Arts '26, is one. The funeral was held at Toronto and interment was made at Napanee.

Crawford—At the top of the seniority list of Queen's graduates, Captain Robert Crawford, Arts '69, passed away at the Kingston General Hospital on November 5. He was in his ninetieth year. A coal merchant for more than half a century, Mr. Crawford had not been at his office since 1938, but had been able to be out as late as September of this year. Since then, however, his health had gradually declined. He was born in Kingston and received his early education at the Grammar School. He entered Queen's in 1865, at the age of fourteen, and during his undergraduate days he won many scholarships. He spent his college vacations sailing lake and river vessels. During his time, Queen's College consisted of what is now the Principal's residence and the Old Medical Building, and only forty-eight students were in attendance. In 1869 Mr. Crawford was the first graduate to be awarded the Prince of Wales Prize "for the best papers at the examination for B.A." He always maintained an active and loyal interest in the affairs of his Alma Mater. For many years he was a member of the Board of Trustees as representative of the Faculty of Applied Science. He was one of the directors of the former School of Mining. In 1935 he succeeded Dr. Alexander Bell as the senior livgraduate of Queen's. Mr. Crawford was greatly interested in the affairs of Kingston and was a prominent member of the old Board of Trade for a long period. A member of Queen Street Church for years he served as treasurer and also sang in the choir. He was bereaved by the death of his wife in 1938. Among the survivors are two sons, including Vernon, Arts '09, Sc. '10, Pittsfield, Mass., and one daughter. Principal Wallace officially represented Queen's at the funeral and Vice-Principal McNeill served as one of the pall-bearers.

the Mulfulira copper mine in Northern

ditional details were given in the message cabled to Canada. Mr. Dixon was born' at Cobalt, Ontario, in 1911. He entered Queen's in 1933, enrolling in Arts and transferring later to the Science Faculty. For five years he was a valued member of the senior Intercollegiate hockey team. Popular as a stu-

W. G. DIXON

dent, he served as president of the Mining and Metallurgical Society and as vice-president of the permanent executive of Science '38. In the summers he worked at the Noranda mines. After graduating as a mining engineer he went to Northern Rhodesia. He is survived by his wife and daughter, his parents, and five brothers.

Donovan—Word has just reached the "Review" of the death of Dr. Edward Ignatius Donovan, Med. '86, which occurred October 8, 1939. Dr. Donovan was eighty years of age. Born at Seymour, Ontario, he attended Campbellford high school. He entered Queen's in 1881 and received his M.D. degree five years later.

Dixon—While working underground at Dryvynsyde—At his home in Vancouring in Northern British Columbia, Beresford O. W. Dryvyn-Rhodesia, Africa, Walter Glyde Dixon, Sc. Syde, Arts '33, died recently at the age of '38, was killed early in November. No additional details were land, and was educated at St. George's College and at Oxford, in England, also at the Universities of Adelaide and Tasmania. For several years he taught in Australia and Tasmania. He came to Canada in 1928 and entered Queen's the following year. Obtaining his B.A. degree in 1933, he resumed his teaching career. For a time he was a member of the staff of St. John's School, Winnipeg, Manitoba, and then he transferred to St. George's School in Vancouver. The survivors include his wife and two chil-

> Haskin—After a long illness, Dr. Byron Haskin, Med. '03, died at his home in Theresa, New York, on November 7. Driving through the heavy snows of last winter to make calls greatly sapped his strength and he had not been able to regain good health. Dr. Haskin was born at Lyn', Ontario, in 1872. His grandfather had been one of the pioneers in that district, and the log house he built still stands on the family homestead. Dr. Haskin attended the high school at Athens and then entered Queen's in 1899. During the summer months he cut wood and did other jobs in order to earn sufficient money to complete his education. He graduated with the degree of M.D., C.M. in 1903. He opened a practice at Plessis, New York, which he carried on for three years. In 1906 he moved to Theresa. Dr. Haskin was

a member of the Jefferson County and New York State Medical Societies and had been president of the former organization.

Kinahan—Suddenly, at Kamloops, British Columbia, on August 16, John Francis Kinahan, Arts '15, died at the age of sixty-four. Mr. Kinahan was superintendent of separate schools at Calgary, Alberta. Born at St. Augustine, Ontario, he received his early education at Goderich collegiate institute. He enrolled as an extra-mural student at Queen's in 1907 and received his B.A. degree in 1915.

Laird—Treasurer of the United Church of Canada since union in 1925, Rev. Robert Laird, Arts '93, D.D. '19, LL.D. '39, died at his home in Toronto on October 25. Laird had been in failing health for the past year, but he had been able to attend the meeting of the General Council of the United Church at Winnipeg in September. Since his return to Toronto he had suffered a re-Born at Malpeque, Prince Edward Island, in 1871, he attended Pictou Academy and the Kingston collegiate institute before entering Queen's. He obtained his M.A. degree in 1893, and later was made the recipient of the honorary degrees of D.D. and LL.D. He also took postgraduate work at the University of Berlin. After attending classes in the Queen's Theological College, he was ordained to the ministry of the Presbyterian Church in 1895. He held charges at Campbellford and Brockville, Ontario, and at Vancouver, British Columbia, until 1905. For the next eight years Dr. Laird was financial agent and professor of practical theology at Queen's. From 1913 to 1920 he served as secretary of the Board of Finance of the Presbyterian Church in Canada, and for the next six years as Church treasurer. In 1925 Dr. Laird was appointed treasurer of the United Church of Canada, a position he held until his death. He was the organizer of the Forward Movement and its secretary from 1918-20. He served as president of the Alliance of Presbyterian and Reformed Churches from 1937-41. Among the survivors are his wife, Henrietta Odell, Arts '95, one daughter, Dr. Marion D. Laird, Arts '22, and one son, Dr. Robert C. Laird, Arts '23.

MacArthur—On October 8, at her home on Wolfe Island, Ontario, Miss Elizabeth MacArthur, Arts '92, died at the age of seventy-nine. Miss MacArthur was born at Kingston and received her preliminary education privately. She entered Queen's in 1888 and attended for five sessions.

Marquis—The "Review" has just heard of the death of Dr. J. R. Marquis, Med. '12, who was killed in an automobile accident at Kemmerer, Wyoming, on November 18, 1939. Born at Nebraska in 1878, he attended Fremont Normal College and the University of Nebraska, where he obtained his B.Sc., Ph.D., and M.D. degrees. Dr. Marquis enrolled in the senior year in medicine at Queen's in 1911.

Rathbun—On September 7, Lt.-Col. Edward Walter Rathbun, Arts '86, died at the home of his step-mother in Deseronto, Ontario. Retired a short time previously, he had gone to live in Italy, but he returned to Canada at the outbreak of the present war. He was born at Deseronto and received his preliminary education at Upper Canada College. He entered Queen's at the age of seventeen and took classes in Arts for two sessions. On the death of his father in 1903 he assumed management of the Rathbun Lumber Company, and he continued in that position until the first Great War, when he went overseas. He was also vice-president of the Boiler Inspectorate and Insurance Company. The survivors include his wife, his step-mother, two halfbrothers, and two half-sisters. His ashes are being sent to England.

Shea — At the age of forty, J. Russell Shea, Arts '23, died suddenly in Toronto, Ontario, on September 24. Mr. Shea was born at Cartier, Ontario, and received his preliminary education in the schools of Kingston and Sydenham. Enrolling at Queen's he took part of his course extramurally, obtaining his B.A. degree in 1923, with honours in mathematics and physics. After graduation he began a teaching career and held posts in Jarvis and Bloor collegiate institutes in Toronto. The survivors include his wife and two small sons.

Walsh—Ill for the past year and a half, William Allen Walsh, Arts '18, died suddenly at the Whitehall Hotel, Daytona Beach, Florida, on October 18. He had left his home in Montreal ten days previously on a trip planned to build up his failing health. Mr. Walsh was born at Kingston, Ontario, in 1887. He was educated at the Gault Institute in Valleyfield, Quebec, the McGill Normal School, and McGill University, before enrolling at Queen's as an extra-mural student in 1914. He obtained his B.A. degree four years later. He was principal of the Model School at New Carlisle in 1907 and the following year became a teacher at Fairmount School, Montreal, transferring to Argyle School, Westmount, as a teacher in 1914. He entered the service of the Outremont School Board in 1915 as principal of Strathcona Academy and superintendent of the Board and held these positions until the time of his death. For more than two decades he was active in politics and was elected to represent the Mount Royal constituency in the Federal House in 1935. He was defeated in the same seat in the last elections. The Montreal "Gazette" commented editorially on his death as follows: "In the death of W. Allen Walsh in Florida yesterday, Montreal and Canada lost a public servant we can ill spare. Had all politicians been of Allen Walsh's type, the word 'politician' would not have acquired its unsavoury connotation in English—or especially North American speech. He was a man who had made a distinguished career for himself as an educator, before he ever entered the political arena. His brief experience there was such as to add to, not detract from, his stature, as a man of ability and independence. A single term in Parliament made him known, far outside his own district, as on'e whose energy and competence could be depended upon, and those qualities were often called into play by his parliamentary seniors."

Notes

1880-1889

A. D. Cartwright, Arts '85, is retired and living at 354 Stewart St., Ottawa. Mr. Cartwright practised law for many years in Ottawa and was secretary to the Board of Railway Commissioners from 1904 to 1935.

Dr. S. W. Dyde, Arts '83, D.Sc. '87, former professor at Queen's, who is now living in Edmonton, was present at a special convocation of St. Stephen's College, Edmonton, on October 22, when his portrait was presented to the college by the Board of Management. Dr. Dyde was the first principal of Robertson College, since merged with St. Stephen's.

Dr. Michael James, Med. '87, of Mattawa, Ont., was bereaved on November 3 by the

death of his wife.

Mrs. Adam Shortt (Elizabeth Smith), Med. '84, who has been president of the board of the Elizabeth Residence, Ottawa, since its inception twenty-one years ago, was re-elected to office at the recent annual meeting.

1890-1899

F. R. Anglin, Arts '95, Kingston, was bereaved on October 2 by the death of his wife. Mrs. J. L. Davidson (Helen Anglin), Arts '26, and Marion Anglin, Arts '28, are daughters, and A. B. Anglin, Sc. '33, is a son.

Dr. Alison Jamieson, Med. '92, after forty years of medical practice in London, Ont., is now retired and living in Smiths Falls,

Ont.

Dr. H. E. Paul, Arts '98, Med. '01, physician in Toronto, was appointed consultant in urology at St. Joseph's Hospital last year.

1900-1909

Dr. A. E. R. Boak, Arts '07, (Ph.D. Harvard), has been appointed to the Richard Hudson chair in European History at the University of Michigan. In September Dr. Boak was invited to read a paper at the Bicentennial celebrations of the University of Pennsylvania. His subject was "The

Heritage of the Roman Law."

H. J. Coon, Arts '06, Toronto, was recently appointed executive assistant by the Bank of Nova Scotia. Mr. Coon entered the service of the Metropolitan Bank in 1907 and after serving in various branches became chief accountant in 1910. After the amalgamation of the Metropolitan Bank with the Bank of Nova Scotia he became chief accountant of the latter in 1919 and later was appointed an inspector. In 1926 he became manager of the investment department and in 1935 a supervisor of branches, which position he held until his present appointment.

- Dr. J. N. McKinley, Med. '03, eye, ear, nose and throat specialist, Toronto, is at present chief of the nose, throat and ear department of Toronto Western Hospital.
- B. E. Norrish, Sc. '08, formerly managing director of the Associated Screen News, Montreal, was recently made president and managing director.
- J. F. Pringle, Arts '05, Sc. '07, is general superintendent of the Canadian National Railways, Toronto.

1910-1919

H. C. Bates, Sc. '17, is county engineer at Perth, Ont.

James Bews, Arts '11, is farming at Eatonia, Sask. He is secretary-treasurer of Eatonia Union Hospital and occasionally conducts services for the United Church of Canada in his district.

F. W. Danby, Arts '11, principal of the collegiate and vocational institute, Kingston, was recently elected president of the

Kingston Boy Scouts' Association.

Norman B. Davis, Sc. '11 (M.A. Cornell), is now technical consultant to metals controller, Department of Munitions and Supplies, Ottawa.

Dr. C. H. Elliott, Med. '16, Kingston, was bereaved on October 31 by the death of his

mother.

R. R. Hepinstall, Sc. '14, is president and secretary-treasurer of the Hepinstall Steel

Works, New Orleans, La.

Miss Hilda Laird, Arts '18, assistant professor of German at Queen's, received her Ph.D. from Cornell University last February.

R. E. Lewis, Arts '15, is principal of the

high school at Gananoque, Ont.

Adrian MacDonald, Arts '12, for many years a member of the staff of the Feterborough Normal School, and for the past three years on the staff of the Toronto Normal School, has been appointed assistant professor of methods in elementary subjects at the Ontario College of Education, Toronto. Mr. MacDonald is the author of "Canadian Portraits" and of textbooks on English literature.

Rev. J. F. L. Macdonald, Arts '10, Theol. '13, Toronto, who retired from the active ministry some years ago, is at present writing for the "United Church Observer." He is also treasurer of the Toronto East Pres-

R. J. MacKenzie, Arts '15, is an inspector of schools in Manitoba, with headquarters in' Gladstone.

Mrs. Stanley Moote (Grace Wood), Arts '16, is now living in Kintore, Ont.

1920-1929

H. H. Bleakney, Sc. '22, is with Department of National Defence, Ottawa.

Dr. Quartus Bliss, Med. '26, has been practising for several years at Kingsville, Ont.

H. W. Chapman, Arts '26, has been on the staff of the Central Collegiate Institute, Regina, Sask., since 1926.

Dr. T. W. Faulkner, Arts '21, Med. '24, practises at 273 Main St., Huntington, N.Y., specializing in eye, ear, nose and throat dis-

Dr. A. W. Jolliffe, Arts '29, bureau of economic geology, Department of Mines and Resources, recently conducted a geological mapping survey of the Lake Prosperous area north of Yellowknife, N.W.T. In addition to mapping, the purpose of the survey was to examine valuable tungsten deposits of that district.

Dr. R. C. Laird, Arts '23, Toronto, is one of two physicians recently awarded "ad eundem" fellowships in the division of surgery by the Royal College of Physicians and Surgeons of Canada. After leaving Queen's Dr. Laird took a medical course at the University of Toronto, graduating in 1928. He later took his M.S. from Toronto and became a Fellow of the Royal College of Surgeons, England, in 1939.

Miss Luella McDougall, Arts '29, Brockville, Ont., Dr. John W. McDougall, Med. '37, Brockville, and Dr. James 'A. McDougall, Med. '44, were bereaved on June 15 by the

death of their mother.

Miss Marjorie McKenzie, Arts '20, is in the Department of External Affairs, Ot-

Ian MacLachlan, Sc. '25, Arts '26, Kingston, was elected president of the Eastern Ontario Lumber Dealers' Association at the annual meeting held at the Chateau Laurier, Ottawa, on November 7.

J. C. MacLeod, Sc. '24, has been transferred from Detroit to the Syracuse divi-

sion of Solvay Process Company.

Gordon R. Maybee, Sc. '25, Arts '27, of Fry-Cadbury Limited, Montreal, has qualified as a lieutenant-engineer in the McGill C.O.T.C. He is also a member of the Auxiliary Mobile Police Force (C.P.C.)

Mrs. W. A. Morris (Muriel Wilson), Arts '23, has moved from Toronto to Hamilton, where her address is 90 Oak Knoll Drive.

J. L. Murray, Arts '20, was recently appointed principal of the high and vocational school at Timmins, Ont. He succeeds W. W. Tanner, Arts '24.

G. W. Parsons, Arts '26, has been with the Bell Telephone Company of Canada for the past two years. He is now engineer in the

general traffic department.

J. A. Partridge, Arts '22 (M.A., B.Paed., Toronto), has returned to the normal school staff in Hamilton, after a year as public school inspector on exchange in Halton County.

E. M. Patton, Com. '26, of the Bell Telephone Company of Canada, has been transferred from Brockville to Montreal, where he is division commercial supervisor.

Mary Elizabeth Sheldon, Arts '21, has received her M.A. in political science from McMaster University. She is now teaching at the central collegiate institute in Hamilton.

Rev. Dr. G. A. Sisco, Arts '25, D.D. '37, Toronto, secretary of the United Church, preached at the 110th anniversary services at Dominion Church, Ottawa, on October 25.

Lorne Skuce, Arts '29, who taught on exchange during 1939 and 1940 in the Normal School at Hamilton, Ont., has returned to his duties as public school inspector for Halton County.

H. L. Slater, Com. '26, is with the Foreign

Exchange Control Board, Ottawa.

A. J. Strain, Sc. '25, of the Consumers Gas Company, has been transferred from Hamilton to Toronto, where he is manager of domestic sales.

R. F. Bruce Taylor, Com. '24, has been granted leave from Edwards, Morgan and Company, chartered accountants, Toronto, for the duration of the war in order to take charge of the "services section" of the Foreign Exchange Control Board. He moved to Ottawa last January.

1930-1940

T. D. Anderson, Sc. '35, is with Sorel In-

dustries Limited, Sorel, Que.

Miss Irene Emily Anniss, Com '40, is on the staff of the Foreign Exchange Control Board, Ottawa.

E. A. Barton, Sc. '30, has returned from Trinidad, B.W.I., after completing a threeyear contract with Trinidad Leaseholds Limited. He is now with the Worthington Pump and Machinery Corp., Harrison, N.J.

Donald Bailey, Arts '40, is with RCA Vic-

tor Company, Montreal.

R. R. Basserman, Sc. '31, has joined the staff of Messrs. Futterer and Reid, consulting mining geologists, 901 Federal Building, Toronto.

H. T. Berry, Sc. '40, is assistant to the mill superintendent at McMarmac Gold

Mines, McKenzie Island, Ont.

Miss Ruth Best, Arts '38, is a laboratory technician in the department of pathology

at the Ottawa Civic Hospital.

Dr. K. A. Bibby, Med. '32, who has been on the staff of the Boston City Hospital for the past three years, left recently for Victoria, B.C., where he has been appointed radiologist at St. Joseph's Hospital.

Miss Margaret Biehn, Arts '38, is continuing her studies in biochemistry at the University of Toronto, where she holds a National Research Council studentship.

Miss Helen Cairns, Arts '39, has joined the office staff of the Aluminum Company of Canada, at 158 Sterling Road, Toronto. Miss Cairns attended Shaw's Business School, Toronto, last year.

J. G. Campbell, Arts '38, Sc. '40, is back at the University this year as demonstrator

in drawing.

Attention Alumni!

Membership in the General Alumni Association includes subscription to the "Queen's Review."

Keep in touch with Queen's and with your fellow-alumni through the pages of the "Review."

Membership fees are \$3.00 for the year (life membership is \$50. Combined annual fee for husband and wife is \$4).

The "Review" makes an excellent Christmas gift.

News items are always welcome.

Miss Hhyllis Cameron, Arts '39, is a nurse-in-training at the Montreal General

Hospital.

H. A. Carter, Sc. '40, has started a twoyear course at the Massachusetts Institute of Technology leading to a master's degree in aeronautical engineering.

R. J. Chambers, Sc. '33, has been appointed plant engineer at Chandler, Que., for the

Gaspesia Sulphite Company.

Dr. A. E. Chatwin, Arts '32, is serving as chief administrative officer, educational services, Canadian Legion War Services.

Miss Marion Clarke, Arts '38, is teaching this year in the Hestridge School for Girls,

Pasadena, Calif.

W. E. Clarke, Sc. '39, is assistant geologist at the Buffalo Ankerite Mine, South Porcupine, Ont.

Jacques Claveau, Sc. '40, is doin'g postgraduate work in economic geology at the

University of Toronto.

P. L. Climo, Sc. '31, recently left the Hollinger Mine, Timmins, Ont., to take a position with the Gaspesia Sulphite Company, Chandler, Que.

Dr. B. M. Connolly, Med. '40, is interning

at St. Joseph's Hospital, Toronto.

Marty Scholarship Applications Must Be Received By January 1

PPLICATIONS for the Marty Memorial Scholarship for women graduates should reach the Registrar not later than January 1, 1941. Candidates must have the Master's degree when they hold the scholarship, but not necessarily when they apply for it. The scholarship may be awarded to the same woman for a second year, and may be withheld in any year for financial or academic reasons. Further information may be obtained from the Registrar's Office.

Sir George Foster from
